One of the sales that always attract breeders and farmers in northwestern Iowa is that of Mr. W. J. Crow, of Webb, Iowa. The sale will be held at Maclay, the station right near his farm on the Rock Island branch to Sibley, Iowa. The Crow offer has always been noted for size and bone, these being two essentials that have been looked after in this herd. The boars used at the head of the herd and the sires of most of the offering are Crow's Model 30729 and Up To Date 36007, either one of which could be easily made to weigh 1,000 pounds if put in condition. These two boars are not only very large themselves, but they sire that kind of stuff. If size and bone are any inducement to buyers they will certainly find it in the Crow herd. In Up To Date Mr. Crow has one of the most

finished big hogs, and he is the sire of a lot of good stuff on the Crow farm. Another hog that has been used in the herd and is the sire of some of the pigs in the sale is Look Here, a grandson of old Look Me Over. A large per cent of the pigs are of March farrow, but there are also some boars in the sale of April and May farrow. Those who want plenty of size and bone will find it in the Crow offering. Write for catalog and mention The Homestead.

HIGH-CLASS DUROC JERSEY BOARS FOR SALE.

Those who are looking about for a good Duroc Jersey boar should write to, or call and see, Messrs. Stow & Gingrich, of Hamburg, Iowa. Sires now in service are Red Orion 23793 by Orion; Belle's King II. 14113 by Belle's King, a son of Echo King and out of the great Nebraska Belle, the dam of the highest-priced Duroc Jersey boar ever sold, and Duroc Standard 44117, a grandson of the sweepstakes boar, King Perfection, and out of Paulina Queen II. by Duroc Challenger. They now have a crop of boars sired by the above-named hogs, and out of some of the greatest sows of the breed, and they are now pricing these and can ship at any time. If any of the readers of this paper want a boar to head their herd they had better get in touch with the above firm at once.

HEYL'S SHETLAND PONY AUCTION.

One of the largest breeders of Shetland ponies in this country is Mr. George A. Heyl, of Washington, Ill., who will on Wednesday, November 7th, offer for sale at public auction a select lot of ponies. There will be stallions, mares, geldings, colts and matched teams, and no reader should fail to be present sale day. David Harum is today one of the greatest Shetland stallions. He was first in class at the World's Fair and several of the larger shows, and is the sire of the first-prize stallion at Iowa State Fair this year, Peter the Great. There is an extra good lot of ponies included in this offering and we are pleased to recommend it to our readers. In our next issue we will give full particulars regarding the offering. Look up the advertisement on page 28 of this issue and write for catalog, mentioning The Homestead.

IOWA SALES BEAT THE RECORD.

Mr. S. K. Noland, the well-known real estate and live stock auctioneer, of Des Moines, Iowa, in talking to a Homestead representative the other day expressed the opinion that never before were auction sales in the state of Iowa so generally successful and well attended as this year. He says: "The fact that I am selling from \$25,000 to \$35,000 worth of property every week surely demonstrates that there is something doing in my line." Mr. Noland does not handle all the large auction sales that are held, but he certainly handles his share and deserves credit for the business-like manner in which he conducts them. He makes a specialty of closing out sales of mixed stock and implements and will go anywhere to conduct any kind of a sale. Write or wire him at his expense before claiming sale dates. See his advertisement on page 27.

LARGE-BONED ENGLISH BERKSHIRE BOARS FOR SALE.

The old, reliable breeder of large-boned English Berkshire swine, Mr. W. D. McTavish, of Coggon, Iowa, was visited last week by one of our representatives, who found Mr. McTavish busy trading and sending out his famous long-bodied, deep-sided, heavy-boned English Berkshire boars to farmers throughout Iowa and South Dakota. He reported that The Homestead readers were a splendid class of customers for his famous Berkshires. He still has, however, thirty-five head of April, May and June farrowed Berkshire boars for sale at the uniform price of \$25 each. We had the pleasure of seeing many pigs priced at this figure that were easily worth \$40 each. Mr. McTavish can ship on either the American or U. S. Express Company's lines and will take pleasure in sending one of his famous long-bodied boars to any Homestead reader at the above named figure.

ENTIRE HERD OF RED POLLED CATTLE FOR SALE.

On page 28 will be found the announcement of Mr. W. D. McTavish, of Coggon, Linn county, Iowa, offering for sale at a bargain price his entire herd of fifty registered Red Polled cattle, including some imported cows. Of late years Mr. McTavish has used largely imported bulls and now desires to disperse the entire herd to make room for his famous big-boned herd of English Berkshire swine. He finds that his quarters are too limited to carry on the breeding of Red Polled cattle to the extent of his present herd, and also find room for his famous herd of Berkshires. Hence this dispersion sale at private treaty. The present herd bull will be included in the sale and answers to the name of Forester. The imported cows are by Lord Amburst's celebrated bull, Defiance 6966. Twenty of these cows are now giving milk. Much of the younger stock is sired by that famous Red Polled bull, Young Taylor 6752 (Imported). Mr. McTavish has been breeding Red Polled cattle for fifteen years and is a son-in-law of Mr. P. G. Henderson, one of the most noted breeders of Polled Durham cattle in the United States. Mr. McTavish's herd was founded from stock secured of Mr. Henderson and, as he lives in close proximity to the Henderson herd, has had access to the great herd bulls at the head of this great breeding establishment. Following the use of the imported bull, Young Taylor, on this herd, came Billy Boy 8991, then Majestic 11884 and now the present bull, Forester 13265, to which all of the females are bred at present time, or have calves by him. The offering lines up some-

what as follows: Besides the twenty cows are six two-year-old heifers, four three-year-olds, thirteen yearlings and ten calves. It is practically all she stuff. The entire fifty head, or any part thereof, will be sold just as purchasers may desire. Coggon, Iowa, is located on the Illinois Central railroad between Cedar Rapids and Manchester, Iowa.

A GOOD SCOTCH BULL FOR SALE.

On page 31 will be found the announcement of Mr. E. R. Silliman, of Colo, Iowa, a well-known Short-horn breeder, announcing for sale a splendid young Scotch Short-horn bull suitable to head some good herd. Mr. Silliman is prepared to make an attractive price on this young bull to an appreciative buyer. There is no better-bred bull in Iowa than this fellow, and few better individuals. Mr. Silliman has been breeding Short-horns for a number of years and can be depended upon to correctly represent his stock just as they are. In addition to this splendid Scotch bull, he has for sale other young bulls, as well as Scotch and Scotch-topped females at all times. Mr. Silliman is a breeder of good and useful cattle and not a speculator. The wise buyer will find it to his advantage to correspond with Mr. E. R. Silliman, of Colo, Iowa, or better still, to visit the herd and see some of the good bargains that he has to offer.

T. P. WHITTENBURG SELLS TWO GOOD COWS IN MCGAVOCK SALE.

Mr. T. P. Whittenburg, of Pleasant Hill, Mo., one of Missouri's most progressive young breeders of Hereford cattle has consigned two desirable breeding cows to the McGavock sale to be held at Kansas City, Mo., on November 1st. One a coming three-year-old, was got by Lamplighter Jr., the best breeding son of Messrs. Gudgell & Simpson's great breeding bull, Lamplighter. Her dam, Elsie, is a granddaughter of Lamplighter. She is listed as Lot 11. The other is by Don Antonio, a grandson of Lamplighter and out of a granddaughter of Dictator 2d by old Dictator. This young cow is bred to Mr. Whittenburg's grand young bull, Paymaster, considered the best one in Messrs. Gudgell & Simpson's February, 1906, sale. The first cow, Lot 11, is well along in calf to Best Anto, a son of Don Antonio, and out of a Beau Real cow. Mr. Whittenburg never offers a poor animal and his two entries to this sale should not be overlooked.

ZENOLEUM FOR ERGOTISM.

To the list of the many and varied kinds of diseases afflicting farm animals, that are much relieved and often cured by the use of Zenoleum, has been added a new one, namely, ergotism. This disease affects cattle more generally than other live stock. As the nature of the trouble is such as to call for external treatment, some reliable disinfectant is a necessity. The disease is caused by eating food which supports a fungus parasite. Lameness in one or more limbs follows, then a crack appears around the ear, tail or limb, which eventually causes the member to drop off. Experiments have shown that the following treatment in an early stage of the malady will result in a cure. Physic the animal, then give tannin in one-half dram doses twice daily for several days to destroy remaining ergot. Stimulate circulation with chloral hydrate in one-half ounce doses twice daily, and apply Zenoleum externally to heal the crack. This product is invaluable in the stables and is put up by the Zenner Disinfectant Company, Detroit, Mich.

KERR'S SHORT-HORNS IN THE MCGAVOCK SALE.

In McGavock's sale of Short-horns to be held at Kansas City, Mo., on Friday, November 2d, Mr. O. L. Kerr, of Independence, Mo., will have twelve head, one bull and ten females. The writer has recently seen the Kerr offering and those who are in attendance at the sale will find that Mr. Kerr is selling cattle that are of such merit as should please buyers. The bull that Mr. Kerr consigns is a Cruickshank Victoria calved in March, 1905. He is a deep red, a well-proportioned bull, with neat head and horns, is built plenty close to the ground and is one of the easy-feeding sort. He has been used on the females in Mr. Kerr's herd and is an absolutely sure breeder. Someone hunting for a pure Scotch bull should look after him. He is listed as Lot 55. One of the best females of the consignment is the three-year-old cow, Gentry's Butterfly, listed as Lot 56. She is a show cow, besides, being a desirable brood cow and sells with bull calf at foot got by Prince Conqueror, a Princess Royal bull got by the Missie bull, Conqueror. It is a combination of the best Bates and Cruickshank breeding that produced this cow. In 18th Countess of Rosamond Mr. Kerr consigns a two-year-old show heifer that was bred by Messrs. C. E. Leonard & Son, of Bell Air, Mo. She was got by that grand old sire and show bull, Lavender Viscount, and out of Charming Scotia by Imp. Barbarossa, a bull bred by Cruickshank and got by the famous bull, Cumberland. The first six dams in 18th Countess' pedigree are Leonard-bred cows and all are by good bulls that have done service in Mr. Leonard's herd. She is one of those thick, meaty heifers, with a well-sprung rib, a sweet head and horn and is true in all her lines. Breeders will find her a desirable young cow to add to their herds. A young show heifer listed as Lot 64, 9th Craggs of Cedarview, should appeal to the man wanting a choice heifer to add to his herd. She was got by the Scotch bull, Spartan Viscount, he by Orange Viscount. Her dam, 5th Craggs of Cedarview, was by the Bellows-bred bull, Baronview. Then follow a line of Bates-bred champions. Two cows in Mr. Kerr's offering are daughters of that great breeding bull, Gay Laddie, the best son of old Galahad. Both are of the same family as the junior champion bull shown at the recent Amer-

lean Royal. Of the ten cows from Mr. Kerr's herd eight sell with calves at foot and are rebred to the red Cruickshank Victoria bull. See page 34 for Mr. McGavock's advertisement of this sale and if wanting pure Scotch or Scotch-topped Short-horn of much quality and good breeding arrange to attend. NOLAND'S SCHOOL OF AUCTIONEERING.

On page 28 of this issue will be found the advertisement of the Noland School of Auctioneering, conducted by Mr. S. K. Noland, the well-known auctioneer, of Des Moines, Iowa. In his advertisement Mr. Noland calls attention to the fact that his winter term will begin the first of December. This will be a practical course offering the student actual experience in auctioneering. Mr. Noland says that students who complete these courses are capable of conducting any kind of auction sales. In speaking about the fall term which began the first of October, he says: "Several bright young men availed themselves of my special offer for the fall term and are making rapid progress in their work. At the head of this class stands Mr. Marshall McCleary, of Bondurant, Iowa. Mr. McCleary is only seventeen years of age, but I predict for him a brilliant future as an auctioneer. By the time he is twenty-one years of age he will be able to conduct a sale as well as most men with three times the experience." Write Mr. Noland for particulars in regard to his school, mentioning The Homestead.

LAST CALL FOR CRAIG AND FOULTZ'S DISPERSION OF HEREFORDS.

On next Tuesday and Wednesday, October 30th and 31st, Mr. L. W. Craig, of Bolckow, Mo., and Mr. Jno. Foulz, of Rea, Mo., will disperse their respective herds. The sale will be held at Mr. Craig's Grass Hill Farm, three and one-half miles east of Bolckow and two and one-half miles southeast of Cawood, in Andrew county, Mo. Only a few bulls are listed among the eighty-six lots to be sold. Of these, mention was made last week. Among the cows are many good breeding matrons, twenty-three of which will have calves at foot and practically all are rebred. One of the best cows is listed as Lot 61. She is an Anxiety Grove 2d cow out of a Beau Real dam. She is a cow of much scale, weighing close to 1,800 pounds, is an even flesher and a very attractive cow. A good producing cow is listed as Lot 81. She was got by Archa 2d, a grandson of Don Carlos. Buyers will also find her one of those big, broad-backed cows carrying an even coating of flesh. Lot 69, a sweepstakes cow out of a granddaughter of Don Carlos, is another of the large, evenly-built kind, and built plenty close to the ground. She, too, is a regular producer. An Anxiety Grove 2d cow that is a producer above the ordinary is listed as Lot 53. Her daughter, Aline, is listed as Lot 66 and will be found a nicely-developed two-year-old heifer got by Jim Andy. Mr. Craig's former herd bull that has ten daughters in the sale. Another promising young cow is listed as Lot 28. She, too, is a daughter of Jim Andy and is one of those thick, meaty heifers built close to the ground. These are but a few of the many good females that go in the sale. Those wanting Herefords that have been regular producers will find them here in plenty. Everything goes to the highest bidder. Mr. Craig and Mr. Foulz extend a cordial invitation to all who want good breeding cattle to be with them sale day. Those from a distance can come to either Bolckow on the Burlington or Cawood on the Great Western, as free transportation has been arranged for at both towns. See page 35 for advertisement and when writing for catalogs or attending sale kindly remember to mention The Homestead.

MILLS' PERCHERON HORSE SALE.

On December 19th, at the farm near Perry, Iowa, Messrs. J. R. Mills & Son will sell a draft of twenty head of Percheron stallions and mares. At the head of their stud is the stallion, Narcisse 21992, a horse imported by Messrs. Dunham, Fletcher & Coleman, and a second prize winner at one of the greatest shows in France. He is the sire of four stallions and six mares in the sale and they are all good ones. As a breeder he is hard to beat and his colts will certainly speak for themselves when buyers see them. There will be four matched teams of mares in the sale, besides a lot of yearling and two-year-old mares. It will be a decidedly high-class lot of Percherons, and anyone who wants some good mares or young stallions will find them in this sale. They will also sell a couple of Short-horn cows with calf at foot and two young Short-horn bulls. Besides these there will be twenty-two head of good grade cows and belfers and eighteen head of Short-horn steers and seven head of Aberdeen Angus bulls. Those who are interested should send their name for catalog at once and it will be mailed as soon as it is out.

ROACH'S DUROC SALE.

Just as we are closing our forms we learned of the forthcoming Duroc sale of Mr. J. Coy Roach, of Girard, Ill., which will be held on Saturday, November 3d. Readers of The Homestead should not overlook this sale. Mr. Roach has for years had one of the very good herds of the country. He has spared neither time nor expense to make his herd what it should be to hold the position it does. The sale consignment is a very select one. There are two of the best brood sows in the herd consigned to the sale. One of these sows was the dam of the first-prize under year boar at the Illinois State Fair, 1904. She traces to Sensation on her sire's side and to Top Notcher on the dam's side. A daughter of this noted sow by Model Chief, the boar which sired the first-prize under six months boar at the Iowa State Fair this year. One of the greatest mistakes Mr. Roach ever made was when he consented to dispose of Model Chief, and breeders will see an excellent lot of pigs in the sale by him. Three boars and one gilt of January farrow and ten March boars by Model Chief will prove attractions. Five boars are consigned out of Helen Blazes III., the \$1,000 sow which Mr. Roach secured last winter from Messrs. Fagan, Browning, Hess & McCabe. She now has a fine litter of eight by Ohio Chief which should please. Look up Mr. Roach's advertisement on page 28 of this issue and plan to be present Saturday, November 3d.

PERCHERON, SHIRE, BELGIAN AND COACH HORSES AND SHORT-HORN CATTLE.

We take great pleasure in calling the attention of our readers to the new advertisement of Messrs. Taylor & Jones, of Williamsville, Ill., importers and breeders of draft horses. They are a firm becoming too well known in both this country and all over Europe to need any introduction as importers, breeders and showmen of Percheron, Shire and Belgian horses, as they have fought their way clear to the top at the greatest shows ever held in America in probably a shorter time than any firm that ever entered into the draft horse business, and this is not to be wondered at when one becomes acquainted with their knowledge of business and their way of handling horses, as well as satisfying their customers. In the first place they are men of honor and think more of their word and friends and customers than they do of money and their motto has been to make a customer of every man possible, for when once a customer they expect to deal with him in such a manner that it means always a customer. They never had a law suit in their lives and their father and father-in-law, Mr. John R. Jones, came to the prairies of Illinois before the railways and drove cattle from the plains of Illinois to New York City and has done business all of his life since right there at Williamsville, and he never had a law suit, believing it better to deal with men without either party buying trouble, as they put it, and right here we may say it means much in buying a stallion to deal with such a firm, not only one who has an ample amount of capital to back his guarantee, but a firm who intend when they set in to do business to please you without having to be made to do it. Not only is the intention of Messrs. Taylor & Jones good, but they are good financially. They own over 1,000 acres of land surrounding Williamsville, which means as good land as is on the face of the earth, no country excepted, and Mr. M. E. Jones, known nearly the world over as Milt Jones, is interested in both the banks of Williamsville and the neighboring town of Elkhart, in both of which he is a director. He is also better known as owning the famous Cherry Grove herd of Short-horns, which numbers about 130 head, and is without a superior in America, being headed by the great \$5,100 champion sire and show bull, Lord Banff, and made up of many of the most valuable cows of the breed, such as the champion \$5,000 Cicely, better known on both sides of the water as the queen's heifer, and many other famous cows. Mr. Jones has made three of the importations of stallions personally for the firm, including many prize winners, and it was he who brought out the first importation for this firm in 1900. Mr. C. R. Taylor, known by everyone as Charley, is not only a man of business, but considered everywhere as a judge of a horse the equal of any in America and he has the honor of being the judge on Shires at the Great St. Louis Fair. His experience of shipping horses for twenty years has been of much value to him. He has made many trips to Europe selecting prize winners, and no horseman is better known today than Mr. Charley Taylor. It is but justice to say that their prize record for the last four years is a wonderful one. Space will not permit us to give it all, but their last show was at the great Illinois State Fair, where was

probably the greatest lot of draft horses seen in America at a state fair in many years. There they won twenty-eight prizes on draft horses and made a wonderful display, having a whole barn full of horses including forty head. Their winnings include four herd prizes and two championships and two reserves in championships, nine first and many second prizes in large rings of from twenty to thirty entries of the best horses in America. Messrs. Taylor & Jones are constantly building new barns to make room for their growing business and have lately built a new blacksmith shop and keep their own man to do their shoeing. A visit to this establishment will be entertaining to anyone.

LITRELL & SONS SELL SOME DESIRABLE SHORT-HORNS IN THE MCGAV-OCK SALE.

When Manager W. C. McGavock secured six head of Short-horns from the old-established herd owned by Messrs. J. J. Littrell & Sons, of Clark, Mo., he secured a consignment such as is not often found in a combination sale. From Messrs. Littrell & Sons' herd breeders of Missouri have secured much good stuff and the man who wants absolutely reliable cattle should see their offering for this sale. Three bulls and three females are listed. Among these is the yearling bull, Village Scotland, a pure Scotch bull got by their great breeding bull, Scotland's Crown, one of the best breeding bulls in Missouri. His dam, Village Flower, was by the Scotch bull, Village Squire, then followed such sires as Chief Officer, Burgomaster's Gloster, Village Boy and Scotland Pride, all Cruickshank bulls or bulls whose ancestors were bred by Mr. Cruickshank. A fancy bull got by Ruberta's Prince, the \$1,000 son of the great show cow, Ruberta, and out of a daughter of Scotland's Crown, will be found a bull of great substance and quality. He is listed as Lot 31. Probably the best individual from Messrs. Littrell & Sons' herd is the September yearling, Prince of Hazelland, listed as Lot 33. He, too, is by Ruberta's Prince and out of a daughter of the Harris-bred bull, Prince Rupert. Messrs. Littrell & Sons have produced many good bulls, but it is doubtful if they have ever produced a better bull than this young fellow. He is a show bull from end to end. All three bulls are red. We have seen them and do not hesitate to recommend them to those who are hunting herd bull material. Among the cows is Orinda, the dam of the last bull mentioned above. She is due to calve before sale day and the man hunting a breeding cow should not miss her. Look over her yearling son and you will agree with us. Two heifers are listed. One is a daughter of Ruberta's Prince and out of a Scotland Crown cow, and one is a daughter of Scotland's Crown and out of a pure Bates cow got by Kirklevington Duke 34th. More reliable or better cattle are not found than are bred by Messrs. Littrell & Sons, and if any of our readers want a bull, a cow or a heifer he will find that Messrs. Littrell & Sons have listed such animals as should interest them and that such cattle never sell above their value in combination sales. See page 34 for advertisement of the McGavock sale.

THE FAGAN, BROWNING, HESS & McCABE DUROC SALE—LAST CALL.

The writer representing this paper, after inspecting the offering of Durocs to be sold on Wednesday, October 31st, by Messrs. Fagan, Browning, Hess & McCabe, of Hersman, Ill., is pleased to say to the readers of The Homestead that it is one of the very best he has seen this year. In point of both breeding and individuality the offering is unexcelled. This firm have been making history for the Duroc breed. Long ago Mr. J. M. Browning, father of Mr. H. E. Browning, one of the members of this firm, was a history maker in the Duroc business. From him Mr. S. E. Morton, of Camden, Ohio, one of America's greatest Duroc breeders, secured the foundation stock which later made his herd famous. The present firm are active, progressive business men. They have purchased only such stock as would tend to improve their already good herds. On February 2d they sold at public auction the first Duroc sow to ever bring \$1,000 and in the forthcoming sale they are offering five of the get of Helen Blazes, the dam of the \$1,000 sow, sired by Tip Top Notcher, at public auction. Such an attraction as this should not be overlooked. One of the litter, Helen's Tip Top Notcher, won third in a ring of thirty-one shown at Illinois State Fair this year. Another attraction is Lucy's Proud Advance. This spring boar is one of the best the writer has seen. His sire, Proud Advance, was a champion winner at Iowa State Fair. He sired Alix II., and Proud Lady, the highest-priced Duroc sow ever sold. The dam of this pig is Lucy Wonder XXI., a sow never defeated except by Nebraska Belle, and the only living member of the Lucy Wonder litter, champion sow World's Fair, Chicago, 1893. This boar should go to head some good herd. A lot of three boars by Keep On 37327, third at Iowa State Fair, 1905, with litter mates first, second and fifth in same show, and out of Lucy Brooklyn IV. by Tip Top Notcher Chief is certainly of show-yard merit. Two March pigs, full brothers in blood to the noted breeding and show boar, Ambition, now at the head of the good herds of Messrs. Thomas & Hogsett, of Golden, Ill., should not be overlooked. Ambition stands today one of the best yearling boars of the breed, and these full brothers should be appreciated. A boar and sow farrowed March 23d by Tip Top Notcher and out of Violet, she by Buddy K. IV., champion Illinois State Fair, 1905, and second-prize aged boar 1906, are especially attractive. They are bred right and are fit to go into any company. With proper handling the boar should make a state fair winner next fall. A Hanley litter farrowed April 8th is an unusually good one. Four boars make up the offering from this litter, everyone a good one. Seldom has the writer seen the get of a boar so uniformly good as is the get of Hanley, and this litter is no exception. A boar of March 2d farrow which should go to head some good herd is No. 9 of the catalog. He was sired by Tip Top Notcher and his dam is The Lad's Goldie 23d by Sock's Kan't Be Beat by Kan't Be Beat. No richer pedigree can be written, and this boar is made right in every way. We have only gone over the offering as our space allows, but we wish

IMPORTERS AND BREEDERS OF
**PERCHERON, SHIRE
AND BELGIAN STALLIONS.**

WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND
SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN
ANY OTHER FIRM IN AMERICA.

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DU HAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

Oakview Farm High Class Durocs

...Sale of... **GIRARD, ILL., NOV. 3, 1906.**

45 Head---Gilts, Boars and Sows---Head 45

Sixteen head of spring boars and gilts sired by Model Chief, the great son of Ohio Chief; five March boars out of Helen Blazes 3d—the \$1,000 gilt. Herd headers every one. Other spring boars and gilts sired by Advancer, Orion Chief and Sandow's Best. As a Special Attraction to this sale I will put in two of my best sows, Lady Fancy, a Sensation and Top Notcher bred sow, and Jay's Fancy out of Lady Fancy and sired by Model Chief. Any sow or gilt sold at this sale for \$100 or over given free service, if desired, to either of my herd boars, "Jay's Orion" or "Jay's Commodore."

DUROC JERSEY BOARS--SHROPSHIRE RAMS

S. M. DEYOE & SON, Mason City, Iowa.

cannot be present, bids sent to Mr. D. M. Pierce, representing this paper, will be carefully handled. See announcement on page 33 and plan to be present October 31st at Hersman if interested in good Durocs.

Messrs. Stow & Gingrich, the well-known proprietors of the Clover Wave herd of Duroc Jerseys, at Hamburg, Iowa, write as follows: "We have the best lot of boars we ever raised and they are coming along in nice shape. They are sired mostly by the 700-pound yearling, Duroc Standard 44117. A few others are by Red Orion 28793 and Critic's Echo. Several of these pigs are above the average shown in their class at the Iowa State Fair, and should find a place in some good herd. The gilts average up about the same as the boars, and we think we can select twenty of them and with about the same number of yearling and aged sows we will have an extra good bunch to put in our brood sow sale which takes place on the 2d of next February."

WINTER TERM IN AUCTIONEERING

THE only practical course in Auctioneering offered anywhere in the world. My students always "make good." Write me for full particulars in regard to Winter Term, which starts the first of December. Can take only a limited number.

THE DISPERSION OF THE :: RIVERDALE HERD OF ::

Short-horns

WILL TAKE PLACE AT THE STATE FAIR GROUNDS
... SPRINGFIELD, ILL., MONDAY, NOV. 5TH ...

42 HEAD---10 BULLS

The entire herd goes in order to settle a partnership. Nothing will be reserved or protected and a herd of matrons that were selected with care and an idea of long service at Riverdale go at such figures as you see fit to give. They are a strong lot. Good individuals, choicely-bred and producers of worth. Imported and home-bred Scotch are listed, including the leading Cruickshank and other leading Scotch tribes with a number of good American sorts with the best of Scotch tops. The bull list is a strong one, including the Duthie-bred bull Highland Champion, one of the best sons ever imported of the celebrated sire Lovat Champion. This bull is an exceptional individual, a getter of stock of unusual merit, some of which are winning in the leading shows of this season. This is an opportunity to secure a sire regarding whose worth there is absolutely no question. Pride of Riverdale is the pick of the last year crop by Highland Champion and he was reserved for service in the herd. He is a Cruickshank Secret with five imported sires at the top of his pedigree followed by the best of Cruickshank productions. With all this he is an extra individual and it is an opportunity that does not often come to secure a high-class herd sire. Good selections can be made from among the others too. This sale should attract widespread attention. Get the catalog. It will interest you and will be mailed to all who write for it, mentioning The Homestead, to

WHITEHALL FARM
YELLOW SPRINGS, OHIO.

Send Bids to Mr. D. M. Pierce, representing This Paper

Grand Dispersion Sale of Aberdeen Angus Cattle.

Perhaps no place in the annals of history has it ever been recorded that thirty-five head of the famous Blackbird family of Aberdeen Angus cattle were ever thrown on the market by any one individual breeder or firm. The best-posted Angus breeders claim that this number has never been offered on either continent at one time. Nevertheless, it is the good fortune of Messrs. Baker & Smith, of Mt. Vernon, Iowa, to have this number to offer to their firm at their dispersion sale at Cloverdale farm adjoining the depot grounds of the C. & N. W. R. R. at Mt. Vernon on November 14th. It will undoubtedly be a surprise to the breeders of America to learn of the dispersion of the Cloverdale herd. There is no plea nor excuses for this offering; the facts are simply these: The partnership contract entered into a number of years ago by Mr. Matt Baker and Mrs. W. M. Smith has now more than outlived its time limit. Mr. Matt Baker has had charge of this herd absolutely since 1901 and is in position to prove by his books that each and every animal of breeding age in this herd has produced a calf each year. After this dispersion sale Mr. Baker will engage in the breeding of Angus cattle on his own account in western Iowa, where he and Mrs. Baker have one of the choicest farms in Shelby county. It is certainly with the regrets of Mrs. Smith that this herd is to be dispersed. The herd was founded by her late husband, Mr. W. M. Smith, in 1893, on the best and choicest Aberdeen Angus cattle foundation that could be secured at that time. The following announcement of Mr. Baker and Mrs. Smith, will best serve as an introductory for this all-important coming event: "In dispersing this herd of cattle we do so with much regret, yet with a degree of pride. The herd was established on the good sound judgment of the founder and fads had no place in his business career. He was a firm believer in 'whatsoever a man soweth that shall he also reap,' and that like begets like, and that merit will always win. Viewing the situation from this standpoint he bought the best offered for sale, and endeavored by the use of the highest type of bulls to breed good cattle. We have tried to follow along the line laid out and have been very careful in the selection of the herd bull and while good cattle are to be found in all strains of the breed, yet the tribes sent out from Tillyfour, Ballindalloch and Montbletton to do battle for the breed, to enrich, replenish and elevate, to mold the true Angus greatness, the tribes that have advanced the breed to the highest state of perfection yet attained, that have captured the leading prizes at the most important exhibitions in the world and broke records at public sales, are not numerous. It is on this solid rock we pinned our faith, hoisted our flag and marched into battle. What we have been doing is nothing superlative in the least; nothing but what any ordinary man can do, and nothing but what he should do. The main thing is start right and the battle is half won. We believe we are quite right

in making the statement that there never has been a farm dispersion sale during the history of the breed in this country where the opportunities to procure so many high-class breeding cattle were so great. The bulls used in the herd were as follows: Captain Forbes, Heather Black Jim, Key of the West, Cloverland Pride, Black Kiellor 3d and Blackbird Man. The herd has been in the hands of Mr. Matt Baker, the managing partner, and all dates and statements may be relied on. Farm just across from depot. Railroad stock yards on farm. Respectfully yours, Baker & Smith."

Escher's Great Big Polands.

One of the most up-to-date private sale catalogs that has come to our desk is that of Mr. E. F. Escher, of Manning, Iowa, the man that raises the great big Poland Chinas. It contains the pedigrees of all his herd boars and brood sows and is illustrated from cover to cover. It is printed on a nice quality of paper, but the best of it all is that it contains the kind of stuff the people want and it is therefore being asked for by everyone who is looking for a big boar or a few choice sows of the same type. The first illustration is of his great breeding boar, Gay Monarch, one of the largest hogs in the state and an easy 1,000-pound boar. The get of this hog has been in demand by all breeders who are growing the big ones. He is now shipping boars and sows every day and in a recent letter he says: "I am having excellent runs on sales; judging from present indications will easily clean up my entire lot of boars of about sixty head, and am placing most of them in good herds, where they will be heard from later on. Wild Rose Standard's get of two litters will net me about \$600. Out of her eleven boars I have but one each of fall and spring litter left. The fall boar should go at the head of some good herd, as he is worthy of the same position his litter brothers are filling. This fellow measures from pole of head to root of tail fifty-two inches, hump girth fifty-three inches, height thirty-five inches, bone of hind legs at smallest part eight and one-fourth inches, weight 350 pounds, and is thin. He will easily mature into a 900 or 1,000-pound hog, just as his sire, but will have more quality and, remember, he is one of the prolific sort. His dam has farrowed sixty pigs in five litters and has raised eighteen the past twelve months. His full sister, twelve months old, raised eleven boars out of a litter of thirteen, each one fit for herd use. W. R. Standard and her four daughters farrowed fifty-six pigs and saved nearly all of them. This is breeding that is making Escher's Big Ones famous, as they possess the size, quality and prolificacy second to none in the state. I am not changing herd boars, and the two old fellows stay right here at the head of my aged breeding herd. There got fills the bill of the best breeders. The breeder who may think Gay Monarch too large for a smooth breeder wants to get my catalog and look up our Perfect Chief 2d 37628 and Winsome Dude 2d 39159. Here

is something that is as well bred as your best, and having their show-yard record established they show for themselves. Write for catalog and get acquainted with one of the best herds of the "Big Ones," with size, quality and prolificacy.

Herefords in the Kansas City Auction.

Numerous young bulls that should appeal to the best breeders as herd headers are cataloged for the auction at Kansas City, November 1st. A list of the consignors will be found in the advertisement and from this it will be seen that their blood lines are of the best. Farmers and steer breeders will also find bulls cataloged that will meet their requirements in improving the type, thickness and finish of their cattle. These bulls will sell, whatever they may bring, and it may be that bargains and many of them will occur. No bulls are held in such high esteem as are the Herefords, which is demonstrative on every hand, but a notable instance of it occurred at the recent American Royal sales under the auspices of the various associations. Twenty-five Hereford bulls there averaged \$239.80, which was \$55 per head higher than was made by any other breed for their bulls. Hereford cows, however, of about as good quality as the bulls sold for only an average of \$139. Certainly females that will produce \$239 bulls are worth more than \$100 less than the annual income they will produce, and it simply proves that females of this breed are bound to advance, and that quickly. It also shows that there is a great opportunity just now to start in the breeding of Herefords and the forty head of cows and heifers uniformly good and high class in every particular cataloged for this auction present a chance to secure dams that will produce high-priced bulls that will prove the greatest of investments and money makers. The time to do it is when these superior females are offered. Next year probably they will be worth double the money. Many of us have seen such advances and it is not unreasonable at all to expect it.

Last Call for the Hayes' Short-horn Sale.

One offering of Short-horn cattle that should command the attention of the breeders and farmers is the one to be sold at Hampton, Neb., on October 31st. Mr. Hayes has been breeding Short-horn cattle for the past sixteen years and has always purchased the very best cattle to add to his herd. He has used good, strong sires and these will be shown in the strong lot of individuality found in the offering. The herd has increased considerably and this has caused the owner to part with some of the choicest of the herd. He will sell about forty head in all. Part of the cows will be safe in calf, while part will have calf at foot. Others will be bred to Barmpton Gloster got by Imp. Barmpton Ensign and pronounced by the best of judges one of the good sires of this breed. Mr. Hayes paid a good price for this animal and has been using him on the cows that have

calved since his addition to the herd. Starlight Oderic will be offered in this sale and we believe him to be one of the strong animals of the Short-horn breed. He has been used in the herd for some time and his get show that he is a choice sire. He is a very strong animal with good, strong back, very good feeding head and lots of bone, good, straight legs and a strong constitution. He should be taken by some good breeder. We have inspected the Hayes herd and will say that we do not know of a sale where more money makers can be found than will be sold in this sale on October 31st. The bull offering is choice and many a great prospect will go through the ring. These bulls have made a wonderful growth and will please any breeder. They come from strong families and the large, rosy cows have given them that easy feeding appearance so much liked by all. The offering will be made up of roans and rich-colored reds. The twenty-four females in the offering will be twelve cows and twelve heifers. These heifers are a bargain and will make any man money. One of the choice bred things in the sale is the Scotch-topped cow, Miss Cupbearer 2d got by Royal Prince IV. She is a Bellows-bred cow and one of the best in the offering. Glendale Beauty got by Ringmaster 2d, he by Lavender King 3d, is one of the cows that will have a heifer calf at foot. She is a very large cow weighing around the 1,300 pound mark. We could call attention to many more of the good ones, but will not, as we expect all interested to come to the sale. Remember that this sale will be one where bargains will be found.

A. F. Graves Sells Six Bulls in the McGavock Sale.

Mr. A. F. Graves, of King City, Mo., consigns six good Short-horn bulls to the McGavock sale, to be held at Kansas City, Mo., November 2d. Among these is a pure Scotch bull got by Straight Cruick, a Robins-bred bull got by Violet's Galahad. His dam, Faithful 2d, was got by Fride's Baron by Scarlet Knight, then follow such sires as Master Mason, Red Emperor, Lord Glamis, etc. He is listed as Lot 46, Dandy Dream, and will be found a desirable young yearling, a solid red and a sappy fellow. The man who wants an absolutely pure Bates bull will find one in Mr. Graves' consignment. He is listed as Lot 51, is red with just a little white and was bred by Messrs. Martin Flynn & Sons, of Des Moines, Iowa. His sire, Grand Duke of Enterprise, was got by Peculated Wild Eyes and his dam, Walnut Hill Hilpa Duchess, was by Kirk Kirklevington 3d by Waterloo Duke 8th, then follow the Bates bulls, 2d Duke of Brant, 22d Duke of Airdrie and Grand Duke of Thornedale. A pure Scotch Secret is listed as Lot 47 and was got by the pure Scotch bull, Gallant Son, and out of a daughter of the Bellows-bred bull, Scottish King. The next eight sires are bulls that were either bred by Amos Cruickshank or are close descendants of Cruickshank bulls. The other bulls from Mr. Graves' herd are all good, useful fellows and will be found great steer bulls.

Last Call for the Rasmess Short-horn Sale.

On Thursday, November 1st, at his farm near Lake City, Iowa, that veteran breeder, Mr. John Rasmess, will make his fifth annual sale of Short-horn cattle. Previous offerings from this well-known herd have always commanded the attention of breeders from home and abroad. His coming offering is the equal of anything ever sold before from this herd. The Scotch tribes are represented by Victorias, Lavenders, Miss Ramsdens, Wimples, Marchioness and Lovely tribes, while the Scotch-topped cattle are of the Young Phyllis, Rose of Sharon, Young Mary, Fisher Roan and other popular strains. Nine Scotch cows and heifers and five Scotch bulls will be sold, and they represent the cream of the breed. Fifteen of the cows in the sale will have calf at foot by his noted bull, Red Knight, and a few will have calf at foot by Lord Craibstone and also by his son, Keystone, the latter to be sold in this sale. It will not be out of place at this time to call attention to the two bulls that have headed the Rasmess herd. First and foremost was Fitz Eustace, a son of the noted Cumberland by King James and out of the 60th Duchess of Gloster by Imp. Chief Baron. For a number of years this great Duchess of Gloster bull headed the Rasmess herd and as an individual and as a breeder he stood second to no other bull in the state or the West. He assisted materially in lifting the Rasmess herd to the top of the Short-horn ladder, and made it one of the most noted herds in the state. In his coming sale will be several cows and heifers and a few bulls sired by him, and he is also the grandsire of a large per cent of the cattle in the sale. The old bull has passed out of existence, and it will be one of the last chances breeders will have to get some of his get. His present herd bull is Red Knight-174212, a son of Marengo's Count and out of Imp. Lady Douglas, the dam of the \$7,500 bull, Cumberland's Last. He is a Miss Ramsden, a low-down, thickly-made bull, and a grand good breeder. It has been remarked by the very best breeders that these two bulls were the best two in any one herd in the West, and they always merited all that has been said about them. The catalog will show these two bulls to be well represented in the sale, and they are the sires of some good stuff. Among the best Scotch cattle is Imp. Dalmeny Princess 9th, a six-year-old daughter of Imp. Scottish Sailor, and one of the best breeding cows in the West. She will have a bull calf at foot by Red Knight and is safe in calf again to the same bull. She is a splendid individual, has had five calves to her credit already, and she was one of the leading prize winners as a heifer in Scotland before she came over. Imp. Gladys of Dalmeny is another daughter of Imp. Scottish Sailor that will go into the sale and she is out of Imp. Gladys by the Duthie-bred bull, Prince of Fashion. She is also a splendid cow and will have a roan bull calf at foot by Red Knight. No. 3 is Lavender Pearl, a six-year-old daughter of Collynie Archer out of Miss Lavender by the Earl of March. She is one of the best bred Lavenders that will go into a sale this year. She is also one of the great breeders in the Rasmess herd and will have a bull calf at foot by Red Knight and will be rebred and safe in calf to him again. No. 4 is Bonnie Belle Mahone, a two-year-old heifer and a daughter of the noted bull, Champion. Her second dam is Imp. Bonnie Belle by old Craven Knight, and she is also one of the good things in the sale. She will be safe in calf to Red Knight. There will be four daughters of old Champion in the sale and about nine head sired by Fitz Eustace. There will be a daughter of Imp. Scotland's Pride out of Imp. Topsy. She is one of the high-class heifers in the sale. He also sells daughters of such well-known Scotch bulls as Prince of Athens, Godoy, Baron Lavender, Lord Marr and other high-class herd leaders. His bull offering is the best he has ever made. He sells the bull, Keystone, a son of Lord Craibstone. This bull he purchased last season at the W. J. Henry sale, and he topped that offering. One of these is Lavender Fitz 25894 by Fitz Eustace and out of Lavender Pearl by Collynie Archer. Then comes in unbroken lines such well-known bulls as the Earl of March, Red Emperor, Cumberland and Pride of the Isles. He is a straight Lavender and a very toppy fellow. Another eeking good youngster and the making of a splendid herd bull is Prince Victor by Earl Victor and out of a daughter of Fitz Eustace. His second dam is Imp. Dalmeny Princess by Scottish Sailor. He is a low-down, thickly-made fellow and as toppy as you find them. Another very excellent young bull is Royal Victor, a Victoria-bred bull bred by the well-known breeder, Mr. Ernest Funke. Here we have one of the growthiest bulls in the sale, splendid in color and a nice individual, and he is a bull that the buyers are going to like when they see him. Red Knight's Model is another good youngster, a son of old Red Knight and out of a daughter of Fitz Eustace. The offering is a good one from beginning to end and breeders and farmers will find some very choice cattle in this sale. Write for catalog at once and kindly mention The Homestead.

Last Call for Mt. Pleasant Short-horn Sale.

In making the last call for the Mt. Pleasant, Iowa, "Opportunity" Short-horn sale next Thursday, November 1st, as advertised by Sale Manager Mills on this page we wish to call attention to the fact that this event presents some attractions and opportunities in the selection of breeding cattle that are not often to be found. Among them is a pure Scotch herd bull of ultra-fashionable breeding, combining symmetry and finish with scale and quantity. This bull is known as Gold Stream 177214, a tried sire of reputation; a choice individual and valuable in every way. He is consigned by Messrs. Grimes Bros., of Montrose, Iowa, who guarantee him and part with him reluctantly, as there are few better-bred sires in Iowa possessing such individual merit. He belongs to the popular Nonpareil Princess family, than which there are few better, and in the list of sires contained in the pedigree are some of the more prominent

Cruickshank bulls, back for a dozen generations. His sire was invincible, a bull bred in Scotland by Mr. A. Crombie. The dam was a daughter of Imp. Spartan Hero, bred by Mr. Cruickshank and well known throughout Iowa; second dam by Vice Consul, also bred by Cruickshank, and the third dam, an imported cow by the Campbell-bred Golden Prince. Gold Stream is an excellent individual and for those demanding a straight Scotch pedigree, he should certainly prove a "plum." The extensive consignments of Scotch-topped young females from the Cedar Lawn farm of Mr. Philip J. Schoene, of Summerfield, Ill., presents unusual attractions worth looking after, representing worthy descendants from such great sires as Roan Gauntlet, Master of the Rolls, Craven Knight, Champion of England, Imp. Harvester and others. Mr. Schoene's cattle are bred from deep milk-producing strains and include young Marys, White Roses, Lady Elizabeths, and other popular sorts, including such sires as the pure Cruickshank Lavender bull, Ladron 113910, bred by Colonel Harris & Son, of the Lavender bull, Galahad. Grand Viscount 210512, a son of the Cruickshank Braith Bud sire, Lavender Viscount; Pride Perfection, a son of the noted Duthie-bred Cruickshank Mysie bull, Imp. Scottish Pride; Dick Taylor, son of the Cruickshank-bred Violet; Imp. Harvester, etc. These cows have either calves at foot or are bred to straight Scotch bulls in nearly every instance. Included in Mr. Schoene's consignment are five royally-bred young bulls, ripe for service that should be looked after by anyone seeking to improve his herd with top blood. Mr. W. G. Burkhardt, of Fairfield, Iowa, contributes some high-class Bates blood to this sale that should attract attention, including daughters of Wild Eyes Duke 5th. This bull was a son of Royal Waterloo, whose dam was also the dam of Peculated Wild Eyes, one of the most noted Bates-bred bulls in America. One of these cows, a three-year-old, traces to Imp. Waterloo Duchess 3d through a line of Bates-bred sires, largely from the noted Valle herd. Another traces to Imp. Water Girl by Grand Duke of Waterloo, and is valuable from a pedigree point of view. A fine two-year-old Waterloo Duchess bull is also included. His sire was Lily's Chief, a son of Imp. Matabele Chief, a superb, red bull bred in Aberdeenshire, Scotland. Outside this single Scotch pedigree, however, the pedigree is Bates throughout. Space forbids further mention. Catalogs are ready and will be cheerfully forwarded at once upon application to D. R. Mills, sale manager, Des Moines, Iowa, and additional entries for the Kansas City, St. Paul and Omaha sales are urged to forward pedigrees at once.

Last Call for Goodwin's Angus Offering.

At Heatherton Farm, Naperville, Ill., Wednesday, October 31st, will be held one of the most important sales of the season. Every indication is that it will be a gala affair in doddie circles. Naperville is but a twenty minutes' ride from Chicago on the main line of the Burlington, and special arrangements have been made with the road to accommodate stockmen. The list of animals offered is complete in every respect, and probably more Angus breeders will be gathered on that date than for any Angus date of recent years. There will be plenty of animals and at prices that those seeking first-class breeding can afford to pay. It is a sale with many features. The male offering is prime, including an extra fine bunch of bulls of different ages. A number of these will be seen by reference to the catalog to be a little young, yet it is the chance to get a good one right. From this lot one can pick a bull that will be ready for service by the time he must change the stock bull. Prince of Elches 3d is a fifteen-months-old Erica and a Jilt-bred bull that will make good at the head of any herd. His dam with a fine heifer calf at foot is also in the sale. A pair of twins, sixteen months old, by Zaire 12th, now at the head of Mr. L. H. Kerrick's herd, will prove another attraction. There will be a regular bouquet of Rosebuds shown, three bulls and three cows, that are full of merit. Heather Monk will likely be the sensation of the sale. As a yearling he tips the beam at 1,600 pounds and has been tested and found to be a sure breeder. His sire is Black Monarch of Emerson and his grandsire, Black Knight, among whose noted get were the first, second and third-prize cows at the Columbian World's Fair. Forty head of cows are cataloged and about one-third have calves at foot, while half the number show offspring in the sale. There will be exceptional Jilts, six in number, all except one by the champion, Blackbird King. They are extra good. Blackbird 19th, the last calf of Blackbird 5th, is offered. She has a calf at foot, as well as Blackbird Lassie 7th, by the noted \$3,100 Black Woodlawn. Her first calf is now at the head of Messrs. Palmer & Palmer's herd. Trojan Ericas will also be included in considerable number. The standard is high all through, as a perusal of the sale catalog and Heatherton Herd History will show. Both of these will be mailed on request sent to Mr. John S. Goodwin, Chicago, whose advertisement appears on page 35. Kindly mention this paper when writing.

Last Call Humbert & Thomas Duroc Sale.

One of the best offerings that now remain to be sold this fall in southern Iowa will be that of Messrs. Humbert & Thomas, at Corning, Iowa, on November 3d. They are selling fifty head altogether—twenty-five boars and twenty-five sows. This offering carries some of the best blood known to the breed, such as that of Tip Top Notcher (the highest-priced Duroc Jersey boar ever sold), Gold Dust Jim (the noted Iowa State Fair sweepstakes winner), and old Duroc Challenger (noted as the sire of Cole's Duroc and Larchwood, first and second-prize boars at the Nebraska State Fair in 1903). There will be a lot of excellent boars in this sale, the most of which are sired by Tip Top Notcher Gold Dust, a son of the great Tip Top Notcher, and some of these are out of some of his best Duroc Challenger sows. There will be a few fall boars in the sale, and the rest will be spring boars. The gilts are all sired by Tip Top Gold Duat, and they are among the best we have seen this fall. There will be a num-

The best of these great breeds always to be found and our prices are the lowest. If you are in need of a Stallion of the above breeds or contemplate buying, write us. BARNs AT FARM.

A FEW CHOICE SUFFOLK FILLIES FOR SALE.

ber of brood sows in the sale, some with litter by Gold Dust Jim 2d, their present herd boar, and one of the best sires in southern Iowa. Gilts sired by this boar sold for from \$150 to \$250 in the E. Z. Russell sale last winter, and proved to be among the best that were sold in that sale. He is a sire of high-class stuff, and a sow with litter by him will be something that breeders can take hold of. One of the sows to be sold is sired by old Hoosier Banner, and she will be bred to Gold

Dust Jim 2d. If any of our readers have not yet purchased a boar, here will be the place to get one. The gilts that are to be sold will be bargains. This firm will not make a spring sale, and therefore are putting their sows in this fall sale. Last year some of the breeders bought sows of this same firm and put them in their spring sales and doubled their money, and the same thing can again be done this fall. Write for catalog and be sure to attend the sale at Corning, Iowa, on November 3d.

O. L. C. SWINE

35 Boars--AT AUCTION AT INDEPENDENCE, MO., NOV. 2---25 Sows
FRIDAY MORNING.

The blood of Kerr Dick, the World's Fair junior champion, and Big Mary, the champion sow, predominates. The following American Royal winners go: The champion boar, the reserve champion, the first and second prize six months boar and litter brother; five sons of the great Kerr Dick. Among the sows are the first and second prize gilts and all the sows shown as produce of sow, get of sire and in young herd. This is by far the greatest lot of O. L. C.'s ever gotten together. Sale will be held in town and in the forenoon at 10 o'clock. Electric cars from Kansas City, Mo., will get you there in forty-five minutes.

The Only All Scotch Sale of Short-horns to be Held in Iowa this Fall.

On page 32 of this issue will be found an announcement by the old reliable firm of Messrs. S. H. Thompson's Sons, of Iowa, City, and Messrs. Wm. Smith & Sons, of West Branch, Iowa, of their sale of all Scotch Short-horns to be held at West Liberty, Iowa, on November 14th. This will certainly be the most attractive sale of the season, as it is the only sale announced where all of the cattle to be sold are Scotch. Messrs. Thompson's Sons sell twenty-seven head, all but one of their own breeding. Messrs. Wm. Smith & Sons are practically dispersing their herd of Scotch cattle, consisting of eighteen head, all of the famous Scotch Rosemary family (by Breadalbane), the entire herd descending from one cow purchased some ten years ago from Mr. S. H. Thompson. Messrs. Smith's entire offering, with the exception of Ringmaster, the herd bull, has been bred by themselves. In many respects this is the most phenomenal offering of Short-horn cattle that has been made in recent years. When forty-five head of Scotch cattle are listed by two breeders it is a rare occurrence that the entire offering with but two single exceptions have been bred by the consignors. A sermon might be preached on the possibilities of success in the Short-horn breeding business from Messrs. Wm. Smith & Sons' experience. Such uniformity of breed type, character and general conformation can be obtained in no other way than by adhering to few families, breeding and developing them by careful hands, attended by close observation. These are precisely the conditions that have existed with regard to the Smith consignment. At this early writing we shall not enter into detail or attempt to individualize on any of the offering, leaving that for future issues. We wish at this particular time to impress upon the minds of Homestead readers that Messrs. Thompson have spent nearly a third of a century in breeding Short-horn cattle, and are now in position to offer the public some splendid specimens that have been obtained through their many long years of successful breeding and developing this, the most famous breed of beef cattle extant. The Thompson herd is without exception solid red in color, this firm having been somewhat tenacious of this favorite color for many years, they having used nothing but red bulls that best met their fancy. Their offering consists largely of females, with some seven bulls only, including several herd heads. So far as color is concerned, the same may be said of Mr. Smith's offering. It is certainly advisable for those who desire to start in the Short-horn business to buy their foundation stock of reputable and reliable breeders who have achieved success in this difficult but splendid line of the live stock business. There is certainly no business that requires greater care or broader-minded or more liberal lieutenants, than does the breeding and rearing of improved pedigreed live stock. These breeders are painstaking, careful, methodical and honorable gentlemen, whose word is as good as a government bond. It is always a pleasure to The Homestead to endorse and recommend breeders of this character, and we trust that our readers will have this sale in mind so that they will apply early to either of the consignors for a catalog. This catalog will certainly reveal as rich a lot of Scotch breeding as has ever been offered to the public. There are no old or worn-out cattle in the sale. Six years is about the oldest animal listed, and this, according to all rules of breeding animals, is but the prime of life, while the major portion are four years old or younger. Watch for future announcements and for sample pedigrees in our issue of November 8th.

Donohoe & Cash Sale of Aberdeen Angus Cattle.

Ever since the announcement of the Donohoe & Cash sale, on November 13th, at Holbrook, Iowa, much talk has been indulged in among Angus breeders concerning the high quality of Aberdeen Angus cattle that the enterprising breeders around Holbrook would contribute to this sale. The Homestead is now in position, after a thorough inspection of the entire offering of sixty-five head that will go under the auctioneer's hammer on November 13th, at the new pavilion in Holbrook, to announce that the offering is strictly first class, from start to finish, and includes practically the entire herd of Mr. Wm. Cash, of Williamsburg, Iowa, including his great show and breeding bull, Woodlawn Blackbird Lad, as well as liberal consignments from the herds of other well-known breeders, such as Mr. P. J. Donohoe, who

has cut quite a figure in all the leading show yards this year, including the American Royal, where he carried off six blue ribbons and four championships. Mr. Mike Donohoe, as well as Mr. M. H. Donohoe, are contributing from the best end of their herds. The same is true of Messrs. John Cash and Mike Cash, while Mr. Patrick Lehey will send forth a few noble specimens of the famous blackskins from his very select herd. In this, our initial mention of this sale, we make no attempt at individualizing on any of the cattle. It is sufficient to say, however, that this will be one of the most important Aberdeen Angus sales to be held this fall. Because of the great Blackbird sale to be held at Mt. Vernon, Iowa, on November 14th, these breeders surrounding Holbrook have been persuaded to part with twenty head of their choicest cattle of the famous aristocratic Blackbird family, with liberal additions of the following families: Pride, Queen Mother and Erica, including Trojan Erica. Two of the most famous Aberdeen Angus bulls (herd heads) will be offered in the great show and breeding bull, Woodlawn Blackbird Lad, and the champion young bull, Glenfoi Thickset 2d. The former bull was used with marked success and won numerous coveted prizes in the hands of such breeders of Messrs. Cantine Bros. & Stevenson, of Holstein, Iowa, and later by Mr. E. J. Davis, of Iowa City, Iowa. This is one of the best show and breeding bulls in the land, and while he is some seven years old, does not show his age in the least. The females in this sale are bred largely to Woodlawn Blackbird Lad and Black Woodlawn, the latter conceded by all good judges to be the best Aberdeen Angus bull in America. The latter bull, of course, is not for sale, but his son, Glenfoi Thickset 2d, junior champion at Kansas City at the recent American Royal, is included. It will doubtless be a battle royal among the foremost Aberdeen Angus breeders of America to see who shall own this champion young bull. With these preliminaries, we conclude for this initial mention and trust that every lover of Aberdeen Angus cattle in America will forward their application at once for a sale catalog of this very important sale to either Messrs. P. J. Donohoe, of Holbrook, Iowa, or Wm. Cash, of Williamsburg, and kindly mention The Homestead when writing.

Shelby County Short-horn Breeders' Sale.

The first annual sale of the Shelby County Short-horn Breeders' Association will be held at the sale pavilion, Harlan, Iowa, November 13, 1906. There will be forty-five head of cattle in this sale from the herds of Messrs. J. G. Westrope, J. C. Nyrop, John Obrecht, H. W. Littleton, G. H. Miller, R. C. Rasmussen, V. L. Dayton, A. Sonneland, W. F. Kilpatrick, C. W. Daws & Son, G. E. Miller and Ole Olson, all well-known breeders in Shelby county. Mr. C. W. Daws, the manager of the sale and one of the most reliable Short-horn men in the state, writes as follows: "I have seen the most of the cattle and you may say to Homestead readers that they are a lot of well-bred Short-horns, of decided beef and milking quality and not a lot of culls. We have taken considerable pains to have the very best for this sale and have made requirements of all those consigning cattle that had to be lived up to. As this is our first annual sale we are going to leave no stone unturned to make it a good one, and buyers will not be disappointed when they come to the sale." There will be some choice Scotch and Scotch-topped cattle in the offering and there will be bulls in this sale that will be fit to head any herd. Mr. J. G. Westrope is the largest contributor, having seven head in the sale. He is putting in a very choice lot of bulls, some of which are sired by the Scotch bull, Sirocco, that formerly did service in his herd. He also sells a few good females. One of the best things in the sale in the way of a Scotch herd bull is Golden Steadfast 182418 by Imp. Steadfast and out of the \$700 cow, Golden Hue, by the Parsons-bred bull, Commodore. He is a five-year-old bull, a roan in color, a good individual and a splendid breeding bull. He is a very thick bull and will weigh a ton. Broad on top, deep through the middle, good in all his lines, he certainly is a proposition to some good breeder who is looking for a herd bull. He belongs to the Cruickshank Brawith Bud family and is consigned by Mr. V. L. Dayton, of Panama, Iowa. He cannot use him in the herd any longer because he has retained all his heifers. He also sells a yearling son of his out of a daughter of Imp. Scottish Pride. He is one of the most richly-bred bulls in the catalog, having nine imported bulls in his pedigree. Mr. Dayton also sells two good Cypress cows and one Matilda. The other breeders are

also selling their best cattle, and we will tell our readers in our next issue about the entire offering. In the meantime it will pay any of our readers to write to Mr. C. W. Daws, of Harlan, Iowa, manager of the sale, for catalog. Kindly mention The Homestead when writing.

Short-horns at Kansas City.

It is an unusually good offering of Short-horns that Manager McGavock has gathered for his auction at Kansas City, November 2d. A letter in this issue from Col. T. B. Hart, who owns one of the best Scotch herds, will show that he is consigning two herd heading bulls and three show heifers. Mr. J. K. Alexander, also of Edinburg, Ill., consigns a superior straight Scotch yearling bull and a two-year-old heifer of grand quality. Edinburg also contributes other good cattle in the entries of Mr. I. W. Baughman. He is sending four sons and daughters of the Scotch bull, Bapton Gloster that Mr. McGavock recently sold for Mr. Baughman to Mr. E. J. Hays, of Hampton, Neb., to head his choice herd. Bapton Gloster is one of the best sires of the breed. Mr. Baughman also includes the dams of these four Bapton Gloster calves. Two herd heads are cataloged by Mr. A. H. Robertson, of Clark, Mo. They are the five-year-old Morning Flash (a Missie bred by Mr. C. L. Gerlaugh) and his yearling son, Goldust, of the noted Golden Drop family. Morning

Flash was got by the Duthie-bred Imp. Sittytton Flash, and out of Imp. Missie May by the famous Pride of Morning. He has been used in the herd of Mr. Robertson for several years and is now offered for sale on account of having too many of his females to retain him profitably in a small herd. His sons and daughters included in the auction will demonstrate his superiority as a sire and as an individual he will show for himself. The strongest Scotch consignment to the auction comes from Vandalia, Mo., and Messrs. W. L. Wright and W. V. Branstetter are the owners. Three imported cows are included and a half dozen other straight Scotch females and a Scotch bull are also cataloged by them. We wish to mention especially the seven-year-old cow, Imp. Fairy Maid 3d, a daughter of Mirabeau, a son of the famous Star of Morning. She is one of the best Scotch cows ever imported to America, and was selected by the noted judge, George P. Bellows, as the very best cow he could obtain for Mr. Wright. She has two daughters this week in the Wood dispersion in Ohio, and Mr. Wright retains in his herd a bull and a heifer from her, both of which are sired by Imp. First in the Ring. She will be sold with a beautiful red heifer calf at foot by the champion, Lavender Viscount, and was rebred in August to Modern Marshal. There is not only straight Scotch, but there will be found Scotch-topped animals in this offering to suit those in search of the best type and conformation and the attendance of cattle breeders in general is urged.

Last Call for "Opportunity" Short-horn Sale at Mt. Pleasant, Iowa.

Mt. Pleasant, Iowa, will have the distinction next Tuesday, October 30th, of holding one of the greatest Hereford sales that has taken place anywhere in the United States this year, at least the opportunity to secure bargains, as advertised by D. R. Mills, sale manager, of Des Moines, Iowa, on page 30, will be second to none, and should attract the universal attention of Hereford admirers throughout Iowa and the middle West. Mt. Pleasant is located in Henry county, Iowa, in the southeastern part of the state, on the C., B. & Q. R. R., only two counties from the Illinois and Missouri lines, hence convenient for buyers from these states, as well as Iowa. It is not too late to secure catalogs if applied for at once, and all admirers of good Hereford cattle are urged to attend. Sixty head are included, embracing forty choice females and twenty superb bulls, including several herd heads of reputation. The most fashionable blood of the breed predominates throughout the entire list of consignments, which are contributed by well-known breeders whose names will be found in the advertisement. Mr. J. L. Jones, of Roscoe, Iowa, contributes six splendid heifers by Lawton 80-80, son of Lars and Perfection's Percy 159923. Those of breeding age have either calves at foot or are bred to Alto Beau 8th 158119, by the prize-winning Masquerader, son of Lamplighter, or Perfection's Percy. This latter bull, Perfection's Percy, is also included and is a grandson of the \$10,000 Dale. He was bred by Mr. Hoxie and should go to the head of some good herd. Mr. A. E. Church, of Mt. Pleasant, Iowa, sends twenty-two head, fourteen of which are a grand lot of females tracing to Anxiety 3d, Anxiety 4th, Beau Real, Corrector, Lord Wilton, etc., many of which have calves and are rebred to the herd bull, Carlyle 17861. Carlyle is also included, being a magnificent representative of Kansas Lad through Eureka, the grandsire of the champion, Lorna Doone. He is of the low-down, beefy type and guaranteed in every way by Mr. Church. Mr. W. T. Wright, of Mt. Pleasant, is well represented by three choice females by Wilton A. 6th, grandson of Lord Wilton; Alto Beau 8th, grandson of Lamplighter, and Pre-emptor, one of Messrs. Gudgell & Simpson's best productions, descending from Earl of Shadeland, out of a Beau Brummel dam. Mr. J. S. Brock, of Bentonport, Iowa, contributes three bulls and a heifer by Columbus 51st out of high-bred dams. Mr. John Saar, Jr., of Cantril, Iowa, sends four cows and three bulls, one of the latter, Dandy Rex 225857, a grandson of Princeps, whose get have proven so remarkably successful in the show rings this fall. The rest of his consignment are grandsons and granddaughters of Anxiety 3d, Corrector, Princeps and Donald Dhu, both the latter by Lamplighter. Mr. John Burke, of Mt. Pleasant, Iowa, enters a valuable cow, descending in a direct line from Kansas Lad and out of a daughter of Earl of Shadeland, second dam by Anxiety 4th, and she has a lusty bull calf at foot. Messrs. Jas. Wallbank & Sons, of Mt. Pleasant, are represented by Petal 6th, out of a daughter of Anxiety 4th, which should prove pure gold to astute breeders. She has an August hull calf at foot and is rebred to Wilton Alamo 6th, by Wilton Grove, grandson of Lord Wilton. Mr. G. B. Robinson, of Marble Rock, Iowa, lists one of the notable consignments of the sale, the same being sired by sons and grandsons of old St. Louis, whose blood is getting so scarce; Corrector, Java and Lord Wilton, the females tracing to Lord Wilton having calves at foot and rebred to popular sires. Mr. John Shepherd, of Danville, Iowa, sends two bulls by Alto Beau 8th, grandson of old Lamplighter from daughters by Earl of Shadeland and Cherry Boy and Mr. James D. Davis, of Floris, Iowa, Mats grandsons of Java that should not be overlooked. The sale will be called at 1 p. m. and catalogs will be immediately forwarded upon application to D. R. Mills, sale manager, Des Moines, Iowa, who also urges contemplating contributors to his Kansas City, St. Paul and Omaha sales to forward entries and pedigree at once.

The Steward & Hutcheon Sale.

Breeders of Hereford cattle throughout the country who wish breeding stock to add to their herds, animals to fill in their show herds, or the man who is founding a herd should look to the Steward & Hutcheon sale, to be held at the farm near Bolckow, Mo., on Wednesday, November 7th. In the bull end of the offering there will be found animals fit to head most any herd. The individuality is there and the breeding should please the most exacting. The first of these is the hull, Parsifal, listed as Lot 1. Few better-bred bulls are to be found, he being got by Predatory, a grandson of Don Carlos and out of a Beau Brummel cow. Parsifal's dam, Priscilla 5th, was got by Messrs. Gudgell & Simpson's great breeding bull, Lamplighter, by Don Carlos, and the dam of Priscilla 5th, Priscilla, was got by a son of Don Carlos. Where can more Anxiety blood be found and through a hull that was good enough to stand second at the last American Royal in a strong ring of junior yearlings, and second as a junior calf at the same show in 1905? To describe him is but to repeat the hull is old story, and we simply say the hull is right, the breeding is of the best and the man hunting a top-notch herd bull should not miss being on hand. He is listed as Lot 1. A September yearling that should appeal to many is Beaumont Jr., listed as Lot 2. He, too, is a royally-bred hull, being got by Beaumont, that great breeding bull that has sired so many winners for Messrs. Steward & Hutcheon. Beaumont was got by Beau Brummel and out of Mansellette by Don Carlos. The dam of Beaumont Jr. is Beau's Queen, got by Beau Brummel and out of Fowler Queen 2d, she by old Fowler. Breeders should not lose sight of the fact that it is from Fowler Queen 2d that Messrs. Steward & Hutcheon got so much of their good stuff, and a hull from this family should appeal to those who desire to buy herd-leading material that comes from stock that breeds on and on. As stated last week, the hull trade with Messrs. Steward & Hutcheon has been such that not enough hulls were left in the herd to make a very strong list

of hulls and Messrs. Van Natta & Son, of Fowler, Ind., were asked to contribute seven head, which they have done. The entire seven head are by their famous herd bull, Prime Lad, and from their best cows. Messrs. Van Natta & Son realized that in order to show up as good a lot for quality as will be expected in such a sale they must pick carefully, and this they have done, selecting seven bulls that they think will be a credit to most any herd. Two of these are just past two years of age. One, Prime Lad 11th, listed as Lot 6, is a hull that Mr. Van Natta says has much scale, yet is not lacking for quality. His dam, Ellen Terry, traces close up to such sires as Beau Real, The Grove 3d and Anxiety. The other, Prime Lad 13th, listed as Lot 7, is out of Miss March On, got by March On and out of Roaa Fowler by old Fowler. Miss March On's full sister won junior championship wherever shown. Prime Lad 19th, listed as Lot 5, is also out of a March On cow that was shown successfully as a two-year-old. Her dam, Cleopatra, cost Messrs. Van Natta & Son \$1,010 as a yearling. Another of the good sons of Prime Lad is listed as Lot 8, Prime Lad 20th. His dam, Bright Lass, was got by Lamplighter and was picked by Messrs. Van Natta & Son as one of the good things produced by Messrs. Gudgell & Simpson. Messrs. Van Natta & Son bring these bulls West hoping they will be appreciated by western buyers. They have not been highly fitted, but will carry just enough flesh to show their worth. The female end of this sale is strong in daughters of the great herd bull, Beaumont, yet there are others that will appeal to the most critical buyers. One of the attractions of the entire sale is the five-year-old cow, Beau's Queen and bull calf, got by Beaumont. Beau's Queen was got by Beau Brummel and out of that great breeding cow, Fowler Queen 2d. Few finer specimens of the breed are found. As a calf she was first in class and junior champion at the international and in 1903 was defeated by her sister for grand champion. Today, after producing two calves, she shows as much quality as one could ask for and is certainly a magnificent specimen of the breed, being a cow of much substance, a broad-backed cow and one that has quality from end to end. She should go to a good home where her bull calf will be appreciated as much as the cow. Lot 15, Gladys, got by March On 5th and out of Greenwood Queen 2d, is another of the Queen family and one that should please some critical buyer. She, too, is an international winner, standing first in a class of junior calves the same year Beau's Queen won first as a senior calf. She sells with calf at foot by Beaumont. Lot 39, Beaumont's Queen by Beaumont and out of Fowler Queen 2d, is a three-year-old cow that will please any admirer of the "white face." She was second-prize calf at St. Louis World's Fair and junior champion at Portland Exposition last year. Few better breeding cows will be found. She sells with bull calf at foot by Mapleton Beau and is rebred since June 16th to Mapleton Lad. Missouri Queen, listed as Lot 38, is a full sister to Beaumont's Queen and is a most desirable yearling heifer. Lot 40, Mapleton Queen, is another of the good daughters of Beaumont and Fowler Queen 2d. She is just past two years old. Last year she stood second in class at Minnesota State Fair and at Portland. Mr. Hutcheon thinks she is even better in her two-year-old form and we think with him on this subject. These are but a few of the many good things that go in the Steward & Hutcheon sale and it is to be regretted that this herd should be practically dispersed at a time when it had reached such a state of perfection. The breeders who realize the time and money spent in bringing it to its present high standard should avail themselves of this opportunity to secure the best that two such men as Messrs. John Steward and Wm. Hutcheon have spent their years of labor building. Only a few old cows and the herd bull, Beaumont, are held out of the sale, and on these Mr. Hutcheon will continue to spend his time building another herd. The advertisement will be found on page 35 and those of our readers who are interested in the "white face" should send at once for a catalog and arrange to attend the sale, and one of these Mr. Hutcheon will Burlington and Guilford on the Great Western.

Kerr's Sale of Prize-Winning O. I. C.'s Forenoon, Friday, November 2d.

The sale of prize-winning O. I. C. swine, to be held by Mr. O. L. Kerr, of Independence, Mo., on Friday, November 2d, at Independence, Mo., will be one of the greatest sales of O. I. C. swine ever put up at auction and those who attend will see the grandest lot of individuals they have ever seen. Mr. Kerr has developed the bone, the feet, the back and the head and ears on his O. I. C.'s to such a high state of excellence that it is doubtful if there is another herd in America that can show as many that are as good as the Kerr O. I. C.'s. We do not wish to over estimate, but we do think great credit is due Mr. Kerr for the manner in which he has brought the O. I. C. to the front in the past two years and the breeder who wants herd boar material or a sow to add to his herd should respond to Mr. Kerr's invitation to be with him on November 2d. If the hogs do not please you it will be because you have a different type in mind than has Mr. Kerr. Six championships went to Mr. Kerr's herd at the American Royal and the ring-side talent were unanimous in their comments, saying that Mr. Kerr had the greatest lot of O. I. C.'s ever seen at any show. Among the thirty-five hogs listed the writer has never seen so many uniformly good ones and they are headed by the champion, the reserve champion and the first and second prize pig under six months. These were also winners at the Missouri State Fair. There are others in the sale that are their equal, but were not of proper age to show. In sows Mr. Kerr has a strong lot listed, including the first and second prize gilts, the sows that won as produce of sow, get of sire and in young herd. In fact everything that goes in the sale has been selected with care. If any of our readers are in the market for O. I. C.'s that are bred right, that are backed by ancestors of great individuality, they will find them here and in goodly numbers. The last announcement of the sale will be found on page 31.

..FIRST ANNUAL SALE..

OF THE SHELBY COUNTY

SHORT-HORN

BREEDERS' ASSOCIATION

TO BE HELD AT THE SALE PAVILION

HARLAN, IOWA, TUESDAY, NOV. 13, 1906.

A Choice Lot of Scotch and Scotch Topped Cattle From the Herds of

J. C. NYRUP, J. A. OBRECHT, H. W. LITTLETON, J. G. WESTROPE, G. H. MILLER, OLE OLSON, V. L. DAYTON, AUG. SONNELAND, W. F. KILPATRICK, G. E. MILLER, C. W. DAWS & SON, R. C. RASMUSSEN.

30 Cows and Heifers and 15 Bulls

The cattle that go into this sale have all been inspected by a committee selected to pass upon them and nothing but the very best was allowed to be cataloged. There are some particularly high class herd bulls in the offering, some of which are straight Scotch. The cows and heifers are also a very high class lot of the beefy, early maturing, and well bred lot of cattle and many of these will have calf at foot. When writing for catalog, address

C. W. DAWS, MGR., - HARLAN, IA.

Col. Geo. F. Bellows, Auctioneer.

ALL SCOTCH Short-horn Sale

The only sale of absolutely all Scotch Short-horn Cattle to be held this Fall will be the sale of S. H. Thompson's Sons and W. M. Smith at West Liberty, Ia., Nov. 14.

S. H. Thompson's Sons sell twenty-seven head; W. M. Smith & Sons, 18 head, the Smith contingent being a dispersion, all of the Scotch Rosemary family. Thompson sells 17 females, all but three with calves at foot, or are bred, ranging from one to five years of age—all but one bred by themselves. Ten Scotch bulls are listed, of the Lavender, Alexandrina, Lovely, Mysie, Princess Royal, Duchess of Gloster and Rosemarys. Wm. Smith & Sons sell their herd bull, Ringmaster, a son of Young Commodore. Fifteen of the 18 contributed by Smith & Sons are females. Some showyard material, as well as some great breeding stock, is listed. The sale will be held at West Liberty in the heated pavilion.

ABERDEEN ANGUS CATTLE

THURSDAY, NOV. 8th, 1906.

AT

**SOTHAM
PAVILION, Kankakee, Ill.**

THE equal of this consignment has not been offered the public for years. More high class cattle than ever was offered in one sale before. More show cattle than ever was offered before, Blackbird Prides, Ericas, Heather Blooms and other fashionable families. No breeder need stay away because the cattle are not good enough. We are selling cattle that cannot be duplicated. The man who would like to start a herd can do it now and do it proper. Come see for yourself, and if you don't find them good I pay the expense. Send for a catalog and see the finest bunch of pedigrees you ever looked at. We are selling a great bunch of bulls. Biondel is, without doubt, the greatest bull ever sold at public auction, except Prince Ito.

DISPERSION SALE OF THE CLOVERLAND HERD

Aberdeen

ANGUS CATTLE

WEDNESDAY, NOVEMBER 14, 1906.

On November 14th, in order to dissolve the partnership existing between Baker & Smith, the entire herd of Cloverland doddies will be sold at auction. The most remarkable offering of Aberdeen Angus Cattle ever placed before American breeders. Forty-eight head of first-class, highly-bred doddies of the market-topping sort. Thirty-five head of the world's most famous family, the BLACKBIRDS. No such an aggregation of the famous Blackbird family has ever yet been offered on either side the water. The two Blackbird herd bulls, Black Keillor 3d 41587 and Blackbird Man 72244.

Nine bulls are included in the sale, the remainder all being females. Show yard material as well as great foundation stock will here be found in abundance. Auctioneers, Cols. Silas Igo and Geo. P. Bellows, with assistants. Mt. Vernon, the place at which the sale will be held, is thirteen miles east of Cedar Rapids on the main line of the C. & N. W. Ry. Attention is called to the choice offering of Angus cattle by Wm. Cash and others at Holbrook, Iowa, on November 13th. Parties can attend both sales.

FIFTH ANNUAL SALE OF

SHORT-HORN CATTLE

46 HEAD
46 HEAD

At the Home Farm near town

Lake City, Ia., Thursday, Nov. 1, 1906
Imported, Straight Scotch & Scotch Topped Cattle.

HERE will be nine Scotch cows and heifers and five Scotch bulls in the sale of Miss Ramsden, Matchless, Victoria, Marchioness, Lavender, and other Scotch tribes. I am also selling two splendid imported cows, Imp. Dalmeny Princess 9th and Imp. Gladys of Dalmeny, both with good bull calves at foot by Red Knight, and rebred again to same bull. The rest will be well Scotch-topped, having five and six of the very best crosses. I am selling a very high class lot of bulls, among which are several sons of Fitz Eustace, a son of Lord Craibstone, Prince Missie and Earl Victor. Every female in the sale that is old enough will either have calf at foot or will be right at calving. Catalog now ready. Write for it, mentioning Iowa Homestead.

Steward Hutcheon HEREFORDS

AT AUCTION, WEDNESDAY, NOVEMBER 7, 1906.

At the Farm near Bolckow, Mo.

THE GET OF BEAUMONT 134751

50 HEAD 40 FEMALES, 10 BULLS 50 HEAD

Among the cows and heifers are several daughters and granddaughters of
Fowler Queen, the greatest show and breeding cow ever got by Van Natta &
Son's great breeding bull, Fowler. The females of the 1905 show herd are
included. Ten heifers are by Beaumont. Others by such sires as Beau
Brummel, Lamplighter and Paladin. Among the bulls is Parsifal, the second
prize junior yearling at the American Royal. A double Beau Brummel just
a year old. Seven sons of the famous Prime Lad. These are consigned by
W. S. Van Natta & Son, of Fowler, Ind.This sale is brought about to settle the estate of the late Jno. Steward and
the only things reserved are a few old cows and the herd bull, Beaumont.
These are reserved by Mr. Hutcheon as a nucleus for a herd. All trains
stop at Bolckow on the Burlington, and Gullford on the Great Western.

Send for catalog, mentioning The Homestead.

STEWART & HUTCHEON, BOLCKOW, MO.

ABERDEEN ANGUS AT AUCTION.

AT HEATHERTON FARM, NAPERVILLE, ILL., OCT. 31, 1906, 1 P. M.

57--HEAD Prime in All Respects HEAD--57
40 Females-----17 Bulls.Come and see if a fair selection has been made from the cattle in the
Heatherton herd. You will probably meet more Angus breeders than have
assembled at a sale in recent years. Thirteen cows with calves at foot, cows
in calf, heifers and young herd headers. An inspection of the Heatherton herd
in its twenty-fourth year and in its new home will interest breeders. Begin-
ners may buy with confidence that later knowledge will not cause them
to discard the blood lines chosen from this herd. The offering consists
of thirteen Blackbirds, twelve Prides, eight Jilts, six Trojan Ericas, six Rose-
buds, five Zaras, four Heather Blooms, etc.Naperville is twenty-eight miles west of Chicago on the main line Burling-
ton road and through trains and suburban service. Send for Heatherton Herd
History, second edition, and also sale catalog at once, mentioning this paper.

Sutter's

GROWTHY DUROCS fall males got by Neb. Wonder, he by Crimson Wonder are now ready to ship. Write me. WM. SUTTER, Liberty, Neb.

ATHELRED 28069 for sale. The best pig ever sired by Tip Top Notcher. He was 4th prize boar at Nebraska as well as siring 3d prize sow at same show in 1905. "The best Tip Top Notcher pig I ever saw," J. J. Harding. "He should have borne blue ribbon," S. R. McKelvie, Twentieth Century Farmer. Price \$1,000. A. Wilson, Bethany, Neb.

12 GOOD ORION BOARS

FOR SALE. These are out of some of our very best Duroc sows and it is about the last chance to get an Orion boar. Write quick if you want one.
MANLEY & CO., LYONS, NEB.

A Few Good Duroc Jersey Boars For Sale

MUNSON'S Perfection, a son of the sweepstakes boar, King Perfection, and Orion's Model, a grandson of Old Orion. Also a few young boars. Write me at once. Address, J. E. WEHR, PORTSMOUTH, IOWA.

WALNUT GROVE DUROCS.

I HAVE about 75 pigs for the fall trade. They are of the large, roomy type, representing the blood of Improver II, Higgin's Model, Jumbo Perfection, Bell's Model, Bell's Top and others.
HENRY G. WARREN, INLAND, NEB.

SHORT-HORN CATTLE--DUROC JERSEY HOGS

80 CHOICE spring pigs sired by Fairview Wonder 44051, Fairview Col. 25603, out of choice sows. My prices always insure a sale. A few good Short-horn bulls for sale.
JAMES T. DOLLISON, SACS CITY, IOWA.

112 CHOICE DUROC JERSEYS 112.

SIRED by Duroc Challenger's Wonder S 34637, Crimson's Critic 40921 and Chime's Advance 32791, a son of the great Proud Advance. We have a choice lot of pigs. Write us. M. S. Moats & Son, Randolph, Neb.

I HAVE 90 choice spring pigs sired by grandson of Proud Advance and a son of Pericles out of Tolstoy and Duroc Challenger sows. Prices within reach of all. I have some extra good boars for sale. Address, S. I. Welch, Cherokee, Ia.

FAIRVIEW HERDS. Will sell my herd of Duroc cattle, Duroc swine. No swine for sale now. Fall Sale Oct. 30, 1906; spring sale Feb. 13, 1907. J. B. Davis & Son, Fairview, Kan.

VOL. LI. NO. 44.

DES MOINES, IOWA, NOVEMBER 1, 1906.

WHOLE NO. 2572

RATIONS FOR BEEF COWS.

The breeding of beef cattle on high-priced land presupposes the economical maintenance of cows from which such stock is bred. In order to ascertain the cost of keeping beef cows, the Illinois Experiment Station has just issued an account of the results secured in feeding cows three different rations, the components of which are generally grown on every corn-belt farm.

Thirty grade Angus cows, similar in all respects, were divided into three lots of ten each. The following feeds were used and valued per ton as given: Corn silage, \$3.34; shock corn, \$5.59; corn stover, \$2.25; shredded stover, \$2.25; clover hay, \$3.00, and oat straw, \$1.50. The average feed eaten daily per cow for the whole time, included in the 140 days following December 25th, is viz.: Lot 1, silage, 16.65 pounds; clover hay, 3.5; oat straw, 9.56. Lot 2, shock corn, 8.7 pounds; clover hay, 3.5; oat straw, 10.83; Lot 3, corn stover; first forty-two days, 21.67 pounds; shredded stover, last ninety-eight days, 10.29; clover hay, 1.56; oat straw, 8.19.

The middle of December probably marks an average time when the corn stalks are well cleaned out. By the end of the 140 days it is expected to again resort to the meadows for feed. With unfavorable conditions, especially in the northern states, the feeding period would be longer. The oat straw in these experiments was freely given and the average amount eaten represents what the cows actually consumed. The extra amount eaten by Lot 2 is supposed to have practically taken the place of the wasted fodder, which item of loss did not appear in the silage-fed lot. Lot 3 did not receive any clover hay until the first part of March when their unthriftiness called for a change, which seemed to indicate that stover and straw did not make a satisfactory ration.

The results of the three rations are brought out in the condition of the animals and their gains. The silage-fed cows made 150 pounds gain, the shock corn-fed, 106, and the stover-fed, 57 pounds. It is stated that the first two lots were as sleek and glossy as could be desired, while a casual observer could see that the third lot was sluggish and "out of condition." The average cost of keeping a cow one month on silage, clover hay and straw was \$1.47; on shocked fodder, clover hay and oat straw, \$1.39, and on shredded stover, oat straw and a small amount of red clover, ninety-three cents. With corn at thirty-five cents per bushel, it costs thirty-seven cents more to keep a cow on silage for the 140 days than on shock corn, with the same supplements used in both cases but since the silage-fed cows gained forty-four pounds more it emphasizes the value of silage for this purpose.

The feed of each cow will be seen to be rather high in the average daily amount consumed for the period, but this is due to the fact that soon after the cows had calved it was found necessary to increase their rations until they were eating approximately twice the amount necessary to maintain the same cows while dry. The offspring was found to be more thrifty and vigorous from the silage-fed cows than from the others, though not so appreciably better than those from the shock corn-fed lot.

In order to make a further comparison of the three rations, the author calculates the number of acres required to winter cows by this method. It will be noted that the oat straw and stover-fed yielded also a certain amount of grain;

hence these two feeds are placed on a money basis and considered as the part of an acre which their value constitutes. Thus we find that a cow fed silage, clover hay and oat straw can be wintered on one-third of an acre; on shocked fodder, clover hay and oat straw on a trifle more; and on stover, oat straw and a small amount of clover hay, on one-fifth of an acre. No account of labor or the value of the fertilizer produced was taken. Dry, protected quarters were supplied and conditions were made as favorable as possible for the welfare of each lot.

From the facts above given we might conclude that a beef cow can be wintered in good condition on shock corn, clover hay and oat straw for about \$7, and knowing the cost of her summer keep, which will vary in different localities, one can make a fair estimate of the cost of raising calves for the feed-lot.

WHAT CONSTITUTES A GOOD CORN CROP.

There are few men in the central West who have not been aroused to do better work in the selection of their corn on account of the general agitation of this subject which has largely emanated in recent years from the experiment stations. In every locality may

be found individuals who are growing the so-called "pure bred" corns. In most cases these corns are yielding more than the ordinary varieties and those who have found this to be true are generally trying to instill into the other fellow the advantage of the new kind over the old.

There are a number of varieties of corn that differ slightly in the details of their outward characteristics and yet are much the same in general type. A table given in a recent Kansas bulletin proves this to be true. Of thirteen varieties mentioned, ten have a standard length of from ten to ten and one-half or eleven inches. The circumference of the same ten varieties is from seven to seven and three-fourths inches. They are all tapering, or slightly tapering and the percentage of grain in each varies only from 84 to 88.

These varieties are so similar in character, therefore, that there must necessarily be but small difference in the yield per acre when they are grown under conditions to which they are properly acclimated.

We would advise no man to undertake to improve a scrub variety, it being much better to obtain from some source, something that is more or less

fixed in type. However, where considerable improvement has been made by judicious selection from year to year, it is generally inadvisable to make a change. If, for example, the best ears in one's corn are around ten inches in length and are fairly cylindrical, and if the circumference runs from seven to seven and three-fourths inches and the kernels are of fair length and if one's fields show but few barren stocks and the yield is satisfactory, we would say that this is the "type" that should be grown. It matters very little whether it has a high-sounding name or not, or whether it is one of the recognized standard varieties. The thing to be aimed at is the yield of the sound corn per acre and the kind that will give the yield, is the kind that should be grown, regardless of what is said by experiment stations, corn judging schools, farmers' institutes, or any other organization.

In fixing one's type by selection from year to year, we strongly believe in keeping in mind what might be called the beauty point. Straight rows not only look well, but this means uniform kernels. A cylindrical ear is not only the right kind from a theoretical standpoint, but also from a practical, because on such an ear there are more kernels of uniform length than on one that is tapering. If the butt and tip are well covered and yet the length kept up in one's selection this means just a little more corn, and it is the corn that we are after. In the matter of color, one cannot be too particular because this is the best indication that corn is being kept pure.

RATIONS FOR WORK HORSES.

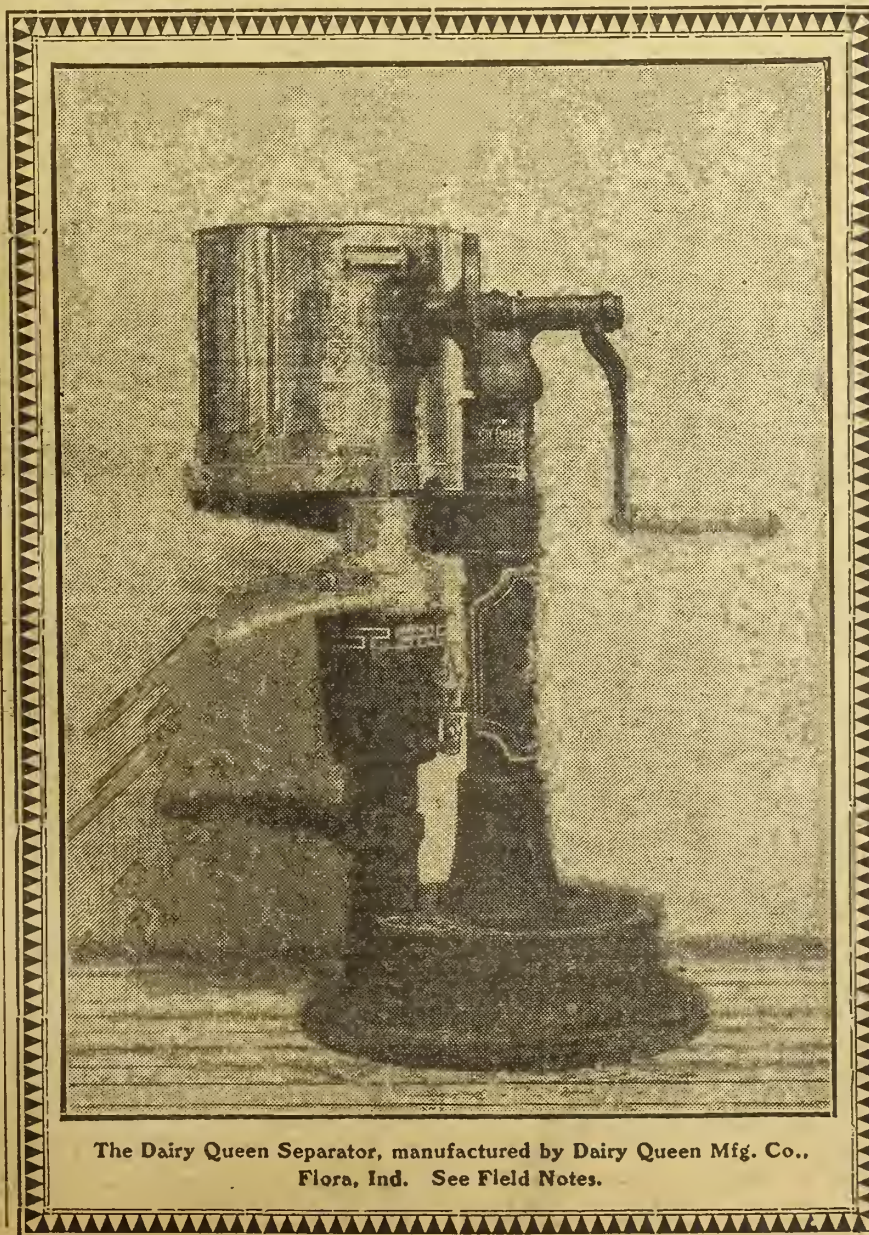

One of our subscribers, Mr. J. C. Williams, Ashland county, Wis., asks for information on the question of feeding work horses, as follows:

Please let me know the amount of feed to be given a team of 2,600-pound draft horses at moderately hard work on the streets and the farm. Whole oats and good timothy are fed, but the teamster seems inclined to overfeed with hay.

Regarding the grain part of the ration we would say that oats is about an ideal food, but a ration that is generally considered more economical and perhaps one that will keep the team in better flesh and as cheerful spirits is composed of shelled corn fifty pounds, oats fifty pounds and wheat bran twenty-five pounds. From a pound to a pound and half of this mixture for every one hundred pounds of weight will keep a work horse in good condition.

On the amount of hay a horse should be allowed, horsemen differ, but a general rule is to feed from one to two pounds per hundred weight of horse, depending on the amount of work the animal is doing. Fully one-half of this amount is fed after the day's work. The appetite of a horse is usually in excess of his powers of assimilation, so that it is not difficult to overfeed him with good timothy, a thing that he dearly loves. If our correspondent's horses are dull and lacking spirit and have rough, hard-looking coats, it is not unlikely that the hay feeding is being overdone.

If other details in the care of the team are being properly looked after, each horse should do well on about fifteen pounds of grain fed in three equal parts daily and about an equal amount of hay, both amounts reduced whenever the team is not working for several days, as there is danger of azoturia, a poisoning of the system from overfeeding an idle horse.

The Dairy Queen Separator, manufactured by Dairy Queen Mfg. Co.,
Flora, Ind. See Field Notes.

INVESTIGATING THE BUSINESS OF GRAIN DEALERS.

Before congress adjourned its last session the senate ordered the Interstate Commerce Commission to investigate the grain business with a view of finding out whether or not methods now in vogue tended to restrain trade. In accordance with this ruling Messrs. Clark and Lane, of the commission, held sessions in Kansas City, Omaha and Des Moines last week.

Mr. E. W. Shields, active manager of the Simonds-Shields Grain Company, of Kansas City, and also the elevator agent of the Chicago, Milwaukee & St. Paul Railway, testified before the commission that during the time when the special export rate on corn was established he was able to purchase at least 1,000,000 bushels of corn before other dealers learned that the reduced rate would be made. In another instance when a cut in rates was made for the purpose of equalizing rates to Atlantic and Gulf points Mr. Shields sold 700,000 bushels for delivery under the new rate. When the special rate for corn was in effect he sent out 100 cars of corn a day.

Mr. George K. Walton, of the Logan Grain Company, testified that on September 28th he ordered five cars of grain hauled to the Milwaukee elevator with instructions to Simonds-Shields Grain Company to unload, reload and get the grain out as rapidly as possible. This grain was not shipped until October 8th, though during the time he was urging action there were 212 cars loaded out by the Milwaukee elevator. He said that all orders to handle grain by the elevator must go through the Simonds-Shields Grain Company. The records of the Simonds-Shields Grain Company and the Milwaukee elevator showed that there were no charges for handling, cleaning and clipping grain during September, though the tariff provided that there should be.

In Des Moines the commission gave a hearing to Third Vice-president Hiland, of the Milwaukee road, touching on their relation to the Simonds-Shields Company, of Kansas City. He testified that to his knowledge Mr. Shields was given no advance information concerning the lowering of rates whereby he would have advantage over a competitor. He stated that charges in tariff rates were always published in the daily papers and grain men expected to be informed from this source. When the rate was reduced on export grain Mr. Hiland stated that no advance information was sent to Mr. Shields. The testimony taken at Kansas City and Des Moines indicated that certain orders issued by Vice-President Hiland were not being carried out, though the delay in getting these orders enforced may have been in violation of the interstate commerce law.

The testimony taken in Des Moines by the commissioners indicated that there has been concerted action on the part of certain members of the grain dealers' association to crush out farmers' elevator companies. It was claimed by the secretary of the Iowa Grain Dealers' Association that opposition to these companies was entirely due to the penalty clause under which they are operating. Letters in possession of the commission indicated that the Iowa Grain Dealers' Association has attempted to destroy the terminal markets for those considered "irregular."

Mr. C. G. Messerole, president of the Farmers' Grain Dealers' Association of Iowa, testified that the Iowa Grain Dealers' Association had attempted to run him out of business and he filed documentary evidence to that effect with the commission. He stated that the Iowa Grain Dealers' Association offered to stop the fight on him if he would strike out the penalty clause which requires a member of the Farmers' Company to handle his grain through his own elevator or to pay a penalty of half a cent a bushel. He stated that this penalty clause was absolutely necessary because old-line companies would put the price beyond a point the market would bear and consequently obtain grain and eventually drive the farmers' elevator out of business.

The statement made by several members of the Cereal Club of Des Moines did not harmonize. Secretary Wells stated that these meetings were held for general discussions and that no attempt was made to fix prices and that the members of the club did not vote as to what should be the value of a given grade of grain. The testimony of E.

W. Harper was diametrically opposite to the testimony of Mr. Wells. He stated that a vote was frequently taken at these meetings on prices and expressed by lifted hands as a basis for quotation for the ensuing week. In the opinion of Mr. Harper the so-called case cards were based on information furnished by the Cereal Club of Des Moines.

Other witnesses testified that they were obliged to pool with their competitors in order to hold their own share of the business. Mr. S. B. Williams, of Madrid, Iowa, pooled with competitors from Nov. 1, 1903, to Sept. 1, 1906. During this time the elevator doing the largest business turned the balance over to its competitor at an advanced rate of one-half cent a bushel. The pooling contract was canceled September 1st.

Peter Ide, of Story City, Iowa, in part testified:

In June, 1906, Wells (secretary of the grain dealers' association) read to me an agreement to equalize grain purchases and urged me to join the association of grain dealers, and to go into a like contract. I refused. He said that terminal facilities would be better if I would, and there would be no fighting and prices would not be boosted to drive me out of business. I did not join. Wells came up once, later, and said that if he had anything to do with it the price would be pushed up by my competitor. It has gone up a cent and a half. I still get the grain, but without profit.

Mr. W. G. Case, whose name was frequently mentioned by parties testifying before the commission, was placed on the stand and interrogated in detail with respect to the cards furnished grain buyers. He stated that the information on these cards was obtained from a close study of all the markets and that they were furnished at fifty cents a month to all parties who subscribed for them. He contended that they were used by grain buyers for reference and that they had nothing to do with the fixing of prices. He denied that the Cereal Club authorized the cards or that the grain dealers' association had anything to do with it.

JUDGES AT THE INTERNATIONAL.

Great as some of the fairs that have been held this fall are and important as each has been to the locality in which it is located, it must be frankly admitted that all the fairs combined are but preliminaries to the great International held in Chicago. This year the International comes from December 1st to 8th. The mammoth amphitheater which was nearly finished for last year's fair has now been completed and everything is in readiness for the 1906 show. The manager, W. E. Skinner, goes on record as saying that the present outlook indicates that the coming fair will be the largest ever held.

The board of directors have recently held a meeting at which the important business of selecting judges was transacted, with the following results:

CATTLE.

Short-horns—Breeding and fat classes, J. H. Miller, Peru, Ind.; Wiley Fall, Des Moines, Iowa; John Lewis, Lafayette, Ind. Angus—Breeding class, Prof. W. J. Rutherford, Ames, Iowa. Fat Class, Louis Pfelzer, Chicago. Carload Class, Louis Keefe, Chicago.

Hereford—Breeding Class, N. H. Gentry, Sedalia, Mo. Fat Class, W. S. Van Natta, Fowler, Ind.; Thos. Mortimer, Madison, Neb.; Thos. Clark, Beecher, Ill.

Galloway—Breeding and Fat Classes, Judge J. Calvin Ewing, Youngstown, Ohio.

Red Polled—Breeding and Fat Classes, J. H. Gillilan, Colorado Springs, Col.

Polled Durham—Breeding and Fat Classes, Prof. Thos. Shaw, St. Anthony Park, Minn. Grade and Cross-bred and Champion Steers, foreign judge, Arthur P. Turner, Pembroke, England. Carload Fat Cattle, James Brown, Chicago. Carload Feeder Cattle, Harry Schirding, Petersburg, Ill. Carcass Cattle, Wm. Russell, Chicago.

SHEEP.

Shropshire—Breeding and Fat Classes, Geo. Allen, Lexington, Neb. Southdown—Prof. G. E. Day, Guelph, Canada.

Oxford—H. L. Compton, Monroe, Ohio. Hampshire—P. W. Artz, Osborn, Ohio.

Dorset—Arthur G. Danks, Allamuchy, New Jersey.

Cheviot—Prof. J. H. Skinner, Lafayette, Ind.

Cotswold—J. Hal Woodford, Paris, Ky. Lincoln—To be selected.

Leicester—J. M. Garbouse, Weston, Ontario.

Rambouillet—Prof. C. S. Plumb, Columbus, Ohio; Prof. J. H. Skinner, Lafayette, Ind.; Prof. W. C. Coffey, Urbana, Ill. Grade and Cross-bred and Champion Sheep, Frank Fisher, Chicago. Carload Sheep, Robt. Mathison, Chicago. Carcass Sheep, H. A. Phillips, Chicago.

SWINE.

Berkshire—W. D. Fletcher, Lowell, Mass. Poland China—J. M. Kemp, Kenney, Ill. Chester White—To be selected.

Duroc Jersey—To be selected.

Tamworth—E. N. Ball, Hamburg, Mich. Yorkshire—J. J. Ferguson, Chicago.

Hampshire—J. E. Price, Lexington, Ky. Grade and Cross-bred and Champions, Chas. Goepper, Chicago. Carload Swine, George

Chandler, Chicago. Carcass Swine, Harry Boone, Chicago.

HORSES.

Percheron—Prof. C. F. Curtiss, Ames, Iowa. Clydesdale—Prof. W. L. Carlyle, Ft. Collins, Col.; Prof. Geo. C. Humphrey, Madison, Wis.; Prof. F. R. Marshall, College Station, Texas.

Shire—Alex. Galbraith, Janesville, Wis. Belgian—Wm. Bell, Wooster, Ohio; W. E. Prichard, Ottawa, Ill.; Prof. Wayne Dinsmore, Ames, Iowa.

German Coach—Mat Biers, Mendota, Ill. French Coach—Harry McNair, Chicago.

Hackney—Henry Fairfax, Aldie, Va.; Prof. W. L. Carlyle, Ft. Collins, Col.; Prof. W. J. Kennedy, Ames, Iowa, referee.

Shetland Ponies—Wm. J. Sampson, Youngstown, Ohio.

Ponies Other Than Shetland—Wm. J. Sampson, Youngstown, Ohio.

Draft Horses in Harness—Prof. C. F. Curtiss, Ames, Iowa.

SUPERINTENDENTS IN CHARGE OF DEPARTMENTS:

Cattle—Thos. Clark, Beecher, Ill.

Horses—R. B. Ogilvie, Chicago; J. S. Cooper, Chicago.

Sheep—Mortimer Levering, Chicago; C. F. Kurtze, assistant, Indianapolis, Ind.

Swine—A. J. Lovejoy, Roscoe, Ill.; C. F. Kurtze, assistant, Indianapolis, Ind.

Carloads—Richard Gibson, Delaware, Ont.; J. W. Martin, Gotbam, Wis.

Carcasses—Prof. C. F. Curtiss, Ames, Iowa; Prof. Wayne Dinsmore, assistant, Ames, Iowa.

Students' Judging Contest—Superintendent, W. J. Black, Winnipeg, Manitoba.

Horses—Judges, Jas. Z. McLaughlin, Janesville, Wis.; J. M. Fletcher, Wayne, Ill.; Prof. W. L. Carlyle, Ft. Collins, Col.

Cattle—F. W. Harding, Waukesha, Wis.; O. E. Bradute, Cedarville, Ohio; Prof. H. W. Mumford, Urbana, Ill.

Sheep—N. Noel Gibson, Millbrook, N. Y.; Geo. McKarrow, Pewaukee, Wis.; Prof. R. S. Shaw, Agricultural College, Mich.

Swine—N. H. Gentry, Sedalia, Mo.; W. D. Fletcher, Salem, Mass.; Prof. W. B. Richards, Agricultural College, North Dakota.

Judges for College Classes—Arthur P. Turner, Pembroke, England; Frank Fisher, Chicago; Chas. Goepper, Chicago.

Judges for Finished Product—College Exhibit—G. Howard Davison, Millbrook, N. Y.; W. A. Henry, Madison, Wis.

Practically every name on this list is that of a man who has not only state but national reputation as a judge of live stock. The public, we believe, is justified in holding the opinion that the ribbons as tied at the International will proclaim accurately to the world the relative merit in all classes.

FALL PLOWING FOR SPRING GRAIN.

A subscriber of King City, Mo., sends the following communication:

Would you advise fall plowing land intended for oats in spring or would it be better to do the plowing in the spring? There is difference in opinion in this locality on this matter and I wish you would bring these things out a little.

It depends very largely on the kind of crop produced on this land in 1906. If it is sod ground or if it produced a crop of small grain, we would have no hesitancy in advising that the land be plowed this fall. On the other hand, if the land is now in corn it might be advisable to do no plowing, either in the fall or in the spring. In this case, of course, the land must be thoroughly disked in the spring in order to prepare a seed bed for the oats.

The advantage of fall plowing compared with spring, in the case of sod and stubble land, is due to the fact that the soil becomes much more firm. This is desirable in growing any kind of small grain crop. Indeed, this is why it is better not to plow corn land at all, because in that case disking insures a good seed bed, while the lower soil remains firm and thereby prevents growth of too much straw which is always apt to lodge.

A Short Course in Agriculture.

There is one kind of education that is rapidly growing in popularity. We call it "useful" education. To a large extent our agricultural colleges and experiment stations are responsible for the dissemination of this kind. Its increase in popularity is indicated in two ways: First, by the increase in attendance in both the long and short courses at these institutions, and second, in the increase in the number of the agricultural short-course schools being established here and there throughout the corn belt.

Red Oak, Iowa, is a point that has become noted on account of the success attained by the local agricultural school. During the last few years a one-week school held at that point has been attended by several hundred young men and women of the surrounding country. This year the date for this school has been set from January 14th to 19th, inclusive. Professor Holden, of the agricultural college, will have charge of the corn work and there will also be given a course in domestic science under the supervision of Mrs. Jones, of the agricultural college. Some live stock judging

For Heavy Loaded Party Lines
"ELLIOTT" TELEPHONES
 Bona-Fide "World Beaters." 18 Years Experience. Extra Powerful High Grade. Guaranteed to Ring 25 to 40 Phones on one line, loud and clear. Space too small here to name many valuable features of "ELLIOTT" Phones. Be wise, write for elegant Catalog, or write for our Special Offer on first order from your section. You'll not regret it.
 ELLIOTT TELEPHONE & ELECTRIC CO.
 Indianapolis, Ind.

will also be included, and for this purpose some of the very best herds from the surrounding country will be used for instruction purposes.

This is not a money-making institution, but strictly intended to disseminate agricultural enlightenment. Those who have been instrumental in establishing it determined that as the majority of the farmers in the locality could not attend an agricultural college; it was only feasible to try the plan of bringing the benefits of the agricultural college to their people. Marvelous success has crowned the efforts of these men.

Mr. A. C. Gustafson, of Red Oak, Iowa, has active charge of this school and those of our readers who desire further information concerning it should communicate with him.

Send Us Your Subscription Today.

Five excellent newspapers and magazines for \$1.25 a year—supplying your home with news, literature, agricultural information, market reports, entertainment and general instruction all the year round. If already a subscriber for one or all, your time will be extended for one year. All these for \$1.25:

The Chicago Weekly Inter Ocean, a grand general newspaper for the family—all the week's news, reliable market reports, a wealth of prose and poetical miscellany, departments for women and children, something for each member of the household.

The Kansas City Weekly Star, an able, fearless, independent newspaper, filled with information and entertainment, containing much that you cannot find in any other paper.

The Homestead, the greatest farm paper in the world, reaching more than double the number of paid subscribers taking any other weekly agricultural paper in its field, having departments covering every interest of the farm; edited by actual farmers and numbering among its contributors a larger number of successful farmers, breeders and experiment station workers than any other farm paper.

The Homemaker, a delightful monthly of entertainment and instruction for the women folk of the farm; something to brighten the lives of your wife and children.

The Farm Gazette, the most beautiful farm magazine in the world; elegant illustrations, printed on fine paper; cover in five colors; reading matter both helpful and entertaining.

Send us \$1.25 today, stating whether your subscription is a new one or a renewal. Address, The Homestead Co., Des Moines, Iowa.

An interesting article, explaining the theory and the object in the arrangement of the tread as used on the Litchfield Manure Spreader, is given on page 5 this week.

HOMESEEKERS' EXCURSIONS. CHICAGO GREAT WESTERN RAILWAY.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arkansas, Indian Territory, western Louisiana, Mexico, New Mexico, Oklahoma Territory and Texas at rate of one fare plus two dollars for the round trip, except that a maximum rate of \$23.00 from Des Moines will be in effect to above territory with the exception of Mexico. Stopovers will be allowed in both directions. Limit thirty days, stopovers both ways.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arizona, Kansas, Missouri, Nebraska, Nevada, Utah, Wyoming, Alabama, Florida, Georgia, Kentucky, eastern Louisiana, Mississippi, North Carolina, Tennessee and Virginia at rate of one fare plus two dollars for round trip. These have limit of twenty-one days to return and allow stopovers on going trip.

On the first and third Tuesdays of each month until November, homeseekers' tickets will be on sale to Denver, Colorado Springs, Pueblo, at rate of \$23.00 from Des Moines and to Ogden and Salt Lake City at rate of \$23.50. Other Colorado points in proportion, all having limit of twenty-one days to return and allowing stopovers on going trip.

To points in Idaho, Montana and Washington homeseekers' tickets on sale the first and third Tuesdays of May, June, September, October and November at rate of one fare plus two dollars for the round trip, tickets having limit of twenty-one days to return.

To points in Minnesota, North Dakota, Manitoba, Saskatchewan and other Canadian provinces, homeseekers' tickets are on sale each Tuesday this year. Have limit of twenty-one days and allow stopovers west of St. Paul.

Full information can be obtained from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Farm Furrows

Turned by a Practical Farmer.

It will not be a great while until that beef ring should be organized and rehabilitated. The benefits of a beef ring are many and most essential.

High farming consists of attempting to raise the largest possible product on the whole farm. Good farming is to raise products at the greatest possible profit.

It is about this season of the year that we have a suspicion that the "weigh of the transgressor is about 1,800 pounds for a ton of coal." Scales at home will get around this old trouble.

Jonathan says to Ben Davis: "It is in a time of great plenitude when I get left, but it seems that I am here to stay with you this year, Ben." "Jonathans are a drug on the market," is a Missouri item.

It is claimed that George Washington was the first breeder of high-grade mules in America. Being dissatisfied with the work of horses, he at once bred a lot of high-class mules for service on his big Virginia farm.

The Illinois Experiment Station has found out that a larger yield of oats can be obtained by drilling than when sown broadcast and that less seed will be required. One bushel less is required where a drill is used and the yield is six bushels more.

There is at this time such a demand for hornless cattle in both dairy and beef herds that muleys are at a premium. So, many are engaged in producing a hornless strain. There are some polled cattle in all breeds and these are employed as starters.

I have lived long enough and have raised enough children to note that it is wrong to nag children about their faults. It is better to turn their minds to something else and their faults will gradually disappear. Talk sunshine and the clouds will soon vanish.

I have tried growing raspberries with and without mulch. Some of the advantages of mulch are: It prevents the growth of weeds; retains moisture; adds humus to the soil; prevents mud at picking time and keeps the fruit clean. The question with me is, does it pay?

Indian summer does not come in the summer time, but we can stand a lot of it, just the same. It takes us back to the time when we sodded up the house with prairie sods, made the fire-break effectual, picked the snow apples and rolled a barrel of cider into the cellar.

It has always been a mystery to me why anything as cheap as buckwheat would be adulterated by the addition of cement or other deleterious substances. We now have a pure-food law that ought to insure greater purity. Let us have pure food of all kinds at whatever cost.

When I was a boy it was the common practice on farms to call the hands to meals with the dinner horn, but I rarely hear one these days. The modern farmer and farm boy have a watch and at the appointed time the heads of the horses are turned dinner-ward and supper-ward.

One good thing can be said of a straw-stack hog house. It does not have a foul smell, as many hog houses do. A hog will keep its bed clean if given a chance, but it does not have reasoning powers that will enable it to escape the extremes of heat and cold usually found in a straw-stack bed.

According to the National Stockman, the demand for pork this year has astonished even the most sanguine friends of the hog. Both fresh and cured meats have been taken in large volume right along at prices which were so high that they were expected to check consumption. There are three reasons why this condition has existed and still exists. First is the prosperity of the South, a large consumer of cured meats. The southern trade was never larger than it is today. Next is the growing foreign trade, which like our own seems to proceed regardless of prices; and, finally, the people of this country have learned to eat bacon. Its consumption is unprece-

Montgomery Ward & Co.'s No. 75 Catalogue Now Ready FREE

Nearly 1300 large pages, thousands of pictures, 127,000 articles. The biggest bargain book ever printed. Beats all Catalogue records for quantity, quality and low prices. Full of many things you want that you cannot buy near home and multitudes of things of better quality and at lower prices than any other catalogue or store offers you.

Send for Your FREE Copy Today.

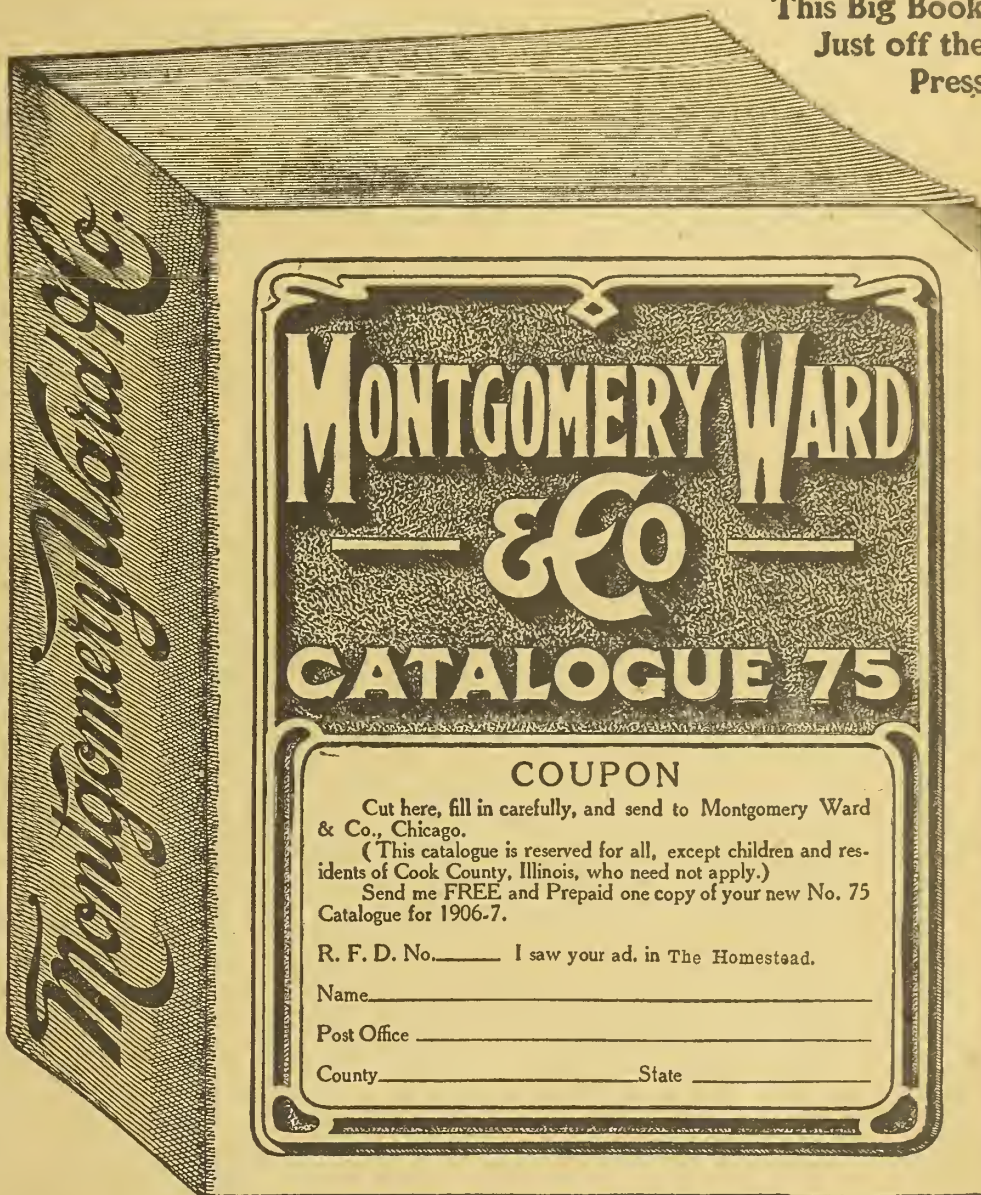

\$50.00 a year, at least, is easily saved by every one using this No. 75 Montgomery Ward & Co. Catalogue to order goods from. Many write us of saving hundreds by being our regular customers. It pays others, it will pay you. We are the originators of the Catalogue business. We have been square with our millions of customers for 35 years—we will be square with you

We Make No Charge For This Great Catalogue

We even prepay the postage. Ordering a copy of this large Free Book puts you under no obligations to buy anything of us. We ask you to send for it, read it, look at the pictures and prices, and then when you find out how much money it saves you you will be glad to order from it, for it means a saving of 20 per cent to 50 per cent on everything you wear, eat or use in any way. Remember this is no partial list or imitation of the Montgomery Ward & Co. Catalogue, but is the genuine, the latest, the complete, new, large Montgomery Ward & Co. Catalogue, Number 75, for fall of 1906 and all of 1907, full of the very latest styles and newest city goods of every kind that you can possibly want or use. **DON'T DELAY**—send for your copy today. It will go to you at once, by return mail if possible, all prepaid and absolutely free of all cost.

Montgomery Ward & Co., Michigan Avenue, Madison and Washington Streets, **Chicago**

dented in our history, and is still growing. There has been no shortage in numbers of hogs, but a vastly increased demand. This is why prophecies based on hog supplies have failed and are likely to fail in the future.

The free seed delivery has done some good in the world after all. The agricultural department at Washington brought us sorghum from China, and kafir corn has been given the semi-arid country of the southwest. Macaroni wheat has been brought from Russia, and Japanese rice from Japan.

A storm sash is the best way to shut out Jack Frost from the cellar windows. If this is not provided, leaves will be found the next best. It pays to make the cellar frost proof long before there is any danger of low temperature. Forty years ago we made the cellars of our houses warm by building up prairie sods.

A horse that acts ugly when being curried probably has some reason for his

action. He probably has a thin skin and a sharp comb irritates him. It does not pay to fight with a horse that does not like to be curried with a sharp comb; it is far better to use a coarse brush. I have often washed one horse I have that does not like a sharp curry-comb.

The elevator attachment for the potato digger is all right some seasons and in some localities, but occasionally it will not distinguish the potatoes from clods and stones about the same size of the tubers. In such cases it is better to pick them up in the old-fashioned way, employing baskets with handles like a pail. The half-bushel size handles better than a larger basket.

For twenty years the Ohio Experiment Station produced an average of forty bushels of wheat in a three-year rotation consisting of potatoes, wheat and clover. On another farm a rotation of corn, oats, wheat, clover and timothy was carried on with a yield of twenty-eight and one-half bushels of wheat per acre. With proper market privileges for

a series of years a clover, potatoes and wheat rotation will be hard to beat.

Hill, the railroad magnate, says that in twenty years we will have 130,000,000 people and asks where they are to be employed and how are they to be fed. In a century the coal supply will be practically exhausted. In the face of these facts, if they be such, and there is no reason to dispute them, every farm properly cared for should be worth more money for each year of the period. There will be a growing dependence on the fruits of the soil.

If a garden is manured heavily and not kept in growing crops all through the growing season the fertility will leach away into the subsoil, where it will be out of the reach of surface-feeding crops. If kept growing something all through the summer it will not leach and it will be all the better for the soil. If allowed to leach it will be better to change the spot occasionally and put the old garden spot to clover to bring up the fertility again.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscribers, \$1 a year; ten copies one year, \$10, and an extra copy to letter up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

REARING BEEF CALVES.

Although animals intended for the block are marketed much younger in these days than they were in former times, it is to be doubted if on the average we have yet reached the point in our feeding operations that results in maximum profits.

The average man who raises his own steers makes two mistakes, and these are so frequently made that we often hear it stated that one cannot raise steers at a profit on land worth \$100 an acre. Our first handicap is that we do not use enough prepotent beef sires. While at a farm sale recently we noticed that grade bulls seven and eight months old sold readily at from \$50 to \$75. They were almost eagerly snapped up by farmers who kept all the way from ten to twenty-five cows. In that very neighborhood one could find pure-bred animals of much better individuality that were selling from \$75 to \$150. Now, in our opinion, the difference in the price of sires from these two classes is so insignificant compared with the results that it is almost beyond one's comprehension to understand why there should be found sale for the grade at all.

The second mistake is that calves are not fed well enough during the first six months. There is no time in the history of an animal intended for the block that feed will do so much for it as during the first six months. Under average conditions it does not pay to let the steer calf suck. If he is fed new milk for three or four weeks and then put on ten or twelve pounds a day of warm skimmed milk, together with about all the ground oats and corn he will eat, it is surprising what weight he will attain by the time he is six months old. But the grain ration should not be dropped then. If it is kept up a well-bred steer can be made to weigh all the way from eight to ten hundred pounds when he is a year old. Of course an extra good one, if he is well stuffed, may be made to go twelve hundred pounds, but this kind of feeding is hardly practicable under average conditions.

A steer that weighs eight or nine hundred pounds at twelve months ought to make a gain of two pounds a day during the next six months, and this brings him right around twelve hundred pounds at eighteen months old. You have then a \$50 or \$60 steer at average market prices and you have only kept him eighteen months. Mr. S. B. Packard, of Marshall county, Iowa, a staunch believer in the marketing of steers at an early age, has placed himself on record as believing that 1200-pound steers can be made at a cost of \$26 for grain, forage and grass. At this estimate a profit would be realized on the grain fed and if the steer brings \$60 there is the additional profit of \$34.

We realize that these figures are not accepted without some questioning by the average man, and yet we know from

experience that they are not extravagant. It is not an unusual thing to find men with pure-breds making their young heifers and bulls weigh ten or eleven hundred pounds at twelve months old, and if one's herd of cows were well graded up and a good low-down, thickly-fleshed bull were used, practically the same results could be obtained with high grades.

We have no use for a pure-bred bull of questionable individuality, but we do say that at the present time there are good pure-bred bulls selling in various parts of the corn belt for less money than they are really worth, simply because we have not fully realized the importance of good blood in the feed lot. We need good blood to get the gains; we need it to get early maturing qualities, and we need it when we go to market if we expect to get the top price.

SURFACE DRAINING LAND.

So much has been said in recent years about the tile draining of land that we sometimes lose sight of the fact that water can be removed from a soil in any other way. As a matter of fact it is often possible to remove water by surface drains inexpensively and sufficiently rapid to answer the purpose of drainage fairly well.

Certain soils are so close in texture as to render tile drains almost impracticable, and in such cases farmers who handle this kind of land usually learn to get rid of the water with a wonderful degree of skill.

The fall of the year is the time to begin operations in an attempt to remove water by surface drainage. Take a fall-plowed field, for example. Scrape out with the ordinary road scraper an open ditch throughout the entire length of the draws. This need not be deeper than about a foot and not more than two or three feet wide. The sides should be flaring so that machinery will pass over the ditch without difficulty. Into this main any number of surface laterals may enter. Usually these are made with a plow, though ordinarily it pays to go over them with a shovel and clean out the loose dirt.

Where land is fairly level it may pay to run a furrow every twenty or thirty feet. If this is done it is surprising how water in the spring will seek these channels, and, of course, find its way into the main open ditch and down to the outlet. Surface tillage in the spring will fill in the shallow laterals so that this system of drainage need not interfere materially with cultivation. If there is danger from too much water after the crop is in, it is then entirely practicable to go into the field with the plows again and furrow out the land much in the same manner as was done in the fall. It may seem a little like performing useless labor to make these shallow ditches and in turn fill them up by cultivation and then to open them out again. However, as said before, where tile does not operate or where there are cases where scarcity of labor or scarcity of capital makes tiling impossible, the system that is here advised may be used with reasonable expectation of getting results.

AMERICAN CANNED MEATS ARE GOOD.

The investigation of packing house affairs made earlier in the year, resulted in creating considerable sentiment abroad against the character of American meats. This was particularly true as applied to canned products.

Recently, two well-known butchers from England visited the Union Stock Yards of Chicago, and spent some time investigating the methods of every department of the packing houses. Special attention was given by these foreign inspectors to the methods employed in putting up canned goods and sausages. Their report has recently appeared in a London Meat Trades Journal. The commissioners say:

The slaughtering is exceedingly well done, and in the most expeditious way, while the workmanship of the butchers is splendid, and if less water were used on the beef we think it would be advantageous, especially to the butcher who buys on this side. The refrigeration is carried out on the most modern principles, and the meat generally is handled in the best possible way.

The canning department seems to us to be especially well organized and supervised. The greatest care and cleanliness are observed, machinery being used wherever it can be made available, and we failed to see any evidence whatever to justify the violent and grossly exaggerated attacks that have been made on these firms in this connection. The inspection is rigid—the government appointing any number of inspectors it considers necessary for the work in hand, and each

Double Volume of Sound.

THE Duplex is the first and the only phonograph to collect the vibrations and get all the sound from both sides of the diaphragm.

Because the reproducer or sound box of the Duplex has two vibrating diaphragms and two horns (as you see) to amplify the sound from both sides of both diaphragms.

The Duplex, therefore, gives you all the music produced—with any other you lose one-half. Compare the volume of sound produced by it with the volume of any other—no matter what its price—and judge for yourself.

Purer, Sweeter Tone.

BUT that is not all, by any means. For the Duplex Phonograph not only produces more music—a greater volume—but the tone is clearer, sweeter, purer and more nearly like the original than is produced by any other mechanical means.

By using two diaphragms in the Duplex we are able to dispense entirely with all springs in the reproducer.

The tension spring used in the old style reproducers to jerk the diaphragm back into position each time it vibrates, by its jerking pull roughens the fine wave groove in the record, and that causes the squeaking, squawking, harsh, metallic sound that sets your teeth on edge when you hear the old style phonograph.

In the Duplex the wave grooves of the record remain perfectly smooth—there is nothing to roughen them—and the result is an exact reproduction of the original sound.

Direct From Our Factory.

WE ask the privilege of proving to you that the Duplex gives a double volume of music, of purer, sweeter tone than any other phonograph made. We want to prove it at our expense. We ask you to let us send you one at our expense—under an arrangement mutually satisfactory—for use in your home one week.

Invite your neighbors and musical friends to hear it and if they do not pronounce it better—in volume

Write today for catalog and full particulars of our FREE trial offer.
You'll never regret it. Please address

The Duplex Phonograph Co., 179 Patterson Street, Kalamazoo, Mich.

ORDER EARLY.

Each horn is 30 inches long with a 17 inch bell.

An Entirely New Principle in Phonographs

- Two vibrating diaphragms to reproduce the sound.
- Two horns to amplify and multiply all the sound from both sides of both diaphragms.
- No tension spring and no swing arm to cause harsh, discordant mechanical sounds.
- Consequently, the Duplex produces a sweeter tone and greater volume of music than any other phonograph and is absolutely free from all metallic sounds.

Size of cabinet, 18 inches by 24 by 10 inches high.

and in tone—than the best old style phonograph, return it at once at our expense. That's a fair offer but it isn't all.

We save you in the price exactly \$70.15—because we save you all the jobbers', middlemen's and dealers' profits. We are actual manufacturers—not jobbers—and sell direct to you at factory prices.

Sold through dealers the Duplex would cost you at least \$100—and it would be a bargain at that. Bought direct from our factory it costs you (one profit added) only

\$29.85

And you get a seven days' trial in your own home—and under no obligation to keep it if you are not satisfied. You run no risk, for this advertisement could not appear in this paper if we did not carry out our promise.

Music In Your Home.

WITH the Duplex Phonograph you can enjoy a delightful selection of songs, poems, piano, banjo, guitar, or violin music, short stories, anecdotes or dialect pieces, all reproduced by the marvelous two horned Duplex with the faultless fidelity of an instantaneous photograph.

You can bring to your family and friends, in all their original beauty, the priceless gems of musical art, the classic performances of famous artists like Paderewski, D'Albert, Raoul Fugno, and Jan Kubelik.

Or, you can listen, entranced, to the magic notes of melody fresh from the throat of a Patti, Melba, or Calve, and the great dramatic tenors, Caruso and Tamargo.

And best of all, you can hear once more, the voice of dear old Joe Jefferson as, with matchless pathos he delivers the lines of Rip Van Winkle so familiar to a former generation.

With every Duplex we send free
three 10 inch records.

Inspector has only two and one-half consecutive hours on duty, so that his power of concentrating his attention to his duty is not interfered with by long hours.

We are of the opinion that the quality and purity of the products of the farms we visited are such that the British public need not have the slightest fear in consuming them.

This will undoubtedly have the effect of restoring, not only our former volume of trade, but it will be no surprise, if in the future it should go far beyond the bounds of former records. Investigations have shown that the packing houses of England are much less sanitary than those of this country—indeed, they are so bad there, as indicated by authentic reports, that there is no comparison in the matter of sanitary measures employed between slaughtering houses abroad and those at home.

The farmer is vitally interested in sustaining a good market for canned meats. In the very necessity of the case, a certain amount of this kind of meat is produced on every farm of the corn belt. When cows get beyond the age of usefulness, either as breeders or milkers, they are generally marketed as canners. The value of this class of cattle is never high, but with a reasonable foreign demand it is always such as to afford a fairly good outlet for low-priced products.

SEED CORN PHILOSOPHY.

One of our subscribers, Mr. H. H. Phelps, sends us the following communication relating to the matter of saving seed corn:

Forty years of experience in saving, caring for and planting seed corn has brought me to the following conclusions, namely, that there is more seed corn injured after it is saved than before. Moisture is responsible for nearly all poor seed. Moisture and heat injure as much seed as moisture and cold. A thoroughly-dried kernel if not injured before it becomes so will retain its vitality for years if it is protected from moisture. That the bran on the cob is the natural protector of the germ against moisture, so it should be left on the cob until ready to plant. The germ of a kernel of corn is very sensitive to moisture, especially if it has not been injured and the moisture is accompanied by heat. When the grain is perfectly dry it is dormant and the oftener

it is waked from this dormant state before it is planted, the weaker it is. There are so many ways that seed can absorb moisture that, without good judgment on the part of him who cares for it, failures will be common.

Unquestionably, moisture and heat are just as injurious for seed corn when in combination as moisture and cold. In too many cases men have come suddenly to believe that corn should be placed when picked in quarters where no freezing could take place. The result has been that in many cases it has been stored in warm, poorly-ventilated quarters, and of course such seed cannot possibly come out strong in the spring. The thing that must be done during the next few weeks is to insure perfect ventilation of the seed corn, and one should see to it that ears in storage do not touch one another. They do not touch in the field as they grow, and if we will look for them, nature throws out a good many hints that are of some assistance if utilized.

WILD WITH ITCHING HUMOR.

Eruption Broke Out in Spots All Over Body—Cured at Expense of Only \$1.25—Thanks Cuticura.

"The Cuticura Remedies cured me of my skin disease, and I am very thankful to you. My trouble was eruption of the skin, which broke out in spots all over my body, and caused a continual itching which nearly drove me wild at times. I got medicine of a doctor, but it did not cure me, and when I saw in a paper your ad., I sent to you for the Cuticura book and I studied my case in it. I then went to the drug store and bought one cake of Cuticura Soap, one box of Cuticura Ointment, and one vial of Cuticura Pills. From the first application I received relief. I used the first set and two extra cakes of Cuticura Soap, and was completely cured. I had suffered for two years, and I again thank Cuticura for my cure. Claude N. Johnson, Maple Grove Farm, R. F. D. 2, Walnut, Kan., June 15, 1905."

Low steel wheels, wide tires, make loading and handling easier. We furnish Steel Wheels to fit any axle, to carry any load. Straight or staggered spokes. Catalogue free.

EMPIRE MFG. CO., Box 103 F Quincy, Ill.

DAY BY DAY

Agricola

Country merchants are concerned as to the outcome of the pure food law. Here is one instance. Added eggs are unfit for food and selling them is a violation of the law. But how shall it be applied? Eggs are perishable property. Can the country merchant fall back upon the farmer of whom he bought them? He may not be able to identify the eggs. Or they may have been acceptable when the farmer sold them. They may "go off" enroute to the distant commission house, or in the wholesalers' hands, and the final purchaser, the consumer, may find them stale and unfit for food, but this does not fix the responsibility. Country merchants are anxious to have the exact application of the pure food law defined and made plain.

Corn is the chief crop of Kansas, Iowa, Nebraska, Missouri and Illinois. It is one of the easiest of crops to grow, one of the cheapest as to seed and harvesting, and its possibilities are yet unfathomed. Those of our readers who like Agricola live in the "corn belt" have cause for gratitude. But where is the corn belt? Here are Minnesota, Wisconsin, and the Dakotas flattering themselves that they are broadening the belt so that they also are "in it." All agree that the belt has natural limitations, but that the line of demarcation is rather indefinite and fluctuates with the years. But those who are near the limit take risks which we of the corn belt proper do not take.

The corn belt will never be famous for its production of sugar beets. The beets will grow, it is true, but conditions do not always favor a uniform stand, large leaf development and freedom from late growth which eats up the sugar. This conclusion is necessarily tentative, and subject to revision with larger experience. Corn can easily be tested as to profitability, as the seed is cheap, the labor home labor, and the machine for manufacture—the pig—portable. But a beet sugar factory costs some \$600,000, and an idle factory is a dreary sight from the view point of the owners. And its shadow is depressing to the whole country.

This year quite extensive beet planting

Buy **"PEERLESS"**
This **Pitless Scale**
\$46.50

U.S. STANDARD

We Pay the Freight.

You would pay from \$75 to \$100 for this scale if it had a steel frame.

The Peerless has a wooden frame and comes direct from the factory. That's why we can sell the Peerless at \$46.50 while others ask from \$60 to \$100.

Why pay a fancy price when you can get this absolutely dependable U. S. Standard Scale and keep 3/4 of that money in your pocket? No middlemen's profits stuck on to the Peerless.

30 DAYS FREE TRIAL

No Money in Advance.

No deposit, no notes to sign, nothing to pay unless you are satisfied—and you are the judge of that.

Let us send you a set. Test them for a month and make up your mind whether they are worth \$46.50. Keep them if you think they are.

Send for the free "Peerless" Pitless Scale catalog fully describing every part.

You will make a big mistake to buy a high priced scale before investigating the "Peerless."

has been done on the 43d parallel in Iowa; some 1,600 acres, but no one dared build a factory to manufacture them into sugar. The plan adopted was to ship them to a northern factory for this purpose. The results point to success on parallel 43, and a decision to build a factory there. With this as a base the same tactics will be used to find other localities and no one now knows how far south the sugar beet belt will be extended.

The average receipts for the first year on parallel 43 will be about \$50 per acre, some fields running up to twice that. This is called good for inexperienced hands.

Agricola has no use for the Sunday newspaper cartoons. They are not in accord with his sense of humor for any day of the week, but the legitimate cartoon has been effective for good, and the ill-advised cartoon has not been able to down the man who has right and justice on his side. Our readers who remember the civil war and reconstruction time will recall the trenchant cartoons of Thomas Nast in Harper's Weekly. He ridiculed Boss Tweed of New York City, and Abraham Lincoln. And Lincoln, the true-hearted, became loved and well nigh revered by all, but the false-hearted Tweed when he fled to Cuba, then a Spanish possession, was recognized by his cartoon and arrested as a kidnapper (the cartoon showed Tweed with a child in his grasp) and turned over to United States justice.

But let us go still further back. About one hundred years ago there appeared a cartoon in France representing Napoleon Bonaparte squeezing a sugar beet over his cup of coffee, and the infant child at the table, the King of Rome, had another sugar beet in his hand and the nurse was represented as saying: "Suck it, dear, suck it. Your father says it is sugar."

This shows the ridicule to which Bonaparte was subjected because he introduced beet sugar manufacture. But he had right on his side and came out conqueror in this battle.

And this is the way he "made good." Beets had but six or eight per cent of sugar—too low for profitable manufacture. He set his chemists to work analyzing individual beets. Those richest in sugar were reserved for mother beets, the beets grown from this seed were analyzed and the richest reserved for mother beets, and the following out of this plan has resulted in giving from 13 to 18 per cent sugar. The beets grown nowadays will probably run about 15 per cent sugar, and they are bought at the flat rate of \$5 per ton.

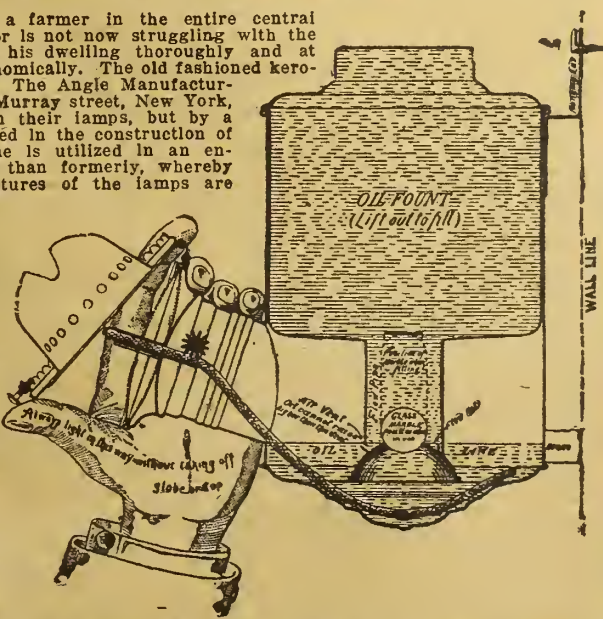

Talking of plant breeding, who can point to anything the equal in science and skill with that which has improved the sugar beet? Well, horticulturists will point to our improved apples and the sour crab, and we will accept their palatable apples, but then see how long a time they have been at it.

Referring again to the troubles of

THE HOUSE LIGHTING PROBLEM.

There is scarcely a farmer in the entire central West who has not or is not now struggling with the problem of lighting his dwelling thoroughly and at the same time economically. The old fashioned kerosene lamp must go. The Angle Manufacturing Company, of 78 Murray street, New York, still use kerosene in their lamps, but by a new principle involved in the construction of these lamps kerosene is utilized in an entirely different way than formerly, whereby all disagreeable features of the lamps are removed. These

lamps simply burn kerosene in a scientific way. They have been on the market ten years and are now found in some of the best homes in the United States. The Angle lamp gives a soft, mellow, restful light, and it is lighted like gas without removing globe or top. It is also extinguished by a single turn like gas or electricity. For further information concerning this wonderful kerosene lamp address the Angle Manufacturing Company, 78 Murray street, New York, and their illustrated catalog will be sent you. Look up the advertisement of this lamp on page 9 and when writing please mention this paper.

WHEELS

HOW DO THEY TRACK?

DID our readers ever wonder why some spreaders are made with narrow and others with wide front tread? Perhaps, like ourselves, you have concluded that on the average spreader there was no "plan of campaign" or design of construction in this part of the machine and that it "just happened." We can readily see why the extremely narrow front tread is built that way—because it is cheaper. We suppose the very wide tread is built the other way—because, well, you guess; we can't.

Just follow us and we will tell you why the Litchfield Spreader uses the tread that it does, and you will realize that this spreader was not designed "by instinct" nor by guess.

Wide tires are used under truck wagons and wider ones under traction engines, so as to cover all possible surface and prevent these wheels from sinking into the soft ground. The more surface that can be covered, the better the heavy load will ride on top of the soft ground, and the easier it can be moved. For this reason the front and rear wheels should not track, because the rut made by the front wheel will be made deeper by the rear wheel.

The Litchfield front tread is set just inside of the rear tread so as to cover as much surface as possible. Anything narrower than this is avoided because of the lack of stability. The front tread should come as near the width of the rear tread as possible and not run in the same track. The wide front tread prevents the whipping of the tongue when going over rough ground by one wheel dropping lower than the other and creating a sweep or rack to the pole; especially is this so on those machines where the front axle is braced to the pole instead of to the machine itself. It also maintains a stability to the load that is impossible to get from the narrow front tread.

With the wide traction tires on the Litchfield Spreader and the arrangement of the front tread the same load on this machine will ride on top of the sod where other machines will sink many inches through it. To be continued.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

country merchants, the habit which farmers have of each planting the variety of potatoes which he individually prefers makes much annoyance and loss when they are offered for sale. Shippers cannot possibly do as well with a mixed mess of all colors, white, yellow, rose color, pink and red, as they can with all one variety. If farmers in each locality would have a mass meeting and decide upon some one variety for early, and one for late, and all grow the same, then merchants could pay them more money for their surplus. For garden potatoes for home use, they can grow what they please.

Agricola heard a young rural school teacher make a remark the other day which was encouraging. The young teacher said he should plant some flower bulbs this fall, so the children could have them to enjoy early in the spring. He mentioned the crocus, the daffodil, the narcissus, the tulip,

the hyacinth and the lily of the valley.

Education is not merely a thing for the intellect. It is not the person with merely a crammed brain that you consider best worth knowing, but the one with well trained emotions, with a love for the good, the true and the beautiful. And a school yard adorned with trees and flowers and shrubs begets love of school, of home, of country; for it is a natural nursery for the propagation of emotions of patriotism and loyalty.

Davenport's Short-horn Sale.

Rain, much rain and then more rain came to greet Mr. T. A. Davenport the day of his annual sale. The weather man had furnished ideal sale days in abundance up to October 23d. It poured rain during the entire progress of the sale and much disturbed Auctioneer Bellows. The heavy downpour on the canvas was very noisy. A small crowd was present and twenty-one head were sold at fair prices, but Mr. Davenport knew that the small number of buyers were supplied and accordingly stopped the sale. He only offered one of his own bulls, but sold some four or five for his neighbors. Mr. Chas. Rice, of the firm of Rice & Lindsey, was a buyer of much of the choicest stock, as he was on the following day at Mr. G. J. Mack's dispersion. We present buyers' names of all purchases of \$100 and over:

FEMALES.

SEND US THE ADDRESS OF YOUR FRIENDS IN NORTH DAKOTA.

Special rates from North Dakota up to the boundary line to points on the Minneapolis St. Louis R. R. and Iowa Central in Iowa and Illinois, on sale during November and December and good to return until April 15th. Send us your friends address and we will advise them fully. W. K. Adams, D. P. A.; D. B. Ransburg, C. P. A., 512 Walnut St., Des Moines, Iowa.

OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

THE IOWA DAIRY CONVENTION IN 1907.

We are in receipt of the following communication from a special committee appointed some time ago by the city of Des Moines for the purpose of bringing before the people of the state and of other states the greatness of Iowa's capital. Their communication read as follows:

We desire, through the columns of your valuable paper, the opportunity of presenting to the members of the Iowa State Dairy Association some of the reasons why Des Moines should be selected as the place in which to hold next year's (1907) convention.

In the first place, Des Moines is the capital of the state and is one of the greatest convention towns in the United States. We have had nearly every convention at various times that has been held, but we have never had the honor of entertaining the greatest convention of them all, the Iowa State Dairy Association.

Des Moines is the largest and most progressive city in the state, and it is the most conveniently located of any city in Iowa. Every railroad of any consequence operating in Iowa enters Des Moines. It is the center of the greatest dairy country on the face of the earth, and if the convention is held here it will attract more people from Nebraska, Missouri and Kansas than if held in any other part of Iowa.

Again, it is the home of the state dairy commissioner and his assistants; besides, the home of the worthy secretary of your association. It is only one hour's ride from Des Moines to the state dairy school at Ames, and before the association convenes again Ames and Des Moines will be connected by an electric line with service every hour, and one of the special features of this convention should be a trip to the best dairy school on earth.

If you select Des Moines as your next meeting place you will hold it in a city that has four large creameries in operation the year round, and manufactures more butter than any other city in the state. We have three renovated butter houses; a large number of sanitary dairy milk plants, and every fast freight dairy refrigerator line has a representative living here, and this fact alone will warrant a successful meeting, as these gentlemen are traveling all over the state and will put forth an extra effort to bring out the largest gathering of delegates ever attending a state association.

We have the most and best hotels of any city west of Chicago. We have the finest convention hall in the state. We have three of the greatest daily newspapers west of Chicago and four of the largest agricultural papers in the world. And each one will help to boom this dairy convention. In fact, we have everything that any other city possesses and more than some.

Besides all this, the citizens of Des Moines want the buttermakers to meet with them.

"If it's worth roofing at all, it's worth roofing with Genasco."

When shingles have warped, split or burned—when coal-tar has crumbled and melted—when tin has rusted away—you will get *Genasco Ready Roofing*, and get absolute protection from intense cold or heat, the heaviest rain, searching snow-water, and even fire—year after year, in season and out.

Twenty-five years of asphalt knowledge are back of our valuable processes that put the enduring, weather-resisting life of Trinidad Lake Asphalt into Genasco Ready Roofing.

Easy to lay—smooth and mineral surfaces in several weights.

It Makes a Big Difference

how you skim your milk. Perhaps you don't fully realize how big a difference. May be you haven't even thought of it. But look at those two cream pails! One is twice as big as the other. Yet both were actually filled from the same quantity of milk, and Mr. R. A. Shufelt, of Cohoes, N. Y., didn't realize he was losing every day actually as much cream as he saved, until he tried a

U. S. CREAM SEPARATOR

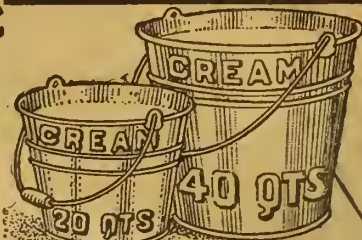

Mr. Shufelt says: "I set the milk in coolers and skimmed with dippers. Best I could do was about 20 qts. cream per day from 20 cows. By keeping an accurate record, I found with the U. S. I was getting about 40 qts. cream per day from 20 cows. As the total amount gained by the U. S. paid for it in 30 days, I will say that it is the best investment I ever made."

How much cream are you losing? Cream is money—the U. S. gets more than any other separator. The U. S. holds the World's Record for cleanest skimming. We will gladly send you our big, handsome, new catalogue telling plainly all about the construction and wonderful skimming records of the U. S., if you will just write us: "Send new construction catalogue No. '81'". Write today, addressing

VERMONT FARM MACHINE COMPANY
Bellows Falls, Vt.

Eighteen distributing warehouses centrally located in the United States and Canada.

The Commercial Club, which is composed of the best and most representative business men of the city, extends a special invitation to the dairymen to meet with them. They pledge themselves to do as much for this convention as any other city in the state.

We believe the above reasons are sufficient to induce the executive committee of this association to locate the next convention in Des Moines and we feel that every dairyman who attends this convention, if held here, will go away feeling that Des Moines is the greatest convention city in the United States.

The Homestead can endorse every word in the above communication. No city in the state can compare with Des Moines in the amount of dairy products manufactured, and this alone should be a matter of special advantage to the city in which such convention is held. The matter of accommodation is duly emphasized in the above letter, and on this point we can only say that there is not one iota of exaggeration in the statement made.

No matter what city or town is selected for headquarters for the meeting of 1907, The Homestead promises to do its full share in the matter of giving publicity to the meeting; but if Des Moines be chosen as the place of meeting The Homestead will be able, in view of its headquarters being located here, to give special service to the whole convention cause.

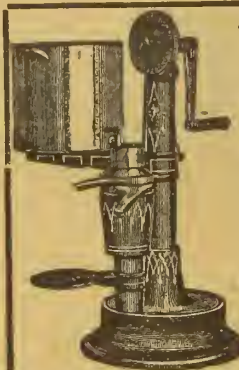

IMPROVING THE QUALITY OF CREAM FROM TAINTED MILK.

That all cream is not good cream is a fact generally conceded by careful dairymen. The surest way to improve its quality is to improve the quality of milk. Even where a great deal of care is exercised in milking and afterwards straining, and cooling, it often happens that there will be some taint or bad flavor. Sometimes the fault is with a single cow; it may seem to be characteristic of her milk at times, or the whole herd may yield an ill-flavored product for a day or more, due to having eaten moldy feed, turnips, garlic or obnoxious weeds or forage. The cream from such milk is not relished, neither is the butter which is made from it, and it hardly pays to spoil a good reputation at the creamery or store by getting rid of an occasional poor product in this way.

Some work has been done of late at the Virginia station that promises to improve the quality of cream from milk of an inferior grade.

As soon as the milk is found to be "off" in flavor, the cause should be learned. If one cow is causing the trouble, keep her milk out and treat it separately. As the acids and bad flavors are largely found in the milk serum, the cream should be skimmed as close as possible. If setting pans are in use, some form of skimming cup should be used that will allow all skim milk to drain off before it is emptied into the cream jar. Thus the bad flavor will largely be eliminated, where if the milk had been mixed with that of the herd of the bad flavor it would have permeated the whole milking. With a separator the bad flavors can be eliminated much more completely. If only a part of the milk is tainted the cream can be separated, then mixed with skim milk from an untainted product and separated again. The same end could be accomplished by setting the cream screw to skim very close, but the cream would not be uniform with that of the usual run.

When the milk from the whole herd is tainted the above plan must be re-

THE DAIRY QUEEN

THE CREAM SEPARATOR YOU HAVE BEEN LOOKING FOR

A close skimmer, simple, durable, easy to operate and clean, runs light and has the largest and lowest supply can of any cream separator on the market, really, an ideal separator, filling all the requirements that a farmer can ask for. You have been wanting a simple machine. We sell these machines on their merit, and guarantee them to be first class in every respect. When you buy a cream separator, you can't afford to make a mistake, as you are buying a machine that you use twice every day in the year. You can try a

sorted to; that of skimming as close as possible. A good machine can get most of the cream in about one-tenth of the weight of the milk. Such cream should test around 40 per cent, and will be almost thick enough to cut. Practically all the milk serum has been eliminated and with it has been taken the taints and ill-flavors also. It is not likely that more than one or two milkings will be so contaminated.

Close skimming with the separator is a good practice at all times. Cream that will test 30 per cent butterfat will stay sweet longer than that containing more milk serum, testing, say 20 per cent. A reliable method of improving the quality of cream as above suggested should be of considerable value, especially to the individual who retails cream to private trade. As a means, however, of producing a good product it should be of secondary importance. The primary object is to produce clean, pure milk, then good cream will be insured.

Test Your Cows.

The testing of each cow at least once a week, as to quantity and quality, is the basis of all successful dairying, as in only too many cases the poor cows in a herd eat up the profit of the good ones. Better to have six good cows than to have twelve medium ones. The Babcock test enables any farmer to determine the value of each cow's milk as easily as an expert chemist, and no farmer who owns ten cows or more ought to be without one unless he belongs to a test association. It is remarkable that although a decade has passed since the introduction of the Babcock test, a majority of the dairy farmers throughout the country have never used it on their farms. This is the more remarkable when we consider that this test is the only method yet discovered by which the actual value of the dairy cow can be determined. It would scarcely be believed if we did not know it to be so, that so important a factor in progressive dairy work would be so neglected.

It is difficult to assign a reason for this neglect of so many to apply in their business a system that carries with it so many advantages. Whether it is a lack of appreciation of the real merits

**You Want All
The Cream**

Therefore You Want the

Iowa Dairy Separator

No other Separator made extracts every particle of cream. Some is always left, and this "some" is your loss.

The "IOWA" does not take part of the cream part of the time. If it did, it would be no better than the others; but it takes all the cream all the time! A Separator that does less than this you cannot afford to buy. Gold medals at World's Fair and Portland mean something. Write today and ask for catalog 25. It's free, and you will find your investment of one cent in a postal card the best you ever made. All sizes from 250 to 750 pounds. Address,

**The Iowa Dairy Separator Co.,
Waterloo, Iowa.**

of the test or some other cause that breeds this indifference it is difficult to assert. The truth is apparent, however, that hundreds of dairy farmers who would insure to themselves innumerable

benefits by using the test in their herds are totally neglectful of it. All dairy-men, however, are not thus indifferent. Many today are using the test right along and are reaping the fruit of their progressiveness in the possession of more valuable herds and larger returns in milk production. To the dairyman who would keep up with the procession its use is a necessity. There are many farmers in this country who will tell you that their success as dairymen dates from the time they began using the Babcock test. Before that time it was largely guess work with them. A cow was judged by the quantity of milk she gave, and in this way they were often misled as to her real value.

Not infrequently cows were kept year after year that did not pay for the feed they consumed, while other cows that were really paying a profit, but were light milkers, were disposed of. The first important lesson taught them by using the test was that their former methods of determining a cow's fitness for a place in the dairy were absolutely valueless. Animals they had once believed to be good were shown to possess little merit, while others before considered unprofitable demonstrated that they possessed superior dairy qualities. This truth was a revelation to the dairy farmer, and by taking advantage of the light thus gained they were enabled to transform a discour-

aging, poor-paying business into one of pleasure and profit.

The painstaking farmer who is practical usually experiences no difficulty in determining the actual value of his cows when he uses the test. It enables him to distinguish the good from the medium and the medium from the poor, thus making it easy for him to get rid of the unprofitable animals. The farmer who tests his cows is in a better position to know the physical condition of his stock as regards healthfulness than is the one who does not. The test is sensitive to very slight changes in the physical condition of stock. If a cow is feverish she will usually show an abnormally high test. If exposed to severe cold the test will be low. If roughly handled or unduly excited the unfavorable results will always be recorded by the test. So, if a cow that is receiving good care and regular and proper feed is found to vary frequently in her test, it is a pretty sure indication that something is wrong with her. It indicates that she is not in a healthy condition and needs the services of a competent veterinarian.

Another benefit arising from the use of the test by the farmer is that he is not wholly dependent upon the creamery proprietor for a knowledge of what his cows are doing. Nearly all creameries now pay for milk on butter-fat basis, the farmer receiving pay in proportion to the fat his milk contains. It is wise for the farmer to know of himself how much this is. It is impractical to entrust the knowledge of the most important feature of a man's business to another, while he himself remains in absolute ignorance of it. If he does not like to take the trouble to test his cows and keep an account of them, ten or twelve may co-operate and hire a young man to do it.

Such test associations were started in Denmark about ten or twelve years ago, and a couple of years afterwards that country boasted of having over 300 such. It is, however, very little work to weigh the milk from each cow once a week and test it. In testing cows they should be milked the same hour in the evening on the test day as on the day before. The total milk should be weighed or measured daily in order to control the production. If the farmers will let the milking be counted as work and not as a little extra chore to be done sooner or later after dark, they will find the cost of production reduced.

Howard county, Neb.

Stanley's Poland Sale.

The Poland China sale of Mr. A. O. Stanley was held at Valley View Farm, near Sheridan, Mo., October 22d. It was well attended and every man who was there pronounced the offering a superior one. The get of the great breeding boar, Joe Prophet, were eagerly sought for. The top of the sale, \$77.50, was paid for a three-year-old sow, Size-Me-Up, the buyer being Mr. W. A. Burg, of Parnell, Mo. Mr. J. L. Everett, of Grant City, Mo., paid the top price for a male, taking a boar of Joe Prophet out of My Hanna Lady. Forty-five head were sold at an average of \$26.50. A list of the buyers follows:

Lot.	Price.
2. Boar, Geo. Vancamp, Sheridan, Mo.	\$30.00

The Manifold Duroc Sale.

The Duroc Jersey sale of Mr. George R. Manifold was held at Shannon City, Iowa, October 19th, and resulted in a realization of satisfactory prices to Mr. Manifold. It might also be added that buyers in every

BEST OF SEPARATORS ACTUALLY FREE OF COST.

This is really the fact in the purchase of a **DE LAVAL CREAM SEPARATOR**. Any reputable person may buy a **DE LAVAL** machine on such liberal terms that the machine **actually pays for itself**.

And it not only does this the first few months, in which it saves its cost, but goes on doing it for fully twenty years to come. In the face of these facts buying trashy "cash-in-advance" separators, or any other than the **best**, is penny wise, dollar foolish. Such machines quickly **lose** their cost instead of **saving** it, and then go on losing instead of saving.

There is no possible reason why any buyer of a Cream Separator should be content with less than the **DE LAVAL** and there never was a more promising time to make this most profitable of all farm investments.

Send at once for new catalog and full particulars.

The Cream of Cream Separators

The Sharples Dairy Tubular is the cream of cream separators—the pick of the whole bunch. Supply can wait low, you can fill it with one hand. All gears enclosed, dirt free, absolutely self-oiling—no oil holes, no bother—needs only a spoonful of oil once or twice a week—uses same oil over and over. Has twice the skimming force of any other separator—skims twice as clean. Holds world's record for clean skimming.

Bowl so simple you can wash it in 3 minutes—much lighter than others—easier handled. Bowl hung from a single frictionless ball bearing—runs so light you can sit while turning. Only one Tubular—the Sharples. It's modern. Others are old style. Every exclusive Tubular feature an advantage to you, and fully patented. Every Tubular thoroughly tested in factory and sold under unlimited guaranty. Write immediately for catalog J-121 and ask for free copy of our valuable book, "Business Dairying."

Rice & Lindsay's Short-horn Sale.

On Thursday, October 25th, fifty Short-horns, dispersed by Messrs. Rice & Lindsay of Clarion, Iowa, dissolving their partnership, sold at moderate prices, falling slightly below the sellers' expectations. Prices ranged from \$25 to \$355. The top figure was paid by Mr. J. G. Hill, of Clarion, for the roan herd bull, Victor Prince by Golden Drop's Victor and out of Imp. Coral Countess by Watchfire. The competing bidders were: J. N. Phillips, Emmetsburg, and J. B. Huisman, Wellsburg, Iowa. A considerable number of calves were sold separately, a fact that held the average down. The effects of the bad weather of three previous days was also in evidence. Every animal was disposed of as shown by the number considered in the average. Auctioneer R. W. Barclay conducted the selling, assisted by Messrs. Haley and Uhr. Mr. Rice will continue breeding Short-horns at Rowen, Ia. Below is the list of those selling for \$100 or over:

FEMALES.	
Fern Nellie, three years, sire Clover Duke, O. Hoyt, Clarion, Iowa.	\$115
Rowena's Charm, three years, sire Imp. Charmer, T. A. Davenport, Belmond, Iowa	105
BULLS.	
Victor Prince 192335, five years, sire Imp. Golden Drop Victor, J. G. Hill, Clarion, Iowa	355
42 females sold for ... \$2,570; average, \$61.20	
8 bulls sold for ... 725; average, 90.60	
50 head sold for ... 8,235; average, 65.90	

A Whole Medicine Chest.

A bottle of DEAN'S KING CACTUS OIL in time of emergency saves many dollars.

PROF. DEAN'S KING CACTUS OIL

Will heal the worst barbed wire cut without leaving a scar if used in time. We have thousands of testimonials that prove this fact. Every owner of live stock should keep it on hand, for it is a positive cure for cuts, sprains, bruises, old sores, swellings, open wounds, harness and saddle galls, etc.

KING CACTUS OIL is equally valuable for ailments of the human race. It is magnetized and soothing, pleasant to apply and heals a wound from the bottom up.

Sold by druggists in 15c., 50c. and \$1 bottles, \$3 and \$5 decorated cans. Sent prepaid if your druggist cannot supply you by **OLNEY & McDAID, Clinton, Iowa.**

Echoes From a Kansas Farm

By Henry Hatch

Those who believe frosted kafir fodder is better than that not frosted will have a chance to feed some of it this year, as there was much of the late planting standing when the first October frost came.

This is the season of the year when the farm boy with hardly a common school education starts off for business college, and expects to land a \$60 a month job, after a few weeks study. Too many want to begin at the top.

The best school for farm boys to attend is an agricultural college. The old saying, let every cobbler stick to his last, holds good in the majority of cases. However, when a boy fully decides that he will not farm, in tackling something else, he must expect to commence at the bottom.

It pays to put in a few acres of wheat or rye around the buildings, if only for fall and early spring pasture. This is the first fall we have done so, and it is found that the value of the pasture more than amounts to the cost of the seed and labor of putting it in. Our wheat is making the best of hog pasture right now, and, being thick on the ground, will last a long time.

There is now no sale for rough stock cattle such as used to be sold for canners, and the only way to get rid of them at all is to feed them awhile, then sell to local butchers. We have four that will soon be fed, and a local butcher will take them at a price that will pay us well for the corn fed and more for the cattle than they could be sold for before feeding.

Since building the barn we have room for the bulk of the hay raised on the place. This gives place to another trouble; getting enough poor hay for bedding. When stacking outside, we had more than enough, but now there is practically none at all. A raid will have to be made on the speltz straw stack.

Some folks say speltz straw makes good feed. We cannot see it that way. In the first place, it is filled with beards, and anything that isn't beards is coarse, tough stuff that stock do not care for. At least this has been our experience, af-

ter feeding some of it last winter. The cattle would not eat it until everything else in the racks was cleaned up. We did not blame them.

A neighbor of ours is going to put in a mill for grinding alfalfa hay, with which he will mix corn. Kafir corn, oats and perhaps some wheat. This mixture he will feed to his herd of thoroughbred hogs. The object is to keep from buying so much mill feed. Millers are still charging an outrageous price for shorts, and probably will as long as they can make sales.

As a rule, the improvements tell whether the farm has been made to pay or not, but not always. There are two exceptions. One is where good buildings have been put up to sell poor land, the other is the farm where lives the man who is land hungry. All that is made by such farmers go to buy more acres. A thousand acres of land owned by one man isn't the benefit to a neighborhood that one thousand acres is when owned by ten men. Mail delivery and telephones are slow to come where farms are large and buildings few.

It is surprising what a large amount of machinery can be packed into a small shed, if you plan a little; and how little can be put in when you just run one tool against another, with no thought of saving space. We have a machinery shed 14x48 feet in size, on the west side of the barn, and were figuring where that which could not be put in was going to be sheltered. We took a half day for it, and got everything in, leaving room for some more. A few of the tools were taken apart, though.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for 25 years.

Hector Cowan's Short-horn Sale.

The sale of Mr. Hector Cowan, of Paullina, Iowa, was held on the date advertised, namely, October 23d. The weather conditions were of the very worst imaginable and the attendance was small. As a result of this small attendance Mr. Cowan did not sell his bulls. Mr. Jno. Rasmess, of Lake City, Iowa, paid the top price of the sale, \$400, for Imp. Patience, Mr. C. A. Saunders, of Manilla, Iowa, got the imported cow, Miss Law, for \$320. The twenty-seven females sold for \$3,940, or an average of \$146. The following is a list of the animals bringing \$100 or more:

Imp. Miss Law, calved March 11, 1899,	320
C. A. Saunders, Manilla, Iowa.....	320
Imp. Patience 31st, calved Jan. 15, 1902,	400
John Rasmess, Lake City, Iowa.....	400

Iowa Beauty, calved Jan. 24, 1898, A. Henderson, Paullina, Iowa.....	150

A. F. Graves' Sale of Poland Chinas.

On Saturday, October 20th, Mr. A. F. Graves, of King City, Mo., made his initial sale of Poland Chinas. Only a few breeders responded to Mr. Graves' invitation to be with him and these were all loud in the praise of the quality, the uniformity and the general excellence of the Lyndale Poland Chinas. That the Lyndale Poland Chinas will be better appreciated by breeders in the future is a certainty, as Mr. Graves is breeding such a practical, useful hog that their merit will win them the recognition they deserve. Fully 500 of Mr. and Mrs. Graves' neighbors and friends turned out to show their appreciation of the good work being done at Lyndale for the pure-bred live stock interest of that section. Mr. and Mrs. Graves had prepared a sumptuous lunch and all were satisfied that the day was well spent, as at no farm in the corn belt can more conveniences for pure-bred stock be found than at Lyndale. These attracted much attention and we hope will inspire many to do better, raise better stock and care for it in such a manner as to give best results. The evenness of Mr. Graves' hogs is best shown in the average of \$27.25 that was made on the fifty-four head sold. The top price was \$40 and the bottom \$20. Col. Geo. P. Bellows did the selling and in his opening remarks made such a plea for the pure-bred live stock industry as should inspire every farmer to do better. Following is a list of all sales over \$25:

Price.

Oottingham's Short-horn Sale.

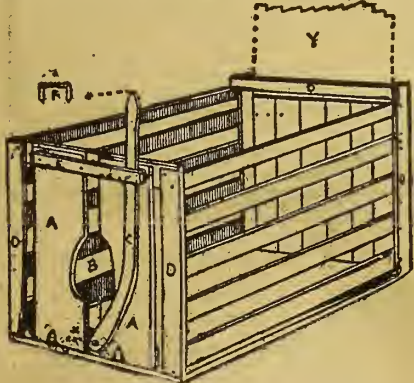

A large number of breeders and farmers were present on Tuesday, October 9th, at the public sale of Short-horns held by Mr. Ira Cottingham, of Eden, Ill. The Scotch cattle sold well, but those present failed to appreciate the Scotch-topped cattle which were included in the offering. Imp. Glad Tidings 3d, went to Mr. Jas. Werille, of Canton, Ill., at \$375, topping the sale at this figure. The hull consignment was topped by Emperor's Best, a Scotch hull which went to Mr. A. C. Brooks, of Glasford, Ill., at \$170. The Poland Chinas averaged right at

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

A York, Neb., farmer sends his plan of hitching four horses abreast with but two lines and without "jockey" sticks or false lines. He writes: "The horses soon learn to swing around as uniformly as if but two were driven. With this you can handle four horses as easily as you can two with the ordinary lines. I think the drawing will explain better than I can how the lines should be crossed." This arrangement will be found more satisfactory than the common method of attaching the two outside lines and tying the horses' bits together.

A ringing trap for hogs is a necessity on many farms, and the accompanying sketch shows a good form, says the Farm Herald. The frame of trap is 2x4 inch pieces, D, D, D, lapped and bolted at corners as shown, and a tight, smooth floor. Also side and top boards are solidly nailed to inner edge of the frame, as shown, making a strong crate from which boards cannot be crowded off. Rear end is fitted with slide door to raise up as indicated by dotted line V. Front end has a door, AA, made of two thick, strong boards on inside cross cleats at top and bottom. AA is joined at bottom by two strong hinges to frame, D, and held up when in use by the iron clamp, F, being placed over top of door and frame, D. Door has a central opening, B, below which are several bolt

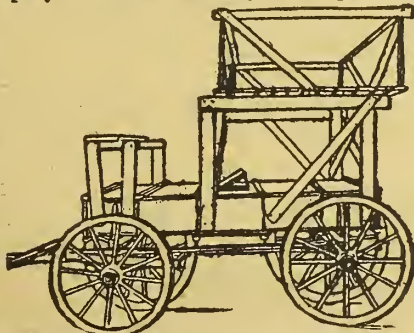

TRAP FOR RINGING HOGS.

holes for fastening an iron lever, C. The top of door also has wide cleat, E, bolted at one end with blocks behind to hold it out from door, so the other end will form a guide for lever,

C, which, when pulled forward, partially closes opening, B, and firmly holds hog, with head through the opening. Lever, C, is fastened while in use by a spike nail inserted as shown, in one of several holes bored through side cleat and door at Z. Opening, B, is twelve inches long and nine and one-half inches wide at widest place near lower end, and lower end of opening is ten inches above floor. Crate is four feet two inches long, two feet four inches high, and one foot six inches wide, inside measure. Place trap squarely with rear end close up to hog house door, with lever, C, thrown back; raise slide door, drive in a hog and drop slide door behind him, and he will thrust his head through hole, B. Pull lever, C, tight against his neck and insert spike to hold it there, and you can ring with ease, a hog weighing nearly 400 pounds.

Probably the most important experiments in spraying fruit trees conducted during the past ten years are those of the experiment station at Storrs, Conn. The experiments have been conducted by W. E. Britton and B. H. Walden who say they believe that if the spraying can be done as soon as the leaves drop off or during November, that a large proportion of the young will be killed, and that they are much more susceptible to the effect of the sprays than after they are partially

TANK SPRAYER USED BY THE CORNELL (N. Y.) STATION.

grown and better protected by their shells of armor. The mature insects die naturally, before spring, and it is only the half or partially grown that carry the species through the winter. On December 10th to 11th, when the spraying was done at Bridgeport, the scales were about all alive. On January 2d, less than a month after the application, twigs were cut and examined, with the result that an average of 17.5 per cent of living insects were found. This can fairly be attributed to the effect of the treatment, principally because no severe weather or ice storms had occurred to kill the scale-insects in unusual numbers. The results of the second examination of twigs on June 2d were somewhat disappointing, as an average of 10.6 per cent of living insects were found. In spite of the rather large percentage of living insects in this test, the writers believe that fall or early winter spraying can and soon will be practiced by the growers. More than 100,000 trees in Connecticut were sprayed last year with uniformly good results.

This Frost Proof Gasoline Engine

will work for you all the year 'round—
in all kinds of weather. It can't freeze, so you'll have no frozen pipes causing expensive delays and heavy repair bills.
We can prove to you that it is the most reliable, easily operated and economical gasoline engine built. And it has a guarantee back of it that absolutely protects you.

The Fuller & Johnson FROST PROOF Engine

water cooled or oil cooled, is built expressly for use on the farm—with the inexperienced man in mind.

It is mechanically perfect and is unequalled for simplicity of construction.

You can operate it—you can understand it—you can control it perfectly.

If we didn't know that, we certainly wouldn't guarantee you satisfaction.

Fuller & Johnson's guarantee has to be lived up to.

Gasoline costs money and the fact that our engine will do most work with least fuel must appeal to you. It never uses a drop more of gasoline than the load demands. Therefore, it develops more power per gallon of gasoline used than other engines.

It runs smooth and steady all the time, whether it's carrying half a load or a full load. Oils itself all over every time the crank shaft goes round.

Our engines are made in all styles and sizes and you can select one that will meet your requirements exactly.

Fuller & Johnson Mfg. Co., 115 Washington St., Madison, Wis.

But before buying any engine, send for our free booklet—

"Helpful Hints on Farm Power." It will protect you from loss and disappointment and help to solve your power problem.

If you are in need of any other farm implements and want to be safe on quality, investigate

The Fuller & Johnson Complete Line of Farm Implements

including, in addition to Gasoline Engines, Plows of every modern pattern, Harrows, Cultivators, Corn Planters, Transplanters, Manure Loaders—all representing the highest standard of excellence in their class, both as to quality of materials used and workmanship.

Fuller & Johnson have been supplying the progressive farmers' needs for forty-five years. They can supply yours.

And your purchase will be no experiment.

IOWA STOCK FOOD

FREE!

To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing.

Zearling, Iowa, July 13, 1906.

Gentlemen:—
I purchased some of the Iowa Worm Powder last February and I don't think I ever made a better investment. The Iowa Worm Powder can be depended upon. I had some of it left that I fed to my spring pigs and it surely done the business.
I gave your Mr. Deal an order today for some more of the Worm Powder, as I want it on hand. An occasional feed of it keeps the worms from accumulating in my pigs. Feeding to prevent sickness heats curing after pigs are sick. Most of the pig losses are due to worms and the Iowa Worm Powder is sure death to worms.
Truly yours,
Alex. Norman.

IOWA STOCK FOOD CO.

Jefferson, Iowa.

"Everyone Exclaims About Our Lights!"

"THE LAMPS are splendid. Everyone exclaims about the amount of light they give," writes Mrs. W. T. Reese, Tiffin, Ohio. "My City friends visiting here say they are as good as Gas. In fact, my home is now considered the best lighted house in the county. Why, when we go visiting our neighbors of an evening it is hard to keep from exclaiming about the poor light they have!"

The Angle Lamp is the new method of burning common kerosene oil, and is as different from the ordinary lamps in results as it is in appearance. It makes common kerosene the best, the cheapest and the most satisfactory of all lighting methods. Safer and more reliable than gasoline or acetylene, yet as convenient to operate as gas or electricity.

The Angle Lamp

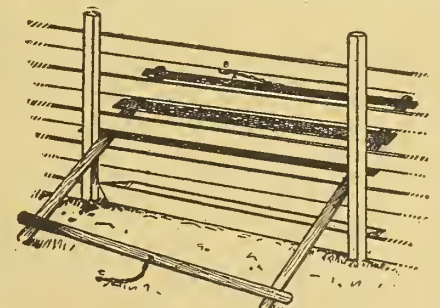

Is lighted and extinguished like gas. May be turned high or low without odor. No smoke, no danger. Filled while lighted and without moving. Requires filling but once or twice a week. It floods a room with its beautiful, soft, mel-
low light that has no equal.
And yet the lamp actually pays for itself. For while the ordinary round wick lamp, usually considered the cheapest of all lighting methods, burns but about 5 hours on a quart of oil, The Angle Lamp burns a full 16 hours on the same quantity. But send for our catalog "33" explaining the new principles employed in this lamp, and for our proposition for selling on

30 DAYS TRIAL

Wouldn't you like to have your home admirably referred to by your neighbors as "the best lighted house in the country"—If you answer such a light would cost so much less than your present system as to pay for itself in a few months use? Then write for catalog "33" describing The Angle Lamp fully and listing 32 varieties from \$1.80 up. It is free for asking.

THE ANGLE MFG. CO., 78-80 MURRAY STREET, NEW YORK.

describes a protection for a hog trough as follows: "When not in use this frame

PROTECTIVE TROUGH.

is hooked up as shown in the illustration at A and B, but when swill is to be poured into the trough it is unhooked and fastened with the chain, C. The plan is said to be very effective."

Mack's Short-horn Sale.

The day following Mr. T. A. Davenport's baptism sale, Mr. G. J. Mack, of Clarion, Iowa, dispersed his Lilac herd of Short-horns, October 24th. The rain had subsided some, but the day was very raw and cold and many fur coats were worn. Some new material came in during the night and several new breeders were bidders at Mr. Mack's sale that Mr. Davenport missed. Col. Geo. P. Bellows did some most excellent work on the block and the bidding was quite prompt and snappy. The result of the sale was very satisfactory to Mr. Mack. All sales of \$100 and over are listed below:

Oil Cure for Cancer.

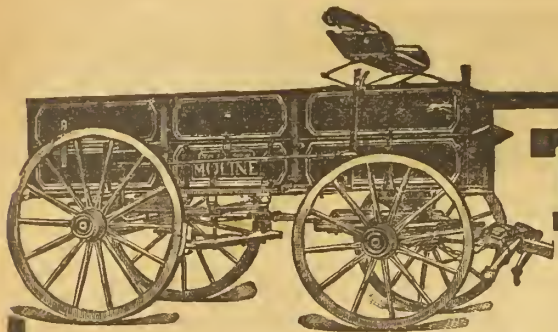

Dr. D. M. Bye's Combination Oil Cure is a recognized Cure for Cancer and Tumor. Beware of Imitators. Write today to the Originator for his free books. Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

With the introduction of the Manure Spreader quite generally in this western country, the condition of our soil plays an important part. The argument advanced by the Litchfield Mfg. Co., in their article on page 5 this week, explains why soft soil requires a different tread than the hard highways where the ordinary farm wagon is commonly used.

HOMESEEKERS.

Every Tuesday, October and November, via M. & St. L. R. one fare plus \$2 for the round trip to points in Minnesota, Dakota, Canada, tickets good twenty-one days. Also first and third Tuesdays, October and November to Montana, Washington, Oregon.

The M. & St. L. is "The Road that Runs" and trains leave Union Station, Des Moines, at 8:15 a. m. and 9:05 p. m. New electric lighted sleepers, all nice coaches. Call at City Ticket Office, 512 Walnut St., or address W. K. Adams, D. P. A., or D. B. Ransburg, C. P. A., Des Moines, Iowa.

This is The Moline THE IRONCLAD WAGON!

Built since 1854 in the largest exclusive Farm Wagon factory in the world, by machinery that does the work with such wonderful precision that each part fits the other with unfailing exactness. This enables us to produce the

Lightest Running Wagon Under Heavy Loads

The Moline has for its foundation the best woodstock that grows—all Hardwood. Selected Hickory for axles, doubletrees and singletrees, and white oak for the rest of the gearing and wheels. Yellow pine boards that are tongued and grooved for

the bottom of box; and we put in the sides the best lumber material obtainable. Now on top of all this we have reinforced every conceivable place on the wagon which is liable to wear with iron and steel protections, not of flimsy size, but with heavy plates.

which are so in evidence on the wagon throughout that The Moline has been called The Ironclad Wagon.

THE WONDERFUL BOOK

Pole—Reach—Hind Gear—Front Gear—Box inside and outside, all have special ironing everywhere. Our master mechanic has written a book, "How the Moline Wagon is Made Ironclad." It is FREE. Whether you want to buy or not, get the book! You will learn a whole lot more about wagons than you ever knew before. Write for it today. Address

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

PASTURAGE—LOSS OF CATTLE.

A Subscriber, Zeating, Iowa.—On the 1st of May A put seventeen head of cattle into B's pasture at sixty-five cents a head per month. B agreed not to take any more cattle to pasture, but he did take other cattle. B told A there was no use to brand his cattle, so they were not branded. The next day after they were put in the pasture, two of them came back, but A did not take them, and B did not come after them. A and B did not see each other for three months. When A went after his cattle there were only fourteen of them in B's pasture. (1) Who must bear the loss? (2) How will the value of the missing cattle be fixed?

Answer—(1) If A can prove that the loss of the cattle was caused by the wrongful act of B, or by reason of B's carelessness or negligence, then A can recover from B the value of the lost cattle—otherwise A must bear the loss.

RIGHTS ON THE ROAD.

A Subscriber, Marshall county, Kan.—(1) I have set out young trees along the fence in the highway where it passes through my land. I have a neighbor who turns his live stock loose in the highway and they injure and destroy the young trees. Is there any way by which I can compel him to keep his stock off the highway? (2) Does a land owner have a right to say what trees and grass shall grow on the roadway to the middle of the road, where it runs through his land?

Answer—(1) It depends wholly upon your county commissioners. The law gives the board power at any session to direct by an order what animals shall not be allowed to run at large within the county, and provides that any person injured in property by animals running at large in violation of the order of the county commissioners shall have a lien on such animals for the full amount of damage done by them without reference to fences, and may take such animals into his possession and retain custody of them till the damages be paid, provided he sues the owner for such damages within five days. (2) Not quite so strongly as you put the question. The land owner owns the road, but he owns it subject at all times to the right of the

public to use it as a road, and he must not in any way impair such right.

LAND AGENT—COMMISSION.

A Missouri Subscriber—I own a house and lot in a Missouri town. A party has been wanting to sell it for me. I made an oral agreement with him that I would take a certain price, net to me, if he would bring a man to me, but I reserved the right to sell to anyone. The man to whom the agent was trying to sell, came to me and asked what I would take for the property, and I told him the same price I had told the agent. In case I sell to him, can the agent recover commission?

Answer—It is doubtful. Indeed it is doubtful whether any contract ever existed between you and the agent. If it did you have missed stating it, and leave us to guess at it. If you had any real contract with the agent, and he sent you a purchaser, you ought to pay him a commission.

FORECLOSURE OF MORTGAGE.

A Subscriber, Roberts, Wis.—A bought a piece of land, and gave B and C mortgages on it. If A fails to pay the interest, how long can he live on the place before B and C can foreclose the mortgages? (2) How long can A live on the place after the mortgages are foreclosed?

Answer—(1) If there is a power of sale contained in the mortgage and conditioned upon payment of interest, it would require six weeks' notice published in a newspaper and also service of notice upon the mortgagor before a foreclosure by sale could be effected. Meanwhile, of course, the mortgagor could occupy the place. (2) After a mortgage is foreclosed the mortgagor is allowed one year in which to redeem the place by paying the amount, interest costs and expenses. Meanwhile he may remain on the place.

HIGHWAY BY ADVERSE POSSESSION.

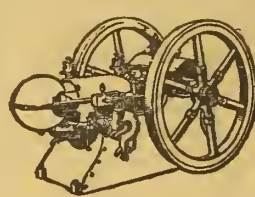

Mr. X. Y. Z., Williamsburg, Iowa—A and B live on opposite sides of the public highway. This highway has been established and used for more than thirty years. A sold part of his land and the purchaser, C, had it surveyed and laid out in town lots. In making this survey, C found that the public highway was over on his ground ten or twelve feet. The accompanying diagram shows the situation. The solid lines show where the road actually is, the dotted lines show where C thinks it ought to be. No one has ever before questioned the location of the road. Has C a right to move his south fence out onto the road to place indicated by dotted line and compel B to move his fence south a like distance, which will destroy B's lawn in front of his house?

Answer—C has no right to move his south fence out into the road, nor can he compel B to move his fence. The fact that the road has been used by the public

that adjacent land owners cannot now change it, no matter whether the lines are according to the original survey or not.

ROAD SUPERINTENDENT.

Mr. F. E., Rodney, Iowa.—(1) What are the duties of a road superintendent in Iowa? (2) The trustees wish to have a piece of road fixed in a certain way, but the superintendent knows that such a way is not the best way to fix it. Is the superintendent required to yield to the trustees in such a case?

Answer—(1) To oversee, subject to the direction of the board of township trustees all or any part of the work on the public roads of the township, as the trustees may designate. (2) The road superintendent is required by law to yield to the explicit direction of the board as to the manner of repairing the roads. The board is provided with a very efficient way of enforcing its authority, for the law provides that no contract shall be made between it and the superintendent without reserving the right of the board to dispense with the services of the superintendent at its pleasure.

STALLION SERVICE.

Mr. T. T. Hayne, Port Arthur, Texas.—A and B together own a stallion. C asked B how much they charged for a colt from the stallion. B said \$20, so C bred a mare to the horse. He sold the mare to D, who was to pay for the colt if the mare had one. The mare had a colt, but it died without standing or sucking. E bred a mare to the same horse, and his colt died, and E bred the mare again and got a live colt. A and B marked E's dead colt off the book and collected \$20 from him for the live colt. They also collected \$20 from D for the colt that died. Had they a legal right to do so?

Answer—You have confused your mind on this matter by bringing E and his mare into it. They have nothing whatever to do with the transaction between the owners of the stallion and C. That agreement stands alone. Nothing was said concerning the matter of the colt standing or sucking. It was to be \$20 for a colt. The mare had the colt. What caused its death does not appear. From the facts stated, A and B were entitled to the \$20.

DEED IN ESCROW—LEASE.

A Subscriber, Mason City, Ill.—(1) If a deed be placed in the hands of a third party to be by him delivered to the grantee after the death of the grantor, is it valid and legal? (2) Is a written farm lease good for the full term in case the landlord should die before its expiration?

Answer—(1) The deed is legal and delivery of it by the third person to the grantee after the death of the grantor, will vest the legal title to the land in the grantee. (2) It is.

A Subscriber, Adair, Iowa.—This correspondent is an old soldier who has served in the civil war and in the war with Spain. He has become entangled in a controversy with the commissioner of pensions, about medical examination. He has been ordered to report to a board of medical examiners a number of times, and is getting tired of it. He is drawing a pension. He wants to know what will happen to him if he neglects to obey

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

A BOOK ON FORESTRY.

Prof. Filbert Roth of the forestry department of the United States government has recently written a work entitled "First Book of Forestry." This shows how soils affect the variety and character of timber; the affect of moisture on timber; what cold and heat do for the woods; how forests are protected against elements and animals; estimating and measuring timber; pasture value of timber land, etc. It is illustrated throughout and makes an attractive book to add to any farm library. It is published by Ginn & Co., of Chicago, Ill.

Winter Protection for Strawberries.

Throughout the corn belt strawberry vines need winter protection of some sort. This is true, whether the plant is for home use only or on a commercial basis. However thrifty and strong the vines are in the fall, one can have no assurance that they will live through the winter and be in condition to bear a crop unless they have had protection of some kind through the winter and early spring.

Protection is needed for two purposes. The first is to prevent killing by excessive freezing. This is not the principal one, however, as especial attention is needed to prevent loss or damage from the alternate freezing and thawing in early spring. Many do not cover their vines until February. While this is better than not to cover at all, it is always commendable to get the plants under protection of some kind in early winter. The covering is then well packed and in good condition so that it will not be blown off in the early spring when covering is so essential.

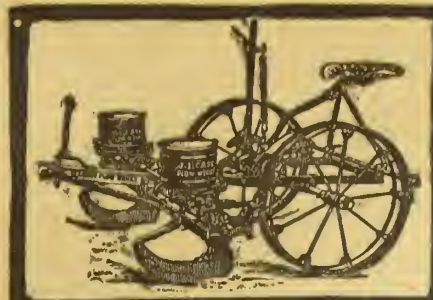

Many materials are used for covering strawberry plants; among them may be named in order of preference, straw, slough grass, sorghum, corn stalks, manure, etc. The most satisfactory covering is clean straw. Oat straw is most generally used, because it is most common. It is rather fine, however, and I believe that wheat or rye straw would be, on the whole, more satisfactory. One thing must be looked to, where straw is used, and that is to be sure that it is free from the seeds of troublesome weeds. A fine and clean-kept berry bed is often made very foul by having weed seed planted in it from the winter covering.

Slough hay makes a very satisfactory covering where it may be had, but as it is rather coarse and is apt to give trouble, it is hardly as desirable as straw. In many localities where neither straw nor slough grass may be obtained in sufficient quantities, something must be planted to use in their place. Sorghum and corn are most commonly used. The seeds of either are sown thickly in August and cut just before heavy frosts. Their use is not practical in this locality, however, as

Porter's "Meadow King"
Hay Carrier

Has wide open mouth, with swinging fork pulley. With this Carrier you can fill the mow closer to the roof of barn than with any other Hay Carrier. The throat of the Carrier has a very large opening, which permits the pulley to approach with a swinging load, and the load can swing in either direction when locked in the Carrier.

J. E. PORTER COMPANY, OTTAWA, ILLINOIS

J. I. Case
Round Hole Plate
Runner Planter

You know that a planter is one of the most important implements you buy-- because "half the crop is in the drop." A good planter means every inch of ground utilized right. The new planter makes this possible. The view which we show opposite gives you only a slight suggestion of the plate. The newly perfected and patented principle is not shown-- it could not be shown in an illustration. It is this hidden mechanism which guides the kernels and prevents a more or less number than you desire leaving the hopper. Ask any dealer to show and explain it to you.

To anyone interested we will gladly furnish a complete description for the asking-- also our catalogue of the entire J. I. C. line including the Single Disc Planter and the Edge Drop Planter which forms the strongest combination of planters made by any one factory.

FREE Farmer's Encyclopedia

Simply tell us what implements you will need the coming season, enclose ten cents for packing and postage, with the name and address of your dealer, and we will send you this most valuable book of 146 pages, bound in cloth. Write to-day. Address:

J. I. Case Plow Works,
Dept. M22 Racine, Wis.

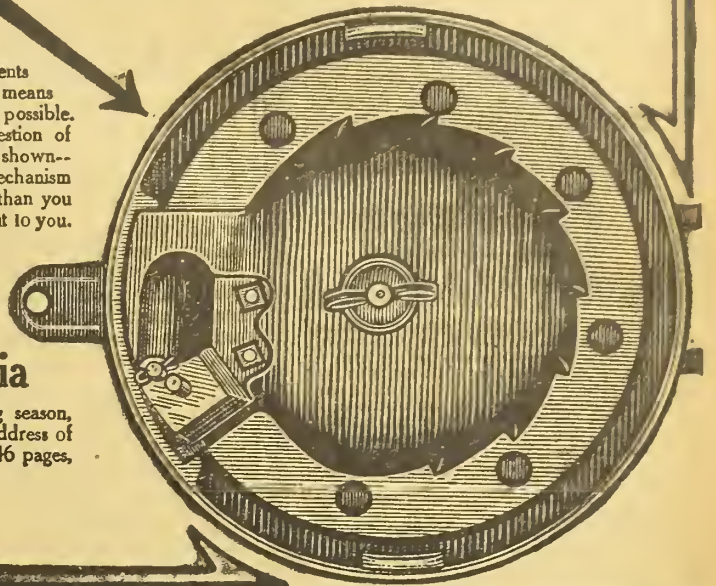

99 in every 100 Perfect

Here is the latest J. I. C. triumph in planters-- the J. I. Case Round Hole Plate Runner Planter. Test after test has shown 99 per cent accuracy. This is a record unsurpassed by any other planter ever built-- edge drop or round-hole. And remember, the J. I. Case Edge Drop Planter is regarded by thousands of farmers as being almost perfect.

If you are interested in planters-- see the regularity of it's work.

Watch it drop 99 hills out of every 100 positively perfect.

Sometimes it runs a thousand drops without a miss. Did you ever see or hear of anything like that? But don't take our word for it-- see the planter at work for yourself in the store of any J. I. Case agent.

the materials above named are more satisfactory and generally easily obtained.

Inexperienced persons usually consider manure the most satisfactory covering and often destroy their plants by giving them a heavy covering of this kind. Manure should never be used when anything else can be obtained, and if its use is necessary that which is put on should be as coarse as possible and should be used sparingly. Strawberries do not need a heating protection; all they need is something to keep the temperature even and prevent sudden changes.

In practice the time to cover strawberry vines is as soon as the ground is frozen sufficiently to hold up a loaded wagon. The load is then driven along the rows and the covering distributed to a convenient distance on both sides of the wagon. A thick covering is not necessary. Experience teaches one to do the work right, but as a venture I would say that three tons to the acre would come as near being the proper amount as any other figure that could be named.

The covering should be left on in the spring until the vines have begun to grow beneath it, but must be removed before the leaves have turned white. In removing the covering the men go upon the field with their pitch forks when the covering is just a little damp and scrape it from the rows into the paths between. Some of the covering should be left over the vines, as much as the leaves can make their way through. This serves a double purpose. It prevents the soil from drying out and protects the berries from the dirt at ripening time. It is a mistake to remove any of the covering from the ground. When left in the paths it prevents them from being packed down by the pickers and serves in a very great measure to retain moisture. This fact, of small importance as it may seem, often means the difference between a large and a small crop at picking time. Franklin Brown.

The Reece Chester White Sale.

The sale of Mr. L. C. Reece, at Prescott, Iowa, on October 22d, attracted more Chester White breeders than any sale of the kind for a long while. While no very high prices were realized, nevertheless it was one of those very even sales, and the fifty head brought up an average of \$24. It has been a long while since a better bunch of Chester Whites were run through one sale ring. The quality of the offering was decidedly high class, and they were well fitted. The high price was \$15 for the sow, Marie, and she went to Mr. W. A. Hoover, of Oskaloosa, Iowa. Breeders from a distance who were unable to be present and knew the character of the offering sent bids and on the whole it was one of the good sales of the year. Col. Geo. P. Bellows cried the sale and was assisted by Col. Will Piper, Corning, Iowa, and Col.

A SWEET CHESTNUT TREE

To get this valuable "Blizzard Belt" Chestnut quickly introduced and at same time gain new friends, we offer to send a Hardy Sweet Chestnut tree 1 year old, entirely Free to a limited number of property owners not already our customers. A Moulting Hen Needs a Tonic

Shorten the non-productive moulting period—hasten the return of normal vigor in the hen, and be ready to reap a harvest while the rest of "hendom" are still shedding feathers. A daily use of Dr. Hess Poultry Pan-a-ce-a will help you do it. It is a perfect aid to digestion and causes the maximum amount of food to be assimilated and hens to become profitable layers throughout the winter.

DR. HESS Poultry PAN-A-CE-A

is a scientific tonic, the prescription of Dr. Hess (M. D., D. V. S.) and the result of experiments conducted by him in his own poultry yards. It contains just the elements to make the hen in confinement as natural as she would be at liberty. It cures, cures, cholera, roup, indigestion, etc. Poultry Pan-a-ce-a has the endorsement of leading poultry associations in United States and Canada. Costs but a penny a day for 30 hens, and is sold on a written guarantee.

1 1/2 lbs. 25c., mail or express 40c.
5 lbs. 60c.
12 lbs. \$1.25.

FOR SALE—Five registered Scotch Collie females, bred or open at snap prices. Address, A. H. Gerot, Riverside, Iowa.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

DRY-FEEDING POULTRY.

Wet feed has had its advocates until the practice of feeding it has reached the zenith. There always have been and probably always will be those who will keep on feeding wet and sloppy feed to poultry. We have advocated the semi-soft food, a food with about all the moisture taken out, except enough to simply hold the particles together. Experiments that have been conducted at the various stations have proven that the very wet feed has but little advantage over the dry when the same care of providing a variety is observed. Variety seems to be the thing needed, and in supplying this some poultrymen are of the belief that they should do the mixing. A writer in the Irish Farming World describes a method of dry-feeding that is practiced by a successful breeder and feeder, as follows: "We give the chicks a mixture of assorted grains, and grit of about the size of a pin head, for their first food. With a dish of beef scraps standing constantly before them, and the fine-ground food thrown in litter, with plenty of green food (cabbage and green grass) they have an inducement to scratch from sunrise to sunset, and they take the food slowly and naturally. With the best scraps always within reach, they at no time crave more animal food, their systems rapidly adapt themselves to the season of plenty, and nature constructs a body planned for a continuation of this same diet, namely, good, thick, strong leg and frame, and a chicken that looks ready to eat at any stage of the game—long-bodied, short-legged, hardy, 'born-to-live'-looking fellows, free from all the ills and pains of chickendom, and fit to wrestle for a living through thick and thin, through good weather and bad, so long as the food holds out. When they reach the age of six or eight weeks, we gradually wean them from the small grains and substitute cracked corn and wheat, place them in colony coops on grass range and soon discontinue the wheat, feeding cracked corn and beef scraps in hoppers, feeding once a week or oftener, as the size of the hopper and number of chicks demand. These food hoppers should be made quite high in front, three inches at least, as the birds are always trying for the larger pieces of beef scraps, and with a low front to the tray of the hopper they waste quite a little by throwing it out with their bills. The hoppers should be covered with waterproof paper to prevent the food becoming wet if they are placed outside the roosting coops. An excellent plan is to have a small 'shelter' to put the food hopper under; this will protect it from the rain and give the birds shelter also—a double advantage. This system continues until the sexes are separated, and then we place the males in temporary yards sufficiently large so the birds never eat them bare of grass. Putting the cull cockerels which we intend to market in pens by themselves, we compound a mixture of equal weights of corn, wheat, oats and barley, ground as fine as flour, if we can induce the miller to reduce it to that fineness, feed it dry and continue the beef scraps as before. This method of feeding market cockerels has given us fatter chickens than we have ever been able to produce by any other method."

The Townsend Short-horn Sale.

The closing out sale of Mr. C. E. Townsend, at Anita, Iowa, on October 25th, proved to be one of the attractions of the season and quite a few of the best breeders were on hand to look after the good things. Victoria Princess 3d topped the female offering at \$310 and was purchased by that well-known firm of Owens Bros., of Homestead, Iowa. Iowa Mysie and cow calf went to Mr. Frank Robinson, of Anita, Iowa, at \$235, and Mr. C. A. Saunders, of Manilla, Iowa, secured Canute's Orange Lassie 2d, a daughter of old Canute, at \$275. Messrs Owens Bros., of Homestead, Iowa; D. J. Cronin, O'Neill, Neb.; C. A. Saunders, Manilla, Iowa; G. A. Bonewell, Grinnell, Iowa, and Frank Robinson, Anita, Iowa, were the leading bidders on the she stuff and secured the cream of the cows and heifers. The old herd bull, Sovereign Cupbearer, was purchased by Mr. J. G. McGee, of Woodburn, Iowa, at \$175 and was a splendid bargain at that figure. The average on the entire sale was \$135, making it one of the good sales of the fall season. Below is a list of those selling for \$100 and above:

COWS.

Emily T., three years, and c. c., S. S. Hall, Pender, Neb. \$150

YOU WANT THIS FREE BOOK

Here is a book—yours for the asking—which should be in the hands of every progressive farmer in America. From cover to cover it is brim-full of facts of vital importance to you. It comes from the greatest independent telephone house in the world—the house that has been most instrumental in bringing the blessings of the telephone to hundreds of thousands of farm houses all over the land. It shows you how simple and easy and inexpensive it is to own a

Stromberg-Carlson Telephone

system—a system that is a money-saver every hour in the day—a convenience and comfort you shouldn't even try to do without, and a protection against sickness, robbery, danger and fire that pays back its trifling cost over and over and over again. You owe it to your business and your family to get this book at once and read every line in it. Your letters will get personal attention and you'll have the help of experts from this great factory in every move you make toward owning a telephone. Sit right down now and say: "Send me your 52 page booklet G12 'How the Telephone Helps the Farmer.'"

Stromberg-Carlson Telephone Mfg. Company

ROCHESTER, N. Y.

CHICAGO, ILL.

A Knox Big Grinder

Will Make \$6.00 a Day for You

THERE'S nothing like it for a neighborhood feed grinding proposition.

You know lots and lots of your neighbors grind their feed—rather they take it to the custom mill and have it ground.

If you have a fast grinding mill like the Big Knox you can get nearly all that trade that passes your place.

No trick at all to get it if you go after it, and can take care of it. They pay the town miller 3c to 5c a bushel. You might as well have that.

Mr. B. C. Bennett, Ashawa, Iowa, writes: "I can grind 50 bushels shelled corn per hour with my Knox Big Grinder. Made \$6.00 in 5 hours grinding for my neighbors."

You or anybody else can grind your 50 bushels an hour—easily.

Just figure a little. Suppose you charge the lowest price, 3c a bushel. That's \$1.50 an hour. Grind 4 hours, and you've made your \$6.00.

The neighbors will easily keep you busy that much of the time. And the four hours don't break into your day so very badly either.

Western Harness and Supply Co., Box 53, Waterloo, Iowa.

Promises don't hatch eggs

When you read the guarantee of some incubator manufacturers does it ever occur to you that such guarantees are of little value?

When you buy an incubator you want a machine to hatch chickens—you don't want a machine that you must return after the hatching season is over.

YOU DON'T WANT TO WAIT ANOTHER YEAR

before you reap the profits of the chicken business.

Buy an Incubator like the "QUEEN," that is right to start with, and you won't need a guarantee—take the "QUEEN" on your own terms, we stand behind it.

Our Free Catalogue tells the difference between Success and Failure in hatching strong, healthy chickens—send for it.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

DIABETES—LAMENESS.

(1) Please tell me what to do for my three-year-old gelding. He passes or tries to pass urine very frequently, seems to be weak and without ambition. (2) Have a colt that was three years old last May. The fall before he was broken he got lame while running in the pasture. Could not locate lameness then. This spring when I began to work him he continued lame and two small lumps appeared on front ankle at opposite sides. He is now quite lame and is sore in ankle. Horsemen here say it is not ringbone. There is no veterinarian here. I used liniment last spring without effect. Please advise.

(1) See that hay is free from mold, as such hay is the most common cause of a trouble such as you describe. Avoid hard water if it is possible to provide soft water. Allow flaxseed tea as a drink in preference to hard water. Give one ounce of sirup of iodid of iron night and morning in half pint water as drench. Increase to three similar doses daily if found necessary. (2) Clip hair from joint and blister with cerate of cantharides and repeat in three or four weeks if necessary. The enlargement, if bony, may be "osslets."

RHEUMATIC ARTHRITIS.

My hogs are five months old and are running in small lots of ten to about one-fourth acre of ground and have dry board floors to sleep on. Have been feeding corn, seven parts, barley, two parts, and oil meal, one part, also fed considerable skim milk. The pigs go lame on one front foot; the knee swells to nearly twice its size, and they do not seem to get better or worse. Three of them have been this way for three or four weeks and remain just the same. Put one outside for two weeks, but see no improvement.

Apparently the pigs are afflicted with rheumatism affecting the joints, although the same condition might possibly have been brought on by bruising. On the basis that it may be rheumatism physic affected pigs with epsom salts and cut down ration to a light slop of middlings, milk and flaxseed meal. Three times daily give ten grains of iodid of potash in a piece of apple or potato and reduce to two doses daily as soon as pigs improve. Blister the affected joints by rubbing thoroughly with cerate of cantharides. See that sleeping quarters are dry and that hogs are kept out of wet.

SICK LAMBS.

I should like to find out what is the trouble with my lambs. They get sick and keep getting poorer every day until they die. The last two that died had their upper lips swollen and they had a very bad fever in their heads. One scoured with it, but the others did not. I have lost eight head now. Is there any cure for this trouble?

Open a lamb and determine cause of sickness which probably is worms. Recently we held a post mortem on a lamb similarly affected and found it infested by stomach worms, lung worms, tape worms and nodular disease of the intestines, also due to a worm. On general principles we would advise you to give each lamb a tablespoonful of gasoline in six ounces of milk and repeat in three or four days and again the following week, if necessary. As we do not know the size and condition of your lambs it might be wise to give a less dose to a few lambs and after gaining experience as to effects judge the proper dose for the balance. Also commence feeding generously upon a mixture of oats and bran along with the best of grass, hay, or other suitable food. Give a change of pasture.

GRAVEL.

I have been feeding twenty head of two-year-old steers on light feed since the first of May, 1906, and there are six of them that have something the matter with their sheaths. They have filled up so that the water comes dribbling away from them, and it seems to be getting worse. What is the cause and what is the cure?

This condition is comparatively common among feeding steers and is due to excess of lime salts in the urine. The bladder may contain gravel or there may simply be a collection of sebulous matter in the sheath. In such cases cleanse the sheath of collected substance by syringing with a warm 1-100 solution of coal tar disinfectant and by scooping with handle of small spoon or other instrument. When cleansed smear inside of sheath with an ointment composed of a dram of iodoform and two drams of boracic acid in two ounces of lard or lanolin or use benzoated oxid of zinc

We Sell You Doors 80c and Windows 62c

ALL HIGH GRADE AND AT HALF YOUR LOCAL DEALER'S PRICES

If you have any use for Doors, Windows, Storm Sash, Door and Blind Manufacturers' Association of the Northwest, and if not exactly as represented in every particular, you can ship your order back at our expense.

Our lumber is first dried and then put through a scientific drying process. Joints are made with heavy hardwood dowel pins, glued with imported glue, pressed together by heavy steam-power press. There is no "come apart" to our work.

Remember, you save 50 per cent, freight included, on your Local Dealer's prices.

We operate the largest mill in the world—123,000 feet of floor space (four acres)—have been in business since 1865—own our timberlands, saw-mills and lumber yards.

We carry a large stock and can therefore ship promptly.

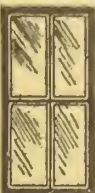

We have no travelling men—sell only for cash. We are the only large manufacturers of sash, doors and blinds selling direct to the consumer. Our prices will astonish you. Don't buy anything in our line until you get our catalog, the grandest wood-work catalog published.

Your banker, or any banker in Davenport, Iowa, our home, will satisfy you that we are thoroughly responsible. Our catalog will explain everything to you. Write for it today. You will receive it by return mail, postpaid.

Do not think of buying until you get our estimate.

Our work is all Guaranteed strictly up to the Official Grades adopted by the

LIFELONG CURES BY A TRUE SPECIALIST

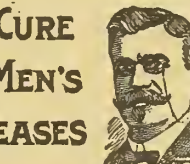

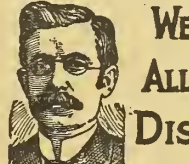

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and proves that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

J. BOYD, M. D., 505 Locust Street, Marquardt Block, Corner Fifth and Locust Streets, DES MOINES, IOWA

ointment if parts are sore. Give steers soft drinking water if possible and if trouble continues acidulate drinking water with hydrochloric acid. A couple of drams of the diluted acid given twice daily in drinking water proves effective.

WARTS.
I have a bay two-year-old colt that has a small wart over her right eye and two others on her neck. I first noticed them about two weeks ago. They are very small as yet, scarcely an eighth of an inch in diameter, but they seem to be growing larger. Will be glad if you can advise me through your paper if they will injure her in any way and what will remove them.

Wart on eyelid should be very carefully treated by applying glacial acetic acid drop by drop until part is saturated. To protect skin around wart rub in lard or vaselin before using the acid. Warts

on neck should be dissected out and the bases touched with lunar caustic to stop bleeding and prevent them from growing again. The warts will only prove a blemish if left alone.

CITY TICKET OFFICE, 512 WALNUT ST.
When you think about traveling call at City Ticket Office of the Minneapolis & St. Louis R. R. (in with the Wabash), at 512 Walnut St., where you will secure the best and latest information. Don't forget the M. & St. L. sells through tickets via St. Paul, over the Northern Pacific, Great Northern, Soo Line, as well as all northern routes. Trains leave Union Station, Des Moines, 8:15 a. m. except Sunday, and 9:05 p. m. daily. Solid through trains to Twin Cities. We are the SHORT Line to Minneapolis. Cafe car on morning train, serves dinner and supper. Night train has new electric lighted sleepers. All cars nice and comfortable. W. K. Adams, D. P. A., D. B. Ransburg, C. P. A., Des Moines, Iowa.

OTHER MARKETS.

South St. Paul, Minn., Oct. 27.—Hogs—Receipts, 2,500; steady; light mixed, \$6.10. Cattle—Receipts, 1,000; dull and weak. Sheep—Receipts, 8,000; mostly through stock; market steady.

Kansas City, Mo., Oct. 27.—Cattle—Receipts, 1,000; nominally steady. Hogs—Receipts, 5,000; steady to 2½¢ lower; top, \$6.32½; bulk, \$6.25 to \$6.30. Sheep—Receipts, 600; consigned direct.

South Omaha, Neb., Oct. 27.—Cattle—Receipts, 400; unchanged. Hogs—Receipts, 3,500; steady to 5¢ lower; top, \$6.30; bulk, \$6.10 to \$6.15. Sheep—Receipts, 1,500; steady.

National Stock Yards, Ill., Oct. 27.—Cattle—Receipts, 1,000, including 400 Texas; quiet. Hogs—Receipts, 1,500; steady; top, \$6.40; bulk, \$6.25 to \$6.32½. Sheep—Receipts, none.

HAY AND STRAW MARKET.

Reported by Freeman Bros. & Co., Chicago, Ill.:

Timothy—Market continues firm and strong with higher tendencies for the "embargo" on the C. & N. W. and C. M. & St. P. railroads are in force, which lines supplied this market with fully one-half of its receipts. With the big source of supply cut off for an indefinite period and the consumption going on intermittently, at about sixty cars per day, it can readily be seen that as soon as cars now in transit arrive and are absorbed, which will not take long, values must move up sharply. Choice and fancy, \$16.50 to \$17; No. 1, \$15.50 to \$16; No. 2, \$13.50 to \$14.50; No. 3, \$11 to \$13; No. 1 clover mixed, \$13 to \$14.

Prairie—Choice Kansas, Okla., I. T., \$13.50 to \$14.50; No. 1, \$13 to \$13.50; Iowa, Minn., Neb., Dak., \$11 to \$12.50; Ill., Ind., Wis., \$7 to \$9.

Straw—Moderate arrivals continue and prices are firm; rye is selling at 50 cents a ton higher than last week. Choice rye, \$8.50; good, \$7.50 to \$8; wheat, \$6.50 to \$7.

CHICAGO MARKET LETTER.

In a letter dated October 26th, Messrs. Clay, Robinson & Co. quote the Chicago market as follows:

The cattle market has received a hard pounding this week, liberal marketing, poor beef trade east and the fact that recent high prices were on a rather unstable foundation combining to turn the tide, and values have sustained a slump of 35 to 50 cents from the recent high point. While the steadily decreasing supplies from the range country will probably help the situation out next week, the trade is not expecting any great advance, although part of this week's loss may possibly be regained. We quote: Choice to extra prime steers at \$6.60 to \$7.15; medium to choice steers, \$5 to \$6.60; common to fair steers, \$4.25 to \$4.75.

Receipts of butcher stock have been very liberal, but not much change in prices, except on medium to good grass heifers which are about 10 to 15 cents lower. Fat dry-fed cows and heifers have held steady and good canners and cutters have also sold at unchanged prices, while veal calves are 25 cents higher than the close last week; milkers and springers steady.

The market on stockers and feeders has sustained a decline of 10 to 15 cents on most classes. Good heavy feeders have been in good, active demand. This is also true of the better grades of light cattle.

Receipts of hogs, although not quite so large as last week, were plenty heavy enough for the trade and values are about 10 cents lower for the week, top today being \$6.52½, bulk of the good hogs selling at \$6.40 to \$6.50.

The lamb market is just about steady with a week ago, best natives selling today at \$7.65. Sheep have been in good demand all week and are 10 to 15 cents higher than a week ago. There continues to be a good, strong demand for feeding stock and the outlook is quite favorable on all classes. Receipts recently have included a good many warmed up western lambs from the corn belt feed lots, shipped back to market after a few weeks' feeding, and these have been hard sellers, as they are attractive to neither killers nor feeder buyers. Lambs of the right kind that are doing well on feed should be made reasonably fat before marketing and it will pay persons having such to keep them on feed long enough to accomplish this end.

We quote: Fair to good fat wethers, \$5.10 to \$5.65; fair to good fat lambs, \$7.30 to \$7.50; common to fair lambs, \$6.25 to \$7.10; good to choice feeding wethers, \$5 to \$5.15; good to choice feeding yearlings, \$5.40 to \$5.65; good to choice feeding lambs, \$6.50 to \$6.65.

The Week in Kansas.

To the Editor of The Homestead:

This has been a week of varied weather, according to the portion of the state in which you live. Last Sunday, for instance, the weather here in eastern Kansas was like a day in June, but out in the extreme western portion of the state, according to newspaper reports, it was snowing and sleeting. It hardly seems

LANDS AND HOMES FOR SALE.

SHEEP BREEDERS!

Let us tell you something of what it means to be a SHEEP BREEDER or STOCK RAISER IN MICHIGAN. The great Chicago market is near by and freight rates are low. This means something to YOU. We offer 4,000 acres of first-class grazing land at a low price. Are YOU interested? If so, drop us a postal.

MICHIGAN LAND ASSOCIATION

MANISTEE, MICHIGAN.

PRAIRIE LAND

with some timber. Where can you get it except in Canada? Best for grain and cattle. Good climate. Five families in 1902, 600 families in 1905. Write us for map and description. Some Homesteads left. Join half-acre Extension. Cheap land on ten years time. Scandinavian-Canadian Land Co., 115 Washington Street, CHICAGO, ILL.

Two Mo. Farms For Sale

380 Acres: A desirable stock or grain farm in Montgomery Co., Mo., near the booming new town of Bellflower, on the Burlington railroad, 85 miles from St. Louis. This farm consists of 80 acres blue grass pasture, never was plowed; 50 acres new meadow; 70 acres sowed in wheat; 20 acres feed lots, etc., about the buildings; 110 acres pasture, of which 20 acres is timber; 40 acres detached timber coal land. All except the last 40 is fenced, mostly with hog fence into 7 fields. 320 acres is first-class prairie land in a high state of cultivation. There are several ponds, two good cisterns and one living well. The buildings consist of a 1-2 story dwelling, frame, of 7 rooms, 2 bells, and porch; a large barn 44x59; a 2 room tenant house, ice house, cellar house, and other out buildings, some fruit; telephone with splendid connections in house; daily mail, R. F. D. A bargain at \$45.00 per acre.

308 Acres: A first-class stock farm in Audrain Co., Mo., about ten miles from both the Wabash and C. & A. railroads, and eight miles from the Burlington. 308 acres fine prairie land, 115 well; 60 acres is somewhat broken blue grass pasture land, with some timber extending from prairie to creek; and 40 acres good bottom land, in pasture, mostly blue grass. This farm is all under fence and subdivided into seven fields. The prairie is all fine plow land in a good state of cultivation, of which 88 acres is wheat stubble down to timothy; 40 acres corn stubble; 30 acres meadow; 40 acres in corn; 10 acres in pasture and lots about out buildings; a good one and one-half story 5 room frame house; barn 36x40; good cistern, good pond, a running stream through farm; some fruit; daily mail R. F. D. Telephone line with extensive connections passes house. There is an excess of 11 acres, making actually 319 acres in this farm. A great bargain at \$35.00 per acre.

These very low prices are made to make quick sales, and will not hold good after the first day of February, 1907. Will carry as much as 60 per cent of the purchase price at 5 per cent almost any length of time to suit purchaser. Am the owner of these farms, and in dealing direct with me you save agents' commissions. Address,

L. D. MUDD, MONTGOMERY CITY, MO.

CORN LANDS

IN SOUTH DAKOTA.

Big Sioux Valley Land Co.

SIoux FALLS, S. D.

CORN LAND.

UNIMPROVED ¼ section about 5 miles from railroad in Faulk Co., South Dakota. All kinds of grain and buffalo grass grow there. Best of soil and water and in arid region where land is constantly changing hands and increasing in price. If taken at once, I will accept the Very Low price of \$16.00 per acre on reasonable terms, no commissions to be paid. No trades. Write or call upon the owner.

E. M. Kieron, 311 Nicollet Av., Minneapolis, Minn.

House Wrecking Company at sheriffs' sales and bankrupt prices on our last page. The Chicago House Wrecking Company are an old, reliable house, who purchase merchandise at sheriffs' sales, buy exposition buildings and furniture and other goods at low prices and give the farmer the benefit. Write for their large free catalog, No. 500, mentioning The Homestead. It will save you much money.

FOR SALE A "Bumper" Iowa Farm

A good farm as there is in Iowa, containing 300 acres, located in Kennebeck township, Monona Co. It is 5 miles from Onawa (county seat) and 2 miles from Tiffin, both good railroad towns. I will sell for \$75 per acre if taken soon, part cash and balance on time at a reasonable rate of interest. The house is a good frame house of about 6 rooms, brick foundation, cemented cellar, etc. Barn is large with brick foundation, almost new, has lean to shed 12x32 feet. There are ample cribs, bins, etc., hay scales, good wells and windmill. The farm is well fenced and will divide into 2 farms nicely. All buildings are well painted and in good condition. About 25 acres was under plow this season. The remainder is splendid hay land with the exception of 15 acres of good timber land along the west line, which is the little Sioux River. For stock or grain the farm has no superior anywhere. The soil is deep and a very rich dark loam, easily worked; no rocks, no sand. As the Northwestern Mutual Life Insurance Co., of Milwaukee, renewed a small loan for 5 years on the above described land, June 29, 1906, there can be no question as to perfect title. I refer you to any bank or commercial agency in Omaha, Neb., or Council Bluffs, Ia., as to my reliability. The farm to be appreciated must be seen. All inquiries cheerfully answered. All crops reserved. Address,

Z. T. LINDSEY, OMAHA, NEB.

I also own 267 acres of adjoining land, partly cultivated and part hay land, fenced only, on which I will make a very reasonable price.

Kansas Bargains

160 ACRES Meade County, Kansas, wheat land \$8.00 per acre.

360 ACRES Marion County, Kansas, one mile from railroad town; choice land; every foot tillable, at \$40.00 per acre. Will sell all or part. No buildings.

343 ACRES Johnson County, Kansas; excellent rich soil; one mile from Olathe, Kansas, close to electric line to Kansas City; only seventeen miles from Kansas City Stock Yards; highly improved; the very best bargain we have ever offered. Write for further particulars about all three.

SOMETHING GOOD IN MISSOURI

246 Acre Farm in Henry Co., Missouri

This farm is a finely-located, improved farm about fifteen miles north-east of Clinton, Mo., the county seat, and two miles from a good railroad town. It is all good, level, rich land and can practically all be cultivated. The improvements are all new and well finished. They include a good, substantial, conveniently-arranged, seven-room house, a good barn 28x40, double corn crib, hog house, chicken house, good cistern and well. The farm is well fenced and cross fenced.

Located as it is, in one of the farming counties in Missouri, and being so well improved, this is an unusually desirable home place. It is also close to the Kansas City markets, which insures higher prices for grain, hay and live stock.

The owner of the farm lives in Iowa and has all his other interests there. He wishes to sell it and will give very favorable terms or might consider a good Iowa farm, live stock or other property in part payment. Write for full particulars.

Send for our new illustrated catalog of improved farms. It is the most attractive list we have ever issued and offers many unusual bargains. The descriptions are complete and the illustrations are from actual photographs of improvements on the farms described. It is printed in handy folder form on good paper and contains a large map of Iowa.

We have a few good farms to exchange for city property, merchandise, etc.

NORTHERN IOWA LAND COMPANY,
INDEPENDENCE, IOWA.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of a mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS,
KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands at low prices, but also get located in the finest climate, where crop failures are unknown; no bugs, flies or rust; freedom from electrical and destructive wind and hail storms; where fruits of all kinds do well. UNIMPROVED FARM LANDS

In Osceola County, Michigan.

THIS group of lands was covered at one time with hardwood timber, some hemlock, but no pine. Soil is heavy and rich, clay or gravelly loam, well watered. Crops: Good hay and grain lands; ideal for potatoes; all fruits do well. These lands are guaranteed to be as fine as any in the state, but are still wild and covered with some timber and must be cleared. Markets are plentiful and close and on good railroads. Good schools, churches, roads and telephone lines already built. Terms: Lands sold for cash or one-quarter down, balance in five annual payments, interest 6%. Price, \$12 to \$15 per acre. Write for booklet.

H. W. MARSH, MANISTEE, MICH.

IN THE GREAT SOUTHWEST

Prices of farm products were fixed recently by the American Society of Equity. Members of the society bind themselves not to sell products at less than the following prices: Wheat No. 1 northern, or No. 2 red, \$1; corn to the end of year, 45 cents; from January 1st to April 1st, 50 cents; after April 1st, and until prices are again fixed, 55 cents; oats, 40 cents; barley, No. 2, 55 cents; rye, 75 cents; buckwheat, 70 cents; potatoes, Irish, 65 cents; sweet, 75 cents; beans, navy, \$1.50; red, \$2; cotton, 12 cents; wool, 30 cents; hogs, \$6.50; cattle, \$6; sheep, \$5.50; hay, \$14; broom corn, \$75 to \$100. In nearly all instances the list of prices is to be based on Chicago markets, the exceptions being the price for beans, which is based on Detroit quotations, and cotton on New York. The convention re-elected its old officers except the treasurer, the new treasurer being John P. Stelle, of Indianapolis. Among the directors elected is J. W. Scott, of Plainfield, Wis.

Messrs. Clark and Lane, of the interstate commerce commission, held an important meeting in Kansas City last week. The object of their visit here was to take testimony relating to the grain trade. The commission was instructed by congress in its last session to investigate this subject and to ascertain in particular what is being done by railroads as well as grain companies to restrict the grain trade business. The evidence taken here seemed to indicate that the action of certain railroads interfered with the free movement of grain.

The Kansas Experiment Station has recently published a bulletin relating to the study of corn. It is designed for the use of young men and boys who have entered the contests under the direction of the farmers' institutes and for all others who are interested in the study and improvement of corn. Thirteen of the principal varieties of corn in the state are described in detail, and a score card applicable to Kansas corn is also given. Some attention is given in this bulletin to the subject of corn breeding. The subject of testing is also taken up and the bulletin is well illustrated. It may be obtained upon application to Director of Experiment Station, Manhattan, Kan., the number being 139.

It is reported that the farmers of

Sends Us the Following Letter That Will Be Interesting and Convincing Proof to Those Who Suffer

From Diseases Coming From the Kidneys

TO WHOM IT MAY CONCERN: This is to certify that I have had kidney and bladder trouble for eight years and never got any relief until I used Swain's Backache and Kidney Pills. I have used nearly all the medicine advertised for those diseases, but failed to receive any permanent benefit from them. I think by the occasional use of Swain's Backache and Kidney Pills I will have no further trouble. They have been a great blessing to me, and I recommend them to any one suffering with kidney and bladder trouble. Signed, W. C. DONALDSON, Odessa, Mo.

We are daily in receipt of just such letters from people in all walks of life, telling us what Swain's Backache and Kidney Pills have done for them. That is why we tell you they will cure every disease that comes from the kidneys. Bright's disease, Diabetes, Gout, Rheumatism, Dropsy, Blood diseases, Constipation, Backache, Deafness, Heart disease, Nervousness are diseases caused by the kidneys failing to remove and wash the impurities out of the blood through the urine. Swain's Backache and Kidney Pills are sold by druggists at 50 cents per box or Swain Medicine Company, Dept. 12, Kansas City, Missouri.

ANY ONE SENDING US 10c TO PAY POSTAGE AND PACKING AND MENTIONING THE NAME OF THIS PAPER CAN HAVE A 50 CENT BOX "FREE" TO TEST.

Soon Pays for Itself

Enterprise Wind Mill Co., 24 Main St., Sandwich, Ill.

Brown county, Kan., have up to date sold this year clover seed to the value of \$100,000.

Announcement has recently been made concerning the changes that will be made in the president's cabinet. Secretary Shaw, of the treasury department and Secretary Moody will retire the first of the year. Mr. Moody's place as attorney-general will be taken by Mr. Bonaparte, present secretary of the navy, and Mr. Bonaparte will be succeeded by Mr. Metcalf, whose place as secretary of commerce and labor will be taken by Mr. Strauss. Secretary Shaw's place will be taken by Mr. Cortelyou, now postmaster-general. Missouri will still be represented in the president's cabinet, Mr. E. A. Hitchcock, secretary of the interior, remaining in his office.

John Q. Royce, in his forthcoming report to Governor Hoch, will ask for more money to employ bank examiners in his department and will also recommend a change in the examining plan which will be more comprehensive than the one in use at the present time. There are nearly 700 state banks in Kansas and three bank examiners are supposed to examine every bank at least once a year. This is almost a physical impossibility.

The Kansas State Board of Health has been conducting a series of examinations of the butter of Kansas. In a recent report giving the analysis of samples from twenty-one creameries only one company furnished butter up to weight requirements. The weights of the samples furnished varied from 13.9 ounces to 15.8 ounces, except in one case where the net was the full sixteen ounces. Dr. Willard, the state chemist, states that when practically every sample is under weight it is evidence that the general practice of creameries is to make them so.

F. L. Bowman's Sale of Durocs.

Mr. F. L. Bowman, of Hamilton, Mo., held one of the most successful sales of Duroc Jerseys held this fall, on Friday, October 19th. Only a few breeders were in attendance from a distance and it was up to Mr. Bowman's neighbors and the breeders who came to make his sale the success that it was. Mr. W. S. Wilber, of Hamilton, Mo., who is starting a herd, was the most liberal buyer of the better things and a bright future is in store for this gentleman, in the Duroc business. At the American Royal Mr. Bowman bought the two-year-old boar, Gold Finch 2d, to succeed Goldie's Top Notcher, his former herd boar that died some two weeks ago. At the opening of the sale Gold Finch 2d was shown and Mr. Bowman announced that all sows bringing over \$50 could be left and bred to this bog free of charge. This had much to do with bringing the prices up, as all were favorably impressed by him and the breeders were anxious to get litters by him. The top of the sale was \$175 for Lot 2, a Goldie's Top Notcher fall yearling. Mr. W. S. Wilber, who bought her, refused \$50 for the two choice pigs from her spring litter. The next highest price was \$150, paid by Mr. Wilber for a litter sister to No. 2. Both are show sows and with their length and breedy appearance should do Mr. Wilber plenty of good. Mr. E. S. Bonner, of Hamilton, Mo., and Mr. C. B. Fagin were the runners up. Forty head were sold and an average of right at \$40 was made. Col. C. C. Keil and Col. Harry Graham did excellent work, both in the ring and on the block. Colonel Keil opened the sale and sold about one-half the offering. Following is a list of all sales over \$30:

Lot Price.

1. Two-year-old sow, E. S. Watson,

Let Me Quote You a Price on the AMERICAN Manure Spreader

We manufacture and sell the celebrated American Manure Spreader to the consumer direct from our factory—saving all the middle profits made by jobbers and dealers. These profits are left out of consideration in the prices that I want to make you direct from our factory on an American Manure Spreader.

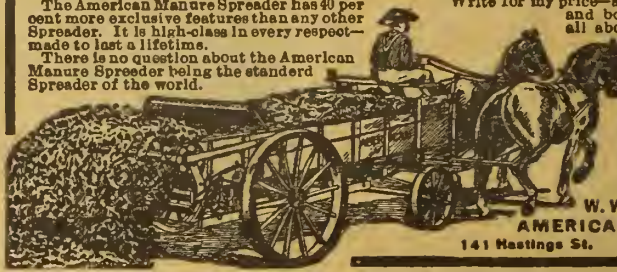

This means that you can buy from our factory at factory prices—be a Wholesale Buyer. And that isn't all! We don't ask you to pay cash in advance.

We sell the American Manure Spreader on Time—

liberal time payments—giving our customers easy terms to pay for their Spreaders—letting the Spreader really pay for itself as it earns for you. We are the only concern in the United States manufacturing and selling Manure Spreaders direct to the user on time and on trial at low factory prices.

The American Manure Spreader has 40 per cent more exclusive features than any other Spreader. It is high-class in every respect—made to last a lifetime.

There is no question about the American Manure Spreader being the standard Spreader of the world.

30 Days' FREE Trial

To prove all of our claims for the celebrated American Manure Spreader, we allow 30 days' trial on every Spreader we sell.

This permits the customer to use the Spreader on his own farm for a full month to be satisfied that it is just as represented. If not as represented it can be returned to us. We pay all freight both ways—trial being FREE.

The low price I want to quote you on an American Manure Spreader will be for the Spreader delivered at your station.

We Pay All Freight

This price will be for the Spreader on time—this price will be for the Spreader on trial—and this price will be a price that is lower than dealers are charging for Spreaders that are not nearly so good as the American. When you examine all the exclusive features of the American you will agree with me.

Write for my price—and write for my catalogue and booklet. They will tell you all about the American Manure Spreader and give you a lot of good information on the question of fertilizing—a question that every farmer is interested in and wants to know all about.

Just write me today on a postal card. I will see that you get our book and my special price at once.

H. G. McMillan's Sale of Short-horn Cattle.

Lakewood Farm scored another big success in the sale of Short-horn cattle held October 24th. The growing popularity of Short-horn cattle, Percheron horses and Poland China hogs as produced at Lakewood Farm by Mr. H. G. McMillan, of Rock Rapids, Iowa, was manifest last Wednesday when, during a fifty-hour rain, wind and snow storm, enough breeders and farmers congregated to buy the offering from Lakewood at the handsome average of \$120 per head. Breeders from a distance were much surprised to see the high character of cattle offered by Mr. McMillan, and particularly were they impressed with his great Scotch bull, Morning Joy 188620. The writer has always been an ardent admirer of Morning Joy and has repeatedly urged the proprietor of Lakewood to never part with him under any circumstances. Morning Joy is a rare combination of Campbell-Reid blood as an outcross of Scotch blood. He is a Campbell Mina, founded on Bashful, sired by the Captain Barclay (of Ury fame) bull, Young Ury (10984). Morning Joy's sons in this sale made the handsome average of \$150. Mr. Geo. F. Root, of Alberta, Canada, was present and offered Mr. McMillan \$1,000 for Morning Joy, which was refused, Mr. Root then buying one of Butterfly Lad at \$350.

THE DUPLEX PHONOGRAPH.

This illustration of the Duplex Phonograph represents one of the greatest instruments of its kind. It is elegantly constructed and finished and makes an ornamental piece for any parlor. It possesses an entirely new principle in the two horns. This discovery allows of a large volume of sound of the greatest purity and sweetness. The tones of the Duplex are entirely free from the usual metallic sounds. Nothing adds to the attractiveness of the home so much as music. A good phonograph is more conducive to culture and refinement than any thing that can be put in the home at any

SAVE ALL
the DEALERS'

thing like the same cost, or several times the cost for that matter. It reproduces entrancing melody and the matchless gems of literature right by your own hearth where every evening of the coming winter it will be the source of the keenest kind of enjoyment. The holidays will soon be at hand, and what would be a more acceptable gift to the family than one of these beautiful instruments? You can buy a Duplex at factory prices. A neat booklet describing the Duplex in detail will be mailed upon application to the Duplex Phonograph Company, Kalamazoo, Mich. See their advertisement on page 4 and when writing to this company mention this paper.

IN AND AROUND WISCONSIN.

Wholesale naturalization frauds in Hennepin county, Minn., have been discovered and the evidence has been turned over to the United States authorities, a thorough investigation being now under way. Up to date, sixty-two warrants have been issued. It is said that a large number of foreigners have perjured themselves in taking out their second papers in over-stating the time they have been in this country, this being done in order to be able to vote. A well-known politician has been arrested and bound over to await the action of the federal grand jury.

The Wisconsin rate commission has been giving a hearing to the attorneys of the beet-sugar companies located at Menomonee Falls, Chippewa Falls and Janesville for reduced rates on the transportation of sugar beets and pulp. The attorneys for the sugar-beet companies claim that rates are excessive and unreasonable, being at least 25 per cent higher than they are in Michigan and Nebraska. Attorneys representing the Northwestern and Milwaukee roads claimed before the rate commission that the rates are as low as can be made by the companies if a reasonable profit is to be made on the transportation of the beets. The testimony shows that the beet companies pay the railroads about \$200,000 a year.

Farmers in Sully county, S. D., have raised by popular subscription the sum of \$100,000 for the purpose of constructing and equipping an electric line from Pierre to Okoboji, a distance of twenty-one miles. Sully and Buffalo are the only two counties east of the river that are not traversed by one or more railroads, and farmers in those counties have determined on having the only electric line in the state.

A machine corn husker is now being used in Rock county, Wis. For eight years Mr. A. M. Hollenbeck and Mr. Vernon McDole have been trying to solve this problem, but not until recently have they discovered the mysterious mechanical principles that are necessary to success. They have already built and rejected six machines. The one they are now using is worked by an eighteen-horse-power gasoline engine. The inventors claim that the machine will take care of fifteen or twenty acres a day. It is estimated that this husker when placed on the market will be sold at from twelve to fifteen hundred dollars.

Independence, Iowa, has a unique industry in the growing of pumpkin seeds for market. A local seed house pays from five to eight cents per pound. Some farmers are able to net six dollars per acre on the same land where corn grows.

The Big Pasture Opening in Oklahoma.

Regulations have been recently issued concerning the sale by bids, of what is known as "Big Pasture" lands, or 505,000 acres, in the Kiowa-Comanche country, Oklahoma.

This land will be disposed of in quarter-section lots, in sealed bids, to the highest bidder, under the provision of the homestead laws of the United States. No bids shall be considered which shall be at a less rate than \$5 per acre for the lots embraced in such bid. No bid will be considered that is received before 9 o'clock a. m., on Monday, the 3d of

December, or after 4 o'clock on Saturday, the 8th of December, 1906.

Each bidder may make as many bids on separate tracts as he chooses, but he must list the tracts bid for by him separately, on the same sheet of paper, and set opposite each tract, the total amount of bids therefor. No individual will be allowed more than one quarter-section, although as said before, bids may be made on any number.

For maps, schedules, etc., relating to these lands, application should be made to Register and Receiver, United States Land Office, Lawton, Okla.

Mt. Pleasant Angus Sale.

The opening Angus sale in Mt. Pleasant's new pavilion took place on Wednesday, October 24th. The weather was everything but what was desirable and on this account the attendance was smaller than was expected. The contributors to this opening sale were Messrs. W. B. Seeley, Mt. Pleasant; W. K. Henss, Wayland; J. T. Cline, Salem, and J. D. Beaber, of Rome. Fifty exceedingly useful animals were sold on the date mentioned. Col. Silas Igo did the selling and his work was exceedingly creditable. The first animal offered proved to be one of the great bargains of the day. This was a two-year-old Blackbird Top Erica consigned by Mr. Seeley. She went to Mr. Corwin, of the Van Buren County Farm, at \$105. Mr. Patrick Donohoe, of Holbrook, secured Blackcap of Clover Lawn, a very fine three-year-old double-bred Blackbird heifer consigned by Mr. Seeley, at \$175—the top of the sale. Mr. Donohoe also paid \$210 for Blackbird Dale. Mr. J. T. Cline secured the two-year-old Blackbird bull, Black Jam Dale, at \$155, and Mr. E. C. Temple, of Osceola, paid \$125 for a very fine Coquette calf consigned by Mr. Henss. Mr. Lee Watts, of Wayland, captured the prize young bull, Barondale 2d, consigned by Mr. Seeley, at \$120. Mr. J. C. Frame, of Salem, secured one of the largest and smoothest cows in the sale, Park Princess B. 2d, owned by Mr. Seeley, at \$115. Messrs. Samuel Green & Son, of Trenton, Mr. Beaber and Mr. J. L. Bennett, of Chariton, secured some nice young things at around \$100. Mr. Enoch Beery, the popular stockman of Salem, picked up some bargains at the latter part of the sale. There were several of the young things that sold very cheaply, bringing the general average down to a trifle over \$82, while Mr. Seeley's average was something over \$112.

Wood's Short-horn Sale.

A large number of Short-horn breeders were present at the closing out sale of Mr. W. I. Wood, at Washington C. H., Ohio, on October 18th. Imp. First-in-the-Ring topped the sale, going to Mr. J. C. Murray, of Mt. Sterling, Ohio, at \$1,675. The plainer-bred lots had a tendency to lower the average on the better class of cattle. Colonels Woods, Barclay and Urton conducted the sale in a satisfactory manner. A list of animals selling for \$100 or over is given below:

FEMALES.

Missie W., three years, sire White Hall Sultan, Carpenter & Ross, Mansfield, Ohio	\$505

In The Feed Lot

There is no subject worth so much study by farmers in general, and especially stock farmers, as the care and feeding of live stock. No farm weekly gives such a fund of timely advice in its regular departments, nor the benefit of the ideas of the most noted live stock experts as does

THE TWENTIETH CENTURY FARMER

The feeding Department is in charge of H. R. Smith, who is in charge of Animal Husbandry at the Nebraska Experiment Station. Mr. Smith is a practical feeder, having been raised on a stock farm; he has been a student of the feeding question all his life. It was he who three years ago selected and produced Challenger, the sweepstakes champion at the International Live Stock Exposition.

The Veterinary Department is in charge of Dr. H. L. Ramacciotti, one of the best known successful practitioners among western veterinarians. Questions from subscribers with regard to sick live stock are answered free of charge. The saving of a single animal, and everyone has losses now and then, would pay our subscription price many times over.

The Market Department is in charge of A. C. Davenport, Commercial Editor of the Omaha Bee, who is a widely known authority on stock markets.

Each issue contains special articles from such men as Geo. Bellows, F. D. Coburn, C. R. Thonias, W. E. Skinner, E. B. Mitchel and other leaders among thinking live stock men.

CATARRH ADVICE FREE.

The attention of our readers is called to the really generous offer in this issue of our paper on page 20; the offer of helpful and valuable medical advice, absolutely free of charge on the cure of catarrh, from one of the great specialists and public benefactors of this country—Catarrh Specialist Sproule. For twenty-one years he has had wonderful success in curing catarrh, and because he sees how many people stand in need of honest and reliable advice on the cure of this ailment, he will give this advice free of all charge to any who write and ask for it. We advise our readers to turn at once to Catarrh Specialist Sproule's generous offer and we urge them to read every word of it, and send today for whatever medical advice they stand in need of. Catarrh Specialist Sproule's offices are at 473 Trade Building, Boston, and all letters should be addressed to him there.

BUSINESS OPENINGS.

"Business Openings" on the Union Pacific is the interesting title of a booklet recently placed before the public by the Union Pacific Railroad Company.

The booklet aims to give a brief but comprehensive summary of the economic, social, industrial and civic conditions of points along the Union Pacific system and lays especial stress upon the splendid opportunities presenting themselves to farmers, stock raisers, manufacturers, merchants, miners and investors.

From cover to cover the publication teems with the most interesting information and one is amazed at the wonderful and unthought-of resources of the West.

All those contemplating settlement or investment in rich, productive and rapidly growing communities along the line of this great railroad will find it to their advantage to read the booklet.

The Homestead and The Homemaker \$1.25 per year.

A dollar's worth of Standard Stock Food

—contains more feeds,
—will go farther,
—last longer, and
produce more and better results,

than a dollar's worth of any other stock food made, whether it costs 5c or 15c a pound.

YOU can prove this to your own satisfaction by examining various stock foods and their feeding directions. The Standard looks better, smells better, tastes better and is better—stronger, richer, more concentrated—and a much less quantity of it is required at each feed.

It gives the best results at the least cost.

Sold on our money-back, square-deal guaranty.

Go to your Dealer and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

STANDARD STOCK FOOD CO., 1516 Howard Street, Omaha, Neb.

FREE TO YOU.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

OUR LEGAL DEPARTMENT.

(Continued from page 10.)

to pay taxes on the full forty acres? (2) B bought a horse from A for \$60 and gave his note for that amount signed by his wife as surety, due fourteen months after date. B's wife owns seventy-five acres of land, with two mortgages on it, one given before the note was given and one afterwards. Do the mortgages come in ahead of the note?

Answer.—(1) Section 1344 of the Iowa code provides that ground occupied by a public road shall not be assessed or taxed as part of adjacent lands. (2) The note is not a lien on the land at all, while both mortgages are liens on the land. So far as payment of the note from the proceeds of the wife's land is concerned, both mortgages would be ahead of the note.

SUBSCRIPTION TO PAPER.

A Subscriber, Atkins, Iowa.—I subscribed for the Farmers' Tribune for three months, paying the subscription in advance. When the time expired I wrote to the publisher to stop sending the paper, but the paper continued to come. I then told the postmaster to notify the publisher to stop the paper, which he did, and I have not taken a single copy of the paper from the postoffice since that time. Recently an adjusting association, which seems to be a collection agency, sent me a rude dunning letter, demanding the payment of \$7 and threatening suit. What is the law in such a case?

Answer.—You are liable for the subscription so long as you took the paper from the postoffice. You are not liable for any time since you ceased to take the paper from the postoffice after requesting the postmaster to notify the publisher to stop sending it.

HORSE DEAL.

A Subscriber, Milledgeville, Ill.—A sold a horse to B, saying that it was sound and all right as far as he, A, knew, but that he was not much of a judge of horses. A and B drove the horse around a few blocks in town, and then B got out of the buggy and looked the horse over, and then had A drive it up and down the road several times, and then bought it and A was to deliver it the next morning, which he did. About two days later B told A he had got a veterinary to examine the horse, and he said it had a spavin. B offered the horse back to A for \$10 less than he paid, but A refused the offer. B has not paid for the horse in full. What can A do to get the balance?

Answer.—Sue him for it.

CASTRATING ANIMALS—VETERINARY.

A Subscriber, Guttenberg, Iowa.—B is not a veterinary surgeon, but has been castrating colts for twenty years with good success. A had a colt to castrate, and he requested B by letter to come and do it, having more confidence in his skill than in that of the ordinary veterinary. B performed the operation and a few days afterwards the colt became lame in its back, and cannot get on its feet. A wants B to pay for the colt. (1) Can he compel him to do so? (2) Has B a legal right to castrate colts, not being a veterinary?

Answer.—(1) We do not think that A can recover anything from B. Certainly not from the facts as above stated. A would have to prove that the condition of the colt was caused by B's unskillful treatment or by his negligence in order to recover. This would probably be difficult to do. (2) B or any other person who is competent to perform the operation, may castrate domestic animals. No license is required. It may be done by a person not a veterinary.

WILL IN OKLAHOMA.

A Reader, Hennessey, Okla.—A, who was a widow and the mother of two children, died on a homestead in Oklahoma. She married B, who was a widower. B had children by a former wife. A proved up on her homestead in her own name, and it is still in her name, although she and her husband occupy it as their home. There are no children

of the marriage between A and B. A wishes to make a will so that at her death her land will go to her own children, and not to her husband or his children. How can it be done?

Answer.—The law of Oklahoma gives a married woman the power to dispose of her separate property by will the same as though she was a single person. She can will all her property to her own children, so that neither the husband nor his children will get any of it. She ought to have a reliable lawyer prepare the will. She must sign it at the end, in the presence of two witnesses, and request them to sign as witnesses, declaring to them that the paper is her will; then the witnesses must sign their names and the place of their residence, in the presence of the testator and of each other.

WIDE WAGON TIRES—REBATES.

Mr. W. H. G. Whitefield, Bayard, Iowa.—I own a wagon with a four-inch tire, which I have been using on the roads during the last summer, doing considerable hauling. I want the advantage of the rebate on my road taxes, which was provided for by the last legislature. How shall I apply for it, and to whom?

Answer.—You will be entitled to a rebate of one-fourth of your assessed highway tax for the year ending July 1, 1907, provided such rebate does not exceed five dollars, and a like rebate for each year thereafter, during which you use a wagon with tires not less than three inches wide. In order to get such rebate you must make and subscribe an affidavit that you have for the preceding year used only such wagons with tires not less than three inches in width for hauling loads exceeding eight hundred pounds on the public highways of the state. You make oath to this before a township trustee, or the township clerk, of the township where you live and file it with the board of trustees and they will pay you the rebate. The first payments of rebates will not be made

alt? (3) B owed A a sum of money and to secure payment of the same he gave A

We want every reader of The Homestead to have a FREE SAMPLE

We want to put a sample of Amatite Roofing into the hands of every farmer in the U. S. We know that when a practical man examines it and realizes that it does not need painting, we shall have no trouble in selling him Amatite. The special, non-conductive mineral surface which is embedded into the top layer of Amatite saves you all the bother and expense connected with the painting. You can put Amatite on your roof and not look at it again for years, and it will give you good service every minute of the time. You don't have to go over your roof every spring to look for leaks, and you don't have to spend

money for paint and labor every year to keep it tight.

We cannot explain the mineral surface to you very well without showing you a sample. Send your name and address to our nearest office, and you will receive same by return mail. Then you can see for yourself what an advantage it is to use Amatite—the mineral-surfaced roofing—and you can compare its cost with the cost of using some other kind which requires painting. Send now **Barrett Mfg. Co.,** Amatite Dept., New York, Philadelphia, Boston, Chicago, Minneapolis, New Orleans, Kansas City, Cincinnati, Allegheny, Cleveland, St. Louis

Crimson Wonder I Am 34697, is the greatest representative of the "Crimson Wonder family."

He is owned by Mr. U. G. Davidson, of Manson, Iowa, and made a sensational showing at the Iowa State Fair in 1905, winning first in junior yearling class and sweepstakes, and was pronounced the greatest boar ever exhibited on the grounds. As a sire he is unequalled, having sired the sweepstakes boar at the Iowa State Fair this fall, also the junior yearling boar that won third in class. The photo from which this cut was made was taken by a representative of The Homestead on the state fair grounds, and shows the wonderful individuality of this great hog to perfection, emphasizing the fact that he is easily the nearest the ideal type of any living boar.

till after the first day of July, 1907.

WHAT IS RIGHT?

A Subscriber, Milledgeville, Ill.—B rented a farm from A in Illinois. By the terms of the leasing contract each of the parties was to furnish one-half of the cattle, hogs, seed and feed kept and used on the premises. Substantially all the products of the ground were fed on the place. By agreement between the parties B bought several acres of standing corn from a neighbor, and cut, shocked and shredded it with his own labor and machinery, and used it as extra feed on the place for the stock, which A and B furnished together. Should A bear any portion of the expense incurred in cutting, shocking and shredding said corn?

Answer.—A should bear a portion of the expenses of cutting, shocking and shredding the corn mentioned, but just what proportion it is difficult to determine without knowing more about the surrounding circumstances. If both parties want to do what is right, they ought to settle that matter between themselves without any trouble.

SALE—MORTGAGE—FORECLOSURE.

A Subscriber, Jackson, Minn.—On August 6, 1906, A bought a horse from B and paid him \$5 in cash on the purchase price that day and immediately took the horse home and next day he paid the balance of the purchase price to B. On September 1, 1906, B gave a mortgage on this horse and another one, to C. B's wife saw A pay B the \$5 and the balance of the price was paid by A to B where they met on the road, no witnesses being present. C threatens to take the horse which B sold to A. (1) What are C's rights in the matter? (2) Is B liable to any pen-

alty? (3) B owed A a sum of money and to secure payment of the same he gave A a chattel mortgage on a team of horses and some farming implements, the note secured thereby being made payable on demand. The mortgage was made in Milledgeville, Jackson county, Minn., and the mortgage stated that the team and implements were at the time in possession of B. As a matter of fact the property was in Iowa and is still there. Is the mortgage valid and what steps should A take to protect his rights?

Answer.—(1) C has no right whatever to the horse sold by B to A. (2) We think B is liable to a criminal prosecution for mortgaging property that did not belong to him. (3) The mortgage, if properly drawn up and executed, is valid and binding. A should at once demand payment of the note, and if not paid, then go to the county in Iowa where the mortgaged property is located, and there file the mortgage for record, and then seize and take the property and dispose of it according to the terms of the mortgage, to satisfy the note.

SUBSCRIPTION CONTRACT.

A Subscriber, Alva, Okla.—Last September a solicitor for a publishing house in Chicago went through this county taking orders for a county atlas. The book was to be delivered by April 1, 1906. The solicitor misrepresented everything, and told his subscribers that it would be optional with them whether they took the book or not, when it was delivered. The company failed to deliver the book by April last, but has notified subscribers that it will be delivered soon. Can the company compel

subscribers to take the book and pay for it?

Answer.—It depends upon the kind of a subscription contract which was signed by the subscribers. Evidently they signed their names to some kind of a paper, and this paper, no doubt, contains a sure thing, iron-cast, copper-bottomed, double-riveted agreement of the subscribers which binds them. People who insist on signing papers presented to them by strangers must bear the consequences of such conduct. We have repeatedly warned readers and subscribers against signing papers presented to them by glib-tongued agents.

NOT GOOD CAUSE OF ACTION.

A Minnesota Subscriber.—A renter lost his best horse through the carelessness of his landlord, who negligently left a wire lying in the pasture, nailed at one end to a post, knowing at the time that horses were in the pasture. Can the renter recover damages?

Answer.—We do not think that the facts as stated constitute a good cause of action for damages.

SOLDIER'S HOMESTEAD.

Mr. John L. Tobler, Roberts, Wis.—(1) Are there any homesteads to be taken in the Indian Territory, and if so, under what law? (2) I served in the United States army from March, 1898, to March, 1901. If I should enter a homestead could I prove up after living on it for two years?

Answer.—(1) There are no public lands open to homestead in the Indian Territory. (2) You could.

MARRIAGE OF FIRST COUSINS.

A Subscriber, Toronto, Kan.—(1) Can first cousins lawfully marry in Kansas or Missouri? (2) If not, mention some states in the middle West where first cousins are allowed to marry?

Answer.—(1) Marriage of first cousins is prohibited by law in Missouri and Kansas. (2) First cousins may marry in Nebraska, Iowa, Minnesota and Wisconsin.

FIXTURES—DAMAGES.

A Subscriber, Clarksville, Iowa.—I bought a farm in Missouri last spring and made a payment on it, and was to take possession on August 1st, this year, and receive the rent from the tenant who is on the place. I have just received a letter from the tenant stating that some of the buildings and some woven wire fence belongs to him and that he will remove them. Nothing was said about such a thing when I bought the place, and before the deed was made. (1) Can the tenant remove buildings and fences? (2) What lawful remedy have I, if any?

Answer.—(1) It depends upon the tenant's contract with the man who owned the land and rented it to him. If by the contract, the tenant had a right to remove the buildings and fence, he still has such a right. (2) We think you have a remedy against the man who sold you the land (not his agent) for damages. Consult a good lawyer, and lay all the facts before him.

UNCERTAIN CONTRACT.

Everything Burned but the Roof.

A BARN burned up down in Decatur, Ill., the other day, that is—everything but the roof.

And the roof was my famous "No-Tar"—the only Fire Proof roofing made.

Send me your name and address on a post card and I will tell you all about my roofing—tell you how to test any kind of roofing and send you a sample of my "No-Tar" to test.

I will also send you **FREE** a copy of my book which tells how you can lay "No-Tar" Roofing with only a sharp knife and a hammer for tools.

My book also tells how I make "No-Tar" Roofing and why it is the only roofing that is weather, water, acid and wear, as well as Fire Proof.

"No-Tar" Roofing

won't crack in cold weather and the hottest sun can't melt it.

When you send me your name and address I will tell you why.

You ought to write me at once if you are in any way interested in roofing, for I can save you money—on roofing and on Fire Insurance.

Send me a post card today. Don't let anything hinder you.

**O. A. HEPPEES, Secretary,
THE HEPPEES COMPANY,
2401 Fillmore St., CHICAGO.**

farm, that made on the landlord's side to be put on the land east of the road and that made on our side to be put on the land west of the road. Now the landlord wants us to put the manure on his side on land west of the road. (1) Are we required by law to do this? (2) Some of the manure is made in a bank barn and the landlord does not throw it out in the barn yard. The contract is silent as to this matter. Are we required to take the manure out of the bank barn?

Answer.—(1) You are not. (2) You are.

HUSBAND AND WIFE—MISSOURI.

Mr. J. M. B., Albia, Iowa.—A and B are husband and wife and live in Kansas City, Mo., where they have a home which is in A's name. B has mortgages on property in Iowa. They have no children. In case B should die, how would the property be divided?

Answer.—A would be entitled to one-half of the property belonging to B at the time of her death. The other half would go to B's father and mother, brothers and sisters, in equal shares.

CUTTING BACK HEDGE.

A Subscriber, Kensell, Iowa.—There is a willow hedge on the line between my farm and that of my neighbor. The hedge was planted there and is kept up by my neighbor.

Can I compel him by law to remove the hedge or keep it cut back?

Answer.—If the hedge is used for a partition fence, you can compel your neighbor to cut it back once every two years to within five feet of the ground. In case he refuses to do so, notify the fence viewers and request them to act, and they will meet and make an order requiring your neighbor to do so.

SHIPPING STOCK—MISTAKE.

A Subscriber, Stanton, Neb.—A short time ago I shipped a car load of live stock to South Omaha. Another man shipped a car load at the same time. There was some confusion about which one of us should have the best bedded car. Although I applied first, the railroad agent seemed to favor the other man, who was a large shipper. After receiving the returns from my car load I found that I was paid for the other man's car load. I did not notice the mistake till my check was cashed. I am a little ahead of the other man by means of this mistake. His car was well bedded, mine was not. This might have made a difference in the shrinkage of 100 or 150 pounds. (1) Must I correct the mistake and refund the overplus I received to the other man? (2) In such case must I also bear the difference in shrinkage caused by the difference in cars? (3) The stock I received pay for was sold immediately upon arrival. My stock was held a little while and probably brought a less price. Should I bear this deduction?

Answer.—The right thing to do in this case is to see that the mistake is corrected and that the other man gets the exact amount which his stock sold for less the expenses, and that you get the exact amount which your stock sold for less the expenses, each of you bearing the shrinkage which occurred in his carload. This is the honest adjustment of the matter, and it is what the law would require in case of a law suit. This answers all your questions.

DELAY IN MAKING CLAIM.

Mr. A. M. Kelsey, Ottumwa, Iowa.—Two years ago last December I bought a draft stallion for \$1,000. The man who sold him to me represented at the time that the stallion was sound and an average foal getter. When I took the stallion home he proved to be crampy in both hind legs. He got but 15 per cent of the mares he served in foal the first year, and last year only about 10 per cent. I gave him at all times the best of care. I sold him last spring for \$225. Can I recover damages from the man who sold the horse to me?

Answer.—It is very doubtful whether or not you could win in a suit for damages. The long delay on your part in making a claim would not be favorable to you in a law suit.

CONSOLIDATING SCHOOL DISTRICTS.

A Subscriber, Moulton, Iowa.—(1) Please publish the law providing for the consolidation of independent school districts. (2) State the advantages and disadvantages of such consolidation.

Answer.—(1) The law you refer to, was passed by the last legislature and can be found on page 103 of the session laws of 1906 which you can see in the office of nearly any justice of the peace. It is too long to publish in this department. (2) The advantages and disadvantages of consolidation are not matters of law, but matters of fact which the residents of districts are likely to know much better than a lawyer.

TRESPASS—TREBLE AND SINGLE DAMAGES.

A Missouri Subscriber.—A has owned a tract of timber land in Missouri for thirty-five years. The land adjoining it on two sides has been cleared for several years, and used for crops. There was a fence between it and A's timber land, but it is now open. The owner of the cleared land is a non-resident, but has a tenant residing on the land. This tenant has cut a large amount of good timber on A's tract near the cleared land. When forbidden to do so he promised to not remove the cut wood then on the land, but has done so because some persons told him it belonged to the land he occupies as tenant. There has been a number of owners of the cleared land, and all agreed that the line was where the fence formerly stood and where A claims it is. Is it necessary for A to have the land re-surveyed in order to stop the thieving?

It is not necessary for A to have the land surveyed. He has a good title by what is called adverse possession. He can sue the tenant and recover treble the value of the timber he has cut, and costs. Even if the tenant can prove that he had probable grounds or reasons to believe that the timber belonged to the place he occupied as a tenant, A can nevertheless recover the value of the timber cut, and costs.

TAX TITLE IN KANSAS.

Mr. P. J. Peters, Meeker, Okla.—I had a homestead in western Kansas. The last time I paid taxes on it was in 1894. I presume it has been sold for taxes. If it has, how can I recover it and what would be the probable cost?

Answer.—In all probability, you cannot recover the land at all. The law of Kansas provides that when land is sold for taxes, the purchaser gets a certificate of purchase, and if the land is not redeemed by the owner within three years from the time of sale, the purchaser may surrender his certificate of purchase, and obtain a tax deed for the

land. He may then record his tax deed, and this deed can only be attacked in court within the next five years—if that time passes without the owner bringing suit to recover the land, he is barred. So you see, you had three years after the tax sale in which to redeem the land. If a tax deed was then issued, you had five years after it was recorded, in which to attack it for irregularity of the tax proceedings; so you are probably barred out by lapse of time. However, it might be well to consult a good lawyer in the county where the land lies, and have him investigate the records.

FISH LAW.

A Subscriber, Onslow, Iowa.—(1) What limit as to length and size does the law fix for the blade of a pocket knife? (2) Is it lawful to seine for fish in a creek in Iowa? (3) What is the law as to trot lines?

Answer.—(1) The state law does not fix the length or size of blades in pocket knives. It provides generally that it is unlawful to carry concealed weapons and prescribes penalties. (2) It is unlawful to seine for fish at any time in the streams of Iowa. (3) A person is allowed to use one trot line extending not more than half way across a stream at any time between the 15th day of May and the 15th day of November.

INCOME FROM HOMESTEAD.

Mr. Ross J. Miller, North English, Iowa.—A man died intestate leaving a widow and seven children of full age. He left an estate valued at about \$20,000, consisting in part of eighty acres of land with improvements, which was used as a home before his death, and is now used as a home for the widow. The widow and children have decided to not divide the property at present. Who is entitled to the income from the eighty acres?

Answer.—The widow is entitled to the use and occupation of forty acres of the land, including one dwelling house and other improvements appurtenant thereto, and to all the income therefrom. The income from the other forty acres belongs to the children, share and share alike, until the property shall be divided according to law, when the widow will be entitled to one-third in fee, and the children the other two-thirds in fee.

CORPORATION OWNING ITS OWN STOCK.

A Subscriber, Newburg, Iowa.—Mr. A is a stockholder in an incorporated co-operative company. The articles of incorporation provide that each share of stock (the shares being of the par value of \$10 each) shall be assessable to a like amount, in case of failure. A wishes to donate his share of stock to the company. Has the company a legal right to accept it as a part of its paid up capital, and thus become a stockholder in its own company?

Answer.—If there be no clause in the articles of incorporation, nor in the by-laws, which forbid it, A can donate his stock to the company and it can lawfully accept it, and thus become the owner of some of its own capital stock. There is nothing in the Iowa laws to prohibit it.

COMPLICATED TRANSACTIONS.

A Subscriber, Morrison, Ill.—A has three children, X, Y and Z. A relative deeded a farm to A, remainder in fee to X, Y and Z. Y is married and has become involved in debt. He gave a judgment note to A for \$300, another to W for a like sum, and still another to R for a like sum—those to W and R being dated after the one to A. A is surety on the W note, and his wife is surety on the R note. A and Y formed a partnership and rented the farm of A on shares. The \$300 note given to A was for stock, machinery, etc., used on the farm. When the lease expired A rented the farm to another person. A few weeks prior to this, A and Y sold off their property at public sale, and Y took his share of the proceeds of this sale and invested it in real estate, having the deed thereto made in his wife's name. (1) What remedy have A, W and R? (2) Can they make judgments operative against Y's share of the farm? (3) Could Y claim exemption against such judgments? (4) Is Y guilty of criminal offense? (5) Would the fact that Y really paid for the real estate, which his wife holds in her own name, be evidence that Y was trying to evade his just debts?

Answer.—(1) None at present except to sue Y on the notes and obtain judgments against him. (2) By keeping the judgments alive until A dies, they can make them operative against Y's share of the farm in which X and Z have the other interests, these rights in remainder not being available till A's death. (3) Y could claim the ordinary exemptions allowed by law to the head of a family, against such judgments. (4) He is not. (5) The facts that Y paid the consideration for the land, and that he had the deed made to his wife, would be strong evidence of fraud in connection with the other circumstances stated.

TRESPASS BY CATTLE.

Mr. A. A. Cox, Kellerton, Iowa.—I rented eighty acres of land from A and planted part of it in corn. B owns land adjoining this eighty and his cattle broke into my cornfield, and died from overeating. B claims that the cattle got into my field through that part of the line fence, which my landlord was to keep up, and wants me to pay for the cattle. I claim that they broke through B's part of the fence. He called in the trustees and they decided that neither portion of the fence was a lawful fence, but they

also allowed me damages for the corn which the cattle destroyed. (1) Who has to pay the damages for the corn destroyed? (2) In case the cattle broke through that part of the fence which my landlord was to repair, who must pay for the cattle that died?

Answer.—(1) If the cattle broke into your field through B's part of the line fence, he must pay for the damage they did in the corn, otherwise no one is liable. (2) In such case B cannot hold anyone liable.

AN UNPAID DEBT.

A Subscriber, Remsen, Iowa.—Last April the agent of a liquor selling firm in Kansas, came to my house and sold me three gallons of liquor. He agreed to give me one month's time in which to pay for it. The liquor was shipped to me, and the day it came a letter came from the firm stating that I had thirty days' time in which to pay for it. I have received no word from the firm since. I would like to know whether or not, after so long a time, I am still liable for the price of the liquor?

Answer.—You are still liable for the price of the liquor. The seller delivered the goods. Justice, law and common honesty demand that you deliver the price. The fact that the seller has omitted or neglected to ask for his money for the last six months, does not in law have the effect of paying the debt.

PROBATE PROCEEDINGS—LAND TITLE.

Mr. Geo. W. Cale, Worthington, Minn.—A certain estate in Nebraska was probated, final settlement made and decree rendered in a certain county. The decedent at the time of his death owned land in another county in Nebraska. Is it necessary in order to make title of record perfect to this land, to have a transcript of the final decree in the probate proceedings, filed in the county where the land is located?

Answer.—It is.

HUSBAND AND WIFE—EXEMPTION.

A Subscriber, Pipestone, Minn.—(1) Can property assessed in a wife's name be lawfully attached to satisfy debts of her husband on notes given by him? (2) What live stock, wagons, buggies and farm machinery can the head of a family hold exempt from attachment in Minnesota?

Answer.—(1) It depends upon who actually owns the property. A wife might have property assessed to her, and yet not own it. By the laws of Minnesota, property which is actually owned by a married woman, cannot be made liable for her husband's debts, and cannot be lawfully attached in a suit on notes given by him. (2) Three cows, ten swine, one yoke of oxen and a horse, or in lieu of oxen and horse, a span of horses or mules; twenty sheep, one wagon cart or dray, one sleigh, two plows, one drag, and other farming utensils including tackle for teams, not exceeding \$300 in value.

How the FARMER'S WIFE CAN SAVE \$1000

2

FREE BOOKS EVERY FARMER'S WIFE SHOULD HAVE

We want every farmer's wife to know the great saving our plan of direct dealing will afford her, that is, buying direct from the manufacturer all her household supplies.

We want to show her in actual dollars and cents just how much money she can save every few weeks by our factory to family saving plan.

We also want to show her how she can furnish her home without cost on our free home furnishing plan.

In order to make this plain to her we have published these two books which every farmer's wife should have. One of them tells "How The Farmer's Wife Can Save \$10.00" in a short time and the other one "How The Farmer's Wife Can Furnish Her Home Without Cost."

The first book contains a full line of the goods we manufacture; with honest descriptions and just as an illustration we wish to mention that in baking powder alone which you are now paying your dealer 25c per can we sell you a Pure Cream Tartar Baking Powder for 12c per can, a clear saving of one-half. This same great saving is afforded throughout our entire list of 140 different articles, some of which you buy and use every day. We practically cut the dealers price in half on everything.

The other book contains illustrations and descriptions of nearly 1000 beautiful, useful articles which we give away free with purchases of our household supplies. For example—with a \$10 order of goods we give you a \$10 premium like illustration herewith or any other you may select from our premium book.

This Fine High-Arm

Rocker

Given
With

\$10

Order

You ought to send for these two books and learn how to save half the money you are now spending for household necessities, and how to furnish your home without cost—they are free.

SPECIAL INTRODUCTORY OFFER
To remove any doubt you might have as to whether our goods are right—whether they will be satisfactory to you in every respect, we will send any supplies you may select from our catalog to the amount of \$2.00 for only \$1.00—and prepay the charges to your address provided it is east of the Rocky Mountains. Do not send us any money. Simply order the goods and we will ship them subject to approval. If they are satisfactory when you get them send us the dollar; if not send them back at our expense. Is that not the best guarantee we could offer as to the quality of our goods? You can't afford to overlook this offer.

CROFTS & REED,

Austin Ave., Dept. 56, Chicago, Ill.

ADVERTISING NOTES.

Messrs. Smith & Armstrong, of Shenandoah, Iowa, wish to furnish Homestead readers with a list of their Iowa corn and stock farms which they have for sale. See advertisement on page 14.

Agents can make an average of \$7 per day selling the pump equalizers made by the Equalizer Manufacturing Company, of Waseo, Minn. Write them for particulars after reading the advertisement on page 7, and mention The Homestead.

The Oregon Nursery Company, of Detroit, Mich., in an advertisement found on page 8 of this issue announce that they desire salesmen to introduce Burbank's wonderful stoneless plum, Miracle, and to sell their well-known hardy nursery stock.

Mr. F. M. Klein, of Jamestown, N. D., is offering Homestead readers bargains in lands in Stutsman, Morton, Stark, Dunn, Mercer, Oliver and Billings counties, North Dakota. For further information address him as per his advertisement on page 15 of this issue.

Mr. R. E. Miller, of Iowa City, Iowa, is placing on the market a pinless clothes-line having springs attached for holding the clothes on. It is a new invention and is not sold by dealers. His advertisement appears on page 7 of this issue. A sample line will be sent for fifty cents.

A 160-acre farm in Pawnee county, Neb., 100 acres of which is under cultivation, the balance in grass pasture, creek and timber land is offered for sale on page 14 of this issue by Mr. Frank Label, of Wymore, Neb. This farm must be sold quickly and in order to do so, Mr. Label is making an attractive price.

The way the cold weather has been coming on suggests need of good warm footwear this winter. The T. M. Roberts Co-operative Supply Company, of Minneapolis, Minn., have a fit in store for everyone. Their new shoe catalog is just out. A postal will bring it. They advertise a felt and arctic combination on page 8 that is a "combination," too. Please mention The Homestead when writing them.

An unimproved section of corn land located five miles from a railroad in Faulk county, S. D., is offered for sale at a very low price per acre and on reasonable terms with no commissions, by the owner, Mr. E. M. Kieron, of Minneapolis, Minn., as per his advertisement on page 14 of this issue. This land has the best of soil and is in the artesian water belt where land is constantly changing hands, and increasing in price.

The Big Sioux Valley Land Company, of Sioux Falls, S. D., have a large number of corn lands for sale in that state and in their advertisement which will be found on page 14 of this issue, they make the statement that these lands will produce as much per acre as the higher-priced corn lands of Iowa and Illinois. If interested, or contemplating a change of location, write them for their thirty-two page pamphlet which will be sent free.

Acclimated nursery stock is the only kind that it pays to buy and plant. "Blizzard belt" fruits, ornamentals, evergreens, etc., are of this kind. The farmer should purchase only the most hardy and tested varieties on the market. He has no time to bother with any other kind. Send to the Gardner Nursery Company, Osage, Iowa, for a mine of valuable information to fruit growers and get a sweet chestnut tree free as advertised on page 11. Please mention The Homestead when writing.

There has appeared in The Homestead for a number of issues the advertisement of Mr. W. H. Grassmeyer, of Riverdale, Neb., which is located in Buffalo county, Nebraska. Three hundred and fifty acres of this farm are under cultivation, the balance in pasture and wild hay meadow, eighty acres being in alfalfa. Mr. Grassmeyer is offering this farm for sale for the reason that he desires to quit farming and engage in other business. There are over \$10,000 worth of improvements, a fine, large, new house, two large barns, two granaries, two corn cribs, scales, feed yards, etc. The farm is located within five miles of Riverdale and twelve miles from Kearney, and in one of the finest neighborhoods in the state. The owner lives on the land, 100 acres of which are now in winter wheat. This offer will bear the closest investigation and we would impress it upon those of our readers who desire to invest in a Nebraska farm that they should write Mr. Grassmeyer for full particulars. He has also a small home of twenty acres on which there are good improvements, located close to Kearney, that he is offering for sale. The advertisement referred to, found on page 15, gives more particulars in regard to both of these farms.

The W. A. Henderson Drug Company, of Clarinda, Iowa, make an announcement on page 16 of this issue that will be of interest to any of our readers who are troubled with rheumatism, indigestion or nervousness. They propose for twenty-five cents in stamps to send to any of our readers who wish to avail themselves of this opportunity one full-sized box of their ox blood tablets which are great flesh producers. These tablets are said to be particularly beneficial to thin people, having produced ten pounds in a month.

The St. Louis Fur Company, D. 224 N. Main St., St. Louis, Mo., who buy furs direct from trappers, have just issued their fall prospectus of the fur season. They believe that furs will be very much in demand, especially mink and coon skins. The prevailing fashion this winter is mink for collarettes and boas and the supply last year was inadequate to the demand for manufacturing purposes and therefore many of the early-caught skins will be used up immediately and will bring high prices. The coon skins will be used extensively for linings for automobile coats. Their advertisement appears on page 25.

Every day the matter of fertilizing land becomes more important. The best way to get all the good from manure is to spread it by a manure spreader. In buying one of these the farmer wants the best he can get at a reasonable price. You can get a manure spreader on three weeks' trial, which seems to us to be an offer that is fair. In the advertisement on page 16 of the American Harrow Company, 141 Hastings St., Detroit, Mich., will be found a proposition that is well worth investigating. This firm offer to sell direct from the factory and thus give the farmer the middleman's profit. The fact that one can buy a manure spreader on time ought to insure the purchase of one now when it is needed. Write today on a postal card.

The Homestead takes pleasure this week in calling the attention of its readers to the advertisement of Mr. A. D. Malin, of Kulm, North Dakota. It will be found on page 15 of this issue. Mr. Malin is represented to The Homestead as being very much in earnest in the belief that he is offering buyers bargains in land that will make them big money in the near future and we are assured that we may safely ask our readers to look into the investments. A friend of The Homestead, who has been acquainted with Mr. Malin for years, writes that he knows him to be a perfectly reliable man and that The Homestead will run no risk in saying something pretty strong in reference to him. Therefore, any reader of this paper who contemplates investing in North Dakota land should send Mr. Malin his address at once.

During the last few years chicken raisers who have kept close track of events, have found that the time has arrived to do away with the hen as a means of incubation. With the steady improvement in incubators and brooders perfection has been so nearly reached that a larger percentage of fertile eggs can now be hatched in a modern incubator than can be hatched under a hen, with less trouble and less expense for oil than for feed. Not only this, but there is no danger of the incubator breaking the eggs or deserting the nest. You don't need to wait until the hen gets ready to sit, but you can bring off your chickens on the very day you want them. It must be borne in mind, however, that there is a vast difference in incubators. The great success of some manufacturers, making good machines, has led to the making and marketing of a number of cheap contrivances that are only incubators in appearance. The market is being flooded with these cheap machines, which are sure to produce unsatisfactory results. There is one concern that in the face of the gradual cheapening of incubator construction has actually increased the cost of building their machine. This has been done because the management fully realizes that if a lasting and growing business is to be built, it must be done

by placing incubators on the market that give satisfaction. This concern is the Pinkerton Manufacturing Company, of 1027 North Main St., Lincoln, Neb., makers of the renowned Queen Incubator, which has taken first prize at every poultry show and fair at which it has been exhibited during the past two years. In the Queen Incubator is combined all of the good points contained in all other machines together with the very finest material and workmanship. If contemplating buying an incubator or brooder write for the Queen catalog. Queen incubators and brooders are sold with the agreement that they do not cost you a cent unless they give perfect satisfaction. See advertisement on page 12.

CATARRH

FREE ADVICE ON ITS CURE

If you have Catarrh let me show you what to do for it; how to drive every bit of it out of the system.

Without it costing you a cent, you can have the benefit of my twenty-one years of successful experience, my wide knowledge of Catarrh, its causes and its cure.

Don't neglect Catarrh! Don't let it make you into a worn-out, run-down Catarrhal wreck.

Remember, Catarrh is more than a trifling ailment, more than a disgusting trouble. It's a dangerous one. Unchecked Catarrh too frequently destroys smell, taste and hearing, and often opens the way to Consumption. Be warned in time. If you have Catarrh, start to cure it NOW!

Don't think it can't be cured because you've tried to cure it and failed.

Don't waste any more time, energy, money, in trying to conquer it with worthless patent medicines.

Catarrh can be cured, if you take it in hand the right way. Write to me today and I'll give you valuable medical advice free on just what to do for it.

you do not have a mill, the Bowsher's are good people to deal with. Look up their advertisement on page 13 and write to them.

WORMS IN HOGS.

The presence of worms in the intestines of hogs is the cause of more trouble than any other single agent. Worms tend to lessen the vitality of an animal, thus making it an easy prey to germ diseases. Some go so far as to say that worms kill more hogs than cholera, and that frequently cases that are pronounced cholera are due entirely to the presence of worms. Prussian hog worm powders have been prepared with but one object in view, namely, the killing and removing of all varieties of worms that are found in hogs. There are on record thousands of instances where this worm powder has done what is claimed for it without in any way injuring the hog. This worm powder is manufactured by the Prussian Remedy Company, of St. Paul, Minn., and the same firm also manufacture the Prussian Stock Food—the noted blood purifier. Prussian Poultry

Mayer

Martha Washington

Comfort Shoes

are made for genuine comfort. It is a pleasure and relief to wear them. There are no buttons to button or laces to lace. You just slip them on and off at will.

The elastic at the sides expands and contracts with the natural motion of the foot, insuring perfect ease and comfort. Can be worn all year round.

Three styles, low, medium and high. Your dealer will supply you. If not, write to us. Look for the name and trade-mark on the sole.

We also make the popular "Western Lady" shoes.

FREE Send the name of a dealer who does not handle "Martha Washington" shoes and we will send you free, postpaid, a beautiful picture of "Martha Washington," size 15x20.

F. Mayer Boot & Shoe Co.,
Milwaukee, Wis.

Food, the great egg producer, is also manufactured by the same firm. A manual of 164 pages has recently been published and will be furnished free upon application to the Prussian Remedy Company, St. Paul, Minn. Their advertisement will be found on page 8 of this issue. When writing please mention The Homestead.

LANDS IN TEXAS.

Thousands of people are now going from Iowa and other central states to the great Panhandle country of Texas and are buying farms there. In this new country they buy land very cheap. As an instance, in this issue Messrs. Boyer & Peterson, of Kansas City, Mo., are offering good Panhandle lands at from \$5 to \$20 per acre. And these lands are close to railroad and will soon double and treble in price. In fact at this time there are a great many buying lands in that section and paying more. Look this advertisement up and write Messrs. Boyer & Peterson for full particulars. Their proposition is certainly good.

SUNNY KANSAS.

At this season of the year it is natural for farmers to think of the mild winters and sunny days down in south central Kansas where cattle and horses roam at will over the broad wheat fields. Homeseekers should write to Mr. R. B. Beard, at Anthony, Kan., for information about some of the bargains he has in good wheat, corn and alfalfa land in that delightful climate. A great many Iowa men are buying land in southern Kansas and are pleased with their investments there. Mr. Beard has an advertisement on page 15 of this issue and will cheerfully answer any inquiries in regard to land in that locality. When writing tell him you saw his advertisement in The Homestead.

FEED GRINDER ON TRIAL.

If it's a feed grinder that you want, then consult the Western Harness & Supply Co., of Waterloo, Iowa, through their free catalog. They are solving the feed grinder question for many a farmer with their ten-day trial offer. Their Knox Big Grinder is a regular mill. The amount of work it will do is surprising. A man will never get cold feet working with such a machine. The company are located in one of the best manufacturing cities of the central West. They have made a study of feed grinders and their faults. Their Big Knox is a well-made grinder. The draft is light, yet it grinds fifty bushels of shelled corn per hour. There are as few parts to its construction as are in keeping with efficient work. All parts that are liable to wear are protected by cup oil bearings. Such a grinder should last a life time. In fact one set of burs has ground 10,000 bushels. You can secure the grinder direct from the factory for half the price that the local dealer would charge. Further, you can grind for neighbors and soon pay for the grinder. The advertisement on page 12 tells all about this splendid offer. You can't afford to waste corn at present prices, so send at once for their catalog and please mention this paper.

FORTIFY AGAINST FAILURE.

Young men who are looking for permanent employment where pay is certain and where there is an opportunity for rapid advancement should read the advertisement of the Wichita Telegraph College which appears on page 8 of this paper. The institution prepares students for the railway and commercial telegraph service. It is not a new school, but one that has proven that it can successfully prepare students for the telegraph service and is placing graduates in positions, who complete the course, or refund their money. A question that many a young man asks himself is: "Shall I go away to school and better qualify myself for business success or remain as I am?" Many are debating this question and still are waiting and waiting because they are not sure the results would be all they hope for. One thing is sure though, without an effort, without an experiment, he can never hope for advancement beyond his present narrow round. No one can assure him of success, whatever he does, or wherever he goes, but it is not difficult to assure him of comparative failure if he remains in the condition and under the circumstances that admit of no advancement. A course of training at the above mentioned school opens the door to advancement and any really ambitious young man or young lady should think twice before dismissing such an opportunity. This is a changing world; no place, from the highest is filled permanently, and those who are elected to do the world's work are those who are willing and are prepared. Begin today and do something looking toward advancement and that something may be simply writing for further particulars regarding the Wichita Telegraph College, 201 S. Main St., Wichita, Kan. When writing please mention this paper.

GOOD FARMS FOR SALE CHEAP.

In this issue the Allen Investment Company, of Kansas City, Mo., are offering for sale several excellent farms at very low figures considering their location. It will pay our readers to look these descriptions over, as there may be something that will just suit you. These farms are none of them more than about thirty miles from Kansas City and this is a big advantage in the way of a good market, as it saves money in the shipping of all farm products. The Allen people are only handling good farms and while they could list hundreds of farms, they only try to sell those which are actual bargains. Look up their advertisement in the Lands and Homes Department on page 15.

LAMPS RETURN TO FAVOR TO READ AND SEW BY.

Lamps for reading and sewing are still preferred by those who have much need of artificial light, though electric and gas fixtures have been made practical for such usages. The mellow light of a student or reading lamp and the strong burner in one of the "sewing" or table variety are much easier on the eyes when burned during the long fall and winter evenings than white light from gas or the glare from an incandescent globe that is not yellow or soft enough to be agreeable. Kerosene lamps of thirty or sixty candle power are found to be more serviceable than any other kind of light for night work and better for the eyes and, though it is a trouble to fill them with oil every day or two, as well as to keep the wicks in condition and the chimneys and globes clean, they are used in almost every household where the smartest gas and electric fixtures are installed. Student lamps for reading have either one or two burners, according to the purpose for which they are needed, and the variety used on a table for needlework has one large round burner. Macbeth lamp chimneys require replacing less frequently than electric bulbs or gas mantles. They don't break from heat, they fit, and they are clear as crystal.

THE DAIRY QUEEN SEPARATOR.

On our front page this week we present to our readers a photograph of the Dairy Queen Separator, manufactured by the Dairy Queen Manufacturing Company, of Flora, Ind. In calling attention to the merits of their separator the manufacturers write: "For more than twenty years centrifugal force has been employed in America in cream separation. The first separators made were very crude in construction, poor skimmers, hard to operate, and in general very undesirable. Some little improvement was made in the bowl construction, but otherwise the general construction was not changed much until in 1898, when the first Dairy Queen Separator was put in operation. The development of the Dairy Queen prior to this time covered several years of experimenting at the hands of the best dairymen that could be found, and as a result of all this time, labor and money, the Dairy Queen Hand Separator of today was produced, an ideal separator in every respect. The design is entirely different from all former construction; the crude and cumbersome frame of the old-style machines gives way to a neat, convenient and simple body frame which possesses a degree of symmetry never before attained in cream separator construction. The Dairy Queen is built on scientific and mechanical principles throughout, which is the result of many years' experience of men who are not only scientific mechanics, but practical dairymen. The machine is built, after careful study of every separator that has been made, to overcome their weak and faulty construction, and as a result we have in the Dairy Queen a separator that meets every need. It is simple, durable, practical, convenient, light running, easy to operate, and a close skimmer. There is no separator today that is as easy to take apart

Swift's Digester Tankage

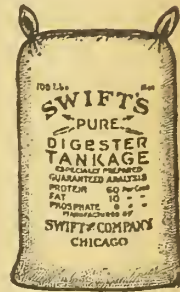

The final test of the season's feeding is the price the hogs bring in the Stock Yards at the packing house. Every good feeder wants Market-toppers—the profitable kind.

They Top the Market

When fed Swift's Digester Tankage (Protein 60%) because they stand shipment well, arrive in prime condition and look attractive to the expert hog buyer. Market-Toppers are Money-Makers. For facts, figures and prices, write us.

Swift & Company, U. S. A.

Animal Food Department, Desk 6
Union Stock Yards CHICAGO

and clean as the Dairy Queen. Our Dairy Queen is so compact that it occupies very little floor space, and this space may be anywhere about the house, as it is perfectly clean; no milk or oil gets to the floor. It can be set on carpet in the kitchen or dining room without soiling same." Those of our readers interested in cream separators will find it to their advantage and gain to write for catalog to either Mr. E. R. Bailey, of Clarinda, Iowa, or Dairy Queen Manufacturing Company, of Flora, Ind. Mr. Bailey is the distributing agent for Iowa, Nebraska and Missouri, and will be pleased to furnish any information desired. See page 6.

SPECIAL COLONIST RATES SOUTHWEST.

Direct from Mills to you we pay the freight

BEACON-ITE LONG LIFE ROOFING

Shingle roofs will rot and are liable to burn; tin and iron roofs will rust. There is only one roofing that will resist rain, wind, snow or sparks from burning buildings and never rot, rust or burn—BEACON-ITE LONG LIFE ROOFING.

It is a long wool fibre that has been thoroughly saturated in a solution, by a damp-proof process that makes it absolutely water-tight. BEACON-ITE is the only roofing that you can buy direct from the mills, thereby saving the jobber's and dealer's profit. Then again, you can put it on yourself (we furnish all necessary cement and nails free) thereby saving the expense of hiring a roofer.

If you are interested in a roofing that will cost you about one-half the price of tin or shingles and will outlast either many years, we want to send you our "Roofing Literature" and FREE samples of BEACON-ITE. Write for them to-day.

BEACON-ITE MILLS, 1105 N. 2nd St., St. Louis.

CRIMSON WONDER AGAIN No. 40785.
CHAMPION 1A STATE FAIR 1906
OWNED BY H.S. ALLEN, RUSSELL IOWA.

Crimson Wonder Again 40785, grand champion boar at Iowa State Fair, 1906. This boar weighed 555 pounds the day he was fifteen months old and his bone measured eight and seven-eighths inches on same date. His sire was champion in 1905 and his grandsire was one of the greatest boars of his day. We only have three boars left for sale sired by him. One of them has for dam the old sweepstakes sow, Nell A. You can buy one of these well worth the money. Address Mr. H. S. Allen, Russell, Iowa.

The Iowa Gate

- FOR THE FARM -

A small child can open or close it

IOWA gates are more than a convenience if women or children ever use them for being so simple they are very light and can easily be swung either way.

The Rolled Steel Tubing Frame makes them strong; not gas pipe or common steel but an extra hard steel tubing that will not bend out of shape.

The IOWA gate is made to last—no castings to break—no wearing parts—even the wires have galvanized stretchers to tighten them. Will raise over the snow in winter—will not blow down, burn or rot out.

Made any length and any kind of wire. Cheaper Than Wood. So write today for our low prices.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

AMONG OURSELVES.

Last meeting I forgot something. I wished to call attention to "With the Editor," where extracts from Mrs. Gilman's "Family Worship" were presented for the consideration of the Home. I would like the ideas set forth by Mrs. Gilman discussed here Among Ourselves. The family, its status and its future, is, presumably, of large interest to us. Let us talk about it in a practical way. The subject should bring out some of our best writers; I trust it will.

Today, as announced last week, we shall wind up the discussion of the propriety of women working in the fields. Among the letters on this subject there are still so many good ones I am at a loss which to give you. After looking them all over carefully, I have selected five for our final consideration. First a "High-School Girl" will say a word for girls:

Will you let a young girl give her views on outdoor work? I have read and enjoyed the talks in Among Ourselves for a long time, but this subject moved me to speak. I am a young girl, a farmer's daughter, who has five sisters, but no brothers. One sister is older, the rest younger, than I. I am attending high school, some distance away, and my sisters and I have all the housework we can do mornings and evenings. I think there is no need of a girl working in the field at all, for I have never done it. Any man that is any good at all ought to be able to pay at least one hired man during the busiest seasons. Some of the girls and women round here husk corn a few weeks in the fall, but that is all, and I know of one woman, and only one, who is a field worker. There is not a worse-looking woman in the neighborhood. She does her housework up in the greatest hurry she can, and in any way whatever, just to get into the field. As to not getting fresh air unless a girl works in the field, why, that is foolishness. If a woman or girl takes good care of the poultry and garden and goes after the cows she will get all the fresh air she needs. Now, don't think we make our father do everything. No, indeed! We do the milking, help shell corn, cut potatoes for planting, and water the hogs, and when he is away we do the chores. Father is good to us and we are good to him, and in that way we get along very nicely.

After this young girl is probably the best place to introduce a young man. Roscoe Woods, friends:

I have just been reading the three articles in the issue of September 20th by "Cousin Eunice," "An Oklahoma Girl," and "Sister Lucy," and right here let me say "Hurrah for Oklahoma Girl." I, too, live in Oklahoma and sometimes, here, as in other states, help is scarce and it is no disgrace for the dainty feet to be seen in the hay field or the small hands to hold the ribbons on a lister or plow, but rather, we young men honor the girls for it. Do not misunderstand me. I do not believe that it is the girl's place to do such work, but in a pinch, all honor to the girl who can uncomplainingly help father or brother out of a difficulty. For my part I should rather see a girl's hands and face browned by sun and wind than soft and white as though those hands never did any heavier work than play the piano or hold a novel, as do some girls I know. I should like to hear from more of the young men on this subject, and I think that all true men will agree with me that honest labor, no matter where it may call one, is no disgrace. And, furthermore, let me say that I also believe it the young man's duty to go into the kitchen when he is needed. For my part when it was necessary I have helped mother cook for harvest and broomcorn hands, and have gotten the meals by myself when mother was not able to do so. And, again, I consider it no disgrace.

There is a manly ring to Roscoe Woods' remarks. When he gets him a wife, it will probably be safe enough for her to go to the fields with him now and then. He can be trusted to see that she does not overtax herself. But at the same time I will ask Reine's Husband to give us his views just at this point:

As Mrs. Walker has asked the men to write, and as I have taken a great interest in the Home Department, I will try to write as I believe most men view the subject now under discussion. The great question now is, "Should women do field work?" I say, no. First, because not one woman in ten is physically able. Second, she can't do field work and keep a home and herself nice and neat. I have never yet seen a girl that made a practice of working in the field who was popular with the young men. This doesn't include helping two or three times a year in case of a pinch. What we need is for each person to be better fitted to fill the place in life which is naturally his. Instead of field work, girls need to learn the science of cooking and composition of various foods, the art of butter-making, and profitable poultry raising. In these two latter branches their parents should be willing to increase their interest by giving them a certain part of the proceeds for pin money. It is natural to ask, what do young men admire in girls? Observation will show us it is a neat appearance, quick wit, and feminine graces. Field work is not conducive

How to Save DOLLARS in Cooking and Heating

One man can saw more with it than two men can in any other way, and do it easier. Saw blades 5 1/2, 6, 8 1/2 or 7 ft. long. Champlion, Diamond or Lance Teeth, to suit your timber. GUARANTEE. If any part breaks within three years, we will send a new part without charge. Send for Free Catalog showing latest improvements, giving testimonials from thousands. First order secures agency. FOLDING SAWING MACHINE CO., 158-164 E. Harrison St., Chicago, Illinois.

to any of these qualities, but tends to develop masculinity. We husbands are but young men grown older, and are only different from them insofar as habit and environment have changed us. Very often we cannot look clean and neat during the week from the nature of our work, but how pleasing to the eye to see your wife neatly and tastefully dressed! Or, when we meet the neighbors at church or festival, what man is not proud to see his wife the nicest, the most popular there? To be a womanly woman is an accomplishment not acquired doing masculine work. Begin by setting your standard in your girlhood, and when you get married don't think it time to quit being charming, but become more so, and use your charm for the benefit of your "best man." I know some women whose husbands and growing children would love to have them look nice and be becomingly dressed. These women have excellent qualities, but that is one art they have lost pleasure in. They plod around and look dragged out. For what reason? They have lost one virtue every woman should have. Their husbands and children wouldn't own that they don't love them just as well, yet in their hearts they know they would be prouder of them if they dressed tastefully, and the mother's influence for good over their children would be greatly strengthened. There is a tendency in young married people because of the need of money for the husband to use most of the profit buying machinery and

DITCHING MACHINE.

The CYCLONE Has No Equal Nor Superior

For Cutting Tile Ditch, CHEAP.

QUICK. Perfect. With six horses and two men the CYCLONE will easily cut FOUR HUNDRED rods of tile ditch, 24 to 30 inches deep, 9 inches wide. Sold under a guarantee to do more work than any ditching machine on earth at same cost. Every Farmer and Ditcher should know all about it. Write for circular, price, terms. SOLD DIRECT. A GREAT SELLER. A BIG MONEY-MAKER. Manufactured and sold by JESCHKE MFG. CO., BELLEVUE, OHIO.

enlarging his flocks, and for the young wife, anxious to please, to get along with the most meager amount of money possible, both thinking when a little better fixed to fix up the home and get more nice dresses for the wife. The man soon becomes accustomed to his surroundings and the use of the spare money. He has never found the time when he was well enough fixed until finally the pocketbook becomes a matter of

contention, and the woman has lost her position as her husband's equal. The plan I arranged for my wife I believe to be the only correct way. The first time I went to town after our marriage I instructed the teller at the bank where I did my business to accept my wife's check and pay from the deposit in my name, the same as though it were my own check. And I will say that she has never spent a dollar that didn't have my approval, and has never spent any considerable amount without consulting me about our assets and liabilities. We have from the beginning of our four years of married life put quite a bit of money into the home because there we have our greatest happiness. We realize that labor saving devices are a part of our capital. For instance, we bought a cream separator to save the wife, then we got a tread power and let the pet sheep run it to save the man. We intend to plumb the house for water in the near future, are blessed with our own gas well for heat and light, and a baby grand piano for pleasure. We have made a neat sum every year, not by excessive hard work, but by reasonable work and by retaining a reserve force that has given us clear heads and steady hands. The farmer has a right to the best; let him and his wife share it equally, and let animals and labor saving machinery be their servants.

There must be hundreds of young couples represented in this circle. I wish every one of them would read this letter together and allow it to influence their future; I trust many will.

Women are frequently accused of wanting the last word. They are to have it this time without asking for it. "A Grandma" will give us a new point, and then the debate will close with a bit of experience by Mrs. Redfern:

In arguments pro and con on this subject the main point has not been brought out. Nothing is said of the intellect. A girl who works on the farm all day and in the evening can sit down to her music, books, magazines or papers is not going to be injured by outdoor work. She has something to think about while at her work. She is using mind and body at the same

time; but the girl who cannot read intelligently or write legibly soon becomes a doll who is kept at men's work. My boys and girls could work together when necessity required, either indoors or in the field. One fall the girls helped in the corn field so the boys could go with them on the first day of the winter term of our school, and the boys fully realized the benefit of the girls' labor. In countries where women have to work in the fields they are allowed no improvement of mind or soul. Every energy is bent to hard work, and mind and soul are dwarfed. When nothing but mind is cultivated the body is a very poor temple for the spirit or intellect. It will never hurt a healthy American girl to do field work because her mind is well developed and her moral nature is broad and charitable.

I would like to add my mite to the subject of women working outdoors. "Missouri Mother's" idea is mine in regard to it. I have learned a very dear lesson myself. Being strong and ambitious when I married I thought I could help outside some. I soon found out that the more I did the more I was expected to do. With my little ones to do for and my housework and the outside work I did more than I should. At the age of thirty years I was a woman broken in health, and for three years, I dare say, my husband paid out more money for doctor's bills than would have paid both a man to do the work I did and keep a girl to help in the house half the time. I have two daughters. They have done little outdoor work, but they have worked as hard as any girls should while growing. The eldest is soon going to a home of her own, but being a very frail and delicate girl she will never be able to do as I did. Let us take care of our girls and not allow them to break themselves down doing men's work. If it had been intended for them to do such work our heavenly Father would have made them like me.

As "Grandma" says, the desirable thing is all-round development, but as Mrs. Redfern's experience shows, the field is not the best place to seek it. Theory is one thing, experience quite another. Theoretically, it may be proved that field work is desirable, but when women who were strong and healthy but are now broken and sickly come, telling us it was field work which wrought the change, it behooves us to pause and weigh the arguments pro and con with extreme caution.

I promised I would sum up this discussion With the Editor. I shall wait a few weeks before doing so. It is possible to have too much of even a good thing. I think we have had enough on this subject for the present.

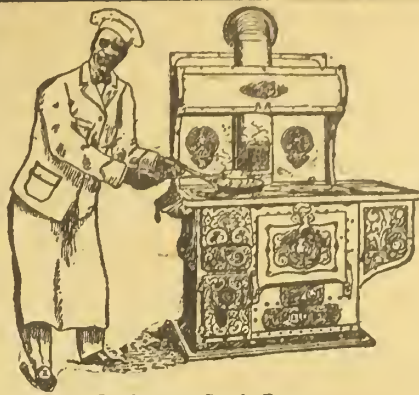

As might have been expected women who are happily married to foreign-born men are up in arms at the discrimination suggested by Mrs. Eugenia's query. A number of very spirited protests have been received. We cannot hear them all, but if we listen carefully to Grandma Grey, we shall understand how the writers of the unpublished letters feel:

It seems to me that Mrs. Eugenia must think that the foreign-born men are terrors. I think Mrs. Eugenia must judge all by that one man. And again I must say that I have just as good a husband as ever lived, and as for him expecting me to help outdoors that is something he has yet to ask me for the first time to do. It is true I help him with some little jobs, but it is because I like to get out, and then he helps me. It is nothing new for him to take the trays out of the incubator, help turn the eggs, put the trays back and help with the little chicks in the brooder; help on wash days, help in every way. As for expecting a new baby every two years—we have been married fifteen years and are blessed with three children, the youngest six years old, so you see all foreign-born men are not monsters. Again, I am personally acquainted with American husbands (right here let me say that I am an American) who expect their wives to help milk every night and morning, and raise the little chicks with the old hens. One of these men would not have an incubator in the house; would not get his wife an incubator, even when she wanted him to. And see him out there in the field! He has the very latest machinery; see him riding behind that harrow with the latest cart attached, while his wife in poor health is chasing through the wet weeds to save the chicks from the coming rain, while if she had the incubators and brooders that my foreign husband provides for me her chicks need not bother her, for they would be in a little corral till they knew when she called. Now, this is one foreign-born man and one American-born. Thank God that all Americans are not like this one. Neither are all foreign-born men as good as my husband.

What warm-hearted, thoroughgoing champions women are when their affections are called out. The foreign-born husband could not begin to defend himself as Grandma Grey has defended him. I trust he appreciates her convincing defense, and that he will be careful to live up to the character she claims for him.

There are a number of fine things still on the sideboard, but all but one must be laid back in the cupboard, to repose in cold storage for another week. I am fearful that it is too late for the friends to avail themselves of Mrs. Ellison's green tomato pickle, but it is worth taking the chance:

I have just read Mrs. J. C. Danielson's

Peoria Lexington Steel Range.

The Large Illustrated Catalog is Free.
BOYLES COLLEGE, 1804 HARNEY ST., OMAHA, NEB.

request for green tomato pickle, and if it is a sour pickle she wants, I will tell how I have just made some in a kind of piccadilly fashion that is pronounced fine. Perhaps it would more properly be called large cucumber pickle, as it is the only way I have ever known of utilizing the large, overgrown green cucumbers. Take equal parts of green tomatoes, cabbage and cucumbers; remove the seeds of the cucumbers and chop all together very fine (I run mine through the sausage mill); salt pretty freely and put in a flour sack and hang up to drain over night. In the morning take such spices as you prefer; boil in vinegar; pour on the pickle; mix well; pack in jar; put on a weight and set in a cool place. I have no doubt it will keep as long as it will last. I used about one box of ordinary mixed spices to two gallons of pickle. Be sure and have plenty of vinegar to cover well. If this is not what Mrs. Danielson wants, perhaps it will interest someone else. I have recently learned another way of using large green cucumbers and will "pass it on." Pare the cucumbers; taste to see that they are not bitter; slice thinly, lengthwise, and soak a few hours in salt water; then drain; roll in flour; season with pepper; put in good hot meat drippings and fry crisp and brown. You will be surprised, if you have never tried them, to find how nice they are.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

A crust of bread and a corner to sleep in,
A minute to smile and an hour to weep in,
A pint of joy to a peck of trouble,
And never a laugh but the moans come double;
And that is life!

A crust and a corner that love makes precious,
With the smiles to warm and the tears to refresh us;
And joy seems sweeter when cares come after,
And a moan is the finest of foils for laughter;
And that is life!

—Paul L. Dunbar.

Till a man has learned to be happy without the sunshine, and therein becomes capable of enjoying it perfectly, it is well that the

sunshine and the shadow should be mingled as only God knows how to mingle them.—George MacDonald.

Do not be so unreasonable as to expect more from life in the world than life in the world is capable of giving.—John Stuart Mill.

HOW TO CLEAN WALL PAPER.

Wall paper accumulates not only dust, but actual dirt, and this condition very frequently saddens the heart of the housewife when she is unable to have her walls repapered. But if she follows these hints she will have the pleasure of seeing her walls look 50 per cent brighter and better, and in some cases rendering them quite clean. Make a mop of strips of some soft cloth, cheese cloth is the best, fastening it to an old broom handle. With this brush the paper thoroughly, ceiling

HAMILTON BROWN SHOE CO.

ST. LOUIS.

When writing, mention The Homestead.

and side walls. This can be done also throughout the year, thus insuring a greater degree of healthfulness to the family and keeping the paper in prime condition as well.

In addition, mix whitening, powdered corn starch and Fuller's earth in equal quantities; dip the mop into the powder and scrub the walls well with it. Next shake every bit of powder possible from the mop and cover it with a damp flannel which is perfectly clean. With this go over the walls thoroughly, sweeping with long, straight strokes. Be sure that the flannel is only damp. When it becomes soiled remove and cover again with a fresh cover.

Often paper can be cleaned by rubbing lightly with bread crumbs, the dirt rolling off with the crumbed bread. In order to cleanse a large space at a time and do the work more evenly, it is a good idea to cut the loaf lengthwise and rub until the surface is soiled, then slice off a piece and continue until it is used up.

If there are grease spots on your paper, mix a little Fuller's earth with ammonia, and cover the spots with the thin paste, allowing it to dry on. When removing the paste, use a stiff brush, which will generally be effectual. French chalk is an invaluable remover of grease spots.

A BIT OF VERSE FOR THE AGED.

Long lines of light and one red fiery glow
Burn where the regal sun bath sunk from sight;
Throbbing sthward the broad horizon flow
Long lines of light.

They send a glory through the coming night,
As hostage for the day that darkens slow,
An earnest of the morn's more kindly might.

So when the sunset claims us and we go,
Happy if, worn with labor and with fight,
We leave above our asses lying low
Long lines of light.

FROM OUR RECIPE BOOK.

Potato Luncheon Biscuits—Boil eight potatoes and mash smoothly with a little milk. Beat into them two tablespoonfuls of flour, two of grated cheese, one teaspoonful of baking powder, sifted twice with the flour, half a teaspoonful of salt and a "suspicion" of cayenne. Mix into a light dough with one tablespoonful of cream and the yolk of an egg. Roll out half an inch thick, cut into rounds and brush over with beaten white of egg. Bake in a quick oven; split while hot, and serve at once. They are nice also for afternoon teas.

Scalloped Onions—Boil six or eight onions till tender, changing the water once while boiling. Break lightly with a spoon, and place alternate layers of onion and bread crumbs in a pudding dish, seasoning each layer with salt, pepper and melted butter. Pour over all enough milk to nearly cover them, and bake brown.

Hermits—Half a cup of butter, one egg,

four level teaspoonfuls of baking powder, one level teaspoonful of cinnamon, half of a grated nutmeg, three-quarters of a cup of sugar, two cups of pastry flour, half a cup of raisins (stoned and chopped). Beat the butter to a cream, add gradually the sugar, then the egg well beaten, and then beat in the raisins. Sift the flour, baking powder and spice together, and add them to the first mixture. Dust the board with flour, roll the mixture out in a sheet a quarter of an inch in thickness. Cut with a round cutter and bake in a moderate oven about fifteen minutes. Keep the dough as soft as possible.

NO FAMILY RESEMBLANCE.

"Is there any difference between fairies and elfins?" asked the teacher.
A pupil replied, "Yes."
"Well, then," said the teacher, "what is the difference?"
"Oh," said the boy, "the elephant is much bigger than the fairy!"

WHY HE WAS GENEROUS.

A third-grade teacher was conducting a class in fractions. After having, as she supposed, made the work clear, she said: "Robbie, would you prefer one-eighth or one-twelfth of an apple?"
"One-twelfth," replied Bobbie.
"Why?" asked the teacher, in dismay.
"Because," replied Bobbie, "I don't like apples."—Little Chronicle.

Dressmaking and Millinery—No. 541.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

There is a vogue in hair ornament that gives the up-to-datens to the coiffure, even more than does its special arrangement. Just now the reign of the back comb promises to be the distinguishing feature, not, it is true to the exclusion of the side comb, but fewer of the latter will be worn. The metal trimmed comb is declining in favor, and more often we will see the comb of one material throughout. Amber combs are noted in profusion in all the stocks where such novelties are handled, and claiming nearly equal favor is the jet comb. Besides the combs there are novelties in fancy pins for the hair, and these when worn should be of the same material as the comb or combs worn. Some of these pins are knobbed, other studded with stones that are expensive or inexpensive, according to the price one is willing to pay for them, but whatever is the choice the same selection should be made for the comb.

One of the touches in the way of trimming that belongs emphatically to the season is the application of bands, one or

[5467—Fancy Blouse Waist, 32 to 40 Bust.]

three, to the long loose or semi-fitting coat, these extending from the neck, or from the yoke if such is used, to the bottom of the garment, and more often these are used on the back of the coat only. One of these covers the back seam, (for these backs are so wide that there must usually be a seam at the center back), and one each side about half way between the center seam and the under-arm seam. A "last year's" garment may be brought up to date by applying such bands. These are usually of the cloth and are cut two inches wide, so that they finish one and one-fourth inches when the edges are turned in. Lacking the cloth, braid of the finished width mentioned may be used.

In No. 5487 is pictured a handsome fancy blouse that is somewhat on the order of the jumper waist, but is not finished quite in that mode, as the one shown closes invisibly at the center back. The waist is made on a fitted lining on which the lace yoke is arranged. At front and back are broad tucks that extend over the shoulder, giving the desired breadth. There are full length tucks at the back, but those at the front extend to yoke depth only. The sleeves are novel and may be finished in elbow or in full length, the pattern providing for both modes. The rosettes are of velvet ribbon, but fancy buttons, or covered buttons may take their place. The girdle effect shown is not a feature of the waist, as it is intended to be worn with any kind of belt or girdle. Pattern No. 5487 is cut in sizes for a 32, 34, 36, 38 and 40-inch bust measure. Give size when ordering.

The novel feature of the three-piece skirt

The International Sunday-School Lesson.

Fourth Quarter. Lesson V. Matt. XXVI, 17-30, November 4, 1906.

The Lord's Supper.

All the singing pilgrim caravans had come to a halt with the high grace-note of the last "song of degrees," "Our feet shall stand within thy gates, O Jerusalem!" Green booths and snowy tents dotted all the valleys and slopes around the city, and three million worshipers made ready for the morrow. Over two hundred thousand lambs had been purchased and marked for sacrifice, and all the details of the joyous festival were being attended to.

Jesus tarried yet in the sweet and restful seclusion of Bethany; but His disciples knew very well that He Who had said: "Thus it becometh Me to fulfil all righteousness," would not ignore the great Pascha. The question was not if He would eat it, but where He would do so. Two of the disciples are at once commissioned to make the necessary preparations. They are sent with sealed orders, no doubt, to keep the traitor off their track. Not one of the remaining ten could possibly divine the place until they arrived there in the evening. A man doing a woman's work (carrying water) would be novelty enough to serve them as a sign. Jesus bade the messengers to ask for a lowly place in some hallway. He will fain make the circuit. As He spent His first night on earth in "a lodging," so He would fain spend His last one. He knows beforehand, however, that His nameless but well-to-do disciple, John Mark's father, perhaps, will give Him the best his stately manor affords.

The disciples are off at once upon their errand. They find it as Jesus has said. The proprietor of the house gladly places at their disposal a spacious room, capable of holding a hundred or more.

But they will not be asked to share it with other paschal parties. They shall have it in complete privacy. It is in the second story, which will add to their seclusion. Its walls have been freshly whitened, and the tile floor scoured for this very occasion. The low, gaily-painted table is already in position, with the couches forming three sides of a hollow square about it. The hanging-lamps, dishes, basins and water-jars are all in position. The disciples view the place with grateful satisfaction, and then hurry out to make the necessary purchases—the wine, and cakes of unleavened bread; the vinegar, salt and bitter herbs; the nuts, raisins, apples and almonds to make the compost of, reminder of the clay in the brickyards of Egypt; and, most important of all, the year-old lamb. One of them carries the lamb on his shoulders, the sacrificial knife sticking in its fleece or tied to its horns. At two o'clock in the afternoon, at sound of trumpet blast, with all others who had been similarly commissioned, they went into the inner court of the temple. At three blasts, they, with thousands of others, struck the death-blow to their victim while the priest caught the blood in a golden vessel, and passed it up to the high altar. As the disciples held the lamb upon a stick that rested upon their shoulders, it was quickly flayed. The parts devoted to God were separated; then, wrapping the victim in its own skin, they started for the house where they were to celebrate the feast. The carcass, trussed upon skewers of pomegranate in shape of a cross, was baked in the household oven.

At sundown, Jesus, with the ten, approached the city, knowing well where He would find the waiting disciples and the supper room. They enter, and the Master views the preparations with evident satisfaction. The three first stars are shining now, and the silver trumpets signal the feast to begin. Shame, shame! The unseemly dispute as to precedence breaks out once more as the disciples scramble for the most eligible places. Jesus rebukes them in an acted parable, performing for them the menial task of a scullery drudge. Now the paschal banquet begins. The ritual is used, the rubrics observed. The cup is passed with thanksgiving. Bitter herbs, dipped in vinegar, are eaten as a remembrance of Egypt. The unleavened bread with a bit of the roasted lamb upon it, is taken by each. Another cup is passed. There is the customary hand washing. Jesus, as the symposiarch, discourses upon the significance of the feast. They break out in the joyous singing of the first part of the Hallel. (Psa. cxii-cxiv.) The third and last cup goes from hand to hand, and then they sing the second part of the Hallel. (Psa. cxv-cxviii.)

At times through the feast, Jesus gives intimations, increasingly distinct, of His betrayal and betrayer. He suffers not His manner toward Judas to change. He probably let him take the chief place at the table. He certainly washed his feet, and gave him his portion with His own hand. But the devil was in his heart, and the thirty pieces in his scrip. An incubus was lifted when the apostate left the table. All that remained of the paschal ritual was the blessing of praise with which it was always closed. They were all expecting it. The innovation could not but be noticed by those who had followed one program annually from the time they were ten years old. Instead of lifting His hand in benediction, Jesus reached over to the dish of unleavened bread upon the table, and, taking a piece, He rose from the mat, and blessed it, and, as He passed from one to another, He broke it, giving each a morsel, saying: "Take, eat; this is My body." Then He filled a cup, and, again giving thanks, and passing it from one to another, He said: "This is My blood of the new covenant, which is shed for many for the remission of sins." Then followed His words of institution: "This do in remembrance of Me."

Analysis and Key.

I. Jesus' fidelity to form of religion. Question not "Would He eat the Pass-over?" but only where He would eat it.

How Much Did Your Fuel Cost Last Winter?

Pretty big sum wasn't it?

Now can you figure up how much of the heat generated by that fuel was wasted?

If your stove is the ordinary, putty-jointed, side-door, under-draft affair, you can safely assume that over one-third the heating power of the coal was lost.

A dollar's worth of stove putty will plug up the seams in twenty stoves—but it won't keep them air tight.

A few weeks' use, and the putty shrinks and falls out, leaving air-sucking cracks, which force the heat and unburned gases up the chimney.

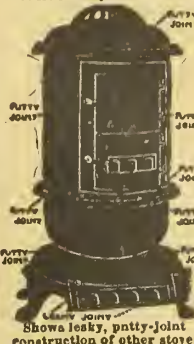

Whether you burn hard or soft coal, a great

percentage of the available heating power is gas—soft coal is fully one-half gas.

To get your money's worth from your fuel you must have a stove which is tight enough to hold back these gases until burned.

And Cole's Original Hot Blast Stove does this.

The air-tight construction (made without stove putty) holds back the gases until they are consumed by the patented top Hot Blast draft. There is absolutely no waste. A hat full of the cheapest coal costing one cent holds fire over night.

Cole's Original Hot Blast Stove

For Soft or Hard Coal

All imitations of Cole's Hot Blast lack the patented construction for top Hot Blast; the patented steel collar connection for the elbow casting to stove body, making an everlasting tight joint which cannot open under the fiercest heat; the patented compound hinge for ash door; the guaranteed smoke proof feed door, and other exclusive features which make the Original Hot Blast the best fire keeper and the most economical.

COLE MANUFACTURING COMPANY

3234-3244 So. Western Avenue, CHICAGO

1856-Sandwich-1906 Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country.

The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

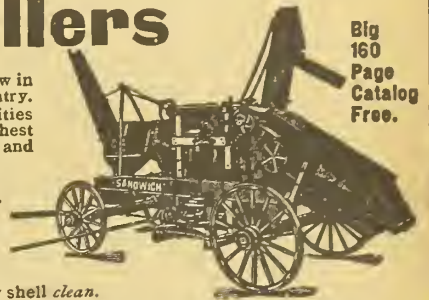

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, belted and geared.

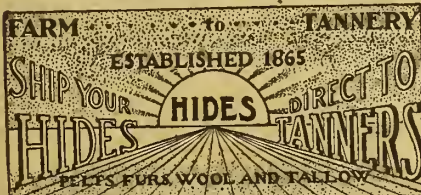

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the hoard of the "gang."

They shell clean and they clean the corn they shell clean.

significant. It is the Eucharist, meaning our "good thanks" for the lamb that was slain; it is the sacrament (sacramentum), our holy pledge of fealty to our Divine Leader; it is the communion (communis), sign of the intercourse and agreement we have with God and each other.

The believer should be always ready to commune, as he is supposed to be always ready to pray. But this does not render special preparation undesirable; for the communicant finds in the sacrament what he brings to it, no more and no less. Jesus is present in the ordinance only to the thought and feeling of the communicant; present only as His suffering and death are realized by faith.

To ask and to take the solemn tokens of redemption is to confess before the world and before the Church faith in the great fact.

At the table of the Lord's Supper man and God meet—man with his highest aspirations, God with His richest gifts.

Incidentally the communion is a pledge of the reunion of Jesus and all His disciples. He said He would eat no more of the bread nor drink of the cup until the kingdom should come. Then He will visibly banquet with us all in the kingdom of His father, according to His promise.

Example for present day. Face and form of religion to be maintained.

II. Passover scene and ceremony described. Use and significance.

III. Evolution of the sacrament of the Lord's Supper. Circumstance, use and significance.

The Teacher's Lantern.

The anachronism of Leonardo di Vinci's lovely and justly famous fresco of the Last Supper is obvious. He represents Jesus and the twelve sitting, in occidental style, at a modern extension table. They did not sit at all, but reclined. It was this reclining, which made it easy and natural for John to lay his head in Jesus' bosom, and for Peter and John to hold their sotto voce conversation without the traitor's observing them.

Perhaps we emphasize disproportionately the sadness of the Last Supper. Jesus, as host, would not allow the occasion to wholly lose its festive character. It was a goodly scene that the well-trimmed lamps shone down upon. The fresh turbans of blue, crimson and yellow, the animated faces, the table covered with damask and well supplied, make a study to delight a painter. The feast extended over several hours, and only the somber incidents are recorded. There must have been much joyous converse as well.

The presence of Judas was the one ugly spot on the feast of love. Jesus, without openly criminating him before the company, plainly announced that one of the twelve would betray Him. He did this for their sakes, that they might know He was perfectly aware of His impending fate, and, not being at all surprised, voluntarily submitted to it. He did it for Judas' sake. It was His last appeal to the traitor. He gave Judas the chief place at the table, washed His feet, gave him his portion with His own hand, lovingly let him know he read his wicked heart, and only when it was clearly of no avail, He bade him do quickly his wicked deed.

No question but that this upper room, forever endeared to the hearts of the apostles (and probably the property of a disciple), witnessed the appearance of the risen Christ in their midst, and of the Pentecostal effusions of the Holy Spirit. If so, it was the very cradle of the infant Church.

The various names by which the Lord's supper is known are in themselves very

SOME ALFALFA PROBLEMS.

BY WM. ERNST, NEBRASKA.

Up to the last three or four years spring seeding of alfalfa was regarded the only safe way and seeding with a nurse crop was but very little practiced. Since that time fall seeding did very well, but I attribute this change only to the increased precipitation. The following table taken at North Platte, Neb., may explain the change. The rainfall at North Platte was in 1893, 13.16 in.; 1894, 11.21 in.; 1895, 14.58 in.; 1896, 16.52 in.; 1897, 17.89 in.; 1898, 15.54 in.; 1899, 13.99 in.; 1900, 12.29 in.; 1901, 16.44 in.—nine years average, 14.51 inches. In 1902 it was 26.27 in.; 1903, 18.36 in.; 1904, 23.17 in.; 1905, 26.81 in.—four years average, 23.65 inches.

Better preparation of the soil may also have something to do with success in fall sowing. Alfalfa sown in the fall will not have to battle with the weeds like spring sowing. Corn-stalk ground well-pastured out is without doubt the best ground obtainable for spring seeding, because the ground is well packed, and a firm seed-bed is absolutely necessary for a perfect alfalfa field.

The ground should be disked as early as possible in the spring, then left alone until seeding time in last half of April, when it should be disked again, then sown broadcast and harrowed three or four times after seeding, with harrow teeth slanted back to firm the ground down. The clipping of the weeds should only be done when the plants are dry, during middle of the day, and the young alfalfa plant should not be cut close to the ground. The seed should be home grown or grown as near home as possible, and if possible, grown near the same altitude as where it is to be planted. Fall sowing should not be done later than August 15. If stubble ground is to be used, oat ground is the least desirable and should be avoided because of the physical condition of oats stubble. We all know it is the hardest to plow unless excessive rain loosens up the soil.

A very nice way to sow alfalfa, and for at madder, pasture grasses and clover, is as follows: Sow rye the fall before on deeply-plowed ground. The rye may be, or rather should be, pastured all winter and spring, then the disk should be used to practically kill all the rye. After disking, would sow and proceed the same as advised in spring sowing. No weeds will bother and what little rye survives will serve nicely as mulching for the alfalfa. Not less than twenty pounds of the best seed obtainable should be sown per acre. As to the leaf-spot disease, will say that we were bothered only once and we attributed the trouble to the fact that the alfalfa was not cut at the proper time. The second growth was well started when we cut first time and when the second crop started the leaves were badly spotted and crop very inferior, but was taken off the ground when bloom started. The third crop was all right.

Alfalfa should be cut when bloom first shows up. In this way it makes four cuttings, and the last cutting will be found the most valuable in quality, making the best of feed for poultry and brood sows during the winter. Seed growing is uncertain at an elevation of less than 1,800 feet above the sea level. The second crop is ordinarily the best for seed. This year was an exception. The first cutting made seed in some sections as well as the third, the second crop being a failure almost everywhere. Thin soil produces seed more regularly than rich, fertile soil on which the stalk generally lodges or kinks, after which but little seed sets. Thin sowing has been recommended for seed growing, but in a field of that sort fox-tail and other weeds will usually come on with the seed. The seed fills best on places where there is an excess of alkali and hard pan. An acid condition of the soil is

not only detrimental to alfalfa for hay, but it will prohibit the setting of seed. Alfalfa is said to be an insect fertilizer, but what insects do the work I do not know. One of the frauds perpetrated upon the farmer is the selling of so-called Turkistan alfalfa seed. I saw what was without question the genuine article, which came from Washington direct to our university. This alfalfa was less vigorous, with considerable less foliage in proportion to the stem than the native alfalfa, when both were grown side by side under precisely the same conditions in the same field. As a rule, seed growing is uncertain, but very profitable at times. Our largest seed crop made \$53 per acre, but all told we got only three paying crops in twenty-five years, during which time we tried for seed. A good many times, too, we found that the seed was not forming at a time when that particular cutting was almost worthless for hay and only three cuttings, all told, were harvested in the field in question.

Incubator Instructions.

To the Editor of The Homestead:

The temperature of a laying hen's body is 98 degrees. The temperature of a sitting hen's body is 103 to 105, and I have known them to register 106. A sitting hen has a fever of from five to seven degrees. It is this fever that makes them want to set. This fever stays with them to a greater or less degree until the chicks are weaned or her sitting notions have been broken up. Little chicks discover the lower temperature days before the hen quits them and become uneasy. This can be verified by any experienced poultry raiser.

In operating incubators, the tendency is towards warming the eggs up too fast. It should take two days instead of two hours. The rule when operating incubators is to run the heat up to 105 in the empty machine, set the regulator and let her "go gallagher." The cool eggs run the temperature down, it also holds the damper down and the heat of tank gets greater and greater. It would be foolish to surmise that the hen gets hotter and hotter.

The contents of an egg is one of the best-known non-conductors of heat or cold, and in order to warm eggs clear through to 103 degrees without injury to the side next the heat, it should take two days instead of two hours. As stated it is my conviction that it is the rule to warm the eggs up too fast.

My convictions drawn from experience are that 102 for the first week, 103 for the second week and 104 for the third week are the correct temperatures, and if occasionally the heat gets a little too high, that it is the proper time to turn and air the eggs. A little too high would mean 105 degrees, which sometimes occurs with the very best regulators.

The sitting hen turns and airs the eggs more than we credit her for. We draw our conclusions too much from casual notice. When we enter the room where she sits, she settles down on the eggs and gets mad. The entrance of a cat or dog has the same effect. Any unusual noise will cause her to settle down and stay that way as long as she is uneasy, but when everything is safe she is an entirely different hen. She is continually working with the eggs, has a number of motions to move, stir and turn them.

She turns them with her beak, with her feet and hocks, and very often she settles down on them and shakes her whole body. She not only does this during the day, but through the night. To verify this all you need to do is to mark the eggs late in the evening and look at the marks early in the morning. The hen not only goes through all these motions mentioned, but she settles down with her head in different directions—her whole aim seems to be to keep the eggs warm and moving.

Reader, no matter the kind of incubator, the mere turning the eggs half over once each day would be a weak mimicry of the hen. The sooner the old superstitions about eggs are put in the background and we get right down to aping the hen in dealing with the artificial method, the sooner incubators will

PILES NO MONEY TILL CURED.

be used on every farm and by every poultry raiser. M. M. Johnson.

The Ideal Hired Man.

That there is such a person as the ideal hired man will not admit of a doubt, although there may be some who will question the fact. Now there being such a person, the question is raised, must he be found or can he be made, and, if so, how? He is a person who has already been found and as a rule is found stopping for a considerable length of time in one and the same place. As a rule he is not a very migrating sort of person, but, on the contrary is one who is seldom out of a job, and one whose help is much sought after. In the first place, the hired man has much to do in making himself, so if the hired hand is not an ideal one, he has himself mostly to blame. Many opportunities present themselves, which if he is watchful, careful and on the alert to improve, will contribute much to his benefit.

The ideal hired man will be considerate of the rights of his employer. He will be honest and never idle away the time that belongs to his employer, for it is just as wrong to steal his time as it would be to steal his cash, and he will be just as careful of the property of his employer as though it belonged to himself. The ideal hired man must possess all the virtues and some of the vices of the average human being. He must be watchful and careful of his speech and manner, for our best and dearest are often entrusted to his care. Oftentimes he must be the "Master" and assume all the responsibility for the time being, and he must awake to all the farm's best interest, not to the farm's detriment. There should be inculcated a love for his work, not simply a love for the results obtained from the labor done, but a love for the growing things, for the wide out-of-doors, for the animals that claim our attention, and with it, care for the best results possible, for in them are our dollars and cents.

The hired man must be a born farmer to reach ideal conditions. We often say of them who succeed in certain lines, that they are a born machinist or a specialist to whatever their calling may be, so why not say born farmers? Unpleasant surroundings have driven many an ideal farm hand to less lucrative occupation and one for which he has no liking, consequently he never attains success.

But at the same time the duty of the employer must not be lost sight of. The employer must be just with his help, he should treat them as he would like to be treated were he in their places. While particular and observant he should avoid being too exacting. If ever out of patience concerning their way of doing anything, or on account of some mistake made, it is best to think twice before speaking once. Always be prompt in payment of dues for labor performed. Strive as hard to please the hired man as you would have him strive to please you. Better consult one another in regard to work rather than be overbearing in your commands. In planning your work treat the hired man as though you had confidence in his judgment. By pursuing this course it will do much toward making the ideal hired man. It is a good place to exemplify the principle of reciprocity. The employment of farming is the most honorable in the world, and one in which pride and pleasure should be taken for more than it is today. But the world moves, and the day will come when to be a farmer will be to have reached the heights of earthly possibilities. Then learn, ideal hired man, to labor and to wait.—(H. P. Nicholson, in Iowa Year Book.)

of eggs. One pound of cut bone for a dozen hens once a day, which should not cost over a cent a pound, will produce more eggs than five times as much grain. Cut bone is complete in egg-making substances. The fall eggs are now advancing in prices and will continue to do so. Do not feed too much fresh meat and bone. Remember that a hen would have to run a long way to catch enough bugs to supply two ounces of fresh meat. Cut bone lessens the grain bill, cheapens cost of food and gives larger profits on fowls and eggs.

JACK OF ALL TRADES.

In nine cases out of ten, when you see a man who is able to do all the odd jobs around the home, it is because he has the proper tools. Look over your outfit of home tools and see if they are fit to do any of the countless things that need to be done from day to day. Have you every tool needed, and are they all in good condition?

It is the simplest thing in the world to supply yourself with a complete set of tools, each the best of its kind. Just buy a Keen Kutter Tool Cabinet. It is a beautifully finished oak case, containing a set of tools for household use. Each tool in the Cabinet is one of the famous Keen Kutter brand. No expert could buy a better set of tools, for better tools are not made. The name and trade mark appear on each one and protect you against bad luck. If anything goes wrong because of defect in making you can have another tool or your money back.

The Keen Kutter Tool Cabinets contain large and small assortments of tools to suit different needs, and range in price from \$7.50 to \$100. Each tool in the outfit has a special rack or hook, so it will not be damaged by contact with other tools.

There are drawers in the Cabinets containing many accessories that are apt to be overlooked in a home kit that you collect for yourself.

Every Keen Kutter Tool Cabinet, from the smallest to the largest, is complete in every detail, and contains Saws, Braces, Bits, Chisels, Gimlets, Awls, Planes, Hammers, Hatchets, Files, Pliers, Screw-drivers, Wrenches, Nail Sets, Reamers, Rules, Squares—in fact, everything necessary for the ordinary home job.

Keen Kutter Tool Cabinets are for sale at the leading hardware stores.

The Keen Kutter Tool Cabinet Booklet will be sent free to anyone who asks for it by Simmons Hardware Company, St. Louis and New York, U. S. A.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

WHAT AILS THE SHEEP?

The man who learned the sheep business forty years ago and then went into a Rip Van Winkle sleep knows nothing about the later and most serious disorders common to flocks. Then the list of diseases sheep was heir to began with "snuffles" and ended with "grub in the head." This was about the extent of sheep disorders and most sheep died afflicted with one or the other of these well known and ancient disorders. Years ago we never heard of anthrax which has become quite common in some districts and has proven disastrous. The flocks of Wyoming were recently stricken with what was supposed to be poison but when veterinarians were consulted it proved to be anthrax.

Worms have been more or less common in flocks for years but it has been only in recent years that the twisted variety has come into prominence. The worm that causes knotty guts is also getting to be quite prevalent in some localities. The scab has become somewhat scarcer as the years go by owing to a united warfare against it on the range

and in states where it was once most prevalent.

There is now a disease, recently brought to light, known as the so-called Texas itch which is caused by a louse which infests dogs and all the canine race, such as wolves, foxes and all related animals which range over the west and the southwest, causing a watery eruption of the skin and it also forms scabs. This special louse does not affect cattle.

The way to prevent many sheep troubles is to dip them at least once, and it will be better to dip twice, annually. The dipping should be thorough so as to be effectual. A partial dipping, even with the best dips will be inadequate and will result in a failure.

The White-Metzger Sale.

The recent sale of Messrs. Geo. H. White and E. M. Metzger, at Council Bluffs, brought out a fair crowd, and a good fair average was maintained. Thirty-one head sold at an average of \$43.20, and Mr. White made an average of over \$50 on what he sold. Perfection I Know 2d, winner of third prize at Des Moines, went to Messrs. Prouty & Keeline at \$125, and Mr. E. D. Keasy, of Wlota, Iowa, bought the boar, Contractor, at \$121. The top of the Metzger offering was \$60 for the first-prize sow at the Nebraska and Interstate fair and she was purchased by Mr. F. M. Harney, of Julian, Neb. Below is a report of a few of those sold in the sale:

Lot.	Price.
1. Contractor, E. D. Keasy, Wlota, Iowa.	\$121

Box 2 Ames, Ia.

ADDITIONAL VETERINARY.

DROPSICAL SWELLING.

I purchased a few days ago at public sale a very fine five-year-old three-fourths blood Percheron mare and colt, dark brown color, weight 1,550 pounds. Before foaling she became much swollen under the stomach; her udder was very large, hard and inflamed, and she was stiff to some extent. She had no trouble in foaling; got along fine, the inflammation soon giving way, etc. Now to the point in question, her udder has gone forward toward the navel, four or six inches, and the mare being slightly sway-backed, the udder shows quite plain. I might say that while she has a large, full hip, they are very close together, no space, but rubbing up against each other. In feeling the udder it is not hard or lumpy and as I remember is about normal. She will likely have a colt in the spring and this is what I feel uneasy about. If it is colt founder, as some think it may be much worse next year, may it not? Have never had a veterinarian see her, preferring to first consult your department. I might also add that she has a very large stomach, dropping down well, though rounding back and front nicely, etc. She has fine action for her size and there is not the slightest enlargement of those veins under the stomach. She is a good milker and will soon want to wean the colt. Please consider this also in your answer.

There is not a single symptom of so-called "colt founder" mentioned in your description. The mare simply has had dropsical swelling of the udder and glands of abdomen and such are common where a pregnant mare is not given a roomy box stall in stable and is afraid to lie down in stall. Prevent the condition by exercising the mare thoroughly every day during pregnancy, giving her a roomy box stall and feeding succulent food and mashes during last three months of pregnancy. The position of udder cannot be changed.

WARTS.

I have four head of calves that have warts on their bodies, mostly on their necks. One of them has bunches hanging on its neck about as large as cups. Please tell me what to do for them; if they can be cured, and what caused them.

Warts are due to some abnormal condition of the skin, but exact cause never can be discovered. The warts having narrow necks may be caused to fall off by putting several small rubber bands tightly around them ligating tightly with a small cord. It is better, however, to cut out the warts and cauterize the bleeding bases with a red hot iron. Masses of small warts may be removed by rubbing with castor oil or goose grease once daily. Caustics such as nitrate of silver, caustic potash, formaldehyde and terchlorid of antimony or nitric acid may be used in place of the knife, but the operative plan is the best.

WEAK JOINTS.

I should like to know what is the matter with my colt. He is about four months old, a nice, blocky fellow, and has been growing fine so far, but there seems to be something wrong with the lower joints of his hind legs. He doesn't step through as he should. Sometimes when he walks the joints slip ahead—almost over. Perhaps I grained him a little too heavy a while ago; I fed him corn and oats mixed about half and half. I quit the corn and am feeding him a half gallon of oats three times a day; two bundles of sheaf oats for mare and colt per day, with hay, and he runs on pasture and is suckling the mare yet. Will he grow out of it and is there anything I could do for him?

We take it from your description that the fetlock joints "knuckle" forward now and then showing a weakness of the

muscles and ligaments. Such conditions are likely to be outgrown but you may greatly help matters by rubbing the tendons and joints once daily with drug-gist's soap liniment and applying a bandage when parts have dried. Remove the bandages twice a day and thoroughly hand rub the parts.

DEATH OF COLT.

I wish your opinion of the disease that caused the death of a bay horse colt four and a half months old. The colt was sick four days and would lie down most of the time. Would suckle a little when not lying down. Water leaked from its sheath a little all the time, but it did not seem to have much pain. It would make water naturally and its stools were somewhat soft. It seemed to have more pain the last day than before. What was the trouble?

There is nothing in your description to enable one to definitely conclude what disease caused death of colt. A post mortem examination always should be made in such cases. It is probable, however, that indigestion led to inflammation of the bowels and death. In that case the intestines would have been found highly inflamed and dark purple in color.

WART.

One of my two-year-old colts has what I think is a wart growing on his hind leg behind the knee joint. It is about the size of a large walnut and looks red and inflamed, and has been there about a year. It may be a little larger now than when it first started. Several of my neighbors have looked at it and all agree it is a wart, but do not know what is the best way to remove it. Kindly give me your opinion of what it is and the best way to remove it.

Cleanse part, clip hair away if long and smear lard around growth; then rub in a little powdered yellow sulphuret of arsenic. Remove scab when possible and again use the powder until the growth is cut down level with skin at which time complete the cure by applying oxid of zinc ointment twice daily.

COLIC.

I have a six-year-old mare that has repeated attacks of the colic. What can I do for her?

When colic attacks repeatedly there usually is some incurable cause, such as the presence of a calculus or aneurism or some such cause. All that can be done in such a case will be to have her teeth put in order by a veterinary dentist; then feed more carefully, giving the drinking water always before feeding, and seeing to it that the bowels are kept regulated by feeding bran mashes or carrots. At time of attack give at one dose two ounces of turpentine and half an ounce of fluid extract of cannabis indica in a pint of raw linseed oil.

BULL NOSE.

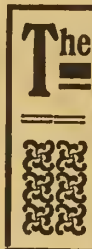

I have some pigs that do not do very well. Their noses become enlarged. Some call it "big nose," some call it "bull nose." What is the best thing to do with them?

The disease is considered incurable, and is a form of rickets, so that the tendency to it is hereditary. Badly-affected pigs should be destroyed and burned, and next season you should breed from new stock. Treat the less affected pigs by feeding tankage or blood meal along with milk, middlings, flaxseed meal, or a combination of such nitrogenous foods and mix limewater freely with all food and drink. Indeed, at first we would even give the pigs some of the lime from which the limewater was made. Scrape the sores thoroughly for removal of all dead tissue; then cauterize lightly with nitrate of silver or lunar caustic pencil. Afterward apply camphor-phenique to sores once daily. Clean up, disinfect and whitewash pens. Pigs should live an outdoor life so far as possible.

ACTINOMYCOSIS.

Please tell me through your paper what is the matter with my bull. He is a thoroughbred Short-horn, two years old, and has a very hard lump on his left jaw about as large as my fist. I first noticed it about two weeks ago. Then it was small, but it is growing fast. I think it is the big jaw. Am I correct? Is there any cure for it and if so, what is it? Should I fail to get it cured will it hurt him for breeding purposes?

The disease is actinomycosis (lumpy jaw) and will not in any way be transmitted to the offspring of the bull, but in time may lead to emaciation and weakness unless treated properly. Clip hair from part and cut into center of lump; then press up into wound some corrosive sublimate powder rolled in wet cotton batting to form a mass as big as a hazelnut. Keep this in place by pressing in cotton or oakum after it. It will cause center of tumor to slough out and this may lead to disappearance or rest of the lump. If despite this treatment it continues to increase in size, repeat the treatment and give the bull a dram of iodid of potash in water twice daily for ten days; then stop for a week and repeat. It may be neces-

Initial Watch

IS THE VERY LATEST THING IN WATCHES FOR BOYS AND GIRLS OR MEN AND WOMEN.

Your own Initial on your own Watch

That is a bright idea and a good one. The wonder is that nobody ever thought of it before. It is really the most fetching novelty of the season, the most popular fad of the moment, and a fad that has come to stay, because it is really not a fad at all, but a sensible idea. Nothing is more distinctively your own than

The Watch You Carry.

Nothing, therefore, deserves a more distinctive mark. What better mark than your own initial engraved in beautiful German text on the case? Of course you want one—you would like to be up with the fashion—but there's your old one. No initial on that, and it cost a lot more than the one we are offering.

That's just the point! This watch

Costs You Nothing.

No money—just a few minutes of your spare time, a few neighborhood calls on your friends and the watch is yours. People change watches now as often as they change hats. Have you had a new one this year with your initial on the case? If not, write us for particulars how to earn one. The chances are good that you will earn it the same day you receive our letter. It is as easy as that.

What Kind of a Watch?

To be sure, we had forgotten that, but thereby hangs a tale!

Not many years ago a young hardware merchant on a down town street in New York took up a line of small

metal clocks and made a specialty of them. They went well. He sold barrels of them; but the demand was all for smaller and still smaller clocks—smaller than anything then made, so he took a trip up into New England, among the Connecticut clock makers, in search of smaller sizes. He found one manufacturer who was willing to make the clocks as small as he wanted them—"pocket size," in fact, if he wanted them as small as that.

With that expression, "pocket size," came a new idea into the hardware dealer's brain, for a pocket size time piece is a watch of course, and this idea revolutionized the watch business of the country. He contracted for half a million pocket time pieces on the spot, the factory's entire output for a year, and this gave him temporary control of the lowest price watch ever put on the market. From this first venture he advanced to the head of the greatest watch manufacturing company in the world. His product now is

2,000,000 Watches a Year

and it scarcely equals the demand. He rolls in wealth and his name is a household word throughout America and England. You know it of course, and when we tell you that this watch is of his company's make and is fully guaranteed by the most successful watchmaker in the world, we have said enough to convince you that the watch is all right.

For full particulars, style and size and method of earning a guaranteed watch with your own initial on the case, address,

Chicopee Falls, Mass., U. S. A.

sary to use the latter medicine for three equal periods of time.

LAMENESS.

I have a black six-year-old mare, weighing about 1,050 pounds. She is lame in the left hind leg at knee joint and has been lame at times for one year. I notice it more after working her or driving her hard. The joint is just a shade enlarged. Would you advise blistering and how should I go at it?

It would be well to blister the joint if you are positive that is the seat of the lameness. In that case, clip hair from joint; tie mare so she cannot bite part or lie down in stall; then rub cerate of cantharides into skin a little at a time for fifteen minutes. Wash blister off in forty-eight hours; then apply lard daily. Afterward, turn her into a box stall for a week or two. It may be necessary to have the joint fired and blistered if the lameness is due to a bone spavin.

YEAST TREATMENT.

There was an article in the August 30th issue of your paper concerning the yeast treatment for barrenness, which I did not understand and as I did not get the paper in which it was explained, will you kindly explain it?

The yeast treatment is still in the experimental stage, but it is high time our correspondents should be telling us results from its use so that we might know whether or not to go on recommending it in practice. The mixture is made by stirring up a cake of compressed yeast in a little warm water to form

a paste, which should be allowed to stand in a warm room for twelve hours, at end of which time stir in a pint of lukewarm, freshly-boiled water and allow to stand, as before, when it will be ready for use. Use it by injecting into vagina after flushing out that passage with warm water. It is best used just at time when period of heat is noticed and animal should then be bred when period of heat is about over. In all cases, mouth of womb should be opened before service if there has been trouble in getting the animal to conceive. In obstinate cases, the mixture should also be used during the intervals between periods of heat, and the treatment is to be kept up in this way until the animal conceives. We will take it as a favor if readers of this paper will at once report what experience they have had with the yeast treatment. We want to know what it has done, one way or the other, and from the information so gained will be able to judge of the merits of the treatment which to date has given, so far as we are aware, both good and poor results.

KANSAS CITY ONE FARE PLUS \$2.00 ROUND TRIP.

On November 18th to 21st The Chicago Great Western Railway will sell round trip tickets to Kansas City and return at rate of one fare plus two dollars. Three trains every day and best of everything. For further information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

A WOMAN'S PHILOSOPHY.

BY A HOUSEKEEPER.

Disappointment—His appointment.
Whose? The Lord's who loves me best.
Understands and knows me fully.
Who my faith and love would test.
For like loving earthly parents,
He rejoices when he knows
That his child accepts unquestioned
All that from his wisdom flows.

Disappointment—His appointment;
Change this letter, then, dear friend.
Take in cheerful acquiescence
All thy Father's love may send.
Soon will faith be lost in vision,
Then in glory thou shalt see
"His appointment," and that only,
Was the right way home, for thee.
—Selected.

Just at this time, when the whole country is filled with disgust and loathing over the revelations of the Chicago packing house scandal, the following remarkable statement clipped from an editorial in July What to Eat will doubtless be read with much interest by thousands of farm people in the middle West:

"Compared to methods of preparing food products often practiced in the rural districts, the Chicago packing houses are even now models of cleanliness. In the country, diseased cattle and hogs are killed and marketed by some farmers just as soon as the disease is discovered, to save the farmer loss by the death of his stock. The methods of slaughtering and preparation of meats are repugnant and filthy compared to those of the big packing houses. With due reverence for the traditionally honored farmer's housewife, the truth remains that butter and milk prepared by her for the market is often more dangerous than wholesome. The vilest renovated butter turned out at the packing houses is clean and healthful compared to much of the dyed products placed on the market by the farmer's wife. Let anyone take a specimen of this bright yellow country butter to the city chemist and it will be found foul and poisonous with aniline dyes. The milk from the country home will often be found poisonous with formaldehyde, which is used as a substitute for cleanliness. Swarms of flies hover about the work-places of the country home, carrying germs from the sores on cattle to the milk pail; from the carcasses of disease-slain hogs and chickens to the butter bins; from the filth of the barnyard and garbage heap to the preserve pantry."

No doubt it will be hard for intelligent and progressive farm people, who read this statement of the editor of What to Eat, to comprehend his motive for

sending forth through the columns of his magazine such a senseless, scandalous and disgraceful libel upon conditions of life and methods of work in farm homes.

The statement that the methods of slaughter and the preparation of meats in the farm home are repugnant and filthy compared with those of the big packing houses, and that the vilest of renovated butter is healthful and clean compared with much that is placed on the market by the farmer's wife is utterly false and unfounded.

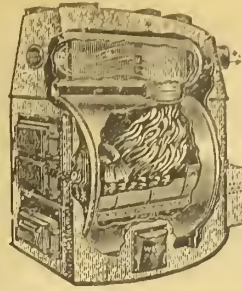

For twenty years it has been the business of the editor to investigate and understand the methods of all kinds of work in farm homes, and we are willing to state that the conditions described in the above clipping do not exist in one farm home in a thousand, and that as a rule the meat, butter and milk and all other products put on the market by farm people are clean, wholesome and healthful, far beyond those produced from factories and packing houses.

On the farm premises of not one farmer in a thousand will be found the unburied, dead carcasses of animals, on not one farm in a thousand will be found sores on the horses and cattle, and in not one farm home in a thousand do swarms of flies infest the work rooms, the butter bins, whatever they may be, or the preserve pantry of the farmer's wife.

The average farm home is as well screened, as cleanly and as wholesome as any other home in the land. The canned fruit, the preserves, jams and jellies are sealed in glass cans and kept in cool, sanitary closets or cellars that are free from flies and vermin, and many city people procure these luxuries directly from the farm home as being more wholesome and healthful than the factory made.

Further than this, we are willing to assert that not one farm woman in a thousand has ever used formaldehyde in any of her products whatsoever, and that it is an exception, rather than the rule, for farm people to color the butter they put on the market. Furthermore, the average farmer puts up his own ice, and the butter made in the farm home is kept in clean, sanitary refrigerators, and a butter bin is something we have never yet seen in any farm home and a thing which probably does not exist except in the imagination of the editor of What to Eat. We have always been in sympathy with the strenuous warfare of the editor of What to Eat on impure food stuffs and have acted as his ally in every possible way, and in view of the facts we have stated it seems to us that it is now up to him either to qualify his statements concerning sanitary conditions in the average farm home, and the quality of products put upon the market, or to state when and where he has found such conditions to exist, that such a scandalous charge may not rest upon the great majority of prosperous and intelligent farm people of the middle West.

The people worth knowing are not always those who have the finest houses and the largest bank accounts; who can

HEAT YOUR HOUSE STORE, CHURCH or SCHOOL HOUSE WITH
Bovee's Compound Horizontal Furnace Radiator 11 YEARS on the MARKET.
THOUSANDS IN USE. BURNS ANY KIND OF FUEL.

Having BOVEE'S Improved Hot Blast Ventilating System and Return Circulating Radiator, which gives perfectly pure air and saves One-Third of the Fuel. Any handy man can properly install one of these furnaces with all connections in a short time. These furnaces absolutely make the best and most durable heating plant in use. help you to enjoy yourself by inviting you to a house party or a yacht ride. But they are those who radiate helpfulness and good will, who make you ambitious for the highest things, who put you at your best. These are the people really worth knowing, the friends best worth having.

"HE CROWNETH THE YEAR WITH HIS GOODNESS."

"He crowneth the year with his goodness!"
The grain
Crowded storehouse and bin:
The fruit, fully ripened, lies blushing, the
cattle
Are safe gathered in.
While chill are the days of November, with
skies
That are somber and drear,
Wide, wide o'er the land he bestoweth his
bountiful
Kindness and cheer.

"He crowneth the year with his goodness!"
Far, far
O'er land and o'er main,
With longing the wayfaring pilgrim shall
turn
To the homestead again.
Joy! joy! to the happy home-coming, where
loved ones
Await his return:
The table with dainties is crowded, and festal
fires
Merrily burn.
"He crowneth the year with his goodness!"
Our Father,
A song we would raise,
A tribute of love and thanksgiving, a psalm
Of jubilant praise:
For health, peace and life, with its blessings,
the care
That hath guarded our ways;
And, oh! for thine own loving favor, the
goodness
That crowneth our days.
—Mrs. A. M. Tomlinson.

We often hear the complaint from women that their white underwear is spoiled by washing in winter, getting a dingy gray look from the coal soot in the water and in the air. Many have adopted colored petticoats for this reason, so why not use colored corset covers, thus saving the dainty white ones for summer wear? Where the family washing is done at home it will be found quite a help to lay aside the white corset covers with the white petticoats until summer comes with the clear water and sunshine. Black corset covers can be made quite ornamental. If one cannot afford the black silk a good quality of mercerized lining looks almost as well, and can be laundered easily. With a sharp steel crochet hook and a ball of yellow Silko, crochet an edge around the armholes and neck, just on the raw edge of the goods. This single crochet edge looks like a good buttonhole edge, and is much easier to do. Briar stitch with the Silko a half-inch from your crocheted edge around neck and armholes. Have the front cut full and square in the neck, and crochet a beading across the top in which to run narrow black satin ribbon to draw up the fullness. When this is completed you will have a corset cover that is not

only serviceable, but beautiful as well. Covers made in the same way from pink or blue gingham, edged and briar stitched with white Silko are quite pretty, and can be used in summer with gingham waists. Try the colored corset covers for comfort and labor-saving.—Selected.

I think the reason why married life so often has too little romance in it is because the engaged life has nothing else," writes Helen Watterson Moody in the Ladies' Home Journal. "I know of no preservation of romance in married life so sure as good housekeeping, and I know of no profession so serious, so absorbing, so demanding preparation and skill as the profession of the housewife. When a young woman marries, she really enters upon the practice of a life profession, as does a young man when he is admitted to the bar or puts out a little sign with M. D. upon it after three or four years spent in preparation. The man, you see, is willing to equip himself fully for his part of the partnership. Does it seem businesslike and in good faith for a woman to take the place of the second partner with a more indifferent training, or even none at all? I would have the young girl who has committed herself to an engagement to undertake at once a course in practical housekeeping."

For a good furniture polish, take one-half pound of beeswax, one-fourth ounce of alkanet root. Melt together in a vessel until wax is thoroughly colored, then add two ounces each of boiled linseed oil and spirits of turpentine and strain through a piece of coarse muslin.

A very good preparation to try when the hands have become rough is made of two ounces of spermaceti, two ounces of white wax and two ounces of sweet almond oil. Melt the three ingredients together over a gentle fire and add one ounce of camphor in shavings. Remove it from the fire when the camphor is dissolved and stir until the mass hardens.

Put a metal spoon or fork in a glass before pouring hot water into it. The dish will not crack so readily.

Dip your brooms in a kettle of strong suds every week or two; they will last longer and be easier on the carpets.

Hard soap is better than grease to quiet squeaking doors or to make unwilling bureau drawers submissive.

A tablespoonful of powdered alum sprinkled in a barrel of water will precipitate all impurities to the bottom.

Keep a small scrubbing brush for the sink, another for vegetables, a larger one for the floors and a wire dish cloth for ironware.

Mrs. Nellie Kedzie Jones, in discussing housekeeping before the domestic science class at the Illinois State Farmers' Institute, declared that

Buildings at Truman's Pioneer Stud Farm, Bushnell, Ill., in which are housed the champion Shires, and Hackneys, shown by Messrs. Truman, at the leading shows throughout the United States and Canada.

not one-third of the married women of our country are good housekeepers, or know how to instruct their daughters in the science of housekeeping and home-making.

It does make one tired—slang is excusable here—to read the census reports giving the number of women “engaged in self-supporting occupations,” said list including clerks, typewriters, school teachers, etc., but not one wife and mother. As if the woman who darns her husband's stockings, keeps the children's faces clean, cooks for a family of a dozen, more or less, keeps a house in order, washes, irons, bakes, mends, sews, sweeps, nurses the sick, spansks the erring and keeps an eye on a thousand and one things from early morning till late at night, and then sleeps with one eye open lest Tommy kick the bed clothes off his sturdy little limbs or badly shows signs of croup, were not “self-supporting.” But come to think of it she isn't. She supports all the rest of the family, and in nine cases out of ten has neither time nor strength left to look out for herself.—Lewiston (Me.) Journal.

It wasn't a smoking compartment, but they were using it for that purpose all the same, and she was too modest to object. By and by the two men got into discussion over the woman question, and at last one of them, an unregenerate bachelor, appealed to the lady thus: “Do you think there will be men in heaven, miss?”

She blushed. “No!” she said. “They will want to go somewhere where they

Free! Free!

To the Sick and Ailing Everywhere

THE CURE FOR YOUR DISEASE

Delivered Free---Free for the Asking---Free to You.

To the sick—the suffering—every man and woman victim of organic disease, local trouble or broken general health.

Dr. Kidd's offer of free treatment is given in the absolute faith and sincere belief that they can and will stop disease, cure it and lift you up again to health and vigor. There is no reason why you should not get well if you will only bring yourself to take the free treatment of these wonderful remedies no matter what your doubts may be.

I Want the Doubters

I want to give them the proof, the evidence and the glory of new life in their own bodies, and I want to pay the cost of this proof, all of it to the very last cent, myself. I have put my life into this work. I hold the record of thousands of cures; not “some better,” but thousands of desperate sufferers, hearty and strong, and big and well; and their letters are in my hands to prove every word I say. Rheumatism, kidney troubles, heart disease, partial paralysis, bladder troubles, stomach and bowel troubles, piles, catarrh, bronchitis, weak lungs, asthma, chronic coughs, nervousness, all female troubles, lumbago, skin diseases, scrofula, impure blood, general debility, organic vital ailments, etc., are cured to remain and continue cured. No matter how you are, no matter what your disease, I will have the remedies sent to you and given into your own hands free, paid for by me and delivered at my own cost.

These Remedies Will Cure

They have cured thousands of cases, nearly every disease, and they do cure, and there is no reason why they should not cure you—make you well, and bring you back to health and the joy of living.

Will you let me do this for you; will you let me prove it, brother and sister sufferers? Are you willing to trust a master physician, who not only makes this offer, but publishes it and then sends the test and proof of his remedies without a penny of cost to anyone except himself?

Send your name, your postoffice address and a description of your condition, and I will do my utmost to satisfy every doubt you have or can have that these remedies will save your life and make it all that nature meant to make it.

Let me make you well. Give me your name and tell me how you feel, and the proof treatment is yours at my cost. No bills of any kind, no papers, nothing, but my absolute good will and good faith.

DR. JAMES W. KIDD,

Box 104, Fort Wayne, Ind.

NOTE—Dr. Kidd, his methods and his offer are exactly as represented in every respect.

can smoke.” The discussion stopped; so did the smoking.

It is from a recollection of his own afflictions as a child that a college professor makes a plea for dirt. Children, he avers, are tortured by the madness of mothers. They are not only scrubbed with cruel frequency, but are restrained from wholesome play by the threat of punishment for soiled clothes. Nature, he maintains, has had a good purpose in implanting in every normal child a fondness for dirt, and the constant efforts to defeat this purpose must have a deleterious influence on the character.

He considers it a grave invasion of the right of childhood to insist that the human young, who are in a state of barbarism, should look like angels on parade. “The laws of nature,” he declares, “cannot be constantly violated with impunity; children who have the possibilities of a fine manhood are perverted into vain and finical peacocks by the diseased desire of mothers for unnatural cleanliness.”

Don't think because you have good eyes that they will bear all kinds of abuse.

Don't use the eyes continuously at close work, without occasionally resting them by looking off in the distance.

Don't hold the book nearer than is necessary for clear, sharp vision.

Don't make a practice of reading type too small to be seen readily at eighteen inches.

Don't attempt to read in a car or other jolting vehicle. It is a strain on the directing muscles of the eye.

Don't read while lying down. It causes an unusual strain on some of the external or directing muscles.

Don't read when very sleepy, as the accommodation and convergence are naturally relaxed, and the extra effort necessary to force the unruly members to work may be shown by a congestion of the blood vessels of the eyeball.

Don't read facing the light.

Don't read in the twilight or in badly lighted rooms.—Pacific Health Journal.

A safe way to wash colored fabrics, is to add to the water in which you intend to wash goods, from two to four quarts of cooked starch. Wash with soap in the usual way; rinse in two clear waters. Have water through whole process tepid. Hang to dry in a shady place, or better still, dry indoors. By this method, goods will look almost like new. The rule applies to cotton or woolen goods, plain or mixed colors. The starch does not stiffen goods, simply holds the colors.—Mary G. Fitch.

A delicate fancy abroad is a “sleep curtain” to hang on the wall at the head of the bed. This curtain sometimes shows a design of drooping poppies embroidered in low tones of red with gray-greens and silver-greens in the stems and leaves. Interwoven with the swaying stalks of blossoms runs a suitable legend, such as one of the following:

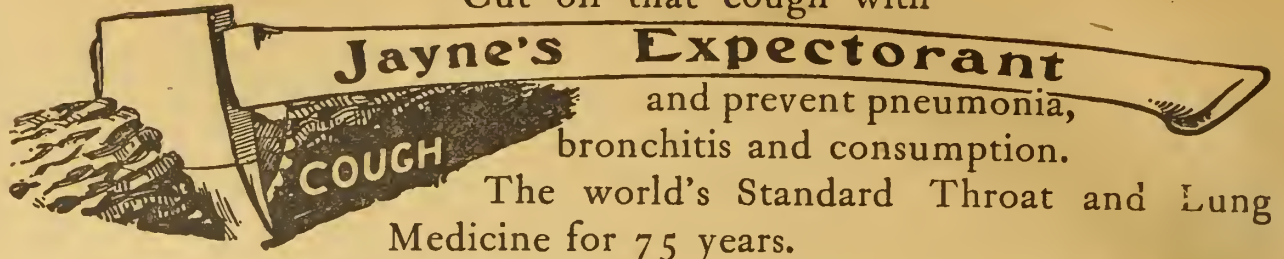

Happy be thy dreams.
Come, gentle sleep, with poppies crowned.
He shall give His angels charge concerning thee.

A curtain of this sort would make a pleasant and unusual gift to a friend.

Don't shut out the sunshine from your houses. Never mind if the curtains and carpets do become a little faded, for sunlight means health, and therefore should be allowed an entrance. It is especially important to admit sunshine into our bedrooms, if we would have our sleep as resting and invigorating as it ought to be.

A pretty ornament for gateposts or piazza rails is made of a tiny nail keg. Have holes bored in the sides. As the soil is filled in and patted firmly down (using a potato masher for the purpose) plant the seeds of various vines at the holes. If the soil isn't well pounded down as you fill the barrel,

Cut off that cough with

The world's Standard Throat and Lung Medicine for 75 years.

Get it of your druggist and keep it always ready in the house.

THE NORTH-WESTERN LINE

The Only Double-Track Railway Between The Missouri River and Chicago

This complete service includes electric-lighted trains of the most modern type with all provisions for safety, comfort and speed.

The Best of Everything

For booklets, maps, train schedules and full information apply to any ticket agent of The North-Western Line or address

L. F. BERRY,

General Agent, C. & N.-W. Ry.,

401 Walnut St., DES MOINES, IOWA.

NW665

when it settles after watering, the seeds will be buried below the holes, sinking with the dirt. Use coarse-leaved vines sparingly, for the nail keg should be a mass of living green. At the top plant vines and plants and set the whole where it will show off to advantage. A large barrel could be utilized for beautifying the stump of a tree, if treated in the same way, but I have seen only the small ones.—R.

Keep a brush at hand for cleaning lettuce, spinach, celery and similar vegetables. It does the work a great deal better than the hands alone.

Don't cook in iron vessels what can be cooked in earthenware. The heat is more uniform, the flavor better preserved and there is less liability to burn in an earthenware than in an iron vessel.

THE FARMERS.

They are building good homes and improving their lands:

They are using their brains as well as their hands:

And with modern machinery that lessens their toil

They are making good profits tilling the soil.

Since rural delivery, the telephone and the trolley have come

Their children are contented, they now stay at home:

City life for the farmers no longer has charms,

They are healthier and happier living on farms.

—Henry N. Montgomery.

Underwood, Ind.

A book is good company. Except the great out-of-doors, nothing that has so much life of its own gives so much life to us.—Beecher.

It is what we give the world, and not what we get, that determines the measure of our success.

\$10.00 AN ACRE PROFIT.

I HAVE \$50,000 worth of central Nebraska land, in one crop county, that will sell for \$10 an acre less than same land can be duplicated for in the county. Have all sizes and kinds of farms, finely improved and unimproved, upland and bottom that does not overflow. All finely located. Am going into other business and must have the money. For full descriptions, plans, photos of buildings and farms, write the owner,

H. J. HILL, 1802 B. St., Lincoln, Neb.

ly favored this year, so that you may be able to meet your obligations.

Be thankful for all small favors, and reach out for greater, for “sad will be the day for any man when he is absolutely contented.” Press forward, and be grateful for all helps on the way. Any new method that may be introduced or offered to lighten life's cares and burdens, grasp and accept gratefully.

Many a good man has got freckles on his reputation by carrying molasses home in a demijohn.—Rural New Yorker.

Is there someone to whose happiness you are necessary? Are there those to whom your face is like a ray of the sunshine, and whose hearts grow light at the sound of your voice? You are being cheated out of the best of life unless you are making yourself indispensable to some of those about you.

It is gratifying to know that in the best country homes in our land the occupants are never worrying over their social position in the community.

Mr. H. J. Hill, of 1802 B. St., Lincoln, Neb., has \$50,000 worth of central Nebraska land that he will sell for \$10 per acre less than the same land can be duplicated for in that country. He has all sizes and kinds of farms, finely improved, and unimproved, upland and bottom lands. For full description and further information, write him at the above address. His advertisement appears on this page.

The Packer and the Producer.

Anything that promotes normal prosperity in any branch of the meat industry benefits the packer, and he is certainly glad to offer any suggestions and encourage any legitimate movement which may be of service in meeting the demands of trade.

The real dictator is the consumer, and we must as nearly as may be perfect our product so as to exactly meet his wants. This cannot be done by any one of us; there must be understanding and intelligent effort, beginning with the first step, and continuing throughout, improving the breeding, feeding, handling, displaying and selling. Quality and economy are the keynotes. Failure in any step affects the profits of all. As in other lines of business, conditions are seldom at any given time favorable for everybody. If range cattle sell high, the feeder who buys them is at a disadvantage. If they sell low, it is hard for the ranchman to feel that the feeder has not had the best of it, and if the feeder pays a high price for corn, the farmer complains. The retail market man is apt to consider that he pays too much and gets too little for his meats, while the packer and the shipper from whom he buys regard the ruling wholesale price as low, and the margin unfairly small.

We can readily agree that supply and demand determine prices, but the thousand and one underlying causes directly or indirectly affecting supply and demand and business conditions generally are not always easy to recite.

The visible supply and cost of production cannot be computed in advance, as in the coal and lumber industries. At the best there will be fluctuations due to unforeseen causes.

The price the consumer pays at retail is largely a matter of trade between himself and the market man. Prices vary as neighborhoods vary, just as one consumer habitually pays \$50 or \$60 for a suit of clothes without grumbling, because he wants the product of a fashionable tailor, when he could get probably as good a suit ready made for half the price or less, if it were not for the satisfaction he takes in flattering his pride.

The predilection of the American consumer for the cuts of beef known as rib and loin has much to do with the price of cattle. Roughly speaking, 50 per cent of the steer is edible, and of this 50 per cent only one-fourth can be classed as choice cuts; that is, as rib and loin. People are slow to learn that all cuts from a choice animal are choice. The market man often has to make his profit for the carcass out of the rib and loin. Natural conditions thus limiting the supply on the one hand and prejudice the demand on the other, it will be readily seen that there is room for improvement in the dressed meat business before all will enjoy the legitimate fruits of toil and enterprise.

It is chiefly to the edible portion of the carcass that the producer must look for improved prices. There is no such difference between the non-edible parts of one animal and those of another. The difference in value is in the beef, pork and mutton, and what the packer pays depends upon what he gets. No one can make good beef out of poor cattle. The quality of the beef is fixed before the steer reaches the slaughter house. The attention paid to the production of the better qualities has resulted in good prices for a constantly increasing number. (Address before the National Live Stock Association by Robt. C. McManus.)

Rotation in Oklahoma.

To the Editor of The Homestead:

One of the most important evils that confront the agricultural and live stock interests of Oklahoma is the land specu-

latter as well as the farmer who is anxious to make a large crop record and then sell out. This class of land speculation is a danger to the agricultural and live stock interests of any new country.

Nature has adapted Oklahoma to a wide diversity of crops, and as an agricultural and general farming state it will be among the leaders when the resources are fully developed and the people understand the proper rotation of crops and the methods of improving the soil. At present most of the farmers pay no attention to the rotation of crops or the growing of tame grasses to replace the prairies that are now mostly broken out. This abuse of the soil is more to be noticed in the cotton and wheat growing counties than elsewhere. There are numberless fields that have been raising wheat and cotton ever since the country was opened for settlement. This land has produced fair crops with no attention toward rotation of crops or increasing the yield of future crops. Everything not sold is burned in time to plow for the next crop.

It is only a question of time when land worked in this way will deteriorate and fail to grow profitable crops of any kind. Farmers will then find out their mistakes and learn the value of understanding rotation of crops, value of clovers, legumes and manure in improving the soil for future crops, and the value of tame grasses to the live stock interests. One thing is certain that unless it is checked by the use of grasses many of the fields will be washed so badly that it will be impossible to work them with modern farm machinery.

I have seen some eighty and 160-acre fields that were practically ruined from soil washing. Blue grass is very well suited for upland soils in Oklahoma, and properly used will prevent soil washing the best of any grass that will thrive under the same conditions.

Alfalfa, of course, solves a great problem on some kinds of soil, but the cost of the seed and chances of failure prevent its becoming very popular as a soil builder in the near future. Clover and timothy are out of the question at present on most kinds of the soil. English blue grass is a success and will become a great factor in the development of the cattle interests and the rotation of crops. The plowing of too much natural grass and not finding tame grasses to replace the prairie grass has had a bad effect on the cattle interests; but with blue grass and some alfalfa Oklahoma will soon come to the front as a cattle producing state.

One thing noticeable at present is the class of people coming to the country and buying homes. These people are coming to stay, to build homes, improve the land, buildings, fences and improving the appearance of their homes. The people are the ones who will prove of greatest value to the state and become interested in good roads, schools and all public improvements. The present high price of land is having a good effect on the farmers in regard to improving the soil and investigating the various kinds of tame grasses.

The average crop man fails to make good on \$50 and \$60 land in Oklahoma as well as in any other country, and I think this will work a great improvement in the development of the land. Taken as a state I think the new Oklahoma has a great prospect as an agricultural and live stock producing state.

SECOND ANNUAL SALE

CHOICE POLAND CHINAS

19
BOARS

Tuesday, Nov. 13, 1906, to be held
at Stock Pavilion, Waterloo, Iowa

35
SOWS

The boars represent the best Poland breeding. Fall boars by C's Perfection 95893 will make herd headers. Those sired by Max 95039, the herd boar, are strong individuals in merit and breeding. Sows are by Model R. 24 79187, an 800-pound hog with worlds of bone, size and quality. Sows by Improver 24679 that are tried breeders. Also some by C's Perfection as good as you will find. They will grace any herd. A grand lot of gilts by Max that will be well worth the money. Don't miss this chance to get first-class young boars at your own price. Sows are open and arrangements can be made for having them bred. All stock guaranteed. Send for catalog and come and have a good time.

WM. CROWNOVER,

PARAMOUNT STOCK FARM,

WM. HOLLAND,
Auctioneer.

HUDSON, IOWA.

JNO. H. HARVEY & SON SELL POLAND CHINAS

At Maryville, Mo., Saturday, Nov. 17.

33 Boars = 28 Sows

THREE spring boars got by the great Nemo L's Dude and out of a Corwin bred sow should go to head good herds. They weigh 275 lbs. each, have the bone and are smooth fancy fellows. We also sell a few fall males, 25 strong spring boars and 28 extra good spring gilts. Tecumseh strains predominate. All are the big kind. Write for catalog.

JOHN H. HARVEY & SON,

MARYVILLE, MO.

TOO LATE TO CLASSIFY.

100 EXCELLENT, LARGE-BONED POLAND CHINA SPRING PIGS

FOR SALE—A number of one and two-year-old sows and one fall yearling boar. Also my herd boar, Ideal Perfection 37754, farrowed May 2, 1904. Most of my pigs are sired by him. He was a prize winner at Iowa State Fair in 1905. I will warrant him right in every way. I will ship him on approval east or west. This is the way I ship all my stock. You don't buy a pig in a sack when you buy from me. M. P. LYDON, Cresco, Howard County, Iowa.

30 DUROC JERSEY BOARS FOR SALE.

ONE boar pig out of S. E.'s Model IX 11452 and sired by Proud Advance 23549. Others sired by Proud Advance, the sire of the first prize gilt at Des Moines this year, also sire of the second prize litter at the same show. The rest are sired by Peerless Orion and Oran, both sons of "Old Orion." Write me your want of yearlings and spring pigs or come and see them. Address,

JOHN WEIGHTON,

Audubon, Iowa.

WILLOWDALE POLAND CHINAS.

MODERATE prices for the best blood of the breed. Herd headed by Master Sunshine 72227, the first ten-month-old pig to sell for \$1,000. His dam is Grand Fashion U. S. best sow outside of Perfection family. M. S. is assisted by Eldorado 104425, a 700-lb. yearling with show ring quality. Will book sows bred by either of the above for winter trade. A most excellent lot of pigs sired by Master Sunshine, Eldorado, C. Perfection 2d, Perfection E. L., Meddler, Corrector 2d, Spellbinder, E. J. Perfection, G's Perfection and Perfect M. Write for prices. Also pure bred White Wyandotte cockerels, now ready, one dollar each. Harry R. Smith, Maynard, Iowa.

POLAND CHINA HERD BOAR

FOR SALE—A. L. Keep On 102883, a son of Perfect Keep On, has good length, fine head, is in good condition. Also some good spring boars of March and April farrow out of old dams. A few yearling Aberdeen Angus bulls from matured dams. F. T. Wells, Bristow, Iowa.

BOARS! BOARS! BOARS!

WILL offer special prices on extra good Duroc pigs if taken at once. Pigs by ten leading sires including Ohio Chief, Higgin's Model, Morrison's Bell Top and others. Write me at once. Boar sale Nov. 10th. Frank Alldritt, Friend, Neb.

FIELD NOTES.

Ohio Chief, boars are offered for sale by Mr. W. D. Pittman, of Lake City, Iowa.

Mr. M. M. Elmendorf, of Lacona, Iowa, has twenty-five Duroc Jersey boars for sale.

Good Duroc Jersey boars are offered for sale by Messrs. Clark & Tryon, of Wausa, Neb.

Tamworth boars are offered for sale by Messrs. Norrish & Bevington, of Kingsley, Iowa.

Good Duroc Jerseys boars are offered for sale by Messrs. Sheldon Bros., of Shannon City, Iowa.

Read the advertisement of Messrs. A. B. Easter & Son, of Fremont, Neb., if you want Duroc Jerseys.

Mr. Gus A. Pederson, of Ocheyedan, Iowa, is offering some extra good bargains in Duroc Jersey boars.

Some good Orion boars are offered for sale by Messrs. Manley & Co., of Lyons, Neb. They can also spare a few choice gilts and brood sows.

Mr. Austin Renshaw, of Blair, Neb., is offering some good Duroc Jersey boars for sale sired by the noted prize-winning boar, Junior Jim.

Mr. William Malcolm, of Brewster, Minn., is offering some splendid young boars for sale sired by his sweepstakes boar at the Minnesota State Fair.

Mr. August Post, of Moulton, Iowa, has over 100 head of Poland Chinas for sale. See his advertisement on page 31 and write him for prices and descriptions.

In our date claim columns this week, Mr. J. L. Barber, of Harlan, Iowa, claims January 18, 1907, as a date on which to hold a public sale of Chester White bred sows.

If any of our readers want a good Duroc Jersey boar at a reduced price they can get him of Mr. J. F. Lentz, of Earlham, Iowa. He has sold his farm and most close them out.

Mr. John C. Miller, of Harlan, Iowa, advertises thirty choice Single Comb Brown Leghorn cockerels for sale. Read his advertisement and write him at once if you are wanting this popular fowl.

Mr. F. M. Jenkins, of Pomeroy, Iowa, is offering young Duroc Jerseys of both sexes for sale. They have good color, heavy bone and good length. See his advertisement which appears on page 31 of this issue.

Mr. Albert Bell, of Lake City, Iowa, writes: "Just say to Homestead readers that I have forty good Duroc Jersey boars and they must go soon. Consequently the price will be right. Who is the first man to be pleased with both quality and price?"

Mr. J. C. Jay, of Mt. Pleasant, Iowa, is offering special prices on Duroc Jersey hogs for thirty days. He writes that he shipped 105 head last season and had only one dissatisfied customer, and that old customers buy every year, as he breeds five different strains. Try one.

In our date claim columns this week there is announced to take place at Dunlap, Iowa, on November 20th, a Duroc Jersey boar and bred sow sale; on January 12, 1907, a bred sow sale by Messrs. Hood & Baker, of Dunlap, Iowa. They also claim June 18, 1907, for a Hereford cattle sale.

Mr. O. R. Phelps, of New Sharon, Iowa, writes in regard to his recent sale of Poland China swine: "I had a very good sale, selling fifty-five head for \$970.25, including some very small late pigs. The highest price was paid by Mr. R. A. Fritz, of Grinnell, Iowa, for a sow, she selling for \$37, and eighteen head of my best brought \$454."

Messrs. W. F. Garrett & Sons and John H. Harvey & Son, of Maryville, Mo., claim January 31st for a sale of Poland China bred sows. That great son of Expansion that these gentlemen purchased at a long price will be used on many of the sows. Breeders who want the big kind that have quality should take warning. They will find them here.

Bessrs. Wm. Ray & Son, of Defiance, Iowa, write: "We have several good Poland China boars for sale sired by Dakota Chief 2d, a few by Perfection Grand and a few good Meddler boars. We also have a good yearling for sale by J.'s Perfection 37361. We are making special prices on these boars for the next thirty days and we know we can please our customers."

Four topdy yearling Shropshire rams are offered for sale by Mr. Willard Miller, of Anita, Iowa. He also has thirty or forty good ewes for sale. He is one of the best Shropshire breeders in the state and he will send out just the kind he says he will. Any of our readers who want a Shropshire ram or a few good ewes can get them of Mr. Miller if they write him at once.

Mr. F. M. Erschen, of O'Dell, Ill., breeder of Duroc Jersey hogs, in remitting for advertising, writes: "I still have some good young boars left, sired by Comet 25965, Frank's Choice 25801 and my yearling boar, Long Duke 44289, and a few by Roland 37255, for sale. Long Duke has proven to be a very good breeder." Mr. Erschen's advertisement appears on page 46 of this issue.

The coupon at the foot of our last page this week will be worth a large amount of money to you if you will fill it out and send for the 500-page catalog No. 500 of the Chicago House Wrecking Company offered free to Homestead readers. Read the full-page advertisement of this reliable house on our last page this week and send them one order and you will be sure to become a permanent customer. They buy bankrupt stocks, purchase exposition buildings and furniture, merchandise at sheriff's sales, etc., and give the farmer the benefit. Be sure and mention The Homestead when writing them.

Mr. A. Latimer Wilson, importer, of Creston, Iowa, writes us that he has sold eleven horses for \$11,000 since he came home from Europe, besides the home-bred horses sold. He claims the business is much better than last year up to date. Mr. John Larson, of Fairfield, Iowa, a director in the English Shire Record Association of America, bought one of Mr. Wilson's best two-year-old imported Shire colts, Fordy Spark 8446 (23320). Mr. Larson had been all around through the principal shows of Iowa, including the Iowa State Fair, and then went to Creston, Iowa, and bought of Mr. Wilson this colt, which is considered one of the heaviest-boned Shire

colts in the state. Mr. Wilson expects to hear from this colt in the show ring in the future.

Read the advertisement of Mr. F. H. Her-ring, of Kalona, Iowa, on page 31, if wanting to buy Duroc Jersey swine.

Mr. F. E. Garrett, breeder of Duroc Jersey swine, of Lohrville, Iowa, writes: "In your field note appearing in The Homestead October 25th, you made a mistake. I am a Wonder is a litter brother to Mr. H. A. Allen's sweepstakes hog, instead of a half brother as you have it. My show sow, Ruberta, is suckling a nice litter sired by I Am a Wonder." Mr. Garrett's advertisement appears on page 47.

Mr. W. J. S. Taylor, of Humeston, Iowa, breeder of Duroc Jersey swine, writes: "I have twenty young Duroc males of spring farrow that are of good choice color, with plenty of bone. Twelve of these are sired by Proud Advance 2d, a choice son of Proud Advance; five by Duke of Ohio 29529, and three by Geo. Hur 40851. These will be priced right. I only have a few gilts for sale." See advertisement on page 46.

Cut out the coupon in the large advertisement of the Chicago House Wrecking Company, fill it out and send for the 500-page catalog No. 500 of this reliable firm. Some of the bargains they offer this week are remarkable—furniture, machinery, roofing, gasoline engines, scales, rope, fire-proof safes, nails and many kinds of merchandise are offered to Homestead readers at remarkably low prices. Be sure and write today!

Mr. I. J. Lorton, of Union City, Ind., breeder of Duroc Jerseys, in remitting for advertising, writes: "My herd is doing fine and trade is fair. I have four extra good boars, two by I. J.'s Chief and two by Col. Perfection, that are fit to go into any company and head any herd. I will guarantee them in every respect. They have good color and bone and are very smooth, all round good ones and will be priced worth the money." See advertisement on page 46.

Mr. D. M. Norton, of Sanborn, Iowa, in renewing his advertisement for Shropshire sheep, which will be found on page 31 of this issue, writes: "We only have a very few yearling rams left, two of which we have used lightly, they being our best. In order to be able to supply our old customers rams in the future, we have concluded to offer a car load of nice young ewes for sale that we may fill their place with new blood. We do not expect to import better ones, but a change of blood is our object."

Mr. H. Fessenmeyer, of Clarinda, Iowa, known as one of the growers of the biggest Poland Chinas in southern Iowa, writes: "I have just returned from a trip to Mr. Harvey Johnson's, where I bought a half interest in Chief Tecumseh 4th, he by Chief Tecumseh 3d and out of Columbia 2d. This boar won third at Des Moines, fifth at Lincoln and second at the Interstate fair. He will be used on my brood sows for next year and I expect to show the boys some of the best stuff ever sold in southern Iowa."

In order to reduce his herd of eighty head of Double Standard Polled Durham cattle, Mr. L. L. Henningsen, of Dike, Iowa, is placing an advertisement in The Homestead this week, which will be found on page 31. Mr. Henningsen will sell a car load or any number to suit purchaser. His offering consists of cows and heifers, ten young bulls and his herd bull, Storm Lake Hamilton 232932 (2706). He is three years old and a son of the famous show bull, Young Hamilton 114169 (49). For full information see his advertisement and write, or go and visit Mr. Henningsen.

Messrs. White Bros., of Perry, Iowa, offer to trade their well-bred Pride bull for a good Blackbird bull. He is a five-year-old and is a son of the \$2,000 bull, Cranewood Black Knight, and his dam is Centerville Pride, one of the best cows in the Wm. Miller herd. Any Angus breeder who has a good Blackbird bull can make a good trade here if they write at once. He is an excellent breeder and is all right. They also have a splendid young Pride, a Trojan Erica and a Queen Mother that they wish to sell. Anyone wanting one of these should write to Messrs. White Bros. without delay.

Messrs. W. C. Wendt & Sons, of Donnellson, Iowa, breeders of Short-horn cattle, Poland China hogs and thoroughbred chickens, write: "We have some very large, growthy February and March boars and gilts which we will sell at farmers' prices if taken soon. They are large and thrifty, with good length and plenty of bone. Anyone wanting a boar or gilt will do well to write us stating what type of hog they want. We will give prices and answer any questions asked. We took every first in the Poland China division at the Lee County Fair, 1906, also sweepstakes on aged boar. Our herd is headed by Butler Perfection 83221 and Ideal U. S. 106561. Satisfaction guaranteed."

In his advertisement appearing on page 31 of this issue, Mr. Bert Fry, of Plainfield, Iowa, breeder of Poland China swine, is offering for sale thirty-five spring boars and ten fall yearlings that are high class. In writing in regard to his stock, Mr. Fry says: "They have long, deep bodies, broad backs, square, heavy quarters, fancy heads and ears, black, slick coats, with no curls, swirls or spots, and are heavy boned with short legs. They are from large litters, fifteen gilts having farrowed 110 pigs and raised 108. My old sows averaged nine pigs each. It will pay you to come and see them. Free livery to the farm. If you cannot come, write me and I will give you a close description of what you want with a price in reach of anyone."

Messrs. Norrish & Bevington, of Kingsley, Iowa, breeders of Duroc Jersey and Tamworth hogs, write as follows: "We have a number of pigs of either breed to sell at moderate prices. In aged Tamworths we have the St. Louis champion and reserve champion boar that we would let go after December 1st or an extra good yearling (Tamworth) that we could spare after November 15th. We would be glad to have anyone wanting one or more of either breed write or visit us and we will give careful description of anything wanted and guarantee pigs to fill our description. Any that do not can be returned at our expense." We can recommend the above firm to readers of The Homestead, and anyone wanting a good Duroc or a Tamworth boar will be able to get what they

want from the Cedar Lawn herd. Write them today before the best are sold and you will be pleased both with the price and the quality of the boar ordered.

On account of sickness in his family Mr. W. A. Forsyth, of Greencow, Mo., has been forced to postpone his Short-horn cattle sale to some future date.

Forty head of unbranded suckling colts from mares weighing 1,050 to 1,500 pounds, are offered for sale by Mr. A. Y. Haug, of Borine, S. D. The advertisement appears on page 31.

A public sale of Hereford cattle is announced to take place at Sioux City, Iowa, April 3, 1907, by the Stanton Breeding Farm Company, of Madison, Neb., and Messrs. Edmonds, Shade & Co., of Kingsley, Iowa.

On December 18th, at Marysville, Kan., will be held a joint breeders' sale of Short-horn cattle, with Mr. Frank P. Healy as manager. He could use a few more cattle in this sale, but wants good ones. Any breeder having a few of this kind that he wants to put into a sale will do well to write Mr. Healy at Bedford, Iowa.

Three hundred and twenty acres of nice, smooth, black, productive land, 100 miles southwest of Kansas City, is offered for sale in an advertisement on page 31 of this issue, the address of which is Box A, Eureka, Kan. It is close to town and will raise corn, wheat or alfalfa and will be traded in part or all for sound, young stallions.

Messrs. A. J. Graves & Son, of Ames, Iowa, proprietors of the College View herd of Short-horns, are offering fifteen head of cows and heifers for sale as per advertisement on page 31 of this issue. These animals either have calves at foot or are bred to the great Scotch bull, Imp. Charmer. They also have twelve young bulls ranging in age from eight to twenty months old by Imp. Kinellar Stamp for sale.

There was an announcement in last week's Homestead (October 25th, on page 4) of Dr. O. A. Johnson, 1233 Grand Ave., Kansas City, Mo. (Suite 327). Dr. Johnson is a cancer specialist and offers to send a free book, "Cancer and Its Cure," to those suffering from this most dreaded of all diseases. Dr. Johnson does not resort to the knife, but uses a mild combination treatment which, he claims, destroys the growth and drives it out of the system. Send for his booklet.

Messrs. Allen Bros., of Russell, Iowa, in sending copy for advertisement on page 31, write: "We have the finest bunch of O. I. C. boars ever raised. They are big, growly fellows, out of big litters. Alice 14539 farrowed forty-eight pigs in three litters. She has a fine bunch of September farrow that will be heard from next year. Snow Ball farrowed twelve and raised ten—six boars and four sows. Snow Ball was a winner at the state fair last year. Other sows did as well, but we can't tell about all of them." If you need a boar this fall go to Russell and inspect their stock or write them.

Why pay high prices for merchandise when the Chicago House Wrecking Company will sell you equally good goods for 30 to 50 per cent lower prices? The large advertisement of this reliable house should be read from beginning to end by every reader of The Homestead. Don't miss any part of it, for all the bargains are remarkable. You should also, by all means, write for their 500-page catalog No. 500 and study it thoroughly, as it will save you a lot of money in a year. This firm buy out exposition buildings and furniture, merchandise at sheriffs' sales, etc., and give the farmer the benefit. Be sure and mention The Homestead when writing.

The Elliott Telephone & Electric Co., of Indianapolis, Ind., are entering upon their nineteenth year as manufacturers of high-grade telephones. From 1887 to 1897 they manufactured and sold a private line 'phone, but since the Bell patents expired they have devoted their whole efforts towards perfecting a powerful 'phone, especially adapted to long distance party line work, and they furnish convincing evidence that they are putting out a most satisfactory party line instrument. We have no connection or interest in the company whatever, but to anyone expecting to purchase one or more 'phones, our advice would be to get their catalog and special introductory offer on first order. You will see their advertisement on page 2 of this issue.

Mr. H. S. Allen, of Russell, Iowa, the owner of the noted Duroc Jersey sweepstakes boar, Crimson Wonder Again, writes as follows: "I still have some big, growly, heavy-boned hogs for sale. We have a corking good boar by Top Nother Again that should go in some good herd. He will be priced well worth the money. We have some big, heavy-boned March and April boars by the third-prize boar of 1905, Leather Stockings 2d. There are boars among these for both breeder and farmer and the price will interest you. We also have three boars left sired by this year's champion, Crimson Wonder Again. One of them has for dam the old sweepstakes sow, Nell A. We will make it interesting for the man that wants one of these, as we want to clean up our boars in the next thirty days."

Mr. F. A. Murray, breeder of Polled Durham cattle, of Mazon, Ill., in furnishing copy for his advertisement found on page 31 of this issue, writes: "I wish to call the attention of your readers to the public sale of Polled Durhams and Short-horns to be held at the new fair grounds at Mazon, Ill., Wednesday, November 14th, by myself and Mr. Fred Hartford, of this place. There will be some as good pedigrees as can be found among the Short-horn families and in many cases from three to four crosses of Polled blood manifest in the Polled Durhams. The females of breeding age are mostly in calf to Brookside Knight, a bull bred on our farm and one that gets 'no horns' and several of the younger ones in the offering are by him. The cattle are principally red in color and comprise Scotch Victorias, Secrets, Violets, Orange Blossoms and other noted families. This is a draft sale of forty head and are to be sold to the highest bidder with a guarantee as breeders, so that you take no chances." The gentlemen making this sale are reliable and intend to give their customers a square deal. Address Mr. F. A. Murray, Mazon, Ill., for catalogs and arrange to attend the sale. Mazon is located about 120 miles due east of Davenport and seventy miles southwest of

Chicago on the main line of the Santa Fe railroad and branch of the Big Four. Ten passenger trains daily stop at Mazon. Good connections with all western lines. The sale will be held at 1:30, November 14th, under cover. Cols. Carey M. Jones, of Chicago, and W. V. Isham, of Mazon, auctioneers.

Mr. F. T. Wells, of Bristol, Iowa, breeder of Poland China hogs and Aberdeen Angus cattle, writes: "I have sold the boar, Midwood Perfection, and now have another herd boar, A. L. Keep On 102663, a son of Perfect Keep On, for sale. He has good length, fine head and ears, good coat of hair and stands on good feet and legs. He is in fine condition to go in a herd and do someone good. He will be priced right. The first check for \$50 gets him, and whoever does get him will get a snap, as he is a good litter getter. I also have for sale some good spring boars of March and April farrow from old dams. They are good, lengthy fellows, weighing 200 pounds. I would be pleased to hear from those wanting Poland China hogs or Aberdeen Angus hogs and will guarantee satisfaction." See advertisement on page 31.

Messrs. Hanks & Bishop, proprietors of the Pleasant Grove herd of Duroc Jersey swine, of New London, Iowa, writes: "We have three growly boar pigs sired by Top Nother Again, and out of a dam sired by Indicator that will make good herd headers for some one. These boars are as smooth as a potato, with good feet and will be priced right. We also have two by Mayor Jr., which won first in class at the Illinois State Fair last fall. The dam of these last two was by Buddy K. IV., first and sweepstakes at the Illinois State Fair in 1905 and second in class in 1906. Say, boys, these are good ones; hard to beat. We also have one by Indiana Boy and Beauty Bishop that we took first with at the Columbus Junction District Fair, with Professor Kennedy as judge, and there were over 100 red hogs on the grounds. He will go to the first man that sends \$40. We guarantee all stock as represented." See advertisement on page 47.

Mr. J. C. Webber, proprietor of the Westview Poultry and Stock Farm, of Montezuma, Iowa, writes us as follows: "I wish to remind Homestead readers that I have some of the very best yearling and spring Chester White boars for sale that they can get, and my prices are right for the quality I am offering. My yearlings will crate 350 pounds and my spring pigs 250 pounds. They have not been fed for the show ring, but have been kept in good, thrifty and healthy condition which is sure to make them more prolific and fit for service. My sale stock are all sired by old stock, both sires and dams, which is another good feature for breeding stock. I will ship C. O. D. with bank references. The following is one of the many letters I receive from my customers: 'We enclose herewith a draft for \$25 which is for the credit of John J. Wolber for the boar pig which he received today. Mr. Wolber requests me to advise you that he is well pleased with the animal.—W. S. Arthurs, Cash, Dillenbeck Banking Company, Bouton, Iowa, Oct. 9, 1906.' See advertisement on page 44."

Mr. A. L. Mossman, of Radcliffe, Iowa, breeder of Duroc Jersey swine, whose advertisement will be found on page 47 of this issue of The Homestead, writes: "I desire to call the attention of the breeders of Duroc Jerseys to the fact that I have at this date (the 25th of October) forty spring boars, weighing from 150 to 250 pounds and, without fear of contradiction, I believe they are the equal of any in the state of Iowa, or any other state, for quality, size, bone, neatness of head and ears, spring of rib, arched backs, good feet, and all points making a good all round hog. I have quite a number sired by Tientsin 17261, the sire of Ruberta, the first-prize junior yearling at the Iowa State Fair, 1906. I have others sired by A. L.'s Chief 43327, the great, big 700-pound yearling. These pigs are smooth and mellow. I still have two Ohio Chief dandies, both recorded, dam Queen Beatrice 80658, one of the best daughters of old Crimson Wonder. Now I stand by any description or statement made about my hogs by myself. Homestead readers are invited to come and see and be convinced, or write for guaranteed description. Prices within the reach of all."

Mr. A. C. Lanham, of Battle Creek, Iowa, the hustling young Poland China breeder, writes: "We have decided to sell Onward 106001 by Keep On, dam Joyful by Frazier's U. S. He was in the second-prize litter that Mr. Carey exhibited at Des Moines two years ago. He is one of the biggest and heaviest-boned ones of the bunch. He will weigh now in thin flesh 500 pounds and could carry 150 pounds more with ease. He is a breeder of large litters and I would like to see the Keep On hog that puts more bone on his pigs than Onward does. We had five sows that farrowed fifty pigs this fall (all by Onward) and a heavier-boned, better-colored lot I never saw. We will guarantee him in every way and will sell him outright or sell half interest and buyer can have him now. Our pigs are doing nicely and we have some very good gilts for sale. They are sired by several different boars, but the best are by L.'s Sunshine. He is coming down in fine shape and I never saw a more active hog for his size. Parties that wrote us last year for sows bred to him but got in too late are having us book their orders now. To show you our stuff sells on sight, we haven't missed selling to hut one party that came to buy. We have sold twenty-five so far."

Messrs. Taylor & Jones, importers and breeders of Percheron, Shire, Belgian and Coach horses and Short-horn cattle, at Williamsville, Ill., write: "We are pleased to say that since we began doing a 'strictly barn business' our sales have been more numerous than ever. Recently we have sold two two-year-old imported Percheron stallions to Mr. D. A. Robinson, Jr., of Hamilton, Ill., an aged Shire stallion to Messrs. Henry H. Miller & Son, of Huntington, Ind.; two Percheron fillies and an imported Percheron stallion to Mr. Melvin Workman, of Loami, Ill.; a span of imported Shire mares to Mr. Curtis C. Neal, of Allerton, Ill.; an American-bred two-year-old Percheron stallion to Mr. John P. Pershio, of Kansas, Ill.; another one to Mr. Mark Cone, of Galesburg, Ill.; an imported Shire stallion to Messrs. Tendick Bros., of Mt. Pulaski, Ill.; two imported Shire stallions to Messrs. Albert Zwicker & Sons, of Preemption, Ill.; one span of Percheron mares to Prof. F. B. Mumford, of Columbia, Mo., for the state university

at that place, to be used as a sample team; one Percheron stallion to Mr. Joe Myers, of Croft, Ill.; one imported Percheron stallion to Mr. Wiley Jones, of Lincoln, Ill., and one Percheron stallion to the Tremont Horse Company, of Tremont, Ill."

A very desirable stock and grain farm consisting of 380 acres in Montgomery county, Mo., near the new town of Bellflower on the Burlington road, and eighty-five miles from St. Louis, is offered for sale in the advertisement of Mr. L. D. Mudd, of Montgomery City, Mo., which appears on page 14 of this issue. Eighty acres of this land are in bluegrass pasture, sixty acres in new meadow, seventy acres sown to wheat, and all is fenced except forty acres of timber and coal land. Three hundred and twenty acres of this farm are good prairie land in a high state of cultivation. For information as to other improvements see the advertisement. Mr. Mudd also has a 308-acre, first-class stock farm which he is offering for sale in the same advertisement, located in Audrain county, Mo., about ten miles from the Wabash and Chicago & Alton railroads, and eight miles from the Burlington railroad. Two hundred and eight acres of this farm are prairie land, sixty acres being somewhat broken and in blue grass pasture, with some timber. Forty acres is good bottom land, mostly in blue grass pasture. It is all first class and subdivided into seven fields. The prices per acre on these farms is considered very low and made for quick sale, and will not hold good after the first day of February, 1907. Mr. Mudd is the owner of these farms and in dealing with him the purchaser will save the agent's commission.

On December 20th, at Audubon, Iowa, Messrs. J. C. Hardman, Braxton, Iowa; J. A. Harris & Son, Atlantic, Iowa; W. D. Pratt, Braxton, Iowa; John Jenkins, Braxton, Iowa, and H. P. Bonnesen, Audubon, Iowa, will make a public sale of Short-horn cattle at the above place. This will be a strictly breeders' sale, and only the best cattle have been picked for the event. Mr. Hardman will sell his Scotch herd bull, Improver 192264, a son of Imp. Golden Drop Victor and out of Imp. Countess of Aberdeen. He is a grandly-bred Scotch bull and an excellent breeder. He also sells two young Scotch bulls and an imported cow. The latter is Mayflower of Pine Grove and is a daughter of Scottish Minstrel and out of Mayflower 15th by Royal Gloster. She is a grand good Scotch cow, a splendid individual and an excellent breeder. Messrs. J. A. Harris & Son will sell about ten head from their herd, among which will be an excellent Queen of Beauty bull. Mr. W. D. Pratt will sell two splendid yearling Scotch bulls sired by Victoria Prince 3d, the sire of his \$500 bull calf at the Thurman closing out sale. Mr. H. P. Bonnesen, of Audubon, Iowa, will contribute about twenty head from his herd and Mr. John Jenkins will sell three young Scotch bulls and two well-bred cows, one of which will have bull calf at foot. Those who may want Scotch bulls to head their herd had better mark down the sale as one of the places where they can be had. Notice of the entire offering will appear in The Homestead in due time.

CARL HANSEN'S DUROC JERSEY BOARS. Anyone wanting a good Duroc Jersey boar at a reasonable price should correspond with Mr. Carl Hansen, of Herman, Neb., at once. He offers for sale a choice lot of boars sired by Bar None, Bar None 2d and Critic's Echo, out of Gold Dust Jim, Surprise and Glendale Chief sows, and they are good ones.

CORRECTION.

In an item under the illustration of David Harum that appeared on page 12 of The Homestead in our issue of October 25th, we stated that the forthcoming sale of Mr. Geo. A. Heyl, of Washington, Ill., would be on Wednesday, November 7th. In this we were in error. It should be on Thursday, November 8th.

NORTON'S CRUICKSHANK BULLS.

We desire to call the attention of Short-horn men to the advertisement of Mr. C. C. Norton, of Corning, Iowa. Without fear of contradiction we unhesitatingly say that he has three of the best young Cruickshank bulls in America. If any of our readers are looking for a bull of this kind to head their herd it will pay them to go and see the two-year-old bull, Sultan, or several others that he has for sale.

A DUROC JERSEY HERD HEADER.

On page 31 will be found the Duroc Jersey advertisement of Mr. John Weighton, of Audubon, Iowa, who offers to sell a spring boar sired by the great Proud Advance and out of the noted sow, S. E.'s Model. This was the sow that topped the greatest sows sold \$1,075 and was one of the greatest sows sold last year. He is a herd header for some body. He also has a number of boar pigs by Proud Advance, the sire of the first-prize gilt and the second-prize litter at the last Iowa State Fair. Write Mr. Weighton at once, as he has some good ones.

HERD OF RED POLLED CATTLE FOR SALE.

Mr. W. D. McTavish, of Coggon, Iowa, in order to make room for his very large herd of English Berkshires, is offering for sale his entire herd of Red Polled cattle, numbering some fifty head, including twenty or more cows now giving milk, his herd bull, together with all younger stock of this famous dairy breed that is now on his Chapel Hill farm. Mr. McTavish is in a position to make very attractive prices, quality of stock considered, on this entire herd or any portion thereof. His announcement appears in The Homestead on page 44.

THE YOUTH'S COMPANION.

No doubt most of our readers keep this paper on file for a few weeks at least. We desire to call attention to an advertisement which appeared on page 20 of the October 18th issue. Reference is made to the advertisement of the Youth's Companion, of Boston, Mass. In addition to the editorial page of the Companion, the children's page, the notes on science, the weekly articles on hygiene and emergency treatment, there are 250 excellent stories published during the year and 2,000—what is called—one-minute stories. There is as much good reading in the Youth's Companion in one year as could be put in twenty volumes of 400 pages each. An exceedingly liberal proposition is made in the

Any lamp—no matter how good—is handicapped if it hasn't the proper chimney.

My business is manufacturing lamp-chimneys that fit perfectly—of clean, clear glass that won't break from heat.

My name—MACBETH—goes on every one.

My Index tells of lamps and their chimneys, fully and interestingly. Let me send it to you—it's free.

Address, MACBETH, Pittsburgh.

advertisement referred to. It will be noticed that for \$1.75 the Youth's Companion will be sent for fifty-two weeks during 1907 and also during the remaining weeks of 1906. If your subscription starts now you will receive the Thanksgiving, Christmas and New Year's double number and the Companion's twelve-color, four-leaf, hanging calendar for 1907. This is an unusually liberal offer and those who are now planning out their reading for another year should send for a sample copy and the illustrated announcement for 1907. Address The Youth's Companion, Boston, Mass.

THE LUMBER TRUST BURSTED.

The above caption is not absolutely literal, but serves as a reminder to farmers who have any cottonwood trees, maple or natural timber that they can get from under the clutches of the lumber trust and avoid paying \$35 a thousand feet by writing the Cedar Rapids Manufacturing & Supply Co., at Cedar Rapids, Iowa, and getting their low price on an American saw mill, which can be operated with any ordinary traction engine such as is found in every farming community in the commonwealth. Usually the native lumber can be sawed at a cost of \$5 per thousand feet when the logs are delivered at the mill. This is the solution of the present tremendous high prices for lumber.

A FEW CATTLE NEEDED FOR SALE.

On December 11th, at Omaha, Neb., Mr. O. M. Healy, of Bedford, Iowa, will sell a draft of fifty head of Short-horns from his well-known herd. His offering will be composed of a strictly pure Bates lot of cattle of Oxford Duchess, Airdrie Duchess, Barrington and other noted Bates tribes. Those who are looking for the dual-purpose and milking strains of Short-horns will find what they want in his sale. Mr. Healy would be glad to hear from some good breeder who desires to sell a good bunch of cattle, as he would rather not sell quite so many from his herd. If some good reliable breeder would like to consign some cattle to this sale they should write Mr. Healy at once. His offering will be made up of a splendid lot of milking Short-horns and he is contributing some of the very best cattle he has to this sale.

LARGE-BONED POLAND CHINAS FOR SALE.

An advertisement that will appeal to those readers of The Homestead who are in search of good Poland Chinas will be found on page 31 of this issue in which Mr. M. T. Lydon, of Cresco, Iowa, is offering 100 excellent spring pigs for sale. He has also a number of one and two-year-old sows and one fall yearling boar that he wishes to dispose of. Most of the spring pigs are sired by his herd boar, Ideal Perfection 37754, farrowed May 2, 1904, which is also for sale. Ideal Perfection was a prize winner at the Iowa State Fair in 1905 and Mr. Lydon will warrant him right in every way. As an evidence that he is offering to our readers first-class stock he will ship his herd boar on approval, either east or west; in fact this is the manner in which he ships all his stock, and parties buying of him need not fear that they will not get just what they pay for.

HEAVY-WEIGHT BERKSHIRES.

All farmers who are in the business of pork production realize that the more weight that can be attained in their hogs at the earliest possible age of maturity yields to them the greatest amount of profit. There is probably no hog of the Martin breeds that yields so great a margin of profit as the Large English Berkshire where he has been bred on common sense lines and passed through the hands of such careful, methodical and judicious breeders as Mr. W. D. McTavish, of Coggon, Iowa. Mr. McTavish has the Gentry strain of Berkshires. In fact, he has the table-back sort with great depth of body, good hams, excellent feet and legs, possessed of great length and carrying short, broad, dish faces. Mr. McTavish has been having an exceptional trade on his Berkshire boar pigs this season to Homestead readers. He still has a goodly number of the later pigs, such as April, May and June farrow, for sale.

GLASER'S POLLED DURHAM AND POLAND CHINA SALE.

On Thursday, November 15th, Mr. J. C. Glaser, of Avon, Ill., will offer for sale forty-five head of Double Standard Polled Durhams and forty head of Poland China hogs of rich breeding and individuality. The Polled Durhams represent the best families of the breed. Eleven of the cows are well along in calf, seven cows with calf at foot, one of the cows having twin heifer calves, and the majority of the cows are bred again. There are a number of choice bulls consigned to the sale, including the herd bull, Bell Boy, sired by Golden Hero, the champion Polled Durham bull at the World's Fair at St. Louis. Mr. Glaser is also offering his farm for sale and we quote from catalog regarding it as follows: "I will also offer my farms for sale if not sold before. One hundred and twenty acres in a high state of cultivation, three barns, two double corn cribs with driveways, granary that will hold 3,000 bushels of grain, stock sheds and fair-banks scales, concrete floor 16x24 for feed-

ing hogs, water piped to all the yards and in the barns from large storage tank, also concrete hydrant boxes. One hundred acres one-fourth mile east of the 120 acres. This 100 acres is fenced in five twenty-acre fields. Three of these fields are in blue grass with running water that never freezes or goes dry; forty acres in corn this year. This 220 acres is an ideal stock and grain farm. Terms made known on day of sale." See advertisement on page 36 of this issue and write for catalog, mentioning The Homestead.

H. R. SMITH'S POLAND CHINAS.

Mr. Harry R. Smith, of Maynard, Iowa, starts a new Poland China advertisement in this issue. He can show as nice a lot of Polands as the best of them. His four-year-old herd boar, Master Sunshine 72227, is one of the best outcrosses of the Perfection family. At eighteen months he fitted to 600 pounds. He has a fancy head and ear, a strong, wide back and a splendid ham, and is as vigorous as a two-year-old. His dam produced E. L. Perfection, which Mr. J. C. Hanna has just sold a half interest in for \$2,500. Eldorado is the second herd boar. He was fitted for the Iowa State Fair, but stable room could not be procured. However, he was first at Fayette County Fair over the fourth prize at Des Moines this fall. His pigs are young, but very promising, as is all of the young stock. The herd sows are exceptional individuals and have fancy, vigorous litters that will pay investigation. Write for prices. You can be assured of excellent treatment. Look up the advertisement on page 31 and please mention The Homestead.

CROWNOVER'S POLAND CHINA SALE.

A noteworthy sale of Poland Chinas will be held by Mr. Wm. Crownover, at Waterloo, Iowa, November 13, 1906. While the farm is located at Hudson near by, the unexcelled advantages for railroad and hotel accommodations at Waterloo will be appreciated by all. Those who attended the sale last year will need no urging to return. The offering is still better this time. Max 99039, the herd boar, sired by Maximum 83037, he by Perfect Chief by Chief Perfection 2d 42459, is a strong individual. His extra strong back, deep full hams and nice bone is well pronounced in his offspring, which consists of a grand lot of young boars and gilts. The smaller part of the male offering is sired by C's Perfection. A few of the boars are ready for service now. Some in the sale are June pigs, but are growthy fellows, both plain and fancy patterns, so that no one need be afraid of not being able to make a selection. The female offering is excellent. Some have proven their breeding qualities with two strong litters, so that they may not be in high condition for the sale. They will make excellent producers for anyone and should be taken as fast as offered. They are sired by Model R. 2d 70187. Some by Improver 84079, grandson of Nemo L's Dude, also by C's Perfection, a grandson of Chief Perfection 2d, a prize winner at Des Moines in 1904. The young sows are of late farrow, but there are only a few that will not be ready for January breeding. They are good stuff for show or breeding purposes. Every-

thing is guaranteed right. All sows are open and arrangements can be made with Mr. Crownover to have them bred to either of his two boars for a small consideration, shipped when safe. Send for a catalog and be sure and attend. There will be something for everyone. Please mention The Homestead when you write.

OF VALUE TO HORSEMEN.

Do you turn your horses out for the winter? If so, we want to call your attention to a very important matter. Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gombault's Caustic Balsam applied as per directions, just as you are turning the horse out, will be of great benefit, and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care nor attention, but does its work well and at a time when the horse is having a rest. Of course it can be used with equal success while horses are in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder.

LAST CALL FOR THE STEWARD & HUTCHISON SALE OF HEREFORDS.

The sale of Herefords to be held at the farm of Messrs. Steward & Hutchison near Bolckow, Mo., next Wednesday, November 7th, should not be forgotten by all lovers of the "whiteface," as this is practically a dispersion, and the best that the late John Steward and William Hutchison have spent years in breeding will go to the highest bidder. Few, if any, herds were better thought of, had produced more good things, or used more fashionable blood lines in producing them than did Messrs. Steward & Hutchison. Their years of experience before embarking in the business placed them in position to know what was necessary in founding such a herd, and they bought the best only. To these they added from time to time, bred many good ones and improved their herd to such a point that it became known wherever Hereford cattle were known. Their record in the show rings of America made their cattle famous, and the cattle that did the winning are to be sold. In last week's field notes mention was made of several, and we now call attention to a few more plums that go in the sale. Mapleton Bell, listed as Lot 47, is a double Beau Brummell, and a full sister to Mapleton, the first-prize bull calf and junior champion at the St. Louis World's Fair. She is a promising yearling and will make a great cow. My Queen, listed as Lot 26, is a two-year-old daughter of Beaumont and Tempter's Queen that should be appreciated. She promises much and should make a show cow. The three-year-old cow, Mayflower, listed as Lot 46, is a daughter of Beaumont that was shown for three years, never standing lower than third. She should please some critical buyer. Pris-

cilla 5th, a Lamplighter cow and the dam of the yearling show bull, Parsifal, that goes in the sale, will be found a valuable breeding cow. She sells with helper calf at foot by Beaumont and is again well along in calf to his service. There are many other good things that much might be said about and the man who wants a high-class cow or heifer to add to his herd or to fill in his show herd should not miss the sale. In bulls the offering is very strong. The show bull, Parsifal, should go to head some good herd; the yearling, Beaumont Jr., a double Beau Brummell, will be found a high-class fellow. Then there comes from the herd of Messrs. Van Natta & Son seven sons of that great sire, Prime Lad, all good ones. The advertising will be found on page 40. Send for a catalog and arrange to attend the sale.

PROMINENT SALE OF SHORT-HORNS IN SOUTHERN IOWA.

On November 15th, at the town of Milton, Iowa, will occur a prominent sale of Short-horn cattle. The sale will be held on the Hon. E. C. Holland's farm, within the corporate limits of the town. Mr. Holland finds himself somewhat long on his cattle interests and has associated with him in a sale Dr. Guernsey and Messrs. Sample & Sample, all three being well-known breeders who have been using some of the most approved Short-horn blood known to the breed. For many years Mr. Holland has been one of the wheel horses in Short-horn circles. In fact, some of the best imported Scotch bulls that have ever done service in Iowa have worked for Mr. Holland. It has been but a few years since Dr. Sample made a very important public sale of Short-horns, which attracted the attention of breeders from a half dozen states. So good a judge as the later Martin Flynn was a purchaser at Dr. Guernsey's sale and paid him the compliment of saying that some of the best cows in all of his acquaintance were sold at this time. In this forthcoming sale Messrs. Sample & Sample are contributing their present herd bull, which is conceded one of the choice breeding bulls of the country. They also list five splendid, tried cows, all safe in calf. Mr. Holland sells twelve females and eight bulls. The offering all told is one that should attract farmers and breeders of southern Iowa and northern Missouri for a considerable distance. We have not the catalog at hand from which to enter into detail, but would have a word concerning Mr. Holland's present herd bull, Prince Charles 166137. He is a massive Scotch bull and looks to be a very impressive sire. He was sired by Imp. Prince Louis. His breeding is not only royal, but individually he is a bull that commands attention from any lover of Short-horns. A splendid young roan bull will be offered, called Royal Fame, sired by Secret Scotchman. This is a Scotch Orange Blossom bull that will bear the closest inspection. Another good Scotch bull is Orange Count, a beautiful red, sired by Golden Crown. So enterprising has been Mr. Holland in the Short-horn business that

he sent some of his best imported cows to Professor Curtiss at the Iowa Agricultural College and had them mated with Imp. Scotland's Crown, as long as that great bull was in service at Ames. The fifteen head of cattle offered by Dr. Guernsey are practically all young things with their future ahead of them. Nine, at least, are long, two-year-old heifers, bred. In future issue we hope to be able to enter more into detail concerning the high quality of breeding that we know to exist in these cattle, but at present writing the catalog has not reached us. However, by the time this article is read by Homestead readers the catalogs will be ready for distribution and can be had by applying to Mr. E. C. Holland, of Milton, Iowa.

STANSELL & MATERN'S DUROC SALE.

The writer representing The Homestead has had an opportunity during recent weeks to inspect the Duroc Jersey herds of Messrs. Stansell & Matern, of McNabb, Ill. For uniformity in type, color and conformation it would be hard to find a better bunch of pigs. These herds have been kept up by the addition of the best blood to be found and in their herd boars, Chief of All and Kan't Bee, are two of as good breeding hogs as are seldom found in any one herd. Chief of All was got by Ohio Boy, he by Ohio Chief. He is large, smooth, with nicely-tipped ear and very strong arched back and stands on the best of feet and legs. He is an excellent sire, as the bulk of the offering is made up of his progeny. Kan't Bee is a very fine yearling boar. He was sired by the noted show and breeding boar, Kan't Be Beat, and his dam was Queen Ruby by Top Notcher. He has proven himself a good breeder and a number of his get have been included in the sale. A yearling gilt farrowed October 12, 1905, by Dandy Joe, he by None Such, the sire of Hanley, dam Daisy Muller by Pathfinder, is a show sow in every particular and should be looked after by some breeder in need of a gilt to top his brood sow sale with, or who wishes to make a valuable addition to his herd. Three yearling boars sired by Tom Wilkes, he by Exchange, are fit to head good herds and the breeder in search of a herd boar should not fail to be present sale day. The spring pigs are a very uniform, growthy bunch and will certainly please those in the market for good breeding stock. In our next issue we will have more to say regarding this offering, but would advise our readers to write for catalog at once, kindly mentioning The Homestead, as per advertisement on page 35 of this issue. Bids sent to Mr. D. M. Pierce representing this paper will be properly handled.

IOWA MONUMENT DEDICATION.

On certain dates in November the Chicago Great Western Railway will sell round trip tickets to Vicksburg, Miss., Chattanooga, Tenn., Andersonville, Ga., Johnsonville, Tenn., Perryville, Tenn., Selmer, Tenn., Danville, Tenn., Corinth, Miss., and Shiloh Battlefield at very reduced rates. For complete information call on or address E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Prize Winning Group of Five Shire Stallions, winning first at Illinois State Fair, 1906, owned by Robert Burgess & Son, Wenona, Ill.

Whitehall Combination Duroc Sale.

One of the most noted Duroc Jersey sales of the year will be that of the Whitehall Combination Sale Company, of Yellow Springs, Ohio, which will be held at the breeding farm of Mr. E. S. Kelley. This company is composed of the following well-known Duroc breeders from Ohio: Mr. S. E. Morton, and Stewart Bros., of Camden, Ohio; E. S. Kelley, C. E. Speaks, G. H. Fogg, and G. D. Black, of Yellow Springs, Ohio. On the day of sale there will be on exhibition at Whitehall farm eleven herd boars, the property of the above-named consignors. They are C. E.'s Col., a grandson of Ohio Chief; Whitehall Model, son of C. E.'s Col.; King of Cols., son of Prince of Cols.; Buckeye Red, son of C. E.'s Col.; Bellville's Model, sire Winchester Chief; Star Chief, son of Ohio Chief; Whitehall King, son of King of Kings; Sound Money, son of Sundell's Fancy; Advancer 2d, son of Advancer. It is doubtful if such an array of herd boars, representing as they do, some of the most fashionable families of the breed were ever seen on one farm. They are individually of the same good type and show-yard conformation which have made the Durocs of the East in such strong demand throughout the middle West. At this time it is well to call attention to the noted herd boars that have come from Ohio to Iowa, Nebraska, Illinois, Missouri and Kansas. Ohio Chief has been one of the best sires the breed has ever produced and his present owners, Messrs. Harding & Osborne, would not part with him. Kan't Be Beat now heads the herd of Messrs. Morrison & Sons, and the recent record-breaking average on fall sales proves the worth of this good sire. Tip Top Notcher, grand champion boar at World's Fair, was farrowed in Ohio, and has long ago established his right to be counted among the foremost Duroc boars of the breed, many of his get having won at the more important fairs of this country. Messrs. Thomas & Hogsett, of Golden, Ill., and Fagan, Brown, Hess & McCabe, of Hersman, Ill., were fortunate in securing this wonderful herd header at \$5,000. Model Chief, son of Ohio Chief, was owned by Mr. J. Coy Roach, who secured him from Ohio and later sold him to Messrs. C. W. and William Reed, of Rose Hill, Iowa. For them he sired the first-prize boar pig under six months at the Iowa State Fair this year. Model Chief Again, a son of Model Chief, heads the good herd of Mr. Grant Chapin, of Greene, Kan. Winchester Chief went to head the herd of Mr. Weedin, of Missouri. Fogg's Col. was selected by Mr. Roberts, of Paton, Iowa, to head his good herd. There are other boars in the West that have come from the Ohio herds that are proving valuable sires. The get of the first boars mentioned makes up the sale consignment to be offered at this time. Two April gilts by Whitehall King and out of Whitehall Pearl by C. E.'s Col. are of the best sows ever owned by Mr. Speaks, will attract the attention of the progressive breeder who is looking for something to top the winter brood sow sale. A March 15th gilt by The Chief by Ohio Chief is consigned by Mr. Morton, who says: "This is as fine a gilt as will enter any sale ring this year and her breeding is right." An April 23d boar by Ohio Chief is one of the sort which make herd headers. These should not be overlooked by anyone in search of an Ohio Chief boar. Five fall gilts from the herd of Messrs. Stewart Bros., of Camden, Ohio, are of October 9th farrow. They are sired by King Allison by Forty Kings and are out of Nellie S. by Ohio Chief. Three boars and one sow by Model Chief Again by Model Chief are considered the best litter ever farrowed at Whitehall, and will suit the most discriminating buyers. Three sows by Whitehall Model and out of Emma B. by Ohio Chief are certainly very fancy gilts that will do to go in any company. Four fall sows (Dewdrop Maid II., III., IV., V.), should suit the breeder who expects to hold a brood sow sale. They are by C. E.'s Col. and out of Dewdrop Girl by Model Chief. Two Model Chief Again boars will suit those looking for herd headers. They are Nos. 34 and 35 of the catalog. A choice boar pig is included by Messrs. Stewart Bros. in No. 38. This boar is sired by The Chief by Ohio Chief, and will make a herd boar for someone. A boar by King of Cols. and out of O. C.'s Variety, she by Ohio Chief, will make someone an extra good herd header. Nellie M. II., by Model Chief Again, is one of the best gilts the writer has seen this year. She should go to some good herd. Augusta II. by Beat Him If You Can, he by Kan't Be Beat, is another of the five gilts. Golden Model by Golden Rule and out of Cedar Vale Model by Model Chief is another of show-yard type and conformation. Ruby II., III., IV., are three extra good spring sows by Model Chief Again. Their dam was by C. E.'s Col. and they are very fine in every way. Pauline, a March gilt by Yellow Springs Best, is one of the toppest gilts of the sale. She should go with some good herd. The catalogs are now out and should be in the hands of every breeder. This is one of the richest-bred and most-uniform lot of Durocs to go under the hammer this season, and western breeders who want something extra fine will do well to be present sale day. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Send all bids to him in care of Whitehall farm, Yellow Springs, Ohio. Look up advertisement on page 42 of this issue.

The Prather Dispersion.

In our issue of last week we called attention to some of the bulls included in the closing out sale of the Short-horn herd owned by the S. E. Prather Company, at the Illinois State Fair grounds, Springfield, Ill., on Monday of next week. This is one of the most important sales of the year, as breeders will have an opportunity to secure at their own figures Short-horns that have been selected and kept with a view to permanent service. The herd bulls have always been the best money could buy, while the females represent the best families the breed affords, both as producers and for their milking qualities. We wish to direct the attention of our readers to the females included in the offering. Among the attractions of the offering is the Cruickshank Secret cow, Sibyl by Imp.

Banker. In both breeding and individuality this cow would suit the most discriminating buyer. She has been a wonderful producer, three of her calves being included in the offering—Pride of Riverdale, a yearling bull of unusual merit; Sibyl of Riverdale, a fine two-year-old heifer of show-yard quality, and Highlander 2d, a very good son of Highland Champion. Those two bulls and the heifer out of Sibyl are ample proof of her producing qualities. She is safe in calf since July to service of Highland Champion. Imp. Vanity is another of the attractive individuals of the sale. She has been a good producer and a show heifer as well, having been shown throughout the season of 1901 by Mr. E. W. Bowen and was placed above Queen of Beauty that season. A bull and a heifer calf out of Vanity are included in the offering and Vanity is safe in calf to Highland Champion. Orange Blossom Queen 2d is a daughter of Imp. Sovereign and is a typical Short-horn cow in every respect. A very fine heifer calf out of this cow sold in the June sale. Miss Ramsden 14th is by Knight of the Thistle and has proven herself both a good producer and a good mother. A remarkably good bull calf out of this cow is included in the offering. He is called Highlander and is a son of Highland Champion. A nicely-made Scotch heifer is found in Rustic Maid. She is by Baron Goldmuck 3d, the son of Baron Gloster that did much good in the herd of Mr. J. W. Dawdy. Anoka Strathallan A. is a daughter of the noted son of Whitehall Sultan, Whitehall King. This heifer is an exceptionally good one and will do well in some good herd. Princess of Riverdale 2d is a good Scotch heifer, the daughter of Imp. Archer's Prince. Roan Lady of Riverdale is a fine Scotch heifer by Pride of the Realm, the only daughter of this noted bull in the sale. Verona 4th is another richly-bred Scotch cow and sells with heifer at foot. Mildred 12th is a richly-bred Scotch cow, the same breeding as Pine Grove Mildred 3d, which topped the Short-horn sale of Col. F. O. Loudon at \$1,050. There are a number of very useful cattle in the sale, many of them bred to Highland Champion. Every animal cataloged will be sold, not a single animal having been offered for sale which had not been cataloged. Write for catalog, kindly mentioning The Homestead as per advertisement on page 39.

Johnson's Duroc Jersey Sale.

One of the best Duroc herds in America is owned by Mr. Thos. Johnson, of Columbus, Ohio. The foundation stock was selected from such well-known herds as that of Messrs. Watt & Foust, S. E. Morton, E. S. Kelley, C. E. Speaks, Puckett & Grinnell, J. D. Nidlinger and others of equal note. The offering consists of fifty-five head of richly-bred Durocs. Among the special features are pigs from Wilda 36584 by prize-winner Corrector 9739 (A.), 15653 (N.). She is a great show and prize-winning sow bought of Mr. J. D. Nidlinger, October, 1905. Speaks' Pearl 37848, the fine sow which topped the sale at Yellow Springs, Ohio, February, 1906. Bred to Whitehall King 15977 (A.), 42939 (N.). Useful Lady F. 33942, a great sow sired by Top Notcher 8803, dam Useful Queen 24270, bred to Proud Fancy 11331. Also pigs from other fine bred sows sired by boars of best individuality and breeding, as follows: Sensation Top Notcher 15629 (A.), 42937 (N.), Such Goods 15093, Challenger 12893, Ben Franklin 15095. As a special attraction will be fifteen young sows, farrowed October, November and December, 1905, bred and guaranteed to be safe in pig to King Fall 17221, first in class and champion at Carthage, Ohio; first in class at Ohio State Fair, no champion ribbon offered; first in class, champion and grand champion at Syracuse, N. Y.; first in class and champion at Lexington, Ky. All in 1906. A representative of The Homestead recently inspected this offering and is pleased to recommend it to our readers who are in the market for extra breeding stock. Bids sent to Mr. D. M. Pierce, representing The Homestead, in care of Mr. Thomas Johnson, Spahr Building, Columbus, Ohio, will be properly handled. This sale will be held at the farm one and one-half miles west of Columbus, Ohio, on the London and Springfield interurban line. Plan to be present if in search of good breeding stock. Kindly mention The Homestead when writing, as per the announcement on page 42 of this issue.

Herd Boars in J. H. Harvey & Son's Poland China Sale.

On November 17th, at Maryville, Mo., Messrs. J. H. Harvey & Son, of Maryville, Mo., will make a sale of sixty head of Poland China boars and sows. Messrs. Harvey & Son have bred Poland Chinas for a number of years, raising the practical kind that have size and quality. In blood lines Messrs. Harvey & Son have been careful to select only such breeding as is noted for the production of good hogs and for this sale they have selected such a lot of siff as should meet with approval at the hands of both breeders and farmers. Of the sixty-one head listed for the sale thirty-three are boars, twenty-eight are big, growthy spring gilts. Tecumseh strains predominate, but these gentlemen have never gone in for fancies and fads. They have bought the individual if backed by ancestors that were known to be good, no matter what the family might be. Among the herd header propositions they will sell are three sons of the great show and breeding boar, Nemo L's Dude, that has made such a great record in the northern shows at Des Moines, Iowa, and Lincoln, Neb. The dam of these three boars is Lady Perfection, bred by Mr. Jno. Bollin, of Leavenworth, Kan. She was got by Mr. Bollin's great boar, Black Perfection, he by Sydnor's Chief by Mo's Black Chief. Her dam, Lady Corwin 2d, was got by the great Corwin I Know by Chief I Know. A better-bred sow would be hard to find. She is one of the great brood sows of the breed and her three sons that go in the sale should be appreciated. Eight yearling, five fall boars and twenty-two spring boars of other breeding are listed. These are of different breeding, some being by G's Perfection, others by Lee's Improver. The sows are all of spring farrow and are well grown and the man hunting Poland Chinas that will prove money makers should not fail to attend Messrs. Harvey & Son's sale. See page 31 for advertisement and write them at once for a catalog.

STANSELL & MATERN'S

DUROC

SALE

Sale of Short-horn and Polled Durham Cattle

ALSO POLAND CHINA HOGS.

TO BE SOLD AT SCOTLAND VALE STOCK FARM, NOVEMBER 15, 1904. SIX MILES SOUTHEAST OF SOUTH ENGLISH AND SEVEN MILES NORTHWEST OF KEOTA, IOWA.

The offering consists of 26 Short-horns, 8 bulls and 18 cows and heifers, and 25 Polled Durhams, 5 bulls and 20 cows and heifers, of as well-bred a lot of stuff as will go into any sale. Animals of high individual merit, including 5 head of the well-known Short-horn show herd of L. W. Barnhart. In the Short-horn offering is included Imp. Dora 3d and other pure Scotch cattle, such as Golden Rule and Golden Rule 2d, sired by Imp. Golden Fame and out of Imp. Ruby 32d, and Scottish Myrtle out of imported sire and dam, and other nicely Scotch-topped cattle. Many of the cows have calf at foot, others safe in calf. The Short-horns are contributed by L. W. Barnhart, South English, Iowa, and M. Yoakim, Webster, Iowa. In the Polled Durham offering are two as well-bred Scotch bulls as the breed contains, Scottish Areher by Prince of Pallas and out of Imp. Ruby 32d. Claudius by Ottawa Gauntlet and out of Imp. Claudia 4th. Dora of Sittytown by Prince of Pallas and out of Imp. Dora 3d, and others of high individual merit and good breeding. Polled Durhams contributed by S. B. Wenger, South English, Iowa; T. S. Gore, South English, Iowa, and M. Yoakim, Webster, Iowa. The Poland China offering is a dispersion of the herd of S. B. Wenger, 45 in number. Eleven sows and one herd boar by Perfection I Know. Three sows by L's Tecumseh and others equally well bred. Perfection I Know's get have taken more premiums at Iowa State Fair the last three years than the get of any other hog, at any state fair. For catalog of hogs address S. B. Wenger, South English, Iowa. Hog sale 10 a. m. sharp. No catalog sent without application. Cattle sale 1 p. m. Sale in big tent. For catalog of cattle sale address L. W. Barnhart, South English, Iowa.

When writing to Advertisers please mention this Paper

Second Call for the Donohoe-Cash Sale of Aberdeen Angus Cattle.

In our issue of October 25th, mention was made of the very superior lot of sixty-five head of Aberdeen Angus cattle that would pass through the auction ring at Holbrook, Iowa, on November 13th. We wish to remind our readers that the auctioneers, Colonels Woods and Igo, will find much to talk about concerning the real merit and value of this superior offering. The consignors to this sale are all well and favorably known breeders of Aberdeen Angus cattle. We refer to Messrs. Wm., John and Mike Cash, P. J., M. H. and Mike Donohoe and Patrick Leahy. These breeders have associated themselves together and own two of the best Aberdeen Angus herd bulls in America, respectively the great show and breeding bulls, Woodlawn Blackbird Lad 35103 and Black Woodlawn, the sire of a part of Mr. P. J. Donohoe's champion show herd of 1906. In our initial mention of this very important sale, we dwelt briefly on the general character of the offering, and unfortunately at this writing, as we have not received the catalog we can do little more than to remind our readers, after a careful inspection of the herd, that from an individual standpoint, as well as from the standpoint of rich breeding in Angus lines, the like of this offering is seldom made. It is altogether probable that the twenty odd head of Blackbirds listed in this sale would not have been contributed at this time were it not for the fact that these breeders propose to make Holbrook, Iowa, a sale point or center where the Aberdeen Angus breeders of America can come and secure as good and as well-bred doddies as are to be found on earth. These enterprising breeders are always alert and awake to any business proposition that will promote the interests of Angus cattle, and they fully recognize that with the great show record made this year by the Holbrook doddies they cannot afford to offer a cheap or inferior consignment. Inasmuch as this sale occurs the day before the Baker & Smith dispersion sale, these breeders have decided to list some of the best cattle in their herd. It means a practical dispersion of Mr. Wm. Cash's prominent herd, including Woodlawn Blackbird Lad. There will be twenty bulls listed in the sale all told and forty-five females; twenty head of the famous Blackbird family, with a liberal consignment of Trojan Ericas, Prides and Queen Mothers. A more aristocratic galaxy of rich breeding would be difficult to find. Among Mr. Cash's good cows is Blackbird Favorite and hull calf at foot, sired by Woodlawn Blackbird Lad. This is a grand cow and would be an attraction any place where Angus cattle are in favor. The dam of this famous cow was a member of the P. J. Donohoe famous show herd. Another attraction is Blackbird Lassie 5th, with cow calf, the calf being by a Blackbird bull also. Another beautiful Blackbird cow is Blackbird Eclipse, a daughter of Bell's Eclipse, her dam selling in the Pierce sale last June for \$925. This splendid cow is now carrying a calf to the service of Woodlawn Blackbird Lad. A neat Queen Mother cow is Brookside Pansy. The great producing doddie cow, Pride of Dennison 23d, by Heather Blackbird, will calve about sale time or soon after. She is the dam of Pride of Clover Leaf, shown so successfully this season by Mr. P. J. Donohoe. The beautiful Trojan Erica heifer, Eileen, a daughter of Edward R., is surely one of the sweet things to be sold. Blackbird Lassie 10th is another of the good things that will calve by sale day. Queen Valentine and cow calf is one of the thick, roly-poly sort that pleases the lover of Angus cattle. Another good one is Pride of Cherokee 16th, as is Blackbird of Clover Leaf 2d by Brookside Star. Mr. Cash is loath to part with these choice females and with the herd bull, Woodlawn Blackbird Lad, but he is making some land changes which necessitates a change in his cattle operations for the present. The great show and breeding bull, Woodlawn Blackbird Lad, never looked more fit for hard service than at the present time, and Mr. Cash assures us that he is the surest bull that he has ever used. The old fellow with a very little fitting could re-enter the show rings and probably duplicate some of his past successes in hot competition. Mr. Mike Donohoe contributes seven head, two bulls and five long yearling heifers. The bulls are both big, stocky fellows, one of them a Miss Copeland, being exceptionally fancy. Among his offering of females is Coquette McHenry 35th, Glenfold Barbara 3d by Black Woodlawn, two Clover Pride heifers and one Miss Copeland, one Trojan Erica by Prileno. Mr. P. J. Donohoe, who won four championships and six first prizes on his Angus herd at the American Royal at Kansas City, will sell ten head, eight females and two bulls. In his offering will be consigned such beautiful heifers as Brookside Pride 3d, Queen of Dennison 33d, Pride of Dennison 6th and cow calf, Erona D., a Trojan Erica and bull calf, the cow herself being by Imp. Prileno, while she is in calf at this time to Black Woodlawn. Another good one consigned by Mr. P. J. Donohoe is Long Branch Crocus 3d by Lord Woodlawn. This is certainly a great cow and one worthy of consideration on sale day. Mr. Donohoe sells two fancy Blackbirds. Mr. M. H. Donohoe consigns a small offering, among which will be the beautiful heifer calf by Blackbird Royal out of Eileen Lass. This is strictly choice, as is also the Blackbird heifer calf by Black Woodlawn. Mr. M. H. Donohoe can always be depended upon to send forth something select. Numerically he is not a heavy contributor to the sale, but he is not ashamed of his offering. Messrs. Mike and John Cash each make small contributions of some of their best things. Mr. John Cash is selling some very useful cows and heifers bred, cattle that he can ill afford to spare, while Mr. Mike Cash consigns the Queen Mother heifer and a Blackbird cow that will look well in any herd in America. He also lists one K. Pride and a calf. However, the calf will in all probability be sold separately. Mr. Patrick Leahy, of Parnell, furnishes the last of the consignment consisting of six head from his famous Glenmere herd. Perhaps the choicest young Blackbird female in the entire sale is Glenmere Blackbird by Black Woodlawn. As the German would say, "she is big enough every way and sticks out all over." This famous little Blackbird heifer has quality to spare, as do the major portion of Black Woodlawn's get.

In this connection we might say that if there is an Aberdeen Angus bull in America that is the equal of Black Woodlawn in individual merit from a show yard standpoint, or from the standpoint of being a great sire, we do not know where he is located. Mr. Leahy also consigns one splendid Queen Mother cow and bull calf by Black Woodlawn, and one splendid Blackbird cow bred to Woodlawn Blackbird Lad. He also lists two splendid bulls, including the splendid bull, Black Monarch of Homedale 2d. This is one of the best Aberdeen Angus bulls to go through a sale ring this year. He is very true and level in his lines, possesses a typical doddie head, is chuck full of breed character and next to Mr. P. J. Donohoe's show bull, Glenfold Thickset 2d, he is the best hull among the younger fellows in the sale. Earl of Glenmere by Black Woodlawn is a Queen Mother bull that Mr. Leahy has been considering as fit timber for a herd bull. However, as Black Woodlawn is still in active service and he has access to him, he has decided to sell Earl of Glenmere in order to make the bull offering more attractive. As this will be one of the most important sales of Aberdeen Angus cattle during the season, we trust that all our readers will find it to their interest to write Mr. P. J. Donohoe, of Holbrook, Iowa, or Mr. Wm. Cash, of Williamsburg, Iowa, for sale catalog. As this sale is held on November 13th, the day prior to the Baker & Smith dispersion sale at Mt. Vernon, it will justify Aberdeen Angus men in coming a long distance to see these two great herds sold. Fifty-five blackbirds will be sold in the two days' sale. The greatest amount of Blackbird blood ever offered at public auction in the world in two days' sale. Parties attending the Donohoe-Cash sale on the 13th can leave after supper for Cedar Rapids, stay all night and leave during the forenoon for Mt. Vernon, which is but thirteen miles east of Cedar Rapids on the main line of the C. & N. W. railroad. Everyone contemplating the purchase of Angus cattle should arrange to attend these two sales.

Cookson Bros.' Scotch Short-Horns.

On page 34 will be found the announcement of Messrs. Cookson Bros., of West Branch, Iowa, who are again in position to furnish some strictly first-class herd bulls. This firm have probably furnished more herd bulls and more Scotch females from which good herds were established than any other breeders in the central West. Mr. Daniel Cookson, the father of Messrs. Cookson Bros., was the first man in America to breed Cruickshank cattle extensively. The senior Cookson in a very early day went to Canada and purchased at low prices the very pick of Mr. Jas. I. Davidson's first importation from Mr. Amos Cruickshank's herd. Hence, Messrs. Cookson Bros., who are the present owners of the herd, have been brought up in the business from their infancy. In fact they were rocked in a Short-horn cradle and have known little other of the cattle business than the famous Sittytton family. Their famous herd bull, Young Commodore, is unquestionably the greatest marvel of the modern type of Short-horns that is today living in the United States. There is no other Short-horn bull in all our acquaintance possessed of that great heart girth, wonderful spring of rib and great roundity that can be found in Young Commodore. He comes by this by inheritance. His sire, Commodore, was of this same type and he acquired this by inheritance. His sire was Imp. Bandmaster, the best forward ribbed bull ever purchased in Scotland by the late Mr. Wm. Miller, of Storm Lake, Iowa. Commodore's dam was Clementine Queen 3d, she by Imp. Master of the Mint, also a bull very strong in this respect, while her dam was Imp. Clementina Queen by Gravesend, conceded to be the best-ribbed Short-horn cow ever imported, unless it was Imp. Princess Alice. Messrs. Cookson Bros. have on hand at this time several herd headers sired by Young Commodore and out of imported cows or American-bred Scotch cows that are suitable to head the best herds in the land. They have a red bull calf by Young Commodore and out of Imp. Beauty 17th by King Cup that is in all probability the greatest production in all their years of experience. They are expecting to use this bull a very little and put him on the market this winter. Messrs. Cookson Bros. concede this fellow to be a better bull at the same age than his illustrious sire, Young Commodore. Certainly he is one of the thickest and best-developed bulls in all our acquaintance. It would be useless, however, for anyone to attempt to buy this bull short of \$1,000, and inasmuch as \$5,000 has been refused for his sire, this price would be very conservative. The other four young bulls now ready to place on the market are as follows: One Orange Blossom, one Heather Mayflower, one out of Imp. Winsome and one Narcissus. Messrs. Cookson Bros. are located two miles from West Branch, Iowa, two miles from Downey, one and one-half miles from Center Dale and six miles from West Liberty. All the above are railroad towns on the C., R. I. & P. system.

Addy & Son Offers Good Summer and Fall Duroc Boars.

Under date of October 19th Messrs. W. L. Addy & Son, of Parnell, Mo., breeders of Duroc Jerseys, write us that they have a number of summer and fall males got by their royally-bred herd boar, W. L. A's Choice Goods, a boar that carries more of the combined blood of America's great prize winners than does any boar of the breed excepting his litter brothers. A pig got by this boar was recently sold at four months of age for \$125. Last spring at their bred sow sale a number of sows bred to W. L. A's Choice Goods were sold. Pigs from these have gone through some good sales. In one instance the top boar and the top sow were both by this boar. At another sale the second and third tops were by this boar. Mr. S. D. Bolles, of Box Elder, Neb., the purchaser of the \$125 boar, writes as follows: "Something Choice is doing well. He is a good pig sure. Suits me good. Have you any gilts to spare?"—S. D. B." Mr. Addy is pricing these Good Choice pigs worth the money and would be pleased to give descriptions.

ALL SCOTCH Short-horn Sale

The only sale of absolutely all Scotch Short-horn Cattle to be held this Fall will be the sale of S. H. Thompson's Sons and W. M. Smith at West Liberty, Ia., Nov. 14.

S. H. Thompson's Sons sell twenty-seven head; W. M. Smith & Sons, 18 head, the Smith contingent being a dispersion, all of the Scotch Rosemary family. Thompson sells 17 females, all but three with calves at foot, or are bred, ranging from one to five years of age—all but one bred by themselves. Ten Scotch bulls are listed, of the Lavender, Alexandrina, Lovely, Mysie, Princess Royal, Duchess of Gloster and Rosemarys. Wm. Smith & Sons sell their herd bull, Ringmaster, a son of Young Commodore. Fifteen of the 18 contributed by Smith & Sons are females. Some showyard material, as well as some great breeding stock, is listed. The sale will be held at West Liberty in the heated pavilion.

Mention Homestead When Writing.

The Shelby County Short-horn Sale.

The first annual sale of the Shelby County Short-horn Breeders' Association will be held at Harlan, Iowa, on November 13th, and after an inspection of nearly all the cattle that will go into the sale we can truthfully say to prospective buyers that here will be one of the best opportunities of the year to buy a few choice cattle of either sex. The sale is under the management of Mr. C. W. Daws, one of the best-known breeders in the West, and he has personally inspected all the cattle that will be offered in the sale. Included in the sale will be sons and daughters of such noted Scotch bulls as Imp. Scotch Pride, the sire of the great Clark cow that has been winning at all the leading shows this fall, and he is also the sire of another good heifer that was a leading winner at the Portland Exposition; Imp. Lord of the Manor, Banner Chief, Gloster Bud, Sirocco, Baron Victor, Bonnie Scot 2d, Golden Steadfast, Master Cupbearer, Royal Gloster and other well-known Scotch bulls will have representatives in this sale. There will be a liberal number of Scotch cattle in the sale, among which will be some good Scotch bulls. Messrs. C. W. Daws & Son will contribute four head, two bulls, one nice heifer and a cow with calf at foot. The bulls are both sired by his former Cruickshank herd bull, Banner Chief. The best of these is named Chief and is No. 37 of catalog. He is a dark red in color, a very toppy fellow, with lots of style, good in his lines and will make a good herd bull. The other one is an October calf and is a very growthy fellow. The heifer that he puts in is named Golden Bracelet 2d, is two years old, and is a daughter of Imp. Lord of the Manor. Her dam is by the Duthie-bred bull, Scottish Minstrel, then comes the two noted bulls, Admiral and Grand Victor. She is a splendid individual and is one of the best heifers in the sale. Frantic of Ardmore is a three-year-old daughter of Imp. Scottish Pride and has a bull calf at foot by the Cruickshank bull, Banner Chief. This is one of the few opportunities Short-horn men will have of getting a daughter of this great bulls, as they are not being offered for sale. Mr. John C. Nyrup is putting in five head. One of these is a nice yearling heifer. She is a Rose of Sharon and is a daughter of his herd bull, Royal Lavender. He also sells two cows, Nos. 1 and 16 of the catalog. One of these is an especially good milk cow and has a calf at foot. The other will have calf at foot by sale time. He puts in two nice young bulls, both sired by Royal Lavender. Mr. H. W. Littleton sells one cow with calf at foot and one two-year-old heifer. The latter is a daughter of a bull called Gordon, bred by Mr. G. H. Miller and she is one of the good things in the heifer line in the sale. The cow with calf at foot is No. 9 of catalog, is five years old and a daughter of Frederick Hero 3d. Mr. George H. Miller sells one bull, one cow with calf at foot and one heifer. The bull is a yearling son of his Scotch bull, Gloster Bud, is a red in color, a sappy, low-down fellow, and is one of the best young bulls in the sale. The heifer is Mildred, a two-year-old double Scotch-topped Young Mary, and is the making of a most excellent cow. She is in calf to the Scotch bull, Idleside, that now heads the herd of Mr. John Cox. She is also a daughter of Gloster Bud. Jennie Lavender is a three-year-old cow, a daughter of Lavender 2d, with calf at foot by Gloster Bud. Mr. John Abrecht, consigns three head, two females and one bull. The latter is Pansy Prince, a son of the Scotch bull, Master Cupbearer, was a year old last February, and is a strong, vigorous fellow. He is right to go out now and do good service, and the man that gets him will get a good bull. Pansy Princess 2d is a three-year-old daughter of the Cookson bull, Bismark, that headed the herd of Mr. J. D. Peterson, at Anita, Iowa. She is due to calve about sale time to his Scotch bull, King Glamis. Miss Mary S. is a nice two-year-old heifer, a Scotch-topped Young Mary, a daughter of the Scotch bull, Sirocco, and has a calf at foot by a Scotch bull. Mr. J. G. Westrop, one of the best-known Short-horn breeders in Iowa, contributes four bulls and four females. He has selected some of his very best bulls for this sale, and they will meet the expectations of the most exacting buyers. No. 31 is Tidy Boy 252612, a son of his former herd bull, Sirocco. His dam is a daughter of Victoria Bud and his dam is a daughter of Imp. Gay Monarch. He has about as much of the very best Scotch blood tied up in his pedigree as will be generally found anywhere. He is a two-year-old, a roan in color and weighs 1,750 pounds. He was first prize winner in his class at Harlan and headed the first prize young herd at the same show. He belongs to the Frantic family that produced so many of the Robbins show cattle. Sweet Violet Lad is another son of Sirocco; was a year old in April and is out of Sweet Violet 4th by Prime Scot. He is a Marsh Violet, red in color and a very likely young bull. Sir Abbottsburn is another Sirocco bull, an April calf, a low-down, thick fellow, with four or five Scotch tops, and is one of those good Rubys. Another Sirocco bull and a great big, lusty, dark red fellow is two years old, and he belongs to the Flora tribe. These bulls are among the best he has and those who are after bulls will find them all we represent them to be. In females he puts in two good Sirocco heifers, one of these is Ruby, out of a daughter of Young Abbottsburn 2d, and has a nice red heifer, calf at foot by Royal Prince 7th, a son of Victor Mysie 2d, and the bull that stood at the head of the Westrop herd for some time. The other is out of a daughter of the great St. Valentine; is a Scotch-topped Young Mary and is bred to Sir Faithful. Drilla G. is a four-year-old daughter of Baron Taylor 2d, and has a bull calf at foot. Fairy Queen 3d is a good four-year-old; a daughter of Cleveland Boy, and out of Fairy Queen 2d by Royal Gloster. She will have calf at foot by sale time. Messrs. J. A. and W. F. Kilpatrick sell three head, one bull and two heifers. One heifer and the bull are all sired by Baron Greenfield, a Funke-bred bull. The bull is Griswold 246447, a nice red fellow and has been used some on their herd. One of the heifers is named Lovely and is a daughter of Mr. Charles Neff's well-known Scotch bull, Captain Lovely. The other is Red Bird, a nice smooth heifer, and

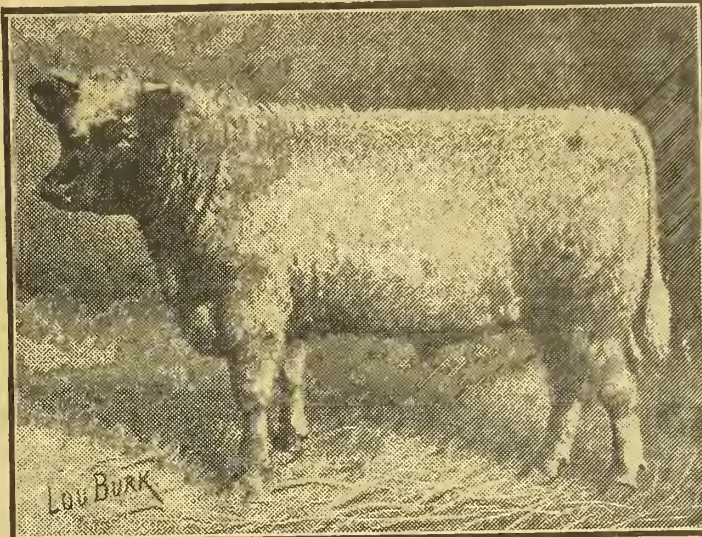

45
HEAD

BIG SOUTHERN IOWA SALE OF

SHORT-HORNS

45
HEAD

On Nov. 15, at E. C. Holland's farm adjoining the town of Milton, Ia., will be sold 45 head of select Short-horn cattle from the well known herds of E. C. Holland, Dr. Guernsey, Sample & Sample. E. C. Holland contributes 24 head, Dr. Guernsey 15 and Sample & Sample 6 head, including their herd bull.

A goodly number of cows with calves at foot or well forward in calf are offered. Dr. Guernsey sells 9 beautiful 2-year-old heifers all bred. Sample & Sample sell 5 cows well forward in calf and 12 of the Holland consignment are all bred to the splendid Scotch bull Prince Charles 166137.

For particulars concerning this sale and for catalog application should be made to

E. C. HOLLAND, COL. R. W. BARCLAY, MILTON, IOWA
Auctioneer.

REMEMBER THE THOMPSON & SMITH SALE AT WEST LIBERTY, IA., NOV. 14.

is safe in calf to the Scotch bull, Royal Hero. Mr. V. L. Dayton sells two Scotch bull. One of these is his herd bull, Golden Steadfast, a son of Imp. Steadfast. He is a richly-bred Scotch bull, a splendid individual, and a good breeder. Here is a bull that the breeders should not pass up, because he is good enough to go anywhere. He also sells one of his sons out of a daughter of Imp. Scottish Pride; and two good Cypress heifers and one Matilda. Mr. August Sonneland sells two heifers, both daughters of Baron Victor, a well-known Scotch bull of the Victoria family. He also sells an April bull calf sired by Baron Victor, and he is a Scotch-topped Young Mary. The cattle that go into this sale have been selected with considerable care, and there will be some exceptionally good things offered for sale. We suggest to prospective buyers that they send at once for a catalog and then be sure to attend the sale. Address C. W. Daws, Mgr., when writing and kindly mention The Homestead.

Lakewood Percherons.

The achievements of Lakewood Farm-bred Percheron stallions and mares has attained success in American show yards this and last season never before approached by any other American breeder. The great show stallions Calypso and Olbert, both imported, and International winners, head this magnificent stud. Lakewood Farm is owned by Mr. H. G. McMillan, of Rock Rapids, Iowa. At Minnesota State Fair Lakewood Percherons won championship on stallion and mare, grand championship open to all breeds on stallion showing four of his get, and grand champion mare showing two of her produce. The Percheron Society of America's gold medal for champion stallion, champion mare, champion three mares and champion display of five American-bred Percherons were all won by Lakewood Farm. More prizes were won by Lakewood horses at Iowa and Minnesota State Fairs in 1906 than all other exhibitors of this famous breed. At Iowa sweepstakes prize on stallion and get went to Lakewood. Percheron society's special for champion stallion any age, champion mare and champion group of five American-bred Percherons all fell to Lakewood. On December 12th and 13th, at Sioux City, Iowa, Mr. McMillan will sell eighty registered Percheron stallions, mares and fillies. The young stallions are clean and sound. The mares and fillies are largely bred to the International first-prize winners, Calypso and Olbert. We are informed that Mr. McMillan is seriously considering the consignment to this sale of practically all his prize winners. If he does this will be the choicest offering of Percherons ever made in this country. It will be the Percheron event of the year.

Some Good Cruickshank Bulls.

On page 39 of this week's Homestead will be found a change of copy for Messrs. C. W. Daws & Son, of Harlan, Iowa. They are offering four splendid Scotch bulls for sale, three of which are pure Cruickshank. One of these is Commodore 2d, a son of Grand Prince and out of Sittyton Lass, one of the greatest cows in the Cookson herd. She is also the dam of Commodore, the noted bull that has been used with so much success in the Cookson herd. Here is a splendid young Scotch bull, good enough to head any herd. His breeding is absolutely all right, and he is a good individual, and some man that is looking for a herd bull

LAKEWOOD FARM

LAKEWOOD FARM PERCHERONS MADE A RECORD NEVER BEFORE EQUALED IN AMERICA.

At Minnesota

We won championship on stallion, championship on mare, and the grand sweepstakes prize open to all draft breeds on stallion showing four of his get, and grand sweepstakes on mare showing two of her produce. In addition we won the Percheron Society of America gold medals for champion stallion, champion mare, champion 3 mares and champion display of 5 American-bred Percherons.

At Iowa

We won sweepstakes on stallion and his get; grand display bred by exhibitor; Percheron Society of America Special for champion stallion any age; champion mare and champion group of 5 American-bred Percherons. In addition to the foregoing specially mentioned prizes the Lakewood Stud won twenty-two other class and special premiums at these two greatest state fairs ever held—more prizes than fell to the lot of all other Percheron exhibitors combined.

230 PERCHERONS ON HAND; 100 STALLIONS, many of them show horses. Special prices during the fall months. Every stallion fully guaranteed. Send for new handsomely illustrated catalog.

ANNUAL PERCHERON SALE AT SIOUX CITY, DECEMBER 12 and 13, 1906

80 HEAD of high-class Percherons at auction, consisting of young stallions ready for service, mares and fillies. The mares and fillies are nearly all bred to the great show stallions, CALYPSO and OLBERT, both first-prize winners at the International, Iowa and Minnesota State Fairs.

H. G. McMILLAN, Prop.

Lakewood Farm, ROCK RAPIDS, IA.

C. M. DENT, Manager.

will find in this fellow about what he wants. Another splendid young bull is Nonpareil Prince, a son of the noted Parson's bull, Nonpareil King, and his dam is Susan Lady 2d by Field Marshal. He is a September calf and a wonderfully thick fellow. They also offer for sale a young Secret bull

by Imp. Lavender Champion, and a Queen of Beauty by the Cruickshank bull, Banner Chief. The latter is a straight Cruickshank and a double bred Queen of Beauty. If any of our readers are on the market for a herd header, the thing to do is to go and see these bulls, but do it right away.

A Letter from Havre.

Mr. S. J. Miller, of Kirksville, Mo., one of the importers of draft horses who deals in quality, more than in great numbers, was much pleased to receive from Perche, France, a copy of one of the leading papers in which appeared the following notice of his last importation of Percheron stallions and mares: "Nos chevaux en Amerique. On nous écrit du Havre: Les expéditions des chevaux percherons en Amerique continuent régulièrement dans notre port. Lasemaine dernière, un convoi de 70 étalons et juments, dont plusieurs primes aux concours de Paris et de Marnes, a quitté le Havre a destination de New-York via Londres. Dans ce nombre, on a particulièrement remarqué un lot d'étalons et juments qui, par leur excellente conformation et leur parfaite conditions, ont fait l'admiration des connaisseurs. Des mellieuses origines, ces chevaux sortent des écuries les plus renommées du Perche. Ces remarquables sujets, nous a-t-on dit, appartiennent à M. S. J. Miller, de Kirksville, Missouri, l'éleveur bien connu en Amerique. Avec un tel lot, M. Miller soutiendra certainement la réputation de notre élevage dans le nouveau continent. Espérons qu'il en aura la récompense et que nous aurons le plaisir de l'avoir parmi nous l'année prochaine.—Un Spectateur." Printed at Nogent-Le-Rotrou, France. The following is an exact translation by J. Davies, Interpreter: "The shipments of our Percheron horses to America continue regularly to our port. Last week a lot of seventy stallions and mares, amongst which were many prize winners at Paris and Marnes great shows, left Havre for New York, via London. Amongst that number, were particularly remarked a lot of young stallions and mares, which by their excellent conformation and perfect condition, were greatly admired by connoisseurs or judges. Of the best origins, these stallions and mares are from the best stables and breeders in the Perche district. These remarkable subjects, we were told, belonged to Mr. S. J. Miller, of Kirksville, Missouri, the so well known breeder in America. M. Miller will certainly be able to retain the reputation of our breeding in the new continent. We hope that he will have his recompense and that we shall have the pleasure of seeing him against next year amongst us.—A Spectator." A representative of this paper recently inspected Mr. Miller's horses referred to in the above article. They are indeed a grand lot of stallions and mares. Several two-year-old Percherons will tip the scales at close to 1,900 pounds. Some prize winners in Paris are in the lot. Mr. Miller was never better prepared to furnish stallions to the farmers of the corn belt. He will continue to sell at the barn door and the buyers of stallions should see his horses, get his prices and see if he cannot save them money. In future issues we shall have more to say of Mr. Miller's horses, but the best thing for those who want stallions is to go to Kirksville now. Mr. Miller's advertisement appears on this page.

Sale of Short-Horn and Polled Durham Cattle.

On November 15th, at Scotland Vale Stock Farm, six miles southeast of South English and seven miles northwest of Keota, Iowa, will be sold a choice lot of Short-horn and Polled Durham cattle, also forty-five registered Poland China swine, the property of Mr. S. B. Wenger. The offering in detail is as follows: Twenty-six Short-horn cattle, eighteen bulls and eighteen cows and heifers from the herd of Mr. L. W. Barnhardt, of South English. Also twenty-five head of Double Standard Polled Durham cattle, five bulls and twenty cows and heifers. Mr. L. W. Barnhardt contributes five head, including Imp. Dora 3d and other pure-bred Scotch cattle, such as Golden Rule and Golden Rule 2d by Imp. Golden Fame and out of Imp. Ruby 32d by Scottish Myrtle. Many of these cows offered have calves at foot. Mr. S. Yoakim is the other contributor of Short-horns. The Polled Durham cattle are contributed by Mr. S. P. Wenger, of South English, T. S. Gore, of South English, and Mr. M. Yoakim, of Webster. In the Polled Durham offering will be found two as well-bred Scotch Polled Durham bulls as the breed has to offer. One is Scottish Arcader by Prince of Pallas and out of Imp. Ruby 22d. The other is Claudius by Ottawa Gauntlet and out of the imported Scotch cow, Claudia 4th. Dora of Sittytton by Prince of Pallas and out of Imp. Dora 3d. In addition to the above cattle, Mr. S. B. Wenger, the well-known Poland China breeder, will disperse his entire herd of forty-five head of choicely-bred Poland Chinas, including eleven tried brood sows and his herd boar by Perfection I Know, and three sows by L. Tecumseh and other prominent sires. It is said on good authority that Perfection I Know's get have won more prizes at the Iowa State Fair during the past three years than the get of any other hog. For catalogs of this hog sale address Mr. S. B. Wenger, of South English, Iowa. For catalog of the Short-horn and Polled Durham cattle sale, address Mr. L. W. Barnhardt, South English, Iowa.

The All Scotch Short-Horn Sale.

We now call attention for the second time to the all Scotch sale of Short-horn cattle to be sold at West Liberty, Iowa, Wednesday, November 14th, at which time Messrs. S. H. Thompson's Sons, of Iowa City, Iowa, and Messrs. Wm. M. Smith & Sons, of West Branch, Iowa, will sell forty-three head of Scotch Short-horn cattle, all Scotch and all choicely bred in the best Scotch families known to the breed. Not only is this offering Scotch, but Cruickshank blood predominates. These parties have arranged to make this sale in the heated pavilion on the fair ground at West Liberty on account of the better accommodations to be had at this place. They have made free entertainment at the leading hotel at West Liberty, the Hise House, one of the attractions. This free entertainment is for all their guests from a distance who care to avail themselves of this home-like place during their stay in West Liberty. It is a pleasure to write up an offering of cattle of this character, because every animal in the Thompson herd, save one, was bred by themselves, and aside from Messrs. Smith & Sons' herd bull, which will be sold, the same can be said of their offering, so that the parties who attend this sale

and buy cattle can rest assured that they are buying them direct from responsible breeders who have given up their life to the work and are in no sense speculators or hucksters in the cattle business. One of the pleasant features in connection with this sale is that only a few families are represented and they being the old reliable, well-tried (and proven faithful) ones. Many years ago Mr. S. H. Thompson founded his herd of Pleasant View Short-horns, now conducted by his sons, on stock purchased of Mr. Daniel Cookson, one of the pioneers of America in breeding Scotch Short-horns. The Mysles, Alexandrinas and Rosemarys were favorites with the elder Thompson. All of his Mysles are founded on Imp. Mysie 36th, a cow bred by Mr. Amos Cruickshank in 1871, and imported in 1873 by the Hon. James I. Davidson. Mr. Davidson, up to 1887, had a practical monopoly on the handling of Mr. Cruickshank's annual crop of calves, and he imported many of the best cattle ever brought to America, Imp. Mysie 36th being one of this number. Mr. Thompson's Alexandrina's all come through Imp. Alexandrina 6th, a splendid cow bred by the late W. S. Marr. The foundation of these is the same as the famous Cruickshank Cicely tribe. Imp. Cicely was of this family. Robbins' great show and breeding bull, Gay Monarch, as was also the dam of Cupbearer. The Rosemary was a family that Mr. S. H. Thompson held in very high esteem. His Rosemarys all descended from Imp. Rosemary, bred by Mr. Amos Cruickshank, sired by Breadalbane, also bred by Mr. Cruickshank. The imported cow was brought out in 1874 by the Hon. James I. Davidson. The Rosemarys descend from Mr. Cruickshank's celebrated Jessie tribe, the same as the Orange Blossom foundation. Mr. Smith's herd is entirely of this Rosemary family. A number of years ago Mr. Smith selected of the elder Mr. Thompson the Rosemary cow, Rosy Gem 4th by Blue Valley Duke 3d, and from this one cow has descended their entire herd, their breeding being practically the same as the Thompson cattle, for the reason that until recently they have always used a Thompson-bred bull. Blue Valley Duke 3d may have had a misleading name. However, he was a pure Cruickshank bull of the famous Lovely family. He was sired by Imp. Double Gloster and out of Imp. Lovely 41st by Cumberland. This cow on which Messrs. Smith's herd is founded was out of Rosy Gem 3d, a daughter of Imp. Spartan Hero. What Messrs. Smith & Sons have achieved in a few years patient breeding, serves as an object lesson to the young breeders of today of the possibilities in the pure-bred cattle business, if the breeder will only buy right and then stick to his text. Messrs. Smith purchased the single cow and now have eighteen of her descendants in the sale. It is a practical dispersion of the Smith & Sons herd, some four old cows only remaining on the farm. Messrs. Smith & Son will sell their present herd bull, Scotch Ringmaster. This is a Cookson-bred bull, sired by Young Commodore. He, without question, is the best Short-horn bull in Iowa. Young Commodore was got by Commodore, he by Imp. Bandmaster, while his dam was Clementina Queen 3d by Imp. Master of the Mine, her dam being Imp. Clementina Queen by Gravesend. Young Commodore's dam was Imp. Gay Lad, she by Grand Old Turk and out of Lady Fragrance 9th by Sergeant-At-Arms. Scotch Ringmaster's dam was by Banner Bearer; her dam by Home Secret, a son of Imp. Spartan Hero. Scotch Ringmaster belongs to the celebrated Orange Blossom family, conceded to be the best milking strain of Cruickshank cattle. The imported cow to which this bull traces, Imp. Orange Blossom 18th, was sold in 1876 for \$3,500. Here is an opportunity for someone to secure a good herd bull that has been tried and proven worthy of a place at the head of a herd. The offering from both these parties is desirable in every way, as there are no old cows offered; six years old being the limit. It is not a culling out sale, so far as Messrs. Thompson's Sons are concerned, but is simply an offering of the surplus young stock that they have bred on the farm for the purpose of selling to breeders. So far as Messrs. Smith's contingent is concerned, it is practically a dispersion, as has been before stated, and will give the breeders an opportunity to get his reserved stock that has hitherto been priceless. Catalogs can be had at this writing by addressing Messrs. S. H. Thompson's Sons, Iowa City, or Messrs. Wm. M. Smith & Sons, at West Branch, Iowa. In the next issue of The Homestead will be found some sample pedigrees of this famous offering of Short-horn cattle. We trust that they will be carefully looked up by those who contemplate the purchase of Scotch Short-horns in the near future, as this sale will in all probability offer the greatest opportunity for Scotch cattle that will present itself this year. In fact it is the only offering of all Scotch Short-horns that has been announced for more than a year.

Blatchford's Calf Meal.

No doubt thousands of our readers know something about the wonderful results that can be produced by the feeding of Blatchford's Calf Meal as a substitute for skim milk. To those who have not had experience with this product it may be said that it is almost identical in composition with skim milk. It is not a by-product made up of mill feeds, but is composed entirely of selected materials obtained from leguminous seeds, flax seed, bean meal, blood and flour. It contains all the elements necessary for symmetrical bodily growth of young animals, and these are in a most desirable form. In the corn belt where there are so many dual-purpose animals the use of Blatchford's Calf Meal is almost an absolute necessity. The milk may be skimmed and the cream sent to the creamery, or all the milk may be sent to the cheese factory and still the calves be brought up to full weights at an early age. Calves of good breeding fed on Blatchford's meal can be finished as baby beefs and may easily be brought to the weight of 1,200 or 1,300 pounds by the time they are eighteen months old. You then have a steer worth \$50 or \$60, and the total cost of all the feed he has eaten will not be more than half the selling price. Blatchford's Meal is manufactured by Mr. J. W. Barwell, of Waukegon, Ill. An illustrated booklet will be sent upon application, giving full information and directions about the use of this wonderful meal. Please mention The Homestead when you write, and look up the advertisement on page 7 of this issue.

SHORT-HORN

CATTLE

ON WEDNESDAY, NOV. 14TH

59

Head of Short-horn Cattle

Will be offered for sale by J. & I. J. Godden, Fair-lawn Farm, Bradgate, Ia. At our fourth sale we will sell 48 cows, heifers and calves—11 bulls.

59

THE females are of the good reliable kind, Duchess of Gloster Orange Blossom, Duchess 10, Sanspareils and good American families. It will consist mostly of young cows two, three and four years old. All shy and doubtful breeders have been sent to market and we are keeping the old cattle on the farm. It is an offering of well bred and good individuals. The cows are bred to Prince Malcolm 201060 by Malcolm 171375, bred by C. E. Gerlaugh. Ohio Malcolm is out of Imp. Missie May of the celebrated Missie Family. There will be eleven cows with calf at foot. The bulls are a smooth, even lot with color, breeding and quality from nine to eighteen months old from good milking cattle. Your presence is kindly invited if you wish to buy or not. Lunch at noon. Parties from a distance will stay at the hotel as our guests. A postal card will bring you a catalog. Send for and arrange to be with us. Bradgate is on the Eagle Grove and Hawarden branch of the C. & N. W. Railway. Bids can be sent to the auctioneer and will be well protected.

J. & I. J. GODDEN, BRADGATE, IA.

A. P. Mason, Auctioneer—R. J. Johnson, Clerk.

COMBINATION SALE OF

SHORT-HORN CATTLE

At UNION, IA., THURSDAY, NOV. 8th.

Mason's sale pavilion at 12:30 p. m. Hog sale at 10 a. m. No postponement on account of weather.

20 POLAND CHINA HOGS

3 old sows, 5 gilts and 12 spring boars.

Free Lunch at 12 o'clock.
Send for Catalog

A. P. MASON, Manager

S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

My importation this year was composed of young stallions and mares that attracted the attention of all importers and lovers of fine horses. Prize winners in Paris are among the Percherons. Two coaches, one a two-time winner, are also in my barns. I have two-year-olds that weigh right at 1,900 pounds. No better strains are found in France. All are young, blacks, dark grays and bays. They are quartered at my barns at Kirksville, Mo., where I would be pleased to show them. If you need a stallion this year I am better prepared than ever before to sell you something extra and at a price that will save you money. By making my own selections in France, selling them myself and at the barn door enables me to do this. I can also sell you some fine mares. To the man wanting an absolutely first-class jack I will say that I have him well marked and big. Come to my barns and let me show you. I will treat you right every way. I can also sell you smooth-coated Fox Terriers, the rats' enemy. Priced at \$3 to \$7.50 each.

Kirksville is on the Wabash and Burlington railroads.

The Last Call for the Lucas County Short-Horn Sale.

The second annual sale of the Lucas County Short-horn Breeders' Association will be held at Chariton, Iowa, on November 8-9, 1906, and it promises to be one of the most attractive sales held in southern Iowa this year. They are offering 102 head for sale and about thirty of these are bulls, including the noted Scotch bull, Imp. Avalanche 154294. The number and the quality of the bull offering is such as will and should commend the attention of breeders, and especially those who want bulls in numbers. The man who wants a car load of bulls can easily get what he wants at this sale. We desire to call attention to three excellent Scotch bulls, Nos. 1, 61 and 65 of catalog. No. 1 is Imp. Avalanche 154294, a seven-year-old son of Spicy Monarch. This splendid bull was bred by Wm. Duthie, of Collynie, Scotland, and is a bull of plenty of size and quality. He is a good breeder and will weigh about 2,300 pounds. Mr. J. E. McCorkle consigns him to the sale because he has used him a number of years and has retained nearly all his helpers. He should be looked after by some breeder who wants a herd bull. Another well-bred Scotch bull is Clan Stewart 167300. He is also red in color and was bred by Messrs. Cargill & Son, of Ontario, Canada. He is a son of Imp. Clan McKay by the celebrated bull, Clan Alpine. His dam is Imp. Sappho 2d by Prince of Archers, a son of the noted bull, Scottish Archer, sold by Mr. Duthie to be the best stock bull he ever owned. The other good Scotch bull is Arabella's Crescent Knight, consigned by Mr. R. L. Bott, of Humeston, Iowa. He is a son of Imp. Crescent Knight and he is out of Imp. Arabella by Watchman (71823). He is a little thin in flesh, but is bred right and he is right, and any breeder who owns a good herd can use him. Among the good Scotch-topped bulls are Lots 21, 26, 27, 62, 63, 76, 79, 94 and 99. There are other bulls in the sale that are good individuals and these are Nos. 89, 90, 91, 92, 93, 98 and 102. The bull offering is an especially meritorious one and there will be some good bargains in the sale. A perusal of the catalog will show some rich Scotch and Scotch-topped blood among the females, together with a lot of heavy-milking Bates cattle. One of the best Scotch cows is Narcissus Flora, a four-year-old daughter of Field Marshal. Her dam is Narcissus Queen by Commodore; second dam by Home Secret and third dam, Imp. Narcissus by Bampton. This cow has eighteen Cruickshank crosses and is as richly bred a Cruickshank cow as can be found in the herd books. She is safe in calf to Imp. Avalanche. A good Scotch heifer that will be sold in this sale is Avern Victoria, a year old in April and a daughter of Imp. Avalanche. She is out of a daughter of Victor Mysie 2d and is a richly-bred Cruickshank Victoria. Avern Rosabella is another good yearling daughter of Imp. Avalanche, and Gaiety's Manhattan is a three-year-old daughter of the Scotch bull, Roseleaf Duke. This heifer was second in the Lucas county show in 1905 and in good company. Mr. C. W. Ramsey is putting in some good, useful cattle, all regular breeders, good milkers and are bred to Sunny Blink Knight, a pure Scotch bull. Mr. F. H. Tinker, of Russell, Iowa, is also selling some good cattle in this sale. The Myrtle strain in the Tinker herd are great milkers and as most of them are suckling calves will be a little thin. He is selling a good Scotch-topped Young Phyllis bull in Scotch Knight 207284. This bull is now four years old, is a good individual and a good breeder and he will have a number of his calves in the sale. Mr. R. L. Bott is closing out his herd and is offering some good cattle in this sale. Mr. C. W. Huntley is selling three good heifers, and the rest of the cows and heifers are selected as good business cows that will make the buyer money. Here is going to be a good place to buy cattle and we sincerely hope they will have a good attendance at the sale. They have issued an excellent catalog which should be in the hands of every breeder and lover of Short-horn cattle. Write to Mr. C. W. Huntley, secretary, Chariton, Iowa, and it will be sent you. Kindly mention The Homestead when doing so.

A Combination Sale of Short-horn Cattle.

We have the pleasure this week of calling the attention of our readers to an important Short-horn cattle sale to be held at Union, Iowa, November 8th, at Moran's sale pavilion. Sixty-one head, forty-five cows and heifers and sixteen bulls, will be sold. Mr. Henry Schwarck, of Eldora, Iowa, consigns twenty-five head; Mr. A. P. Moran, sixteen head; Mr. Nelson Fiscus, of Liscomb, Iowa, five head; Mr. F. P. Clappitt, of New Providence, Iowa, five head; Mr. R. H. Hadley, of New Providence, Iowa, five head, and Mr. C. R. Stubbs, of Conrad, Iowa, one head. The offering is first class in every particular. Many of the cows are first-class milkers. Three straight Scotch bulls, good enough for herd headers, will be sold. Scottish Milkmaid 4th, No. 1 of the catalog, is one of the good Scotch heifers to be sold in Iowa this year. If you want to try good practical Short-horns, be sure and attend this sale. Union is on the Iowa Central railroad, eighteen miles north of Marshalltown and seventy miles south of Mason City, Iowa. Thirty Duroc Jersey gilts and boars and twenty Poland China sows and boars will be sold at 10 o'clock a. m.; cattle sale at 1 o'clock p. m. Send to Mr. A. P. Mason, of Union, Iowa, for catalog. See advertisement on page 38.

Crow's Big-Boned Poland Chinas.

November 7th is the day for Mr. Crow's annual boar sale at Maclay, Iowa. There will be forty-five head offered, all bred by him and farrowed as follows: Two, January 24th, March 12th, April 7th, May 17th; sired by Crow's Model 30729, a hog that has few equals for size, strong frame and heavy bone; could be made to weigh 1,000 pounds easy, and has a good, strong ten-inch bone; is sire and grandsire of many good ones. Sixteen by Up To Date 36007, the best-finished big hog I ever saw; weighed 665 pounds when twelve months old, and 800 when twenty-four. He has a ten-inch bone; is hard to fault. His get are proving him a great sire. They are of the kind

that mature early; grow into large hogs. His color and coat are all that could be asked for. Eight are sired by Look Here 37768, a good, strong yearling, weighing 500 pounds at twelve months in every-day suit. His pigs are a credit to him as a sire. Tako the offering all through they surely ought to suit any person looking for large, growthy heavy-boned stock that have finish. The sales in the past have proven that Mr. Crow's hogs are of the type very much sought for by breeders and farmers who make a success of raising hogs. Mr. Crow has been in the business for sixteen years and never showed a hog at my fair. The only way the public can see there is at the farm in breeding condition. They are kept for breeding only, and have access to plenty of grass. No trouble at farrowing time, and plenty to the litter. The dams of the offering are as good a lot of useful sows as one could wish to see in many a day. They have ample size and lots of quality, extra heavy bone. The sale will be held in a tent. Free entertainment to all. Send for catalog explaining all and attend the sale. It will pay you. See advertisement on page 46 and address W. J. Crow, Webb, Iowa, and mention The Homestead.

The Last Call for the Staples Duroc Jersey Sale.

One of the most important Duroc Jersey sales that is now to be held this fall is that of Messrs. W. A. Staples & Son, at Glidden, Iowa, on November 8th. We predict a good sale for this veteran breeder and his son, and they deserve it. They are putting up a good offering, composed of thirty-five very toppy boars and fifteen good gilts. Among the choice things in the boar line are two splendid sons of old Orion out of the \$605 sweepstakes sow, Nancy VIII. Here is a proposition for the breeder that wants a herd header, and especially the man that wants an Orion boar. Either one of these is a good proposition and will not go begging on sale day. Then there will be three boars by the noted prize-winning boar, Critic's Echo, and as that well-known sire is now dead it will pay breeders to hustle and get one of his sons. This blood has been breeding on and on and it has never hurt any man's herd. The time to buy it, however, is when you can get it and there never was a better opportunity than in the Staples sale. Other boars in the sale will be sired by Junior Jim, the second-prize boar at the Iowa State Fair this year, and still others by I Am a Wonder, a half brother to the sweepstakes boar at Des Moines this year. A few other boars will be sired by Proud Advance Again and O. Pig, a son of Orion. They are also selling a choice lot of gilts in this sale. Any of our best breeders can well afford to buy one of these and should they care to put it into a spring sale can double their money. There will not be another sale this fall that can boast of as much good blood as will go through the ring on November 8th. Arrange by all means to attend the sale. Write for catalog and be kind enough to mention The Homestead when doing so.

Sale of a Prominent Berkshire Boar.

There is probably no Berkshire breeder in the West doing more to keep up the size and bone, as well as the great length of the large English Berkshire hog, than is Mr. W. D. McTavish, of Coggon, Iowa. Very recently Mr. McTavish has sold one of his herd boars, Royal Premier 67448, this boar going to Mr. J. R. Elliott, of Woodward, Iowa. Royal Premier was bred by Mr. N. H. Gentry, sired by Lord Premier and out of Duchess 193d. Both Lord Premier and Duchess 193d were sired by Baron Lee 4th. This boar was the best son of the great and lamented Wooddale boar, Longfellow 16835. In this fellow we find a concentration of the blood of Longfellow, with all the good points of that famous old sire brought to the surface through Royal Premier. Most of Mr. McTavish's pigs for this season are sired by this boar, and as recently seen by a representative of The Homestead, they are an unusual lot of very long-bodied, heavy-boned pigs, usually having fine strong arches in their backs showing great strength of back, with an evenness from head to ham. Great depth of sides has been another potent factor in bringing to the front the Chapel Hill herd of Berkshires. As recently inspected by a Homestead representative, we have found thirty-five very choice April, May and June boar pigs, now being shipped out to Homestead readers throughout the length and breadth of the country. To our more than 80,000 readers each week we can say that no breeding establishment offers better inducements nor better pigs at the uniform price of \$25 each than can be sold by Mr. McTavish. His announcement appears in The Homestead at all times and he will be found a thoroughly reliable and honorable gentleman with whom to do business.

Alldritt's Durocs.

One of Nebraska's prominent breeders who is gaining a foothold in the Duroc business is Mr. Frank Alldritt, of Friend, Neb. Although young in business, Mr. Alldritt has shown great judgment in choosing and mating his herd and now has to offer the public a bunch of youngsters that are right in every respect. Among the good things that Mr. Alldritt has to offer are three sons of the great Ohio Chief. They are growthy fellows for their age and are pigs with quality enough to head any herd. There are also some choice youngsters by old Higgins' Model, the great boar that has made himself so prominent among hog breeders. Mr. Alldritt has pigs from ten of the best sires in the business and if you are in the market for a good boar pig or gilt write him at once or arrange to attend his fall sale, which will be held November 10th, at Friend, Neb. In this sale will be sold daughters of Ohio Chief with the breeding privilege to Alex Air, the only living son of the great sow, Alex II., the \$740 sow belonging to Mr. John M. Morrison, of College View, Neb. This great young boar is owned by Messrs. Frank Alldritt, Geo. Briggs & Son and Henry Warren. He was bought by these breeders at Mr. John Morrison's sale at the neat little sum of \$415. Remember this great offering and arrange to attend the sale and get an Ohio Chief gilt bred to Alex Air.

THE DISPERSION OF THE RIVERDALE HERD OF Short-horns

WILL TAKE PLACE AT THE STATE FAIR GROUNDS
... SPRINGFIELD, ILL., MONDAY, NOV. 5TH ...

42 HEAD---10 BULLS

The entire herd goes in order to settle a partnership. Nothing will be reserved or protected and a herd of matrons that were selected with care and an idea of long service at Riverdale go at such figures as you see fit to give. They are a strong lot. Good individuals, choicely-bred and producers of worth. Imported and home-bred Scotch are listed, including the leading Cruickshank and other leading Scotch tribes with a number of good American sorts with the best of Scotch tops. The bull list is a strong one, including the Duthie-bred bull Highland Champion, one of the best sons ever imported of the celebrated sire Lovat Champion. This bull is an exceptional individual, a getter of stock of unusual merit, some of which are winning in the leading shows of this season. This is an opportunity to secure a sire regarding whose worth there is absolutely no question. Pride of Riverdale is the pick of the last year crop by Highland Champion and he was reserved for service in the herd. He is a Cruickshank Secret with five imported sires at the top of his pedigree followed by the best of Cruickshank productions. With all this he is an extra individual and it is an opportunity that does not often come to secure a high-class herd sire. Good selections can be made from among the others too. This sale should attract widespread attention. Get the catalog. It will interest you and will be mailed to all who write for it, mentioning The Homestead, to

S. E. Prather Co., - - Sherman, Ill.

..FIRST ANNUAL SALE.. OF THE SHELBY COUNTY

SHORT-HORN

BREEDERS' ASSOCIAT'N

TO BE HELD AT THE SALE PAVILION

HARLAN, IOWA, TUESDAY, NOV. 13, 1906.

A Choice Lot of Scotch and Scotch Topped Cattle From the Herds of

J. C. NYRUP, J. A. OBRECHT, H. W. LITTLETON,
J. G. WESTROPE, G. H. MILLER, OLE OLSON, V. L.
DAYTON, AUG. SONNELAND, W. F. KILPATRICK,
G. E. MILLER, C. W. DAWS & SON, R. C. RASMUSSEN.

...30 Cows and Heifers and 15 Bulls...

The cattle that go into this sale have all been inspected by a committee selected to pass upon them and nothing but the very best was allowed to be cataloged. There are some particularly high class herd bulls in the offering, some of which are straight Scotch. The cows and heifers are also a very high class lot of the beefy, early maturing, and well bred lot of cattle and many of these will have calf at foot. When writing for catalog, address

C. W. DAWS, MGR., - HARLAN, IA.
Col. Geo. P. Bellows, Auctioneer.

More Concerning the Great Dispersion of Blackbird Aberdeen Angus Cattle of Baker & Smith.

As per previous announcement the Cloverdale herd of Aberdeen Angus cattle, 85 per cent of which are of the famous Blackbird family, the property of Messrs. Baker & Smith, of Mt. Vernon, Iowa, will be dispersed at Mt. Vernon, on November 14th. This marks one of the greatest epochs in Aberdeen Angus history. Perhaps no event of the kind, aside from the great Turlington dispersion, the W. M. D. Lee dispersion, the J. Evans, Jr., & Sons' dispersion, Wallace Estill's dispersion, and M. A. Judy's dispersion, has ever attracted so much attention from Angus breeders throughout the length and breadth of the country as this sale, and at none of these other dispersions, not even the celebrated closing out sale of Messrs. Charles Escher, Sr., & Son, was anything like the number of Blackbirds offered that will go under the auctioneer's hammer at this time. The Homestead representative who has been familiar with Angus cattle and has had something to do with writing up and handling all of the dispersion sales previously mentioned, can vouch for the fact that this will be the opportunity of a lifetime for the breeders of the land to strengthen their herd in Blackbird blood, as well as for the new beginner to buy the foundation stock and start aright, so that he will never have to start over again. Among the nine bulls offered, aside from the two great herd bulls, Black Keillor 3d and Black Man, are several fine young bulls of splendid conformation and of breeding that could scarcely be improved upon, as every one of them are Blackbirds, making an offering of the sum total of nine Blackbird bulls. A word concerning Black Keillor 3d. This bull has been in service for a number of years. He was calved Dec. 29, 1899; bred by Mr. Robert Craik; his sire was the great Clyde bull, Clyde of Albion, he by Benevento by Young Hero, he by young Viscount. Benevento was a Blackbird bull, coming through Blackbird of Corskie 685, while his son, Pride of Albion, was a Mulben Pride. Black Keillor 3d's dam was Blackbird of Craikstone. She, too, comes through the famous Blackbird of Corskie tribe and is only four removes from Blackbird of Corskie 685. The disposition of this grand bull is perfection itself. So much so that Mrs. Baker can and does lead him anywhere. He is a bull of superior individual merit and in ordinary flesh has won sweepstakes prize at all fairs wherever shown, defeating the grand champion of the Pan-American Exposition. Black Keillor 3d is a half brother to the great Chansman Chief, his dam being bred at the greatest of all Aberdeen Angus breeding establishments, Sir George's herd at Ballindaloch. The first calf from this great bull was a prize winner in 1903 at the International at Chicago. As he is a sure breeder and active in every way, he will be a valuable acquisition to any breeder's herd who may be wise enough to lay hold of this fellow on sale day. It is only on occasions of this kind that such bulls are placed on the market. Much the same may be said of Blackbird Man, stable companion to and assistant as lords of the harem. Blackbird Man was calved Dec. 2, 1903. He is a double Blackbird, being sired by Heather Blackbird, he out of Blackbird of Turlington 6th, she by Black Knight, one of the richest-bred Blackbird bulls that ever lived, while her dam Blackcap of Linn was by Benevento and her dam, Blackcap of Keillor Lodge, she by Knight of St. Patrick. He is the greatest Pride bull ever imported to America. Blackbird Man has for his dam the celebrated cow, Blackbird of Emerson 2d, a granddaughter of Gay Lad and out of Blackbird of Wellington by Young Wellington, the show bull of International fame. This bull was secured for use on the daughters of Black Keillor 3d. He is one of the thickest, as well as one of the smoothest, two-year-old Angus bulls in the land. He is chock full of breed character, style and finish. He is unquestionably a show bull and would be a troublesome contestant in the show ring, were he exhibited. His dam was a first-prize winner at many of the leading state fairs, while her sire was a prize winner as well, while her second sire, Young Wellington, was the Columbian Exposition champion that has not been lost sight of by the breeders of Aberdeen Angus cattle of America. The good business judgment of Mr. Matt Baker in selecting these two bulls to be used on this herd, has certainly been verified by their produce. It now remains to be seen who will be wise enough to buy these bulls at whatever price they may go at and continue the good work. There has not been an opportunity in many years to secure the high character of Aberdeen Angus bulls that has been mentioned above. Among the younger Blackbird bulls are some equally promising, but are, of course, younger and not so well developed. Of the cows and heifers we shall have something to say later. Suffice it to say at this time that they are a superior lot from a standpoint of rich breeding and individual merit; the only criticism that could be given on any of the offering is that in deference to their future usefulness Mr. Baker has not clothed them with that thickness of flesh that would bring many more dollars to his pocket on sale day. He has preferred that the cattle sell for less money on account of not loading them with flesh so that their reproductive powers might be retained to the fullest extent. As evidence that this is the right course, in order to secure rapid breeders, we will hark back to the records of the Baker & Smith herd which show that in five years there has been a living calf each year produced for every female on the farm of breeding age. Thus the fecundity of the herd has been preserved to that extent that at least in Mr. Baker's hands he has had the assurance of knowing that his herd was doubled in numbers each year. There has never been an abortion in the herd since Mr. Barker became identified with it. This is certainly a remarkable record and is due largely to the common sense methods of Mr. Baker, who is one of the most practical men that has ever engaged in the business. His record as a breeder, fitter and exhibitor of high-class show cattle is an enviable one. He has not only been successful against all comers with the famous black-skins, but was equally success-

ful when exhibiting Short-horns, for it was he that brought out and exhibited so successfully the Missouri-bred cow, Red Bird, that repeatedly defeated at the greatest shows in America all the imported cows that met her in battle array. The sale will be held on the farm adjoining the depot ground of the C. & N. W. railroad at Mt. Vernon, Iowa. Every preparation has been made for the comfort and entertainment of those who may attend this sale. Inasmuch as this sale will be held the day following that of Mr. William Cash and others, of Williamsburg and Holbrook, Iowa, a large attendance may be expected. When thirty-five Blackbirds are offered in one sale it surely means that the Angus world should be stirred from center to circumference. To those who are contemplating the purchase of Angus cattle, we would certainly urge that they send to Messrs. Baker & Smith, Mt. Vernon, Iowa, for the sale catalog which is now out and ready for distribution, and in doing so kindly mention the fact that you were induced to do so by seeing this notice in The Homestead.

Godden's Short-horn Sale.

On Wednesday, November 14th, Messrs. J. & I. J. Godden will sell a draft of fifty head from their well-known herd of Short-horns at their farm, near Bradgate, Iowa. In their announcement they have the following to say regarding their offering: "In making the offering herewith cataloged, we desire to say that we have taken great pains to get the best cattle, and it is a very attractive offering we are now making—nearly all young cattle. It will be seen the breeding is of the best, in well-established families, having had three first-class Scotch bulls. The cattle show the Scotch type, the low-down, blocky type that are so much sought after, and they will be in breeding condition, not overloaded with fat." The Scotch bulls referred to in the announcement are Malcolm 171375, a son of Royal Favorite 140612 and out of Imp. Missie May by Pride of Morning 120551; Lord Mar 116306, a son of King James 103902 and out of Lady Hawthorne by Imp. Royal Ranger, and Prince Malcolm 201060, a son of old Malcolm and out of Brewster Beauty 3d by Prince Victor. The latter bull is a straight Scotch bull of the Marr Beauty family. All the cows with calves at foot, or bred and safe in calf, will be by this richly-bred Scotch bull. He is now four years old and because they are retaining his heifers they therefore decided to put him into the sale. He is a good breeding bull and will be a bargain for some breeder who wants a herd bull. The offering is made up of Orange Blossom, Duchess of Gloster and Beauty tribes among the Scotch, and of the Arabella, Duchess, Sanspareil, Ruby, Agatha and Rosabella among the Scotch-topped cattle. They are selling fifty head, ten of which are young bulls from twelve to eighteen months old. About twelve to fifteen cows will have calves to Prince Malcolm, the Scotch bull referred to above. One of the best families in the herd is the Duchess tribe, and they have quite a number of these in the sale. They are all well topped out with excellent Scotch bulls, are invariably good milkers and have been excellent producers in their hands. In fact the calves at foot and those well along in calf will demonstrate the fact that they are a practical and money-making lot of Short-horns. Blossom Princess is a nice two-year-old heifer, a daughter of Gloster Prince and is one of those good Orange Blossoms. Gloster Lady is a yearling daughter of Prince Malcolm and is a richly-bred Duchess of Gloster. Sunbeam is one of the good cows in the sale. She is six years old, has had four calves and is safe in calf again to Prince Malcolm. There are a number of good cows in the sale, all sired by Scotch bulls. There are eleven bulls in the sale, including the herd bull. Six of these are sons of Prince Malcolm and four are sired by Gloster Prince, a richly-bred Duchess of Gloster bull. The sale will be held at the farm near town, and those attending will be well cared for. When writing for catalog kindly mention The Homestead.

The Great Herd and Show Boar, Pericles H., for Sale.

Very rarely does the public have a chance to buy, and at a reasonable price, a herd boar of admitted power and breeding, strong individuality and a high show record. Yet that is what Messrs. Norrish & Bevington, of Kingsley, Iowa, are now offering for sale. You can buy their great herd boar, Pericles H., for a very reasonable price if you do it quick. Pericles H. is a hog of exceptional worth in all three regards mentioned above. Now three years old he has won the much-coveted honor of second prize at Sioux City at the big interstate fair for the past three years and barely missing first once or twice. He is a boar of medium scale, excellent back, breadth, depth, good underpinning, nice head and finish. He is sired by old Pericles. As a breeder there are few better. Owing to their herd being stocked up entirely with his get they want to sell this boar. If you are a wise Duroc man and can use such a hog you will not delay writing Messrs. Norrish & Bevington at once. Please mention The Homestead when doing so.

Model Boy for Sale.

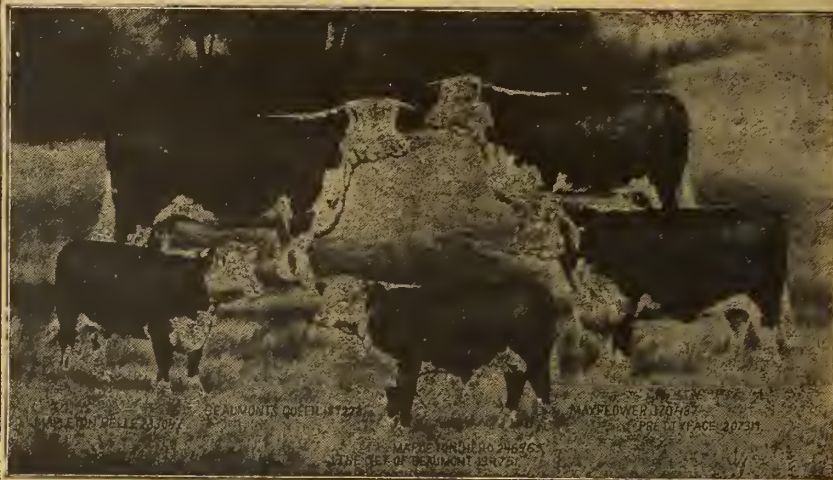

On page 44 of this issue Mr. W. F. Hemmerling, of Dike, Iowa, breeder of Chester White swine, is advertising a choice young boar for sale. He was sired by the second-prize hog at the Iowa State Fair in 1906, W. F.'s Model 12101, and out of the great brood sow, Silver Leaf 20624. In writing about this hog, Mr. Hemmerling says: "Model Boy was farrowed March 12, 1906. He has extra good length, with good, broad back, carrying width from end to end, with well-sprung ribs, good full shoulders, extra heavy in ham, neat head and ears, very heavy body, legs on the short order, but extra good and strong and stands well up on his feet. This pig received first in the under-six months class at our county fair in September, also first in pair under six months, with litter sister. This hog should head some good herd. The first \$50 order gets him."

Hutcheon

HEREFORDS

AT AUCTION, WEDNESDAY, NOVEMBER 7, 1906.

At the Farm near Bolckow, Mo.

THE GET OF BEAUMONT 134751

50 HEAD 40 FEMALES, 10 BULLS 50 HEAD

Among the cows and heifers are several daughters and granddaughters of Fowler Queen, the greatest show and breeding cow ever got by Van Natta & Son's great breeding bull, Fowler. The females of the 1905 show herd are included. Ten heifers are by Beaumont. Others by such sires as Beau Brummel, Lamplighter and Paladin. Among the bulls is Parsifal, the second prize junior yearling at the American Royal. A double Beau Brummel just a year old. Seven sons of the famous Prime Lad. These are consigned by W. S. Van Natta & Son, of Fowler, Ind.

This sale is brought about to settle the estate of the late Jno. Steward and the only things reserved are a few old cows and the herd bull, Beaumont. These are reserved by Mr. Hutcheon as a nucleus for a herd. All trains stop at Bolckow on the Burlington, and Guilford on the Great Western.

Send for catalog, mentioning The Homestead.

DISPERSION SALE OF THE CLOVERLAND HERD

OF

Aberdeen

ANGUS CATTLE

WEDNESDAY, NOVEMBER 14, 1906.

On November 14th, in order to dissolve the partnership existing between Baker & Smith, the entire herd of Cloverland doddies will be sold at auction. The most remarkable offering of Aberdeen Angus Cattle ever placed before American breeders. Forty-eight head of first-class, highly-bred doddies of the market-topping sort. Thirty-five head of the world's most famous family, the BLACKBIRDS. No such an aggregation of the famous Blackbird family has ever yet been offered on either side the water. The two Blackbird herd bulls, Black Keillor 3d 41587 and Blackbird Man 72244.

Nine bulls are included in the sale, the remainder all being females. Show yard material as well as great foundation stock will here be found in abundance. Auctioneers, Cols. Silas Igo and Geo. P. Bellows, with assistants. Mt. Vernon, the place at which the sale will be held, is thirteen miles east of Cedar Rapids on the main line of the C. & N. W. Ry. Attention is called to the choice offering of Angus cattle by Wm. Cash and others at Holbrook, Iowa, on November 13th. Parties can attend both sales.

ABERDEEN ANGUS CATTLE

THURSDAY, NOV. 8th, 1906.

AT

**SOTHAM
PAVILION, Kankakee, Ill.**

HE equal of this consignment has not been offered the public for years. More high class cattle than ever was offered in one sale before. More show cattle than ever was offered before, Blackbird Prides, Ericas, Heather Blooms and other fashionable families. No breeder need stay away because the cattle are not good enough. We are selling cattle that cannot be duplicated. The man who would like to start a herd can do it now and do it proper. Come see for yourself, and if you don't find them good I pay the expense. Send for a catalog and see the finest bunch of pedigrees you ever looked at. We are selling a great bunch of bulls. Biondel is, without doubt, the greatest bull ever sold at public auction, except Prince Ito.

HACKNEY STALLIONS

Good American Bred Stallions, \$800 to \$1000.

First Class imported Stallions, \$1200 to \$1600. Choicest Stallions a Little Higher.

NOTICE

Having concluded to make a change in placing Stallions before the Public account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stud from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars.

The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stables, where we have over 300 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered.

Send for catalog.

THE WORLD'S BARGAIN CENTER
That's what we are known as everywhere and there is reason for it. Our prices as a rule do not represent the original manufacturers cost. Our goods are the best. We do not sell anything but what is in first class condition. Satisfied customers all over this land will confirm this. We guarantee absolute satisfaction.

WE BOUGHT EVERY EXPOSITION
Including the Great \$50,000,000 St. Louis World's Fair, the World's Fair of Chicago, the Pan-American Exposition, Trans-Mississippi Exposition. This has added enormously to our large stock. We have for sale all kinds of building material including lumber, sash doors, windows, and in fact, everything needed in construction of a building for any purpose.

In purchasing the St. Louis Exposition, we secured over \$300,000.00 worth of furniture and household goods, as good as new for further use. It is all overhauled and renovated. Here is a chance for you to get some extremely handsome and fine furniture at half what it would cost you otherwise.

WE SAVE YOU MONEY
You are bound to save big money on your purchases of any kind, from us. There isn't an article that we handle, but what we can sell you at a lower price than you can purchase it for elsewhere. You will appreciate this more and more as you get to know us better. No Sheriff's or Receiver's sales complete without the presence of our alert representatives. We get all the good things in sight. Because we offer goods at lower prices than manufacturers cost has earned for us the good will of thousands of families everywhere.

OUR GUARANTEE
We guarantee absolutely that all purchases of every kind made from us will prove entirely satisfactory and that the material will be exactly as represented. Thus you know that you will receive what you buy and pay for. If the goods received from us are not as represented, return them to us and your money will be immediately refunded. Our method of satisfying customers. There will be no argument about the return of your money. All you need to say is, the goods are not satisfactory and that you cannot use them. You will promptly receive your money back. Send us your orders at once.

OUR REFERENCES
Our Capital Stock and Surplus is over \$1,000,000.00. We cheerfully invite investigation as to our responsibility. Look us up in Dun's or Bradstreet's or any other responsible mercantile agency. Ask any Express Company; write to the Editor of this or any other paper; ask any Banker, or refer direct to our depository—The Drovers' Deposit National Bank, Chicago.

VOL. LI. NO. 45.

DES MOINES, IOWA, NOVEMBER 8, 1906.

WHOLE NO. 2573

REGULATIONS AFFECTING DENATURED ALCOHOL.

The present tax on alcohol, 180 degrees proof, is \$2 per wine gallon. After January 1, 1907, this tax will be entirely removed on alcohol mixed with denaturing materials.

The commissioner of internal revenue, Mr. J. W. Yerkes, has recently published the regulations controlling the making of denatured alcohol, these to take effect January 1st, next.

According to Mr. Yerkes, there will be two classes of denatured alcohol. First, that styled "completely denatured," which will pass into general use for general consumption, and can be purchased at stores without limiting regulations as against the private consumer; and, second, "especially denatured," in which the material demanded by the needs of manufacturing interests will be regarded. As to this latter there are limitations confining it to the special manufacturing industry for which it is prepared.

This especially denatured alcohol will be kept under strict surveillance and governmental supervision.

For the completely denatured article ten parts of wood or ethyl alcohol and one-half part of benzine will be added to 100 parts of ethyl alcohol. In other words, to every 100 gallons of ethyl alcohol will be added ten gallons of wood alcohol and one-half gallon of benzine.

The denaturing process will be accomplished on the distillery premises where the alcohol is produced, in special bonded warehouses designated and used alone for denaturing purposes and for the storage of denaturing materials. These buildings and the operation itself will be under closest governmental inspection and control. Denatured alcohol will supplant very largely the consumption of wood alcohol for both domestic and manufacturing purposes, as it will be cheaper.

While the price of the completely denatured product cannot now be definitely stated, it is believed it will not be more than thirty-five cents a gallon. The price of the specially denatured alcohol will naturally vary according to the cost of the denaturing ingredients selected to meet the necessities of the manufacturing industries. These special formulas will only be used where it is made perfectly apparent to the department that the industrial interests involved cannot use completely denatured alcohol by reason of the presence of wood alcohol or benzine. In that case some other denaturing agent or agents, which will accomplish the purpose of destroying as far as possible, the notable or beverage qualities of the alcohol, and at the same time adapt the denatured article to the special ends desired, will be determined upon. It is

generally conceded that alcohol can be made and sold at a profit at from twenty to twenty-five cents per gallon. This brings it down very near to the present selling price of gasoline. At present, gasoline for power purposes may be said to be without a competitor, but this will not be the case after January 1st. Of course much remains to be done by manufacturers by way of adapting constructive methods to the use of alcohol. However, we have full confidence in American genius to cope with this problem. It is conceded that the passage of the denatured alcohol bill was brought about by the support given the bill by farmers. The keen interest on the part of farmers was due to the fact that the passage of this bill would create a new market for certain classes of farm products, notably corn and potatoes. Incidentally, however, farmers will reap another benefit from the passage of this bill, in the reduction that will eventually be brought about in the price of heating and lighting materials.

PURE-BREDS IN THE FEED LOT.

We have not yet come to the time when pure-bred cattle are so plentiful that they are put into the feed lot to be fitted for the block in any considerable numbers. Not but what a considerable percentage of animals that are now used for breeding purposes should be utilized to that end. Many an ordinary kind of a bull will make rather an extra good steer, and this doctrine is particularly true as applied to hogs. Indeed, there are those who go so far as to say that a barrow show can never be very successful in this country for the reason that even a mean individual, if properly finished, will so cover up as to practically hide his defects, and because of this men will not be

disposed to unsex their good animals.

Two years ago at the Iowa State Farmers' Institute, Mr. R. S. Johnson, in speaking on beef production, said:

At the present prices of all pure-bred cattle, we think it advisable for the farmer to purchase in a small way a few good registered cows, as anyone starting in a small way can in a few years have quite a herd of registered cattle. They eat no more, cost but little more and are surely a joy and satisfaction to any lover of good cattle. After getting a start in registered cattle, the best females should be kept for breeding purposes. The best males may be sold for breeding purposes, but by all odds the majority should go towards supplying the ever growing demands for baby beef. Where the males and females go into the feed lot, the males should be castrated at as early an age as possible and the heifers spayed, and you will find them selling at the same good price in the markets.

This is just as applicable today as when it was spoken. Reasonably good pure-bred beef cows are selling at moderate prices today, and there are few men in the corn belt who own their land who cannot afford from time to time to substitute a few pure-breds for their grades. Let the herd gradually increase until it consists entirely of pure-breds. By doing a little advertising and by selling to neighbors one can, usually dispose of the best ones for breeding purposes at prices considerably higher than the same animals would bring for meat. But the poorer half of the young males and females can usually be fed out, finished at an early age and marketed at a good profit.

There are too many men in the pure-bred business who expect to dispose of everything they raise, good, bad and indifferent, for breeding purposes at pure-bred prices. This very thing keeps the pure-bred business on a much lower plane than would be the case if more of them went to the block.

There is only one thing that will cut

off the sales of inferior pure-bred males and females, and that is when the average farmer realizes that such animals are practically worth no more than grades and refuse to pay more than simply market price at so much per pound. Of course the argument may be brought up that because an animal is pure-bred it may be more prepotent, and while we make allowance for this, at the same time the average man cannot do better than to look well to the individuality of the stuff he buys. He will get enough poor ones even from the very best, and because of this one's foundation stock should be about right in two respects, namely, in blood lines and in individuality.

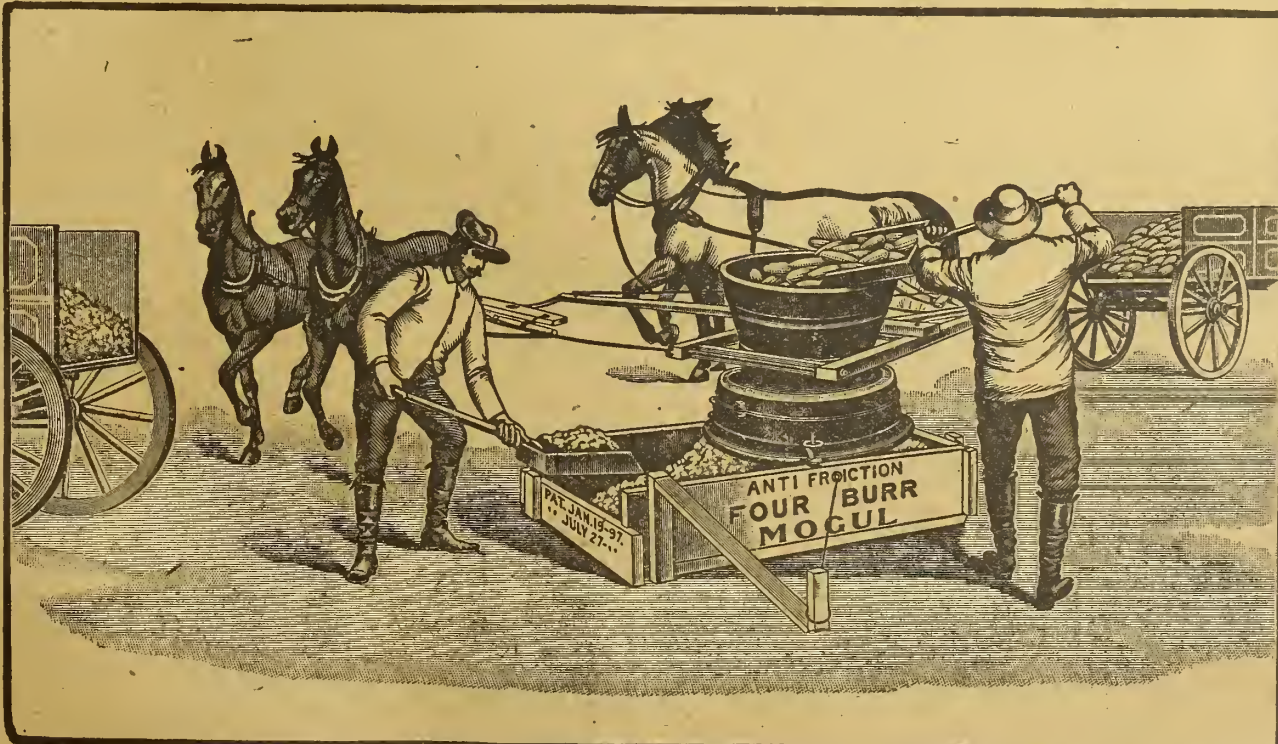

A SUBJECT FOR DISCUSSION.

The mortality among March and April pigs was greater in the spring of 1906 than has been the case in recent years. An inquiry made among men who handle pure-bred hogs revealed the fact that about 50 per cent of the hogs farrowed in March were lost, and the cause of this loss could scarcely in a single instance be given. Men claimed in many cases that their sows were fed no corn but were brought through the winter on fall grain, mill feeds, together with such by-products as oil meal and tankage. Every condition of successful hog raising seemed to be complied with and yet loss resulted.

This brings up a most important subject and one that ought to be discussed thoroughly in these columns. We invite our readers to participate in this discussion, taking for a subject, "The Best Time for Sows to Farrow."

We realize, of course, that men who raise hogs for the market, that is for the meat market,

will not agree with those who are raising foundation stock to be sold for breeding purposes. Men as they look around in the fall of the year for breeding animals, and especially males, always demand size, and there is only one way to get this and that is by having pigs come early in the spring and by feeding them well. We would be pleased to hear from those who believe in having hogs farrowed in March, and also from those who prefer that they should come in April and May. It should be kept in mind that hogs are kept for one purpose, and one purpose only, namely, to give the owner the largest returns for a given amount of food consumed. We have clearly defined ideas on this subject, but shall reserve our judgment until others have taken part in this discussion.

"I have used a Mogul No. 1 mill for four years and ground with one set of burrs more than 30,000 bushels of corn and the burrs are still in good condition.—F. F. Craig, Mt. Carroll, Ill." Owing to the hard, dry condition of corn this season we believe much more than the ordinary amount of grinding will be done and we wish to call our readers' attention to the above illustration of the four-horse, four-burr Mogul mill, that the manufacturers claim will grind from sixty to eighty bushels per hour when operated by two men. This mill has been on the market a number of years and is used by a large number of the best feeders in the West. The size and capacity of these mills for crushing large ears of corn and having two sets of burrs for grinding at once, makes them, we believe, the cheapest method of grinding corn for large bunches of cattle. This company also manufacture several sizes of smaller mills and will furnish free a finely-illustrated catalog and all information. Write to the Bovee Grinder & Furnace Works, Waterloo, Iowa.

THANKSGIVING PROCLAMATION.

The president of the United States, Theodore Roosevelt, has proclaimed Thursday, the twenty-ninth of November, a day of special thanksgiving. His message to the people of the United States is as follows:

The time of year has come when, in accordance with the wise custom of our forefathers, it becomes my duty to set aside a special day of thanksgiving and praise to the Almighty because of the blessings we have received, and of prayer that these blessings may be continued.

Yet another year of wide-spread well-being has passed. Never before in our history or in the history of any other nation has a people enjoyed more abounding material prosperity than has ours; a prosperity so great that it should arouse in us no spirit of reckless pride, and least of all a spirit of heedless disregard of our responsibilities; but rather a sober sense of our many blessings, and a resolute purpose, under providence, not to forfeit them by any action of our own.

Material well-being, indispensable though it is, can never be anything but the foundation of true national greatness and happiness. If we build nothing upon this foundation, then our national life will be meaningless and empty as a house where only the foundation has been laid. Upon our material well-being must be built a superstructure of individual and national life lived in accordance with the laws of the highest morality, or else our prosperity itself will in the long run turn out a curse instead of a blessing. We should be both reverently thankful for what we have received, and earnestly bent upon turning it into a means of grace and not of destruction.

Accordingly, I hereby set apart Thursday, the twenty-ninth day of November, next, as the day of thanksgiving and supplication, on which the people shall meet at their homes or their churches, devoutly acknowledge all that has been given them, and to pray that they may in addition receive the power to use these gifts aright.

In witness whereof I have, hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this twenty-second day of October, in the year of our Lord one thousand nine hundred and six, and of the Independence of the United States the one hundred and thirty-first.

Speaking for the people of the corn belt, it can be frankly stated that there never has been a time in their history when such a degree of substantial prosperity has been enjoyed as during the year 1906. The sunshine and the rains have combined to literally make the prairies blossom as the rose, and there will be stored during the next few weeks in the granaries and cribs of the central West the most valuable crop that has ever been harvested.

Prices of almost every product that is raised on the farms of the central West afford a reasonable margin of profit over and above the cost of production, and this, together with the universally large yields, brings to the farmer an unusual degree of independence.

In addition to the satisfaction we enjoy over our own prosperity, it is gratifying to know that this extends throughout the nation, and the reading of the president's message alone should be sufficient to create within the heart of every American a feeling of devout thanksgiving.

PAN-HANDLE FEED FOR BEEF PRODUCTION.

On the twentieth of January last an experiment was undertaken by the Texas station, the object being to ascertain the value of milo maize and kafir corn when these are made the basis of a ration for fattening cattle. On the date mentioned, twenty steers were started on a grain ration composed of 8½ per cent of weight of cottonseed cake and a mixture of ground milo maize and kafir corn. The roughage used was sorghum hay, kafir corn and milo maize fodder and for a short time some millet hay. Another lot of twenty steers was given a similar ration, with the exception that they were allowed a larger portion of cottonseed cake.

The steers in both cases were started

"The Homestead is certainly the best advertising medium in the country," writes Mr. F. H. Long, proprietor of the Plain View herd of Poland China hogs, Manning Iowa; "99 per cent of my inquiries come through The Homestead." Such expressions are coming to us every day from breeders of horses, cattle, swine, poultry and all kinds and classes of live stock, including pet animals and fowls. No weekly agricultural paper in the world carries so large a number or volume of live stock advertisements as are now regularly appearing in the columns of The Homestead. The pages of this paper devoted to the permanent cards of live stock men, field notes regarding their herds and flocks, and reports of their sales and other operations are not only the most correct and comprehensive attainable information on the current history of this great industry in the corn belt, but constitute an unequaled educational force for the up-building of the live stock interest.

That other advertisers are just as well pleased as the stockmen with results of Homestead advertising is apparent from scores of letters from manufacturers of implements, seedsmen, dealers in farm lands and other general advertisers. "I wish to say," writes Mr. Wm. Lampman, of Omaha, land and immigration agent of the Oregon Short-Line Railroad Company, "that my advertisement in The Homestead has brought the very best results, and for that reason I wish to have it continued for another month." Like results are indicated by the following letter from a well-known St. Louis firm:

St. Louis, Oct. 24, 1906.

Homestead Company,
Des Moines, Iowa.

Gentlemen:—We take pleasure in advising you that the returns from our advertising in The Iowa Homestead this season were phenomenal. In fact, the number of inquiries were almost beyond belief. We were compelled to discontinue our advertising in mid-season because we were unable to take care of our numerous replies. Your paper is certainly "O. K."

Yours very truly,
St. Louis Seed Company.

One of the great advantages of advertising in The Homestead is that the advertiser invariably gets more than he bargains for in the way of circulation and service, for the reason that The Homestead is constantly and rapidly

on six and a half pounds of grain daily and gradually worked up during the next seven weeks, at the end of which time they were on full feed. At no time did they consume more than fifteen pounds each daily. During the six months of the feeding period the steers in Lot 1 made an average daily gain of 2.47 pounds, while those in Lot 2 gained 2.42 pounds. Hogs were allowed to follow the cattle. Practically 500 pounds of pork and beef were made from an acre of milo maize. The twenty steers in Lot 1 were fed for six months and made a profit of \$263.52, while those in Lot 2 realized a profit over and above the value of the feed and the first cost of the steers of \$252.56. In reckoning this profit, no account was taken of the roughage.

HANDLING RIDGLING HOGS.

The following communication has been received from one of our subscribers, Mr. J. W. McColl, of Guthrie county, Iowa:

I have a number of ridgling hogs in my bunch and would like to ask your advice as to how to handle them. Some of my neighbors say that these hogs will not breed, while others claim that they are just as satisfactory for breeding purposes as an animal that is fully sexed. Would you consider it a safe practice to allow the young ridglings to run with one's fattening bunch of hogs? I will not be marketing my fattening hogs for three or four months yet, and, of course, could not afford to turn ridgling hogs in if I thought they were breeders. I would like to hear your opinion and also the opinion of others as to what should be done under circumstances like these.

Ridgling hogs are generally breeders, though no reliable swine man would ever send one out in response to an order for a male pig. We have had some rather costly experience with ridgling hogs, and that experience has resulted in bringing us down to the adoption of but one plan, namely, that of unsexing such a pig com-

pletely, or killing him outright when he is young. After a little experience one will not find it difficult to discover the hidden sexual organ. It means more cutting of course than is ordinarily the case and is an instance where drastic treatment is necessary. From the pig's standpoint, it is simply a matter of giving up the hidden organ or his life, and with hogs around the six-cent mark one can well afford to do a little exploring with the knife in a case of this kind.

A ridgling hog is an all-round nuisance when turned with a bunch of fattening hogs. He will tear around almost day and night and keep everything stirred up generally. Usually he will not take on flesh himself so as to make a marketable pig, so that the owner has to feed him, and in the end you have nothing but a big frame. If you turn him in with your fattening hogs two or three months before they are sent to market, you will find that many of the sows will be piggy and consequently will be docked. We would advise no man to take the chances that would necessarily be involved over the use of a ridgling pig for breeding purposes. He may go back on you after it is too late and as

The busy season of The Homestead's subscription department is now approaching. Soon, subscriptions will be coming in by thousands, taxing the working powers of a large force of clerks to the uttermost and compelling us to employ temporarily scores of additional helpers. These "raw recruits" have to be trained in the art of handling subscriptions, and at best their work is attended with delays and is not entirely free from errors. If, therefore, you feel disposed to co-operate with us in promptly taking care

of all subscriptions, whether new or renewals, the sooner you send in your own and your neighbors' subscriptions, the more effectually you will assist us. Do not wait till the busiest of the busy season and send your subscription when everybody else is subscribing; but do it now, while our regular, trained force is amply able to handle the subscriptions as fast as they arrive. Subscribe today!

The demand among our subscribers for an extension of our "Red Letter Combination" offer through another season has been very strong, and has prompted us to open negotiations with the several publishers interested. The rate of \$1.25 a year for five first-class publications is a very low one and the publishers accepting so large a reduction must content themselves with an exceedingly low rate of profit; but we have succeeded in inducing those interested to renew the deal. So, for the present, on receipt of \$1.25, we will send you or your friend or neighbor The Homestead, the Chicago Weekly Inter-Ocean, the Kansas City Weekly Star, the Homemaker and the Farm Gazette all for one year. If you are already a subscriber for any or all of them and will say so in your letter, your time will be extended for one year.

To those of our subscribers who tried the "Red Letter Combination" last season, it is unnecessary to speak of the advantage of this remarkable offer. The Homestead itself is well worth the price of the entire list. In fact, any single issue of the paper, thoroughly studied and its suggestions put into practice, is worth \$1.25 to any farmer of intelligence and energy. We know of hundreds of instances where a single article has proven worth hundreds of dollars to individual farmers or breeders. The Weekly Inter-Ocean is an old favorite in over a hundred thousand western homes. The Kansas City Weekly Star is a splendid newspaper—a public journal recognized by publishers everywhere as a model worthy of their emulation. The Farm Gazette is beautiful, bright, interesting and instructive. The Homemaker is leaping to the front as a most delightful monthly magazine for farmers' wives. All these for \$1.25 a year is certainly a marvel of cheapness and value combined. We advise our friends to subscribe at once.

a result you will possibly use your next year's crop of pigs.

COPYRIGHTING NAMES OF ANIMALS

The board of directors of the National Duroc Jersey Association at its last meeting made a ruling to the effect that any breeder may, copyright the name of a hog. The copyright fee is to be \$5, but a full page in the Herd Book will be given to the pedigree of a copyrighted name.

This ruling has been made to prevent the misuse of notable names. There are many instances on record where very plain individuals with the blood of a noted sire or grandsire in their veins have fallen heir to the name of the sire, or grandsire, with of course a changed number. According to the recent ruling the owner of a notable animal can protect himself from the misuse of his animal's name.

There is a great difference in machinery, between "improvements" and experimental "alterations." "Improvements" mean changes which make a machine better and increase its usefulness. This is made plain by the Litchfield Spreader story on page 5 this week.

The "New Way" Air Cooled Engine.

"AN EXPERT DAIRYMAN TALKS"

Coopersville, Mich., May 24, 1906.

THE "NEW WAY" MOTOR COMPANY.

Gentlemen:—I am perfectly satisfied with the engine. I cannot find one single fault with it. We start the engine when we get ready to milk and never have to look at it or pay any attention to it until we are through.

Yours very truly, COLON C. LILLIE, Deputy Dairy & Food Commissioner.

Farm Furrows

Turned by a Practical Farmer.

Figuratively speaking, the fields of corn are grinning from ear to ear.

If an apple is to go into cold storage, the sooner it gets there after it has been picked the better.

Nothing causes the rise of righteous indignation more than to see a ninety-nine cent man jerking a \$150 horse.

One of the inducements held out for a hired girl in an advertisement is that there are four good-looking sons in the family.

The labor of the dairyman is a never-ending one. He feeds the cow to make the calf and then feeds the calf to make a cow, and thus it goes on forever.

After all the fuss made about growing ginseng there now comes a new danger in the way of a blight which kills the foliage and therefore heads off the seed crop.

It is about time for some faker to bob up with some new variety of alfalfa with wonderful qualities. A variety that will do well anywhere and live on anything.

A marriage license was recently issued in Chicago for Wojciech Raymniak and Waldyslaw Kaczkoska. There is certainly some room for revised spelling somewhere on the earth.

From now on until next June there will be need of a great deal of sunlight in all the stables. Can it be provided? There is something in sunlight that cannot be provided in any other way.

But little of this year's corn will spoil in the crib. It is too ripe and sound to spoil readily. As a precaution, however, it may be well to scatter the first few loads over a great deal of floor space.

The first permanent settlers of a new country are known in the West as "tender-feet." The first pioneers get into ruts and are pushed out by the enterprising newcomer. This is the history of all new countries.

In the early settlement of Iowa all the straw was burned as soon as the thrashing was completed and Iowa millers then ran all the surplus bran through the "tail race." Both practices have been stopped. These by-products are too valuable now to throw away.

The everlasting foundation of a farm is its fertility. Poor land grows poor crops. Poor crops are a loss to the farmer and a disappointment to the feeder. Putting manure back on land is only giving to the land what belongs to it and the obligation is on the shoulders of the farmer.

An enterprising farmer in one of the New England states unloads hay with a machine run by a gas engine instead of a horse. He says he can unload a load while a man is unhitching the team from a wagon. It pulls up the load, returns the fork and takes the place of a horse and a boy.

When the orchard trees begin to look horns one is at a loss to know what to do. It is hard work to cut out trees where there are too many; and yet that seems to be the cure. There are several ways of cutting them out. The rows may run regularly, diagonally or any way to keep them from "locking horns."

In New York good roads are to be made by "bad men." It is proposed there to set the convicts to making good roads. In some localities they will work out on the roads. In others they will be employed in pounding stone for roads and it is thought that in this way they will compete the least against free labor.

A friend of mine suggests that when it is necessary to give notes to strangers they be made non-negotiable, that is, that they be made payable only to some person, and not to "bearer" or "to order." It will never appear in some "innocent purchaser's" hands. The note can't be disposed of at all. It is not salable. A trickster will not take a note

of that kind, and it may cure the note habit.

A live fly got into a pint of sterile milk in New York recently and in one minute one drop of the milk contained forty-two bacteria—in twenty-four hours the same quantity contained 765,000 bacteria.

A thorough farmer can get more out of the scrub than a scrub farmer can. As a rule that kind of a farmer does not keep the scrub any longer than he can help. A scrub farmer will soon make a scrub out of a pure-bred animal.

From an American standpoint the wages of an agricultural laborer in Russia appears incredible. According to official investigations embracing a decade from 1882 to 1891, the average yearly wages of a male laborer were less than \$32. The cost of his living, \$24 added to it would make the munificent sum of \$56 the average year's wages for a man. The average daily wages in that country for the past five years have run from

eighteen to thirty-six cents per day during plowing time and from twenty-six to forty-four cents in harvest.

A schoolboy living in Wisconsin writes the Furrows man in regard to the pig-scratching business suggesting that it would be better to have a board or a plank on hinges so arranged as to come a little above the pigs' backs and across their runway when they go to and from their swill, and they will scratch their own backs in this manner.

When a farmer sells a horse he must give a guarantee. When the same farmer buys nursery stock he has to wait until the trees come into bearing to see whether he has what he bought. I wonder if in some way the "pure-food law" can be made to operate on the nurseryman, so he will realize the necessity of selling trees true to name.

A bank failure is certainly deplorable at any time and results in shaking confidence that is difficult to restore, but in farming communities these crashes

sometimes bring about good results. In the case of many failures the losers have refused real estate investments because banks have offered a better rate of interest. Land is a safe investment.

A nephew has just completed his circuit around the world. For many years he has been in China, Japan, the Philippines and the island of Guam in the employ of the government. He says telephones have just been introduced in China and that it gives the electrical current about all it can do to carry the Chinese lingo. He is impressed with the idea that America is a very good country in which to dwell.

Evidently there are some people who believe that it is impossible to keep up the fertility of the soil and still keep on raising crops. It can be done by growing leguminous crops and by keeping enough stock on the farm to consume all the forage produced. By following this practice, about as much fertility will be returned to the soil as was removed.

I am familiar with Ridpath's History of the World, and commend it to the scholar as well as to the plain people.
Wm. McKinley

THE Publishers Failure IS Your Opportunity

Dr. Ridpath's labors are deserving of the highest praise. I most heartily recommend his history of the World for study and for convenient reference.
Benj. Harrison.

HOMESTEAD Readers are Offered an Exceptional Opportunity
To place in your homes The World-Famed Publication

Ridpath's History of the World

The publishers' failure places the entire unsold edition in our hands. Brand new, down to 1906, including the Peace Treaty of the Russia-Japan War, beautifully bound in half morocco. We shall sell them first come first served.

At LESS than even DAMAGED SETS were ever sold.

We will name our price only in direct letters to those sending the coupon below. Tear off the coupon, write name and address plainly and mail now before you forget it. Don't delay as there are but a few Sets remaining. Dr. Ridpath is dead, his work is done, but his family derive an income from his History, and to print our price broadcast for the sake of more quickly selling these few sets would cause great injury to future sales.

Here is your opportunity to secure Ridpath's History of the World at the lowest price ever offered—and on easy terms. It will cost nothing to inspect the beautiful specimen pages and let us give you full particulars of our offer.

9 Massive royal octavo volumes, encyclopedia size, 11 in. tall, 8 in. wide, 2 in. thick, weighs 55 lbs., 4,000 double-column pages, 2,000 superb illustrations.

RIDPATH takes you back to the dawn of history, long before the Pyramids of Egypt were built; down through the romantic, troubled times of Chaldea's grandeur and Assyria's magnificence; of Babylonia's wealth and luxury; of Greek and Roman splendor; of Mohammedan culture and refinement; of French elegance and British power; to the rise of the Western world, including the complete history of the United States and all other nations down to the close of the Russia-Japan war.

RIDPATH'S enviable position as an historian is due to his wonderfully beautiful style, a style no other historian has ever equaled. He pictures the great historical events as though they were happening before your eyes; he carries you with him to see the battles of old; to meet kings and queens and warriors; to sit in the Roman Senate; to march against Saladin and his dark-skinned followers; to sail the southern seas with Drake; to circumnavigate the globe with Magellan; to watch that thin line of Greek spearmen work havoc with the Persian hordes on the field of Marathon; to know Napoleon as you know Roosevelt. He combines absorbing interest with supreme reliability, and makes the heroes of history real living men and women, and about them he weaves the rise and fall of empires in such a fascinating style that history becomes as absorbingly interesting as the greatest of fiction.

RIDPATH'S History is strongly endorsed by Presidents Harrison, Cleveland, and McKinley, Jefferson Davis, Lew Wallace, John L. Stoddard, Bishop Vincent, Dr. Cuyler, Rabbi Hirsch, Presidents of Ann Arbor, Amherst, Brown, Dartmouth, Tufts, Trinity, Bates, Colby, Smith, Vassar, Yale, and other Colleges, and by the Great American People, 200,000 of whom own and love it.

RIDPATH is conceded the **Greatest History** ever written. It is the only general history recognized as an authority. It is so beautifully written your children will learn to love it. You should know history in these history-making days. This is your chance to buy for less than ever before. You may pay in small sums monthly, if you wish.

THE HOMESTEAD

A Practical Journal for the Farmer,
Stockman, Fruit Grower, Poultryman,
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10 and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

A LASTING POST.

While in conversation recently with one of our subscribers, Mr. Chamberlain, of Iowa City, Iowa, our attention was called to the lasting qualities of a certain post. This oak post was planted by Squire Chamberlain in 1842 and even yet it is sufficiently sound to hold a gate. This means that the post is at least sixty-four years old. We were informed by Mr. Chamberlain that it was his father's practice to cut post material either in February or March, or in August or September. Just the time that this particular post was cut is not definitely known, though it is one of the four months mentioned.

This brings up a subject that is of vital interest to men who are interested in forestry matters. If any of our readers know of cases where timber has lasted unusually well and if there is any data to hand concerning the time that such timber was cut, we shall be pleased to have the matter discussed through these columns.

Fagan, Browning, Hess & McCabe Duroc Sale.

History repeats itself. Messrs. Fagan, Browning, Hess & McCabe, of Hersman, Ill., have again broken Duroc records in the matter of holding fall sales, having made an average of \$102.18. The highest-priced open sow ever sold at public auction is another achievement of this firm, a daughter of Proud Advance selling to Mr. Ed A. Baxter, of Pawnee, Ill., at \$500. The highest-priced Duroc boar ever sold at auction was a fall yearling boar by Tip Top Notcher and out of Helen Blazes, the dam of the \$1,000 sow Helen Blazes III., and went to Messrs. McNeil Bros., of Bowen, Ill. This boar stood third at Illinois State Fair at Springfield, and was a favorite among many of the breeders for a higher place. Messrs. McNeil are to be congratulated upon securing this boar and he should produce something very good crossed with the get of their noted herd boar, Hanley. Mr. O. S. Gilbert, of Conrad, Iowa, was the competing bidder. A litter brother went to Mr. H. B. Griffith at \$20 and was considered a bargain at that figure. There were many bargains in the sale. While several sold at record-breaking figures, there were many that sold for ridiculously low prices, considering their value. As is always the case with a good sale, there are those present who, when the sale is on, fail to grasp the opportunity presented to them in some well-bred, choice individual, and after the sale pay the buyer a premium to secure an animal sold in sale. Messrs. M. W. Greer & Son, of Rushville, Ill., secured a most excellent boar in Lucy's Proud Advance, a son of Proud Advance and out of Lucy Wonder XXI., the only living member of the Lucy Wonder litter, champion sow at World's Fair, Chicago, in 1893. A sow bred to this boar will certainly prove an attraction in Messrs. Greer's brood sow sale. In the February sale last year four sows out of Helen Blazes sold for \$190 and this past week another litter out of this sow sold for \$150. In summing up this sale, we wish to call attention to records broken: First, highest average ever made on fall sale; second, highest boar ever sold at public auc-

tion; third, highest-priced open sow ever sold at auction. Col. F. F. Luther opened the sale with a strong plea for thoroughbred stock, the Duroc Jersey in particular, and was assisted by Colonels McGowan, Reppert and Keil. A list of animals sold follows:

Lot.	Price.
1 McNeil Bros., Bowen, Ill.....	\$1,000.00
2 H. B. Griffith, Bowen, Ill.....	260.00
3 W. S. West, Hanna City, Ill.....	47.50
4 Seckman & Snyder, Mt. Sterling, Ill.....	45.00
5 Ed A. Baxter, Pawnee, Ill.....	197.50
6 A. R. Fry, Mt. Sterling, Ill.....	30.00
7 O. S. Gilbert, Conrad, Iowa.....	70.00

The Reese Cattle Sale.

A breeder of Short-horns who has been successful in the progress of his business and who has certainly acquired the confidence of his neighbors within a radius of thirty miles, is Mr. J. L. Reese, of New Providence, Iowa, whose very successful sale of Short-horn cattle was held Friday, November 2, 1906. The crowd was largely a local one, with a few buyers from a distance. Messrs. John Lister, H. D. Parsons and Jim Nicholls followed up Mr. Reese's sale from the very successful sale of Mr. John Rasmussen the day previous. These, with a few other buyers from Hampton, Ellsworth and Zeigler, furnished the outside buyers, yet the sale from every point of view was successful. Mr. Reese presented the cattle with little or no fitting, but they showed to be a good, honest, business lot, and it looked like buyers had good values for their money. The older cows that were sired by Double Victor, Mr. John Lister's present herd bull, who had been used during all his earlier days by Mr. Reese, were the attractions of the sale. Mr. Reese has perhaps never used any other bull with as marked success as Double Victor. The frank, honest statements and fair dealings of Mr. J. L. Reese have certainly established him in a favorable manner with all present at his sale. Many of the cattle sold below \$100. The following summary will show the averages, including everything sold but buyers' names and postoffice addresses are given only where \$100 or more was paid:

FEMALES.

Pleasant Hill Blossom, three years, sire Fearless Victor, and cc., Al. P. Mason, Union, Iowa.....	\$160

HELPING THE HUSKERS.

Have you heard how Joel Cagwin, Ames, Iowa, proposes to help you harvest the corn crop? Moreover, he proposes to do it, not for three and a half cents a bushel, but for fifty cents for the whole season. He has made a hit with the men in the corn field with Cagwin's Huskers' Liniment. It is not guaranteed to make the ears slip from the husk to the wagon, but it does help the husker to keep those big cracks and stiff joints from making shucking a misery. If your dealer does not keep it, see the advertisement on page 9. Please mention this paper when you write.

ROOFING

requirements, so far as weather is concerned, are always the same, whether the material is intended for an immense business building or a structure on the farm. The roofing must be sun-proof, water-proof, and fire-resisting. It must be strong and elastic to resist expansion and contraction. There can be no avoiding these issues.

RUBEROID

(REGISTERED U. S. PATENT OFFICE.)

was the first and is today the only roofing made which combines all these qualities. It contains no tar or paper; will not melt or rot. Saturated and coated with Ruberoid Water-proof Compound. Absolutely weather-proof. Burning brands or flying sparks will not ignite it. It has proved its elasticity by enduring torsional strains for years. These are all statements we can prove if you will write to us. Send for samples and Booklet "A."

SAVE MONEY, TIME AND TROUBLE BY USING THE PURINTON FEED COOKER

QUICK and ECONOMICAL.

SIMPLE and DURABLE.

Look at the cut in the center and notice the construction of the Purinton Cooker.

There is little water just where there is the most heat, right above the coals. That's why the Purinton gets up steam quicker than any other cooker on the market.

Naturally, it's easier to bring a small volume of water to the boiling point than a larger volume. That saves you time and fuel.

There are no unnecessary parts to this cooker. It is absolutely safe, practically indestructible and is sold direct from our factory to you at a low price. Made in various capacities to suit all requirements.

Use wood, cobs, coal or anything burnable for fuel.

Double joint in pipe allows pipe to be put in a number of barrels around boiler without unscrewing.

The Last Call for the Shelby County Short-horn Sale.

On Tuesday, November 13th, at the commodious sale pavilion in Harlan, Iowa, where the Shelby County Short-horn Breeders' Association will hold their first annual sale. The offering of forty-five head that will be sold in this sale have been personally inspected by that veteran breeder, Mr. C. W. Daws, who is also managing the sale, and he has taken particular pains to secure the very best for this occasion. There will be sixteen or eighteen bulls in the sale, including a number of Scotch bulls. Among these is Golden Steadfast 182418, a son of Imp. Steadfast and out of a daughter of the Parsons-bred bull, Commodore. Then comes Imp. Pro Consul, Imp. Spartan Hero, Imp. Knight of the Rose and Crown Prince of Athelstane 2d, all noted bulls, and bulls that have made their mark both in the show ring and as breeders. This bull is a roan in color, is five years old, is in excellent condition and is put into this sale simply because Mr. Dayton, his owner, is retaining his helpers. He belongs to the Cruickshank Brawth Bud tribe that has produced so many noted show winners, and he is just in his prime. He will tip the scales at an even ton and is a good individual. Another well-bred bull is Tidy Boy, consigned by Mr. J. G. Westrope, of Harlan, Iowa. He is a son of the Cruickshank bull, Sirocco, and is out of Tidy Girl 3d by Victor Bud, and his third dam is by Imp. Gay Monarch. He is a Frantic, the same tribe that has produced many of our most noted show cattle. He is a splendid individual and has a number of winnings to his credit. Mr. Westrope puts in several other good bulls, nearly all sired by Sirocco, and they are growthy and well developed and any one of these will make a good herd bull. Mr. Daws puts in a couple of extra good bulls sired by his former Cruickshank bull, Banner Chief. Altogether there are sixteen bulls in the sale and they are as good a bunch as will be found in any offering this season. The man that wants a car load can easily get what he wants in this sale. The females are also a representative lot of Short-horn cows, nearly all sired by Scotch bulls and many with calf at foot and bred again. These are sired by such well-known bulls as Imp. Scottish Pride, Bonnie Scot 2d, Bismarck, Baron Victor, Sirocco, Royal Gloster and Imp. Lord of the Manor. We could mention the many excellent cows in this sale, but the catalog will do that, and do it better than we can. Suffice it to say, that they will be there, and in goodly numbers, and it will be a good place to buy and we hope for a good attendance at the sale. Write for catalog to Mr. C. W. Daws, manager, Harlan, Iowa, and be kind enough to mention The Homestead when doing so.

ELECTRIC

IN THE GREAT SOUTHWEST.

News has been given out that prairie fires have been raging in the western portion of the "big pasture" which is soon to be open for settlement. The destruction of vegetation will hinder many from being able to judge the productivity of the soil.

A new ruling in federal quarantine regulations effective only in Indian Territory and Oklahoma is that horses and mules shipped from Texas or any other points for the modified quarantine area of Oklahoma must be dipped the same as cattle. This is done to prevent the spread of fever ticks.

The new interstate commerce law stands in the way of Kansas farmers. The low rates formerly offered by railroads to men looking for work in Kansas cornfields will not be given. Now, huskers will be compelled to pay full fare.

Professor Hanson of South Dakota, now a special agent for the government, has just discovered a new species of potato which will produce more alcohol per acre than any other kind can produce on several times the same area.

There are now in the rural mail delivery service of the country 36,437 carriers. The department has recommended an increase in their salaries.

A railroad in Indiana is testing the value of cement telegraph poles. These are about the same shape and size as the wooden poles and weigh 2,500 pounds each.

A small prairie fire fourteen miles west of Kansas City caused considerable excitement and damage recently. About seventy-five men fought the flames and checked them before they had covered more than a quarter section.

A company has purchased 60,000 acres of land in Presidio county, Texas, which they will devote to the raising of Durum wheat. A large acreage will be put in this fall. While the price of this variety of wheat is several cents below that of other kinds, it will certainly not remain that way long, as every conceivable test has given durum flour the equal of the average run of flour on the market.

A settlement of thrifty Italians are growing wealthy by making wine in Northwest Arkansas. The soil is rocky and can be purchased at low cost, but it seems well adapted for grape culture. In all there are about 150 acres of vineyard. Some 500 men and women are in the work and some yields are as high as 600 gallons per acre.

From work done at the Oklahoma Experiment Station with Bermuda grass, it would indicate that there are remarkable possibilities in this grass for pasture or hay crop. Three cuttings were made this season, June 12th, August 2d, September 18th, respectively, yielding in all five tons of first-class hay, much superior to the wild grasses which produced less than half the amount on adjoining land.

Leading negroes of Oklahoma and Indian Territory have organized a protective organization. The purpose is to prevent crimes which lead to and cause lynching. The company is capitalized at \$25,000.

Fishing Tools for Recovering Lost Tubing and Pumps.

To the Editor of The Homestead:

Having been a user of iron pumps of various kinds for many years necessity has caused me to invent tools to recover pump tubing and rods that had, by accident, been dropped into wells.

At one time I was putting a pump having 4-inch tubing into a seventy-foot drilled well when forty feet of the tubing slipped from the lowering device and

fell to the bottom of the well. Here was a predicament. How to regain that forty feet of four-inch tubing and pull it back to the top of the seventy-foot well was the question, and I solved it in the following manner:

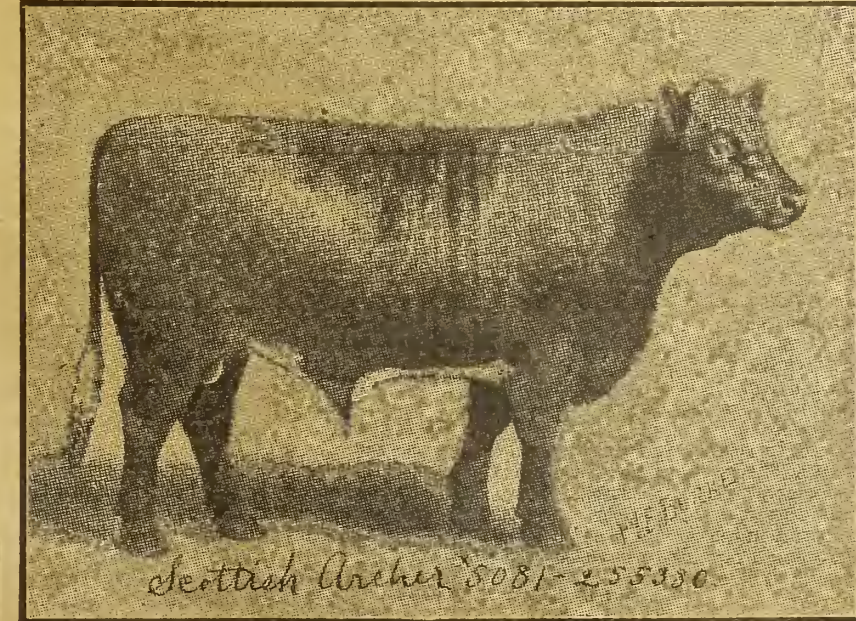

Take about two feet of old wagon tire one and a half inches wide or wider and bend it around until the two ends meet, but leaving an opening at the top in which to fasten the pulling rope or chain; also about two inches from the lower end bend the two sides apart so as to form an opening or sort of slot into which can be inserted two sharp steel jaws, side by side, in this opening and pointing in opposite directions out of this slot. Drill holes through the sides of the slot and also a hole in the broad end of the steel jaws a trifle larger than the rivet that is to be put through the jaws, it being essential that the jaws play loose on the rivet that is to secure them in the slot. These jaws must be made hard and sharp and just such a length that in lowering the tool into the pump pipe they will slide down points upward and yet when the pull upward is made will gouge outward and thereby secure a hold into the sides of the pump pipe and sustain the load until the pipe is brought to the top.

In technical terms this device is known as a "Casing spear." The lower end of the spear should be drawn to somewhat of a point so that it will the more readily enter the pump pipe. In my case I had the windmill tower to which to fasten the pulling tackle; in other cases a tripod could be erected over the well. I hereto attach sketches, Fig. 1, 2 and 3, that will give some idea of what this casing spear looks like.

For smaller pump pipe than three or four inches I made what I will call a pump-pipe grab, which is made by taking a piece of iron about one foot long and three-quarters of an inch square and drawing the ends to sharp points; bend this iron into something like an "S" shape, the distance between points of the "S" and the main stem of the "S" being sufficient to form an opening to admit a two-inch pipe. When the iron is bent into the proper shape weld a loop or iron perpendicular to and at the center of the "S." This loop is to fasten the rope to when the grab is to be lowered into the well.

To secure the lost pump pipe, lower the grab into the well until it is some distance below the top of the lost pipe and then twist the rope so as to start the grab circling around in the well. When, if you have the same luck I have always had, you will soon feel that the tool has a hold around the pipe. When you have secured this hold pull on the rope. The weight of the pump pipe will cause the grab to tilt sideways, thus causing the sharp edges of the square iron to secure a binding hold on the pipe and bring it out.

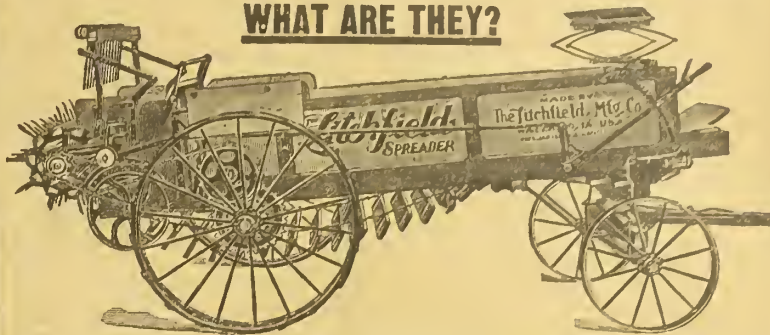

To "pick up" lost pump rods I have

The subject of the above illustration represents the splendid Cruickshank Polled Durham bull, bred and owned by Mr. S. P. Wenger, of South English, Iowa, and is consigned to the big combination sale at Harper, Iowa, November 15th. He is sired by Pirnce of Pallas X, a Double Standard Polled Durham bull bred by J. Miller. He is a dark red and is out of an imported Cruickshank cow, Imp. Ruby 32d by Mountain Archer. She belongs to Mr. Cruickshank's celebrated Brawith Bud family, hence this is an exceptionally well-bred Scotch Polled Durham bull, suitable to head any herd of this growing popular breed. He is a very promising bull, somewhat hunky and of show-yard character. Tempting offers have been refused for this bull because of the fact that he was listed for sale on November 15th, and was held as an attraction.

IMPROVEMENTS

WHAT ARE THEY?

CHANGES in a machine are not necessarily improvements. The popular demand for "improvements" oftentimes leads a manufacturer to "alter" and "change" a machine to fill this demand from the consuming public, for an "improved" article.

The policy of the Litchfield Manufacturing Company is, always has been, and always will be, to make no changes that can be avoided. The principle of maintaining a good thing and sticking right to it when you have it, means success. It means something sure and something you can depend on.

You will find the improvements on the Litchfield Spreader (which, by the way, have been coming quite rapidly of late) are the result of new discoveries and an effort to overcome all the objections that have ever been offered to any manure spreader. It is the policy of this company to make the Litchfield Manure Spreader as near "break proof," "fool proof" and "trouble proof" as modern skill and ingenuity can produce.

Reducing the number of pieces, reducing the complicated mechanism, increasing the strength and where necessary the size of all working parts, is the aim towards durability. Introducing scientific theories that have been worked out along practical lines that will make the work easier on the horses, the distribution better, and the general strain on the machine lighter, are the points aimed at in producing a better machine.

It needs only a careful inspection to convince anyone that this policy has been carefully followed out and that the principle of "improvements" rather than "alterations" has been the guide throughout the entire construction of this modern and we may say, wonderful machine.

The expense to the Litchfield Manufacturing Company connected with one single improvement that will make the machine better is nothing when compared with the saving to thousands of customers on the thousands of machines, all of which are covered by this one improvement.

Will our readers just think this over and try and appreciate how much this thorough care on "the key machine" means to the many thousand customers who are buying and paying for the many thousand duplicate spreaders. Please read this article next week, as it will be interesting.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

made a very simple and efficient device by taking a rope long enough to reach down into the pump pipe or tubing and to where the pump rods are. To the ends of this rope attach six or eight pieces of stout twine one foot long, and to each of these pieces of twine tie a half or three-quarter-inch nut. Lower the rope and nuts into the pump pipe until you are below the lost rod, then twirl the rope between the palms of your hands for some little time. This action causes the short pieces with the attached nuts to tangle about the rod in such a way as to enable you to pull it to the top of the tubing.

A neighbor of mine made a tool with which he picked up a hatchet that had been dropped into a thirty-foot dug well and brought it to the top. To do this he took a wagon rod and twisted the thread end into a flattened spiral and fastening this to an extension pole he lowered it into the well and began

Handling Separator Cream.

The care that the cream receives while it is on the farm plays a very important part as to the quality of the butter. In one sense, under present conditions, we might say that the farmer is the man that ripens the cream; for it is often the case that the cream contains all the acid that is necessary when it reaches the creamery. If acid is what we are working for, all right, but we are after flavor and in order to get that rich, creamy flavor in our butter we must have the cream in good, clean, sweet condition.

The butter makers in our smaller creameries can do a great deal toward getting the farmer to take proper care of his cream, while the butter maker in the larger centralizing plants can do nothing but make butter and plenty of it.

Here are a few things the butter makers should know and explain to the farmer:

Barns should be kept clean.

Milking should be done under the best of conditions.

Milk should be removed from the barn to the milk house as soon as possible after milking is done, and separated while it is warm. The cream should be cooled as soon as it is removed from the milk, and warm cream should never be mixed with cold cream.

The cream should always be delivered while it is sweet, four to six times per week in summer and three times in winter.

The farmer should skim a rich cream, from ten to twelve pounds per hundred pounds of milk. The creamery does not pay anything for the skim milk that is in the cream. A small amount of cream can be handled to better advantage than a larger amount and there is less danger of the richer cream becoming sour. Cream, varying in per cent of fat from 30 to 45 per cent, can be handled to a better advantage by both farmer and creamery man.

One of the reasons why so much poor cream is delivered is because the farmer has not a suitable place to keep it.

The following plan has worked satisfactorily: It requires an oil barrel burned out, placed in the milk house or between the pump and the stock watering tank. Between the first and second hoop drill six or eight one-inch holes at equal

distances. Just below the second hoop drill one one-and-one-half-inch hole. The water pipe from the well should enter at this point. On the inside of the barrel place a wooden trough to carry the water to the bottom of the barrel. In the side of the barrel, next to the water tank, and above the third hoop, drill a two-inch hole and connect this with a pipe to carry the water to the tank. A tight box can be used in place of the barrel. An arrangement of the above description will hold all the cream produced upon an average farm and the cream will be in a fairly good condition for a four-day-per-week delivery, providing that all the water needed for the stock has been passed through this barrel.

We often underestimate the importance of frequent deliveries. The average producer of milk has not the facilities to keep the cream more than three days and even then in a number of cases the cream is not in a fit condition to be made into butter of good quality. It is true that the cost of getting the cream to the creamery must be considered, but it should not be done at the expense of quality.

As a rule, the best results are obtained when the cream is delivered by the producer, or when several patrons in one community take turns in delivering the cream. When this method cannot be followed and the cream cannot be shipped by rail, do the next best thing, that of collecting the cream by means of the regular cream haulers. The man in charge of the wagon should know the grade of cream desired. He should be a man that would treat all farmers alike, and if he found a few of the farmers were not taking proper care of the cream, he should be able to give them a little friendly advice.

The most satisfactory method of handling the cream on the wagon is in the thirty-gallon jacketed cans, fitted up with floats.

The wagon should be covered and fitted up with springs.

The driver should be furnished with a scale with a removable cover, a stirrer, the base being of heavy rubber, to be used to scrape down the cream from the can. The hauler should not rinse out the farmers' cans with water. Have one small dipper, a hook with the patron's name and number, and a sample case to hold enough bottles to have one for each patron. These bottles should be the heavy one-by-five-inch tubes in place of the long nine-inch tubes so frequently used. They hold more, and are easier to fill and empty.

Make regular trips. Call on all the patrons, except when they have told you they would churn. Never fail to call for the cream because the patron has a small amount and thinks he can hold it until the next time. One gallon of off-

Beef Making As a Business

Beef is made very much like any manufactured article. The internal organs of the steer represent the machine and the feed is the raw material. To grow beef the raw material or feed must contain every element of the animal body—but by combining the different grains, fodders, etc. commonly raised on the farm, a perfect ration can be formed—after obtaining the proper ration your ingenuity should be exerted to see that this ration is properly digested and converted into profit.

DR HESS STOCK FOOD

the prescription of Dr. Hess (M.D., D.V.S.) was designed for this particular purpose. Dr. Hess being a doctor of medicine and also veterinary surgery learned from his experience in the practice as well as from such authorities as Professors Winslow, Dun, Quitman and all the most noted writers that bitter tonics would increase digestion, iron would make rich, red blood, and that nitrates of soda and potassium would assist nature in throwing off the poisonous waste material from the system. These ingredients he combined with nature's roots, herbs, barks, seeds, etc. and this formula has become so successfully famous that every pound is **Sold on a Written Guarantee.**

100 lbs. \$5.00

25 lb. pail \$1.60

Smaller quantities at a slight advance.

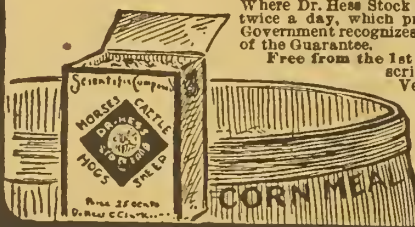

Except in Canada and extreme West and South.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the Guarantee.

Free from the 1st to 10th of each month.—Dr. Hess (M.D., D.V.S.) will prescribe for your ailing animals. You can have his 96 page Veterinary Book free any time for the asking. Mention this paper.

CLEVELAND CREAM SEPARATOR COMPANY,
Dept. H, 33 Michigan Avenue, N. W., Cleveland, Ohio.

flavored cream will spoil several gallons.

Weigh all of the patron's cream in your own pail.

Do not take out the sample for testing until you have weighed and thoroughly mixed the cream. Fill sample bottle.

Be sure your sample bottles are not mixed, and that each patron is credited with the correct amount of cream.

Start early and do not stop longer than necessary.

One of the essential things that a man in charge of a hand-separator creamery should know thoroughly is the butter-fat determination of cream testing. This is often the cause of a great deal of trouble, especially in neighborhoods where the farmers have not confidence in the butter maker and where unfair competition has been practiced. No one is free from mistakes, but mistakes are more apt to occur when the work is done carelessly.

The system of testing cream every time it is delivered is probably the most satisfactory if plenty of time is taken, but when a man has to crowd in fifty to one hundred samples a day after the other work is done, he cannot give it the time it requires.

I would prefer to see a system for determining the total amount of butter fat delivered by a patron for a week or fifteen days by the use of the composite sample. In that case, only one fat determination would be made, instead of four, or several. Many farmers cannot understand why their cream varies from day to day. They do not consider that there are various causes for variation in test of cream, such as changing the speed of the bowl, temperature not always the same, more milk going into the bowl one time than another and variation in the amount of water or skim milk used in rinsing out the bowl, etc.

By the use of the composite they would not have as many tests to compare. Sufficient work has been done to show that an accurate determination of butter fat delivered can be made by the composite system.—[Address by C. E. Lee, before Illinois Dairy Association.]

Where to Place the Separator.

It is reported that thirty cream separators are sold to Iowa farmers every day in the year. In the last five years

That is What We Offer You in the

Iowa Dairy Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

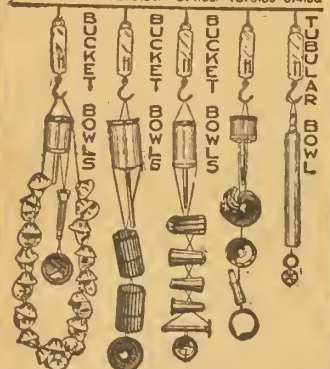

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

Saves Hours of Cleaning

Of course your wife would try to wash even the worst cream separator bowl properly twice every day. But why ask her to slave over a heavy, complicated "bucket bowl," like either

12½ lbs. 12½ lbs. 8½ lbs. 10½ lbs. 6½ lbs.

of the four on the left? Why not save her hours of cleaning every week by getting a Sharples Dairy Tubular Cream Separator with a simple, light, Tubular bowl, easily cleaned in 3 minutes, like that on the right? It holds the world's record for clean skimming.

Sharples Tubular Cream Separators are different—very different—from all others. Every difference is to your advantage. Write for catalog M—121, and valuable free book "Business Dairying."

HILLCREST Butter-herd Holstein Bull Calves. The best money maker to head dairy herds. Write to day. No females to sell. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

conclusions of others are often helpful.

The first thought is to set up the separator in the house; in the back kitchen or store-room. There are many things to favor such a location. The environment will be cleaner in all probability than in any other place. It will be handy for the housewife to clean, whenever her time admits. It will not be forgotten as it is sometimes when it must be brought in by the boys from the barn or outbuilding. Besides the aggravation of having the tubes freeze in cold weather will be avoided. On the other hand much dirt will be tracked into the house by the milkers and there is always some slopping when milk is separated. The skimmed milk will all need to be carried back to the barn which lengthens chore time. In warm weather the milk utensils attract flies and altogether there are many disagreeable features of keeping the separator at the house unless there is provided a special room, apart from the kitchen or other rooms, that is kept scrupulously clean, closely screened and well ventilated,—in short a sanitary milk room.

Sometimes the cellar is used, but the location is generally less favorable than above, as light and ventilation are poor as a rule, and unless there is an outside entrance handy from the barn it is very inconvenient to reach.

With these objections in mind, a location in some one of the outbuildings seems to offer more points of advantage. To a few the idea of keeping milk utensils in the barn may at first seem repulsive, but this is done on many farms that have a reputation for first-class dairy products. The advantages of this plan are so many that the farmer who milks only eight or ten cows will find that in the end, it will pay to fit up a good milk room in, or adjoining, the stable, that is if the stable is a good one and permanent. In such a location the milk utensils are always at hand. The skimmed milk is easily handled and can be fed warm to the calves, not over twenty feet away in many barns. The pails can be rinsed out in cold water at least once a day, and all that needs to be taken to the house is the cream and the parts of the separator. In this way the dairywork is concentrated; it can be turned off faster and more efficiently. Thus the disagreeable features that attend the work at the house are avoided, much to the satisfaction of all.

Many ideas can be gained on the construction of the milkroom, by a bit of study and observation. It need not be an expensive affair, but it should be well lighted, frost-proof, ventilated and made so that it may be kept clean. Have it in a corner of the building if convenient so that two windows are possible and a current of air can draw through the room, which need not be over six feet square. To be frost-proof the sheeting should be double with paper between. An economical inside finish is whitewash, which can be applied to rough boards, and if renewed once a month will keep the room clean and free from odors, if the door to the stable is kept closed during the day and air is allowed to circulate through the ventilating windows. A tight floor of ordinary pine will do, though cement is better.

Now these points and suggestions are only a few of the most important ones. There are many details to be worked out, and many little conveniences that can be picked up by observation. A fine way is to build the milk room as a lean-to where splendid ventilation will be assured.

A room such as above described should cost only a few dollars and be within the purse of every farmer. The ideas can be improved upon if a more expensive milk room is desired; however it such a room as we have above described is kept clean and free from odors it will serve its purpose well. Try the separ-

ator at the house and in the meantime pick up ideas and plan for a milk room at the stable as sanitary and convenient as your means will admit.

L. E. Froeger.

DIFFICULT CHURNING.

The following inquiry comes from one of our subscribers at Persia, Iowa:

Will you please inform me through the columns of your paper why we have trouble with our cream in churning? It takes from two to three hours to get butter and after about one hour's churning the butter fat forms into fine particles, which gives it the appearance of being somewhat curdled. Our cows have access to running water, are salted once a week and have an abundance of blue grass and clover pasture. The milk is set in a cold water separator, water and milk mixed.

It is not an uncommon difficulty to have long churnings at this time of the year. Many of the milk cows are being "stripped" and in such milk the fat particles are small and difficult to bring together. It is not unlikely that the manner in which the cream is skimmed will tend to reduce its thickness also. If the cream is too thin a slow churning is sure. With the advent of cool weather the time of ripening must be extended and it is just possible this has not been considered, so that the proper amount of acid has not been formed to cut the film around the fat globules, so that they will unite on contact with each other. No practical improvement could likely be made in the management of the herd so we suggest three remedies that may remove the difficulty.

In skimming do not get any more of the milk than is possible, that the cream may be thicker. Ripen the cream better. If only one churning is done each week, keep each day's skimming separate, then mix all the cream together on the day previous to the one for churning and the ripening will be more uniform. Cream that stands several days in a warm place and gets bitter will come slow also. Try a different temperature of the cream. When about the right amount of acid is present for churning the cream should be what some would call unpleasantly sour; the proper temperature for churning is between 50 and 60 degrees Fahrenheit.

Greer's Duroc Sale.

The initial sale of the Grand Champion Circuit of Duroc Sales in Illinois was that of Messrs. M. W. Greer & Son, of Bushnell, Ill., on Monday, October 22d. Breeders were inclined to wait until later in the circuit before making purchases. Messrs. Manlove Bros., of Bowen, Ill., topped the offering, paying \$500 for Illinois Chief, a son of Tip Top Notcher. This boar was a prize-winner at Illinois State Fair this year in strong competition and will add strength to the good herd of Messrs. Manlove. An average of \$50 was secured on the entire offering. Col. J. C. Keil opened the sale and was assisted by Colonels McGowan and Reppert. A list of animals selling for \$20 or over is given below:

1 Illinois Chief, Manlove Bros., Bowen, Ill.	\$500.00
2 W. L. Persinger, Bushnell, Ill.	66.00
3 Col. Fred. C. B. Allison, Tennessee, Ill.	61.00

9 W. T. Moore, Terre Haute, Ill.	47.00
10 R. H. Quick, Fiatt, Ill.	25.00
11 W. T. Moore	26.00
12 Manlove Bros.	27.00
13 R. L. Comer, Carlinville, Ill.	50.00
14 Same	31.00

THE HARVEST THAT NEVER ENDS.

Through fall, winter, spring and summer the harvesting of the "milk crop" continues year in and year out. The ever faithful cow never fails to add a goodly sum to each year's revenue from the farm. Yet how little many do towards making the most of her product. Hundreds of thousands of dollars are lost yearly by cow owners through failure to employ a centrifugal cream separator and thereby secure every particle of cream from the cow's milk. Over 750,000 DE LAVAL users are daily proving that the increased gain in the quantity and quality of the "milk crop" is from \$10 to \$15 per cow each year when the

DE LAVAL CREAM SEPARATOR

is used, to say nothing of the time and labor saved. Isn't it worth your while to investigate such a saving? If you own three or more cows the practice of economy and good business methods in the care of their products demands a DE LAVAL machine. Remember that one will last from fifteen to twenty-five years, and that it can be purchased upon such liberal terms that it will earn its cost and more while you are paying for it. Illustrated catalog and full particulars sent free upon request. Write today.

ONE WAY SETTLERS' RATES.

To points in Nebraska, eastern Colorado,

Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minne-

THREE THROUGH TOURIST CARS TO CALIFORNIA

The Chicago Great Western Railway offers choice of three through tourist sleeping cars to California each week via different routes. One car goes via Kansas City and Santa Fe route; one via Kansas City and Rock Island El Paso route and one via St. Joseph and Santa Fe. No other line offers such a choice of routes. For full information apply to E. J. Sawyer C. T. A. 514 Walnut St., Des Moines, Iowa.

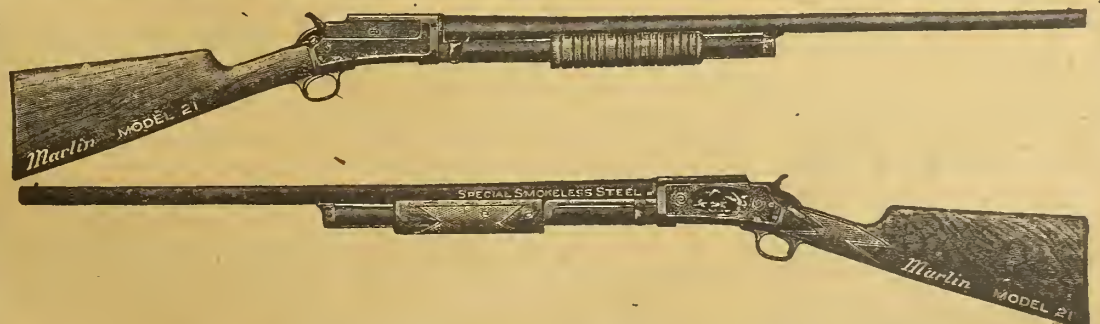

Better Than Ever

No matter what separator you are now using—No matter what separator you are thinking of buying—No matter how you now handle your milk—you ought to examine the

Improved Frictionless

EMPIRE Cream Separator

It won't take you long to see its good points—and it's worth a whole lot to you in good hard money to find the separator that turns easier, is more simple in construction and does better work than any other. All we ask is that you investigate. Send today for catalog and valuable dairy book. Empire Cream Separator Co., Bloomfield, N. J.—Chicago, Ill.

The two rifles illustrated above, Model 21, grade A, and Model 21, grade B, appear in the new catalog of the Marlin Fire Arms Company, of New Haven, Conn. The first one fires six shots with one loading and weighs from six and three-quarters to seven and a quarter pounds. The second one also fires six shots and weighs from six and seven-eighths to seven and a quarter pounds. The prices are \$22.25 and \$38.50, respectively. This company is offering an exceedingly fancy line of fire arms and the prices are right down to the bottom. No father can spring a more happy surprise on his boy than to present him with a Marlin closest margin. Write for catalog so as to secure full description of the fire arms manufactured by this company and compare prices with your local dealer. You will find that you can do much better by dealing directly with the factory instead of with middlemen. The advertisement of this company is found on page 15. For catalog and all other information address the Marlin Fire Arms Company, New Haven, Conn. Please mention The Homestead when writing.

I CURE CANCER

MY MILD COMBINATION TREATMENT IS
NOT A NEW REMEDY.

It has the experience of years back of it and has cured hundreds of cases where the hand of death seemed to forever have closed upon them. Endorsed by physicians, ministers, bankers, business men and others.

Treatment Not Painful

There is no necessity for the patient enduring the intense pain caused by applications of caustics, burning plasters, fiery poultices, etc. Scores of the most advanced cases of cancer have been cured by my Mild Combination Treatment entirely without pain.

BEWARE OF THE KNIFE

No case of Cancer was ever cured by a knife operation. The patient suffers untold agony and shortly finds himself in worse condition than ever. I cure cancer by a combination treatment. Local treatment destroys the deadly cancerous growth; constitutional treatment drives the disease out of the system, thus preventing its return.

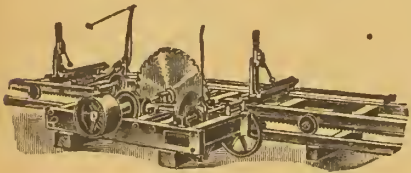

Names of a Few of the Many I have Cured
Mrs. Anna E. Guffy, Arcadia, Kans., Cancer of Breast.
Mrs. Frances Downey, Slidell, La., Cancer of Jaw for 14 years.
Mrs. A. E. Foyt, Rosebud, Texas, Cancer of the Womb after operation failed.
Mrs. D. E. Stone, Harper, S. C., Cancer of Lip after operation failed.
Mrs. J. W. Groshong, Wright City, Mo., Large Cancer in the Forehead.
Mr. N. J. Bell, Newburg, W. Va., R. No. 2, Box 11.
Mr. Peter L. Rice, 1235 14th St., Des Moines, Iowa, Cancer of Stomach.

FREE BOOK—CANCER AND ITS CURE

I send this large book to sufferers free of charge. Tells how and why my treatment cures. If you cannot come to my office for treatment I can cure you at home. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—do not give up hope but write at once.

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

Mr. Abraham Rank, of Minnesota, writes "Being interested in your hints and devices department I thought to render some assistance.

To all your readers who are interested in feeding horses, and especially those who have horses that are inclined to bolt their feed, let me suggest a trough constructed on the plan of a self feeder. I had a horse that was a very bad bolter and I had devised a trough like the one I herewith enclose, since which time I have had little trouble with him. The feed is placed in the hopper and is fed down in such a manner that the worst bolter can't bolt his feed."

Mr. Henry Brown, of Cass county, Iowa, writes "I was fortunate enough to obtain from the railroad a piece of railroad iron about four feet long for use as an anvil. For several years it rested on the floor of the work shop and whenever it was used I would stoop down and pound various pieces of iron into shape. As I grew older I experienced a difficulty in stooping down to work with the anvil and I devised a bench for it as shown in the enclosed sketch. One end of the piece of iron is allowed to project further from the frame than the other so as to give room to work over the end as will sometimes be necessary. The illustration is the best description of how it is constructed."

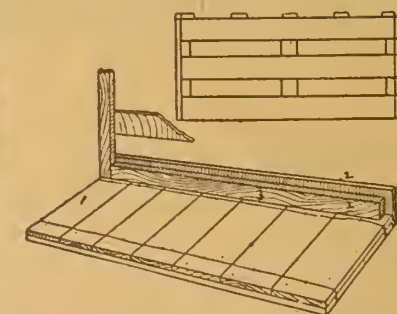

Mr. J. B. Schenk, of Kansas, writes: "I send you a sketch of a sewing horse to be used in repairing harness. To make one first construct a bench about four feet long using 2x4's for the body and 1x4's for the legs. The clamps should be made of oak with a cleat across the top for holding the leather piece in place. To this clamp is attached a small frame projecting out at right angles and the device for holding the clamp shut and opening it consists simply of a piece of broken buggy top hinge. By bending the hinge at the joint the clamp opens and when made rigid again the clamp closes. For operating this device a common stirrup will be found helpful."

Souser Bros., of Iowa, sends us a sketch of a metal pig trough describing it as follows: "A tinner can make a trough like the one we describe and it will be found better than wooden troughs. It is made of an iron frame

and No. 24 galvanized iron. Our troughs are made twenty inches long, ten inches wide and six inches deep. The end frames are made of old wagon tire and the sides of three-eighths inch round iron. We have not only found them better than wood but we have found them to be cheaper. No more wood troughs for us."

Mr. Victor Wiley, of Illinois, writes: "I notice in an issue of your paper a few weeks ago a party asks for a

plan for making a hog crate that will hold a thousand-pound hog. I think I can give the information since I have had a great deal of experience making

Make a Fire-Test Before You Buy

To prove our claims for the fire-resisting properties of Rex Flintkote Roofing, we will mail you on request a sample to test. Lay a red-hot coal on it and see what happens—or rather, see what doesn't happen. The coal dies out, but the roofing doesn't burn. Not only does this roofing successfully resist fire, but it makes an absolutely damp-proof roof, and will wear after other roofs are gone and forgotten. We are not trying experiments. Our firm has been in business since 1837.

Rex Flintkote Roofing affords more kinds of protection to your buildings and their contents than any other roofing. Everything needed in laying comes in the roll. Any laborer can lay it.

Send for Free Sample, nearest dealer's name and booklet on roofing. We make a special red paint for those who want a red Flintkote roof. Enclose with your letter 4c. in stamps and we will send a 32-page book—"Making Poultry Pay."

such crates. Take two 1x10 boards eight feet long and nail 1x12 boards crosswise as shown in the bottom of the crate in the illustration, the short boards to be three feet long. For sides use 1x8 eight feet long and there should be three of them. The crate should be forty inches high. At the bottom of the crate it will be better to reinforce the sides by the addition of a piece of 2x4 that comes out to the corner post. A wire should be stapled to the bottom next to sills and passed around underneath the floor. A crate made in this manner will be strong enough to hold a bull."

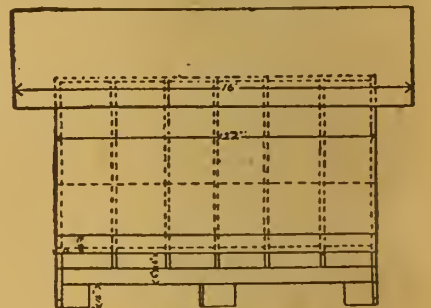

Mr. Mark E. Rankin, of Madison county, Indiana, writes: "I have heard a great deal of the self-feeder in feeding cattle and I would like to have you give me such information through the hints and devices department as you can conveniently, and perhaps it will interest other of your readers." The plan of a self-feeder will depend largely on the character of the feed to be fed to fattening cattle. In the corn belt, and in fact wherever beef cattle are fed for market in the United States, corn in some form is the principal ration used. Corn has been successfully fed to cattle in broken ears, snapped, shelled, crushed, corn and cob meal and corn meal. It will, therefore be necessary to make some minor alterations in the construction of a self feeder to make it "give down" when the various feeds are employed. In making the self feeder it will be necessary to make it of sufficient size for the number to be served and of sufficient storage capacity to last for several days. The follow-

SECTIONAL END VIEW.

ing are the directions for building a self-feeder as given by Professor Mumford: By referring to the sketch it will be seen that the outside dimensions of the box for storage of feed are twelve feet, two inches long, five feet six inches high and four feet four inches broad. This box or storage bin has a capacity of approximately one hundred and eighty bushels. The detailed drawing or sketch will show the construction of the hopper bottom, feed troughs, roof, door, etc. The drawing does not correctly illustrate that the hopper bottom of the storage bin lacks four inches of coming out flush with the wall of the bin and that the opening left for feed to feed out of hopper into feed troughs is two and one half inches wide. This width of the opening and pitch of the bottom of bin should vary with the

kind of feed to be used, that is, if broken corn is used a much wider opening will be required; if shelled corn, a narrower one. The opening left in this case was for feeding meal. Six-inch flooring was used for the sides and floor. A shingle roof is, of course, unnecessary, but was used in this case, the shingles being laid four inches to the weather. The following is a bill of materials necessary to build the feeder as illustrated. Seventeen pieces 2x4, 6 feet; 6 pieces 2x6, 16 feet; 1 piece 2x6, 8 feet; 24 pieces 1x4, 16 feet; 2 pieces 6x6, 12 feet; 30 pieces 1x6, 12 feet; 1 piece 6x8, 18 feet; 1,700 shingles. Nails, paint and

SECTIONAL SIDE VIEW.

labor, together with the materials itemized make this feeder cost from \$30 to \$35, depending upon the grade and price of materials used.

TERRIBLE SCALY ECZEMA.

**Eruptions Appeared on Chest, and Face
and Neck Were All Broken Out
—Cured by Cuticura.**

"I had an eruption appear on my chest and body and extend upwards and downwards, so that my neck and face were all broken out; also my arms and the lower limbs as far as the knees. I at first thought it was prickly heat. But soon scales or crusts formed where the breaking out was. Instead of going to a physician, I purchased a complete treatment of the Cuticura Remedies, in which I had great faith, and all was satisfactory. A year or two later the eruption appeared again, only a little lower; but before it had time to spread I procured another supply of the Cuticura Remedies, and continued their use until the cure was complete. It is now five years since the last attack, and have not seen any signs of a return. I have more faith in Cuticura Remedies for skin diseases than anything I know of. Emma E. Wilson, Lisco, Iowa, October 1, 1905."

KANSAS CITY ONE FARE PLUS \$2.00 ROUND TRIP.

On November 18th to 21st The Chicago Great Western Railway will sell round trip tickets to Kansas City and return at rate of one fare plus two dollars. Three trains every day and best of everything. For further information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

CHOLERINE

Not only prevents, but will cure hog and chicken cholera, roupe, lice, mites, etc. Sold on a positive guarantee. Money returned if not satisfactory. Per box by mail \$1. Agents wanted. Cholerine Co., 301 Junction Bldg., Kansas City, Mo.

LADIES to work on piecework \$3 per dozen. All materials furnished; no canvassing; steady work. Stamped envelopes. Best Mfg. Co., Champlain Bldg., Chicago, Ill.

VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

WARTS ON NOSE.

Please tell me how to remove warts from a horse. I have a five-year-old iron gray mare that has warts on her nose. They seem to be seed warts.

Simply rub the warts and surrounding skin once or twice daily with castor oil or goose grease, and they will in time disappear.

WORMS.

I have a mare that is bothered with worms. I have failed so far to destroy them. What would you advise me to do?

If mare is in foal, medicine cannot safely be given for the destruction of worms. Otherwise, we would treat by administering two ounces of turpentine in a pint of raw linseed oil after fasting her for eighteen hours, and repeat this dose at end of ten days unless bowels at that time happen to be too open. After the oil has acted, mix in feed night and morning for one week a dram of dried sulphate of iron and two drams of powdered gentian root. Then skip ten days and repeat.

INJURED HOCK.

I have a three-year-old black horse that was cut on the barb wire two months ago. The wound was on the inside of the hock joint and was cut clear to the bone. Some joint water escaped, but was checked. No cords seemed to be cut. The wound healed nicely and the horse eats well, but the joint became swollen and tumors appeared on the opposite side of the leg, and blood and matter substance escapes when they are opened. The horse does not try to use this leg. I have used slacked lime, alum and carbolic acid. What can I do to reduce the swelling?

Clip hair from joint and wash thoroughly with a 2-per-cent solution of coal tar disinfectant. When a soft place opens or is cut open, syringe into it twice daily a little of an emulsion of one dram of iodoform in an ounce of sulphuric ether. As soon as healing takes place, blister the joint repeatedly with cerate of cantharides, two ounces; biniodid of mercury, one dram; mix.

CANKER.

Last spring my drove of seventy young pigs commenced, when a few weeks old, to have sore mouths and sore legs. Twenty-nine of them died. They seemed all right until July; then they commenced to die with what was supposed to be cholera, as it was prevalent in the neighborhood. I have only seven left now. My young brood sows since farrowing this fall with their first litters are losing their pigs by their mouths and legs getting sore. The sows are healthy and did not have any cholera, and there have been no cholera hogs in the pasture they stay in. I have kept their pens disinfected and clean. What is the matter with my pigs and would you advise me to keep these brood sows for breeding again?

By all means keep the sows, as this trouble is not to be blamed to them. It apparently is canker of the mouth and nose, and pigs affected are possibly rickety. In the latter case, there would of course be some likelihood that weak parents transmitted the tendency to the trouble. Stop feeding corn to breeding hogs and growing pigs. Feed nitrogenous foods, including combinations of such foods as milk, middlings, tankage, flaxseed meal, and add roots, alfalfa, rape, grass, clover, etc., allowing whenever convenient as much range as possible. Make it a practice to mix lime water freely with the feed and drink two or three times a week. At present, give it daily to all pigs. For the canker, souse the heads of affected pigs over and over

Ring-Bone

There is no case so old or bad that we will not guarantee

Fleming's Spavin and Ringbone Paste

to remove the lameness and make the horse go sound. Money refunded if it ever fails. Easy to use and one to three 45-minute applications cure. Works just as well on Sidebone and Bone Spavin. Before ordering or buying any kind of a remedy for any kind of a blemish, write for a free copy of

Fleming's Vest-Pocket Veterinary Adviser

Ninety-six pages of veterinary information, with special attention to the treatment of blemishes. Durable bound, indexed and illustrated. Make a right beginning by sending for this book.

SIMMONS HARDWARE COMPANY,
St. Louis and New York, U. S. A.

again once daily in a warm solution of an ounce of permanganate of potash in a gallon of water, and in bad cases use a double strength solution of the same medicine. Ulcers should be scraped thoroughly before the first treatment. It will be necessary to clean up, disinfect and white-wash the pens and make it a practice after this to nip off the small sharp teeth found in pigs' mouth at birth, as the lacerations they cause induce the disease.

FISTULA.

What can I do for a fistula? I have a bay mare weighing 1,500 pounds which has a fistula. Our veterinarian opened and drained it and gave medicine to syringe it out with every day. The mare's withers are swollen some yet. Is there not some medicine I can put in the top opening and turn the mare out in the pasture? The swelling was opened four weeks ago and there was no pipe.

You will find this a very difficult case to handle, as the opening is on top and the mare is restless. It will be necessary to more thoroughly open the abscesses to the bottom of each pocket and pipe, after which the cavities should be flushed out once daily with a large quantity of hot 2-per-cent solution of coal tar disinfectant or permanganate of potash and then packed with oakum saturated in a mixture of equal parts turpentine and raw linseed oil. As the wounds heal, remove hair and blister enlargement every two weeks, using cerate of cantharides. Medicine used as you suggest will do no good.

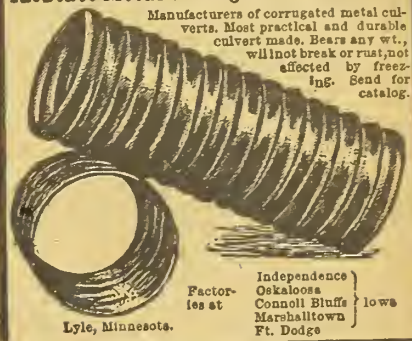

URTICARIA.

I have a dappled gray mare ten years old that has been doing well all summer until one morning when I got her in I noticed she had a lump on each side of her nose about the size of a small hen egg and later on, lumps formed in different places all over her about the size of an egg or larger and her head got a third larger than usual, swelling on each side of nostrils from her eyes to the end of her nose. The swelling in her head has gone down some and the lumps on her body have disappeared. Her right front foot around the top of hoof is swollen and discharging pus. It seems as though her hoof will come off. I cannot find anything in it. I have had three different veterinarians examine her and none of them know anything to do for her. I had her teeth dressed. Please advise me if you can.

The mare had an attack of urticaria (nettlerash), which is akin to "hives" of children, and generally caused by some derangement of the digestive organs induced by change of food. A physic of aloes or a course of glauber salts soon does away with the trouble, the enlargements being treated locally by sponging with a solution of one ounce of hyposulphite in a quart of water. Give her half an ounce of hyposulphite of soda in water or mash twice daily. The swelling and discharge from foot are not apparently associated with the other condition and should be treated as a case of quittor, after determining direction of sinus from which pus discharges. Remove hair from coronet; soak foot in a hot solution of coal tar disinfectant; scrape out sin-

Commencing November 3d, and each Saturday and Sunday thereafter until December 16th and from January 5th to March 31st THE CHICAGO, GREAT WESTERN RAILWAY will sell tickets to points in Iowa at one fare for the round trip good to return until Monday following. Rates apply to points as far north as Bristow, New Hampton and Oneida and south as far as Blockton. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Ia.

DAY BY DAY

Agricola

"He that by the plow would thrive, himself must either hold or drive," said Ben Franklin, the all-round philosopher. And this was before the labor of our country had been unionized. Farm labor is not now unionized, but Franklin evidently used a farm application to teach a general truth.

Brought down to the latter day application, we must say, "Vicarious farming does not mean much net cash." Let us pray that it never will.

We hear that up on parallel 43 where the merchants, preachers, doctors, storekeepers, office holders, bankers, lawyers, etc., went into growing sugar beets by proxy that wisdom has come to them by their experience.

And as another illustration, look at localities where the owners work their own farms and compare the thrift with farms worked by tenants.

Farming differs from all other professions. It is the workshop, the office and the home. Reducing it to merely a business transaction and eliminating the home element emasculates it of its choicest property.

But why do the boys leave the farm? Because the world needs the farm boy and needs him badly. The city could no more live without the farm blood and brain and brawn than it could without the farm beef and bread and butter. It is a sad day and a proud day when the boy leaves the farm home to wrestle with the activities of the business and industrial world.

Power on the farm is an important matter, and growing more so every day. The factory competes with the farm for labor, and even the farm boys are drawn away. Machinery is necessary, and power to run it.

Ten years ago the improved tread power made itself a place on many farms where the old-fashioned tread power would not be tolerated.

With the old-fashioned tread power, when a belt came off or any similar mishap occurred, the power would "run away with the horse" unless someone was on hand to put on the brake, but the improved power has an automatic regulator and is therefore safe.

But the gasoline engine is superseding the tread power. It is another step up the scale. First human muscle, then animal power, then "natural" or chemical power.

The electric power is, however, far ahead of the gasoline engine, where it can be had, and the trolley roads are invading the farming communities and selling power to farmers along the line. But since not all farmers can avail themselves of electric power, and since gasoline is a little dangerous and becoming high in price, they are looking forward and extending the glad hand to denatured alcohol.

I find that a really good husker cribs about seventy-five bushels of corn a day this fall. This speaks volumes for the kind of corn 1906 gives us. But, by

More Thrift—More Profit.

WE guarantee that Standard Stock Food will put and keep every animal on your place in a vigorous, healthy, thrifty condition at less cost to you than will any other means you could possibly employ.

We sell Standard Stock Food to you on that square-deal guaranty.

The modern domestic animal kept on high feed needs a little help from day to day—not medicine or dope or physic, but something to give variety to the ration and to make it taste better.

The animal needs something of this kind, a condiment, a flavoring, a seasoning, just as you need salt and pepper, mustard and horse radish and various kinds of flavors and seasonings to help you digest your food.

Standard Stock Food makes the ration taste better so that the animal eats it with a greater relish.

The very smell of it makes the animal's "mouth water"—that is, it stimulates the flow of saliva and other fluids which perform the work of digestion so that the animal digests its feed more quickly, more easily and more thoroughly.

Hence it makes the feed you feed go farther because less of it passes through the animal undigested.

Its tonic properties quicken the circulation, aid assimilation and put the entire system in that prime condition which makes for finer finish and bigger profits.

We say Standard Stock Food does this better than any other stock food because it is made of purer, better ingredients, more scientifically compounded.

STANDARD STOCK FOOD
"IT MAKES STOCK THRIVE"

As to its quality, you don't even have to try it to be convinced. If your dealer will open packages of various stock foods and let you compare them, you will find that the Standard looks better, smells better, tastes better and is better than any of them. It is stronger, richer and more concentrated.

That's why you need feed so little

STANDARD STOCK FOOD CO.,
1516 HOWARD ST.

of it and that's why it costs you less per animal per month than any other stock food made.

Do not be misled by a low price per pound. Examine the directions for feeding on various packages and you can see for yourself that a dollar's worth of Standard Stock Food will last longer and go farther than any other. It is the most economical stock food made.

Our Square-Deal, Money-Back Guaranty.

You buy Standard Stock Food on a money-back guarantee. If it does not do exactly what we say it will do, you get your money back. You know the editor of this paper would not print this advertisement if he did not know that we will do exactly what we agree to do.

Go to Your Dealer

and ask him to supply you; if he cannot, do not take a substitute but send to us direct. We will ship immediately and protect you with our square-deal, money-back guaranty.

Free to You.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

STANDARD STOCK FOOD CO.,
— OMAHA, NEBRASKA.

the way, it is not the work-by-the-month hand who is cribbing seventy-five bushels per day, but the one husking by the bushel. Three cents a bushel is the ruling price.

I never could see that the color of the corn makes any difference in the yield or in the feeding value, although many have that opinion. But they do not agree as to the relative value, some championing white and some yellow, with here and there a man singing the praise of the red corn. For myself I like yellow corn and white pigs, and find that the two go together nicely, but still it is clearly only a matter of personal taste.

Some writer says that the present tendency is towards the small farm, the eighty-acre farm or the forty-acre farm. I have not noticed it, but it seems to accord with present conditions in one respect. The high price of land makes it impossible for the young man without capital to become the owner of a large farm of his own, and for capitalists to own the soil and the young man be forced to be a hired man or a renter for life is not to be desired from any standpoint.

One thing in favor of the large farm is that enough work is done to warrant investing in machinery. This is

becoming suitable to the small farm. Machinery is cheaper than hired help, and the wife is freed from running a hotel or boarding house for hired men.

Take this for illustration: A small farmer who cuts up all his corn with a corn binder, hauls the shocks up in the fall and tosses the bundles on the self-feed table of a husker which blows the fodder into the barn and delivers the ears into the crib on the other side has the thing down about right. The gasoline engine does all the hard work, and does it better, as the fodder is saved, and the one man who runs the small farm can do the whole work himself, if he must.

When the world's fair was held in Chicago in 1894 the butter in the breed contest made from Guernseys was scored down on account of being too yellow, yet it was the natural color. Later the fashion has called for still paler butter, and ordinary Jersey butter has been too highly colored to suit the fastidious demand. But now it is November, and the butter is paler and Jersey butter is all right, and the butter from "common cows" has to be artificially colored to make it acceptable.

I notice that more of the younger generation of farmers are accepting the teachings of Professor Holden regarding corn than of the older agriculturists. The latter have found out by their own experience what has produced best results, and they cling to that which is good. There is a reason for this, and there is reason for the younger farmers to try what the cornologists teach.

One of the things which the younger farmers did this year was not strictly according to Holden, but incidental to it. He taught to select ears with one size and form of kernel, keeping them separated from all other forms, shelling them separately and planting them separately, so the planter would do more uniform work.

The juniors jumped to a conclusion. They bought seed corn graders, shelled their seed corn together and separated it with the grader. Young America likes machinery. The grader made the different grades of kernels, sorted them into grades, rather, and the result was gratifying.

Those who tried the Holden method of saving seed corn, hanging it up with

Hayes Makes Successful Sale.

The public sale of Short-horn cattle held at Hampton, Neb., by Mr. E. J. Hayes was one of the most successful yet held this season. The sale was well advertised and a large crowd of farmers and breeders were in attendance. The top price was \$230, paid by Mr. Anton Tunberg, of Hooper, Neb., for No. 9 in catalog, a Rose of Sharon cow with fine bull calf at foot by Starlight Oederle. Following is a list of sales over \$100:

Lot.	Name	Price.
1.	Starlight Oederle, Carl Deltsch, Shelby, Neb.	\$205.00
2.	Star Queen, Henry Junge, Benedict, Neb.	102.50
4.	Red Victor 2d, Orville Jones, York, Neb.	130.00
5.	Anna Orange 2d, Anton Tunberg, Hooper, Neb.	212.50
6.	2d Seraphina of Hebron, same, Neb.	160.00
7.	Brawith Bud 2d, Pat Hays, Bradshaw, Neb.	225.00
8.	Scottish Prince, W. M. McLemore, Kearney, Neb.	116.00
9.	Glendale Rose, Anton Tunberg, Neb.	230.00
13.	Tullip, S. C. Beaver, Ulysses, Neb.	100.00
14.	Lucy's Maid, W. A. Woodard, Hampton, Neb.	145.00
15.	Ella, J. E. Hookham, Bradshaw, Neb.	100.00
17.	Lily Abbottsburn, Herman Feuster, Hampton, Neb.	135.00
19.	Miss Cupbearer 2d, C. McCarthy, Henderson, Neb.	200.00
21.	Golden Gem, Mat Archer, Aurora, Neb.	160.00
22.	Glendale Beauty, S. C. Beaver, Neb.	192.50
26.	Miss Byron 2d, C. E. Tracey, York, Neb.	102.50
29.	Loretta, G. A. Sykes, Hampton, Neb.	107.50
30.	Red Monarch, Anton Tunberg, Neb.	102.50
31.	Molly, H. P. Madsen, Hampton, Neb.	140.00
32.	Village Rose, Henry Junge, Neb.	125.00
35.	Baron Oederle, John Martin, Hampton, Neb.	101.00
36.	Peri of Hebron, E. H. Henrixson, Hampton, Neb.	155.00
39.	Baron Rosen, Wm. Mueller, Bradshaw, Neb.	132.50
40.	Victor Dudding, W. M. McLemore, Hampton, Neb.	100.00

The average on the entire offering was \$120.

USED TEN YEARS—IT CURES.

Laurel, Md., Feb. 15, 1906.
Dr. J. B. Kendall Co.,
Enosburg Falls, Vt.
Gentlemen:—I have been using your spavin cure for the last ten years, and it cures.
Samuel Brown.

Will You Just Try This Water-tight RUBBERHIDE BOOT?

Made of purest rubber and best sole leather—sewed not pegged—absolutely water-tight and snag-proof—can be resoled—your money back if they do not outwear two pairs of the best quality rubber boots of other makes.

If you work in the wet, you want a boot that will keep your feet perfectly dry—and at the same time not to go to pieces in a few weeks time. Well, here it is:

The Rubberhide Boot

Made of the purest rubber, with heavy leather outsole, and leather innersole, with a rubber welt and middle sole, all joined together (without pegs or nails), and joined to the upper so securely, that a team of horses can't pull them apart.

And not a drop of water can find its way in. The heavy leather sole does not cut or snag when you step on a nail or a sharp stick. It protects your feet from stones and rough surfaces.

It conforms to the shape of your foot, and it can be easily resoled—any cobbler can "tap" or half-sole the Rubberhide. The uppers are so good that they will outwear two or three pairs of soles.

The inner sole of leather prevents excessive perspiration which makes the ordinary rubber boots such a nuisance.

The Rubberhide is the only absolutely water-tight boot made;

It will last longer than two or three pairs of rubber boots;

It will keep your feet comfortable all the time.

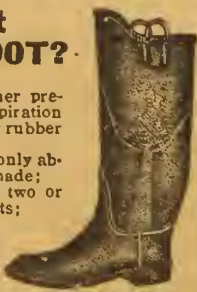

Will You Try a Pair?

Outwears Two Pairs

If your dealer handles the Rubberhide he will sell them to you on a positive guaranty that they will outwear two pairs of even best quality rubber boots of other makes. If they do not, he will refund every cent you paid for them. If he does not, send to us direct (giving dealer's name) and we will send you a pair with the same money-back guaranty. We pay the express charges.

Write for our Catalogue and Price List.

Growing Sugar Beets.

To the Editor of The Homestead:

The sugar beet is only a variety of the sea-shore plant, Beta Maritima, which by careful breeding and selection has been developed along three directions; namely, to give us the many different sorts of mangels, the edible beet of our gardens and the sugar beet. In the appearance and habit, the sugar beet differs but little from the mangel; it is white-fleshed and has more of the shape of the Long Red than of the Globe mangels, but it is smaller, grows more deeply in the ground, with but little of the bulb exposed and develops much more fiber on the bulb and root proper than does the mangel. But the main difference between sugar beet and mangel lies in their composition.

A process of selecting sugar beets for seeds, on the basis of their richness in sugar, has been cautiously going on, until at the present time they contain 20 per cent or more of dry matter and 18 per cent of sugar, while the mangel only contains about 12 per cent of dry matter and 8 per cent of sugar. In growing sug-

ar beets for the manufacture of sugar the composition of the roots is all important. The extraction processes are only economical when the roots contain a high proportion of sugar, and that as free as possible from the non-crystallizable sugars and other soluble bodies. In consequence, most sugar beet factories, not only pay for their roots on a scale varying with the proportion of sugar they contain, but will entirely reject consignments of roots which fall below a certain standard. The necessity of maintaining a high proportion of sugar and of purity means a certain restriction of yield. Heavy crops of big roots, grown by the use of large quantities of manure, mean roots that are deficient in purity. Sugar beets can be grown wherever mangels are found, but on the whole they are more suited to higher and warmer soils than the mangel prefers, dry and warm fall conditions being particularly desirable to ripen the roots off.

Strong, well-worked soils give the best returns and peaty soils the poorest. It is necessary that there should be some lime in the soil. In rotation farming, sugar beets should take the same rotation as mangels, and the preparation of the land does not differ markedly from that of mangels. It is, however, desirable to attain a deeper and mellowed tilth, since so much of the value of this crop depends upon its quality. It is very necessary for sugar making to obtain shapely roots. Heavy dressings of farmyard manure are not recommended, because they injure the quality of the sugar beet. Nitrogenous manures are necessary, but should be used in smaller quantities than with mangels. Valuable as salt is for mangels, it should not be used for sugar beets. Nitrate of soda, again, is not so suitable a manure as sulphate of ammonia, though it produces a larger yield. The nitrate of soda encourages a more deeply rooting habit, and in consequence a more prolonged and slowly ripening growth.

The seed should be drilled at the rate of twenty to thirty pounds per acre, the rows never being more than sixteen inches apart; indeed, for producing high-grade roots, the best distance between the rows is about twelve inches. The plants should be finally singled to one

Your shipments to this market and orders for the purchase and sale of grain for future delivery solicited.

in every nine inches. The richer the land, the closer the plants may be left when singling. The hoeing is that of the mangel crop. When the outer leaves begin to get yellow and flaccid, the crop is ready to lift, which is by no means as easy an operation as lifting the mangel crop, so closely do the fine fibers of the root cling to the ground. On soils of ordinary consistency it is impossible to pull the crop; it is necessary to lift the roots with a fork, an operation which adds seriously to the expense of growing sugar beets as compared with mangels. In the case of sugar beets intended for the factory, the crown of leaves has to be twisted off or the leaves and a very little of the top cut off and the adhering dirt roughly removed from the roots.

The sugar-beet leaves do not form a very satisfactory food for stock and are apt to induce scours. They are best plowed in. The slices from which the sugar has been extracted in the factory, if returned to the farmer producing the roots, form a good succulent food for the winter feeding of cattle. The average yield that may be expected is not heavy, the average being not more than fifteen tons to the acre. The average yield in Germany even where intensive cultivation is practiced, is only twelve tons per acre. Larger yields are only to be obtained by spacing the plants more widely and by increased manuring, with the inevitable result of an inferior quality of root for sugar making. In the absence of factories in which the sugar-beet crop can be sold, the roots can be stored like mangels to be used in the same way as feed for stock. For this purpose it should be remembered that they possess, roughly, twice the feeding value of an equal weight of mangels.

They can be used for food at an earlier date than mangels, because they have, as a rule, attained a higher degree of maturity when they are harvested. In feeding they may be used as succulent food for young horned stock, fattening beasts

THIS MILL ON TRIAL 20 DAYS FREE

We'd like to tell you how we send our "Corn Belt" Feed Mills on 20 days trial free, and why it's the mill for you to buy. This is the one mill you'll like better the longer you use it. 20 days gives you time to see how it works--how it's made. "Corn Belt" Mills grind all kinds of grains evenly and rapidly. Write today for free catalog describing full line of sweep and power mills. **Spartan Mfg. Co., 282 Chambers St., Galesburg, Ill.**

ADVERTISING NOTES.

Iowa farms, the best in the state, are offered for sale, and also for rent to responsible parties, by the Allen Land Company, of Laurens, Iowa.

Any reader of this paper who wishes to buy a good, large farm in Texas should read the advertisement on page 25 of this issue, of Mr. Milo J. Owen, of Barton, Vt.

One of the best farms in the state of Iowa, containing 300 acres, is offered for sale by Mr. Z. T. Lindsey, of Omaha, Neb. If our readers want something real good here is a bargain. Write Mr. Lindsey about this farm at once.

The Bigley Telephone Company, of 56-58 Van Buren St., Chicago, Ill., buy and sell second-hand telephones and parts of all standard and modern makes. Their advertisement appears on page 21 of this issue. Write them and ask for their bulletin No. 19.

Mr. L. C. Mitchell, of Shelton, Neb., is offering for sale a 160-acre farm, located one mile from Gibbon, Neb. There is a five-roomed house, with water, stable for nine horses, and other improvements on the farm. See advertisement on page 24 of this issue.

Mr. J. J. Lynch, of Laurens, Iowa, deals in city property and stocks of all kinds. He is advertising Iowa farms for sale in his advertisement on page 24 of this issue and requests Homestead readers to write him for printed list. He says that he always has bargains to offer.

Mr. C. L. Fisher, of 203 North Seventh St., St. Louis, Mo., is making a very attractive announcement to those who desire to engage in fruit culture. He has ten-acre fruit and truck farms, with new three-room cottages, on which he is placing a very moderate price. See advertisement on page 24.

Farm bargains in southwest Minnesota are offered to Homestead readers by Mr. E. H. Crandall, of Montevideo, Minn., in his advertisement which appears on page 24 of this issue. Mr. Crandall has farms that are composed of the best of black loam corn land and is anxious to send our readers descriptive price list free.

Now is the time to get a bargain in musical instruments. All teacher's and dealers discounts are being given by Messrs. William E. Lewis & Son, of Chicago, Ill., on their large stock of stringed and reed instruments. See page 15. They offer ten days' trial and 50 per cent off. Write for their catalog No. 11 and please mention The Homestead.

Record number 96383: Ringbone of two years' standing; horse very lame; ordinary methods of treatment failed; horse buyer offered \$5 for the animal. Owner treated the case with Fleming's Spavin and Ringbone Paste, after which the same buyer offered \$175 for the same horse. Write Messrs. Fleming Bros., 210 Union Stock Yards, Chicago, for free copy of Fleming's Vest-Pocket Veterinary Adviser. See advertisement on page 9.

Agricultural land located in Northwest Canada, British Columbia, to the amount of 100,000 acres, is offered for sale by Mr. G. E. M. Pratt, of Chicago, Ill., in an advertisement which will be found on page 24 of this issue. Ten thousand acres of this land is offered at \$3.50 per acre, all cash payment, with privilege to purchaser, at any time within one year, of selecting other land and exchanging if not satisfied with the land deeded him under this sale.

Mr. Chas. D. Robbins, of Milan, Tenn., gives readers of The Homestead an invitation to come to sunny Tennessee, in his advertisement, which appears on page 24 of this issue. He is offering land for sale where big red tomatoes and strawberries and silver dollars grow. He has good farms, that are being almost given away, at prices that are extremely low. Full information will be gladly furnished by Mr. Robbins, and in writing kindly mention this paper.

Mr. H. J. Hill, of 1802 B St., Lincoln, Neb., has 2,000 acres of central Nebraska land which he is offering for sale on page 24 of this issue. He makes the announcement in the advertisement that this land is in a sure-crop country and that there has never been but one crop failure since 1886. The land is composed of up-land and bottom land that does not overflow, is finely improved or unimproved, as desired by the purchaser, and can be sold in all sizes.

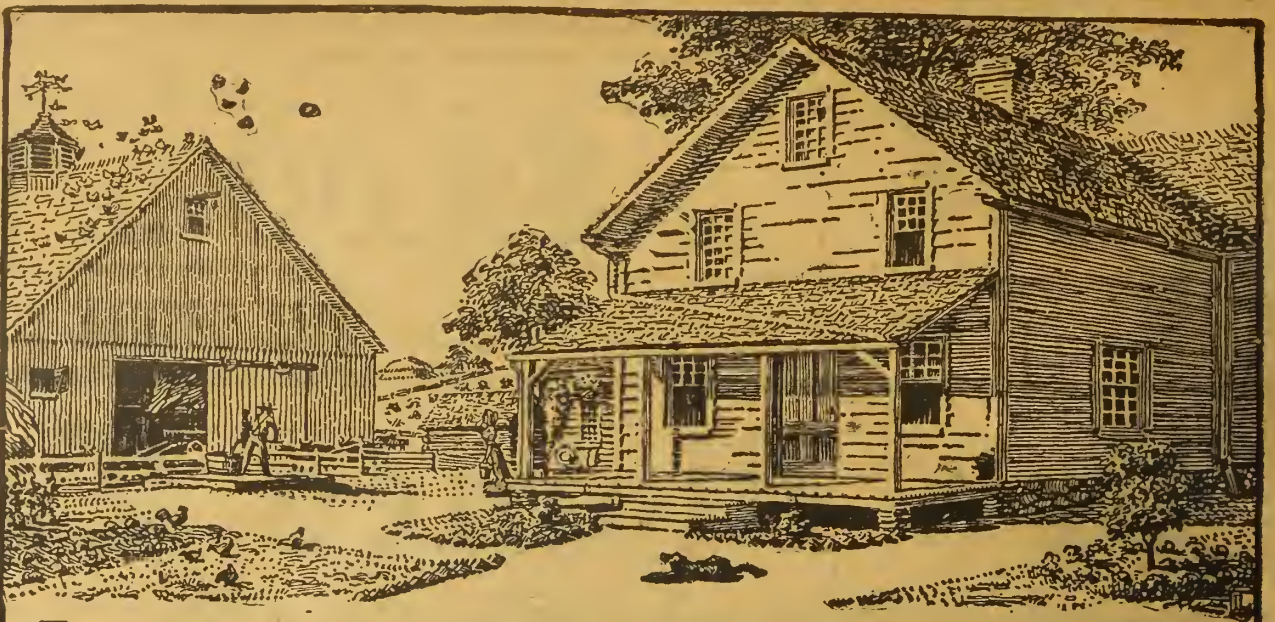

"Ruberoid," a roofing material like or resembling rubber. That's the kind of roofing that is sold by the Standard Paint Company, Chicago and Cincinnati. See page 4. It has been thoroughly tested and is guaranteed wear-proof, weather-proof and fire-proof. Even better than rubber. Certainly, for rubber rots. Ruberoid combines all the good qualities of a roof covering. Samples and Booklet "A" will be gladly mailed. They will put you next to some interesting facts. Mention The Homestead.

BETTER LOOK THIS UP.

A great many people suffer for years from piles and make no effort to have them cured. In this issue Dr. J. C. McLaughlin, of Kansas City, advertises to cure piles without the use of the knife. Those who have this trouble should read the doctor's advertisement. He guarantees his work and many people testify that he has cured them.

BIG COTULLA PASTURE OPENED FOR SETTLEMENT.

Texas is a big country. There is no state in the union with such agricultural resources as Texas, because Texas contains so many different kinds of soil and will produce such a varied class of crops. One of the most interesting books illustrating Texas has just been published by the Investors and Homeseekers' Realty Company, Hall Bldg., Kansas City, Mo. This book answers probably every question that would be asked by a homeseeker and is profusely illustrated with pictures of Texas homes and farms, showing growing crops. The book should be in the hands of every investor and homeseeker among our readers. It is almost impossible for people who have not investigated to believe the statements which have been made about south Texas, but this book is conclusive proof, as it shows the crops in the field from actual photographs. The above mentioned firm have recently purchased a big tract of land in south Texas known as the Cotulla Ranch and have opened the tract for settlement. They have an excellent proposition and will furnish any size tract from

Farmers in the Southwest are getting rich on the increasing value of their farms.

Not so very many years ago Illinois and Iowa land sold for ten dollars an acre. More recently Nebraska lands sold at that price. Look at them now. What makes them so high? The land is no better than it was then. What caused the price to go up? People—nothing but people and lots of them. History will repeat itself in the Southwest—only it will not take so long. The Southwest is growing very fast; much faster than any other section of the United States. The land in the Southwest is just as good as Illinois, Iowa or Nebraska land. But there is more land than people, that's the only reason it's so cheap. How long do you think it will take the Southwest to get as many people to the farm acre as Illinois or Iowa? Just about five years—ten at the very outside. When that time comes you will have to pay just as much for land in the Southwest as you would pay in Illinois or Iowa.

Why not buy your farm in the Southwest now—when you can get it cheap—cheap enough for you to get a big one? A few years hence you will be looked upon just as the man who owns 640 acres in Illinois is looked upon to-day—a substantial, well-to-do, leading member of your community.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

Rock Island

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines

1413 La Salle Street Station, Chicago

or

1413 Frisco Building, St. Louis.

FRISCO

twenty acres up, making it possible to all to own a home and they make the terms of payment easy. Space is too limited to tell the story here, but send for the book. You will be interested in this wonderful country. See the advertisement in the Lands and Homes department this week on page 24.

SAVE THE HOGS.

In a great many localities hog cholera and other diseases are killing thousands of hogs. These diseases cause an immense loss to hog raisers. This loss should be stopped if possible. The Cholera Company, of Kansas City, Mo., are advertising their remedy, Cholera, in this issue and offering to refund the money if it isn't satisfactory. It sells for \$1. Certainly no one who raises hogs can afford to be without this remedy when it costs so little. Look up their advertisement on page 9 and write them.

PROSPEROUS TIMES IN TEXAS.

The great Panhandle country of Texas is becoming famous for its excellent crops. The farmers in that country are all very prosperous. When land can be purchased at \$5 to \$20 an acre that will produce such crops as are shown in the Panhandle why shouldn't the men who own such land be prosperous? They raise big crops with a very small investment. Messrs. Boyer & Peterson, of Kansas City, Mo., are offering to sell Panhandle land at the above figures and any of our readers who are interested should look up their advertisement in the Lands and Homes department in this issue. They have a fine proposition.

A RELIABLE FIRM OF SPECIALISTS.

Readers of newspapers and periodicals in the central West are well acquainted with the firm name of Drs. Fellows & Fellows Co. Their specialty, which they have practiced for many years, deals with chronic nervous and private diseases of men. They have made it a life work and their success has been marked. The wonderful results and uniform success in their methods of treatment has built up an enormous practice in Des Moines and the vicinity, where they are located in most excellent quarters. In addition to their local practice they make a specialty of home treatment. The system is the result of long years of experience and the results have been splendid. They will not accept an incurable case and the result is that they can give a legal guarantee to cure any case which they take. If you are a sufferer of any of the diseases which are within their specialty, write them. You can feel perfectly free with them, as everything will be confidential, and no correspondence between them and yourself will be marked in any way to reveal their identity. Their financial standing is above reproach. It is their sincere purpose to treat every patient with the utmost honesty and by such means they have so far built up their business. You can place implicit confidence in their word and ability. Read their

advertisement on page 17. When in need of the services of specialists you should by all means correspond with Drs. Fellows & Fellows, 123 Rollins Bldg., Des Moines, Iowa. Please mention this paper when writing.

SOMETHING NEW IN GASOLINE ENGINES.

The gasoline engine is a simplified machine. Still you might be surprised to know how improvements are being made every day. The "New Way" Motor Company, Lansing, Mich., have discovered a new way to cool the cylinder of a motor. Their engines are all made with this new and important feature. Testimonials from the highest sources indicate that the "New Way" air-cooled engine is doing the work. The idea is to cool the cylinder with air. If you intend to buy an engine, it will certainly pay you to send to these people for catalog "C" which will explain all. The advertisement is on page 2.

FREE CATARRH TREATMENT.

This exceptional offer is made to you as a catarrh sufferer, so that you may have an opportunity of testing Dr. Williams' new method of treatment and satisfy yourself that he can do all that he claims he can do for you. One month's treatment has permanently cured; long-standing and chronic cases, however, require a regular course of treatment, and this one month's treatment will enable you to decide intelligently if you should continue the treatment longer. So confident is Dr. Williams of the benefits you will receive that he does not hesitate to make you this exceptional offer. Write him for his symptom blanks, books and other information which will be mailed you absolutely free of charge. Address 218 Crocker Bldg., Des Moines, Iowa.

PROFIT FOR YOU.

The little book "Farm Science," but recently off the press, is justly regarded as the equal in practical suggestions, plain teachings and unquestioned authority, of anything ever published exclusively for the farmer. Its character will be seen when we say that it was specially prepared for the International Harvester Co. of America, Chicago, at an expense of several thousand dollars. The book treats exhaustively such live present-day farm subjects as Fertilizing, Preparation of Soil, Crop Growing, Alfalfa, Hay, Small Grains, the Dairy and Farm Powers. Best of all, every one of these topics is handled by a specialist—men of large practical experience in addition to being scientifically qualified to speak on matters in their line. The authors are Jos. E. Wing, expert agriculturist, Ohio; Prof. P. G. Holden, the corn culture expert, Iowa; W. F. Brown, farm specialist, Ohio; C. G. Hopkins and Prof. Fred R. Crane, of the Illinois College of Agriculture; Prof. Thomas Shaw, late of the Minnesota Experiment Station; Prof. Clinton D. Smith, director Michigan Experiment Station, and Hon. Willett Hays, as-

sistant secretary of agriculture, Washington, D. C. The 128 pages of the book are taken up by these eight specialists on their chosen subjects, so it will be seen with what thoroughness each topic is treated. The book is meeting the demand among farmers which it deserves. A large edition is being rapidly exhausted. It is only necessary to send in the postage for its mailing, three two-cent stamps, to receive a copy. We advise our readers to send for it promptly, before the issue is exhausted, kindly mentioning this paper.

DES MOINES TANNING COMPANY.

The Des Moines Tanning Company, of Des Moines, Iowa, which is well known to many of our readers is advertising again on page 21 of this issue. The company is in better shape than ever before to do the best work that can be done in the tanning business, and we would ask our readers who have hides to be tanned to write this company for their new booklet on tanning. It is full of information on how to prepare hides for tanning, and how to ship them, as well as some excellent suggestions on what can be made from the hides of the animals which you have on the farm. Remember this little booklet costs you nothing and it will give you some very valuable hints about the tanning business. Read the advertisement and then write for this booklet.

RIDPATH'S HISTORY OF THE WORLD.

"History teaches everything, even the great future." To study it is to familiarize ourselves with the whole realm of art, philosophy, science and biography. Ridpath's History of the World may be regarded as a complete library in itself. In those nine volumes may be found the equivalent of thousands of ordinary books. Right in this statement lies the value of such a set of books. The average individual desires to have his library as well stocked as possible. To select from the maze of books of numberless subjects now on sale, those which will be the most useful and cover the most ground is a task not for any ordinary person. In fact, it would be practically impossible to choose a list of books that would furnish anywhere near as much information. Such a selection would be beyond the purse. At the present time, these nine volumes of history are being offered to readers of this paper at a cost far below that for which even damaged or second-hand sets are sold for. The books in themselves are elegantly bound and aside from being useful as a source of wide and exact information are an ornament in any parlor or sitting room. The ground covered is from the "morning of the world" up to the present time. It is written from the standpoint of an unbiased American scholar. No other of its kind has ever suited the needs of all classes and conditions of men so well. We cheerfully recommend this popular work to our readers. They will find it a most potent educator of young and a mine of valu-

able information for all ages. Copious and excellent illustrations add much to its clearness and attractiveness, while maps and charts are a valuable feature. The full announcement regarding this bargain will be found on page 3. The proposition is one that does not come every day, so fill and mail the advertisement coupon at once if interested.

KANSAS FARM.

Mr. L. G. Boles, of Birmingham, Iowa, has three great bargains in producing central Kansas farms which are advancing at the rate of 20 per cent each year. His advertisement appears on page 24.

GET CLOSE TO MARKET.

If the farmers who have lived hundreds of miles from a good stock and grain market knew the great advantages to be gained by being within a few miles of such a market, we believe the land near the cities where these markets are located would bring a much higher price. The Allen Investment Co., of Kansas City, Mo., are making a specialty of selling farms near that city and are offering some excellent bargains in this issue. Kansas City is the second largest live stock market in the world, and is also a big grain market. Lands near there are very valuable, and yet the farms offered by this firm are not nearly so high in price as Iowa land. It will pay our readers to read this advertisement in the Lands and Homes department on page 24 and write for particulars, mentioning Homestead.

THE PEERLESS PITLESS SCALE.

The Peerless Scale Company, of Kansas City, Mo., are now putting a scale on the market at \$46.50 that the firm claim to be equal in every sense of the term to the \$65 and \$80 scales ordinarily sold by the local dealer. In order to demonstrate that this scale is in every way superior in workmanship, in materials and in design, the company are making a thirty-day free trial offer. No deposit is necessary, no notes to sign and no freight to pay, and the man who contemplates purchasing a scale is under no obligation whatever until he is satisfied that his scale is satisfactory in every respect. The reason why this low price of \$46.50 is made is simply this: that there are no profits to go to salesmen, agents, jobbers or dealers. By shipping directly from the factory to the farm the Peerless Scale Company save their customers all these intermediate profits. Send for the catalog which gives a full description of the scales made by this company. Address the Peerless Scale Company, Kansas City, Mo., and mention The Homestead in your application for catalog. The advertisement of this firm will be found on page 14.

PLEASANT MEMORIES OF YOUTH.

What middle-aged person of today when thinking over the pleasant days that were a part of youth, does not recall the many happy hours spent in reading that elegant paper, the Youth's Companion? Sometimes one could hardly bide the time from one issue until the next. What would those times have been without it, for then there was little reading matter for juveniles. The fact that today there are hundreds of papers and periodicals may lead the father or mother to think that the children will get plenty of reading matter without any help in their selection. But a word of caution. Nothing but the best should the youthful mind have access to. It is almost criminal to allow cheap reading matter to get into the hands of the boys and girls to taint their minds, to upset all the good principles of moral teaching. Choose for them until they have formed a proper taste and know what it is good literature. One of the papers that should stand high in favor is the Youth's Companion. It is a weekly paper that stands by itself. It is chuck full of interesting reading, not only for the young, but for the old. It becomes, in fact, a member of the family when once it gains a position on the center table. In the announcement for the new year which you will find on page 17 are given 250 capital stories of all phases of life; the farm, the city, the sea and the wilderness. Then there are inspiring papers written by the best of students and public men. There are also special pages and 2,000 one-minute stories, all of which make as much reading matter in a year as would fill twenty ordinary novels. They are now making some splendid offers as special inducements to new subscribers. Nothing will be so welcome to the family as a year's subscription to this paper, that has come to be recognized the world over as standard literature. Note their announcement on page 17 and in writing them please mention The Homestead.

FARMS AND HOMES IN VIRGINIA.

We have received from the publishers, Messrs. Pyle & Co., of Petersburg, Va., a copy of the Virginia Real Estate Herald. This company are real estate dealers and this publication is issued in the interests of their business, calling the attention of the people of the northwest to the advantages they have to offer in the way of Virginia farms. We quote as follows: "We beg leave to call the attention of the farmers of the Northwest to the desirable farming lands in Virginia which we are now offering for sale at very low prices. Virginia is an old settled state, having schools, mills, churches, stores and railroads thickly distributed, and possessing the advantages of a mild and equitable climate, equally removed from the severe cold of northern winters and the intense heat of southern summers; remarkably healthy and free from the scourges, which afflict the more tropical countries, and also from the terrible tornadoes which so often destroy both life and property in the Northwest. The railroads, rivers and bays, which intersect the state, afford ready and cheap transportation to the largest cities of the continent, which are the centers of consumption, as well as the emporiums of export for foreign markets, thus affording the producer the highest prices for his crops.

Fruits and vegetables raised in Virginia can be gathered one day and delivered in the northern markets the next morning. Vegetation is four or five weeks earlier in Virginia than in the country around New York, Boston and Philadelphia, consequently the truck raised in Virginia finds a ready and profitable market in those cities." A gentleman acquainted with the above firm writes The Homestead as follows: "I know these people personally and know that they are of the highest standing in their own community and that they are thoroughly honest, upright and reliable business men. I give you my word for this in order that you may have no hesitancy in such expressions as you might desire to make." The advertisement of Messrs. Pyle & Co. will be found on page 21.

HOW FARMERS PROSPER IN CANADA.

Every farmer who is anxious to better his condition should send for and read a little book entitled "The Home Builders," in which is presented an unusual opportunity for securing a comfortable and happy home and at the same time for making more money in farming than ever before. The section described in this book is the Saskatchewan valley, which is the great wheat region of western Canada. The figures show conclusively that Saskatchewan produces more bushels of wheat to the acre, and therefore more money to the acre, than any other part of the world. It has perfect climate, deep, rich soil, and unfailing markets. Nor is wheat the only crop in which this wonderful valley excels. The yields of all kinds of grain and produce are immense; fruit trees bear heavily; stock is raised with least expense and largest profits; poultry is a big money maker; dairying brings great financial returns. Saskatchewan, in short, is the land of prosperity for the farmer. The book tells about one man who bought 320 acres of Saskatchewan land three years ago for \$12 an acre, paying only \$2 an acre down, or \$640, and is today worth at least \$5,000. There are hundreds of similar instances of success in Saskatchewan. And it is easy for progressive farmers to buy land and establish prosperous homes in this great wheat region. The Saskatchewan Realty & Improvement Co., which owns thousands of acres of the best land in the region, offers very easy terms, and also gives a bond agreeing to refund the price paid and 60 per cent more if the buyer is not fully satisfied at the end of five years. A copy of the book can be obtained free by addressing the St. Paul office of the company mentioned, kindly mentioning The Homestead. See advertisement on page 25.

Bridgford & Nesbitt's Poland Chinas.

A representative of The Homestead recently inspected the Poland China herd of Bridgford & Nesbitt, of Aledo, Ill., and is pleased to recommend it to readers of this paper in need of good breeding stock. Mr. Bridgford has been an extensive farmer for years, while Mr. Nesbitt is known to many of our readers as one of the best Poland China breeders to be found anywhere. On page 10 of this issue will be found a good representation of one of their herd boars, Faultless Perfection 2d. He was sired by Faultless Perfection by Ramsey's Perfection by Chief Perfection 2d and his dam was Reigning Belle by Grand Neadley. All the fall boars offered for sale by this firm and a few extra good spring boars are sired by him. These of our readers who have had an opportunity of seeing this boar and his get have been well pleased with them. Any reader of The Homestead who wants an extra good boar of either spring or fall farrow, should not overlook the get of Faultless Perfection 2d. Rising Sun 2d by Reese's Perfection by Black Perfection is the sire of some very fine yearling sows. Young Delight 104551 by Chief Perfection H. by Chief Perfection II., dam by Lady Delight 2d by Lad Mark, is one of the best yearling boars the writer has seen this season. He is the sire of the bulk of the spring pigs and several yearling sows will be bred to him. His get are uniform throughout and should please the most discriminating buyer. Someone wanting a good brood sow will find what they desire in the two-year-old sow, full sister to Faultless Sunshine 243042, she by Faultless Perfection II and out of Beattie Sunshine III. by Perfect Sunshine. The writer wishes to emphasize one fact concerning this herd. There are no broken-down feet in the herd—everything stands straight up on toes and has plenty of bone. Three fall boars by Faultless Perfection 2d are out of May Sunshine 2d by Perfect Sunshine, and are extra good ones. One of the best producing sows in the herd is Tecumseh Medel by Model Boy. She is the dam of one of the best fall sows in the herd and has an extra good litter of pigs by Young Delight. Certainly some who are looking for a boar, either spring or yearling, or an open or bred gilt, can find in this lot what they want. The advertisement appears on page 36 of this issue and we are pleased to recommend the stock to our readers. Prices are reasonable, and the herd is richly bred and made up of good individuals. Kindly mention Homestead when writing.

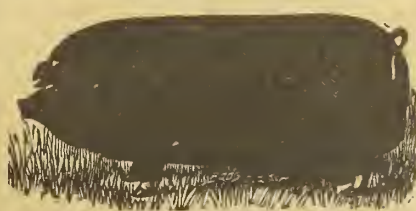

Big Sale of Scotch and Scotch-Topped Short-horns and Polled Durham Cattle.

A prominent sale of Scotch and Scotch-topped Short-horn cattle, as well as a choice lot of Polled Durhams, will be sold at Scotland Vale Stock Farm, November 15th. The well-known breeders will join in the public sale of the above breed of cattle, Messrs. Smith & Barnhardt, M. Yoacum, J. S. Grove and S. B. Wenger. The sale will be held four miles northeast of Harper, Iowa, six miles southeast of South English and seven miles northwest of Keota, at which time Col. Geo. P. Bellows, assisted by Messrs.

Shaver, Lemen & Evans, will part ownership with something like seventy-six head of cattle, including some straight Scotch cattle and a lot of Scotch-topped ones. Messrs. Smith & Barnhardt consign a splendid show bull in Golden Rule, Lot 1 of the catalog. He was sired by Imp. Golden Fame and out of Imp. Ruby 32d; she belongs to the famous Cruickshank Brawith Bud family. Golden Rule is a sire of show cattle, five of his get being shown at the fall sales. Many of the cows in the sale are bred to this bull and three of his got are included. The only reason for selling this splendid animal is that so many of his helpers are retained, that the purchase of another bull was a necessity. This is a bull whose breeding is as good as the best, and one whose reputation as a sire has already been made. He certainly should prove a good investment to anyone wanting a herd bull. A show bull is offered in Golden Robin, a dark red yearling calved June 20, 1906; he was a show yearling this season and possesses fine head and horn; has plenty of bone and scale; his disposition is all that could be required and he is one of Golden Rule's best sons; he is a Scotch-topped Young Mary and as well bred as any Young Mary living. Golden Hero is the show calf that stood second in the open class at Des Moines this year. He, too, is by Golden Rule, and is shaping up nicely for a great yearling next season. This calf is one of his very promising ones, and will do to pin faith to. A full brother to No. 1 is Lot 21 of the sale catalogue, consigned by Mr. M. Yoacum; the same description answers to this bull as does for his most noted brother. This fellow was three years old May 3d, and a proper idea of what he is may be had by the delineation after Burke on page 22 of the catalog. Among the Scotch cows offered for sale is the splendid five-year-old cow Scotch Myrtle, sired by Scotch Fame and out of Imp. Scottish Myrtle by Scottish Victor. This is a cow of great scale, weighing now more than 1,700 pounds. She is a great feeder and so good a breeder is she that one of her sons remains at the head of the herd of Messrs. Smith & Barnhardt. A long price has been refused for this bull, hence the appreciation in which he is held by his owners who consign this cow. A splendid imported cow will be found in Lot 3, Dora 3d. This is a seven-year-old cow, bred by Mr. Chas. Monroe, of Scotland, and is sired by the well-known Dorothy bull, she by the Campbell bull Kinellar Stamp, while her dam was sired by a Missie bull, almost a full brother to Marengo, got by the celebrated William of Orange. This is a choice large cow that is simply thrown into this sale to sweeten the offering. She is an attraction to any sale and should be in demand on sale day. It is a great mistake for breeders to be compelled to part with such cows as Dora 3d for any reason, as imported cows are not now being brought over. It is said by those who had experience that including the \$100 registration fee for imported animals, the cost at the present time of an imported cow is \$200 in addition to the original purchase price in Scotland. Six of the show cattle of the Smith & Barnhardt herds are consigned to this sale. Messrs. Groves, Wenger and Yoacum contribute the Polled Durham cattle, which are all double standard and of the choicest lines of Polled Durham breeding. The herd bull to which the Groves and Wenger cattle are bred is Flora's Victor Royal. He belongs to Cruickshank's celebrated Flora family and was sired by the Marr bull, Imp. Victor Royal. There is no richer-bred bull from the Cruickshank standpoint among present-day Polled Durhams. It is said that he is the first Polled Durham bull ever sired by an imported Scotch Short-horn bull. He comes by his Polled qualities through the use of that great show and breeding bull, Tippecanoe 8th. Imp. Flora 17th was bred to Tippecanoe 8th and produced Scottish Flora 3d and through this cross Flora's Victor Royal was produced. His delineation will be found in the back of the catalog, and serves to show what this great bull is like. The cattle offered by these well-known breeders of Polled Durhams are all double standards, hence can be recorded in either the American Short-horn herd book or the Polled Durham herd book. The catalogs may be had by addressing Mr. L. W. Barnhardt, at South English, Iowa. The sale will be held at Harper.

Closing Out Sale of Polands.

On November 15, at his farm near Keota, Iowa, will occur the sale of Mr. S. B. Wenger's Poland China herd. See page 29. The offering of Polands includes the whole herd, forty-five in number, and represents twenty years of careful breeding and

selection. It is with much reluctance that Mr. Wenger makes this move, but the need of better school benefits are desired. There are eleven sows and one herd boar by Perfection I Know 77521, whose record is familiar to all; three sows by L's Tecumseh, and others by Grand Price 33319, first at Ohio, 1896, Tecumseh L. 40997 and Model Price 99619. Some of the young boars promise to make as famous records as their ancestry. The sows are a most excellent lot in blood lines and in merit. Silver Mine 157893 is the most popular female in the herd. Many of her produce by Perfection I Know will be shown. She will prove her name if you get her and use her right.

I put MACBETH—my name—on every lamp-chimney I make.

If I did not make as good chimneys as I do—and did not have the confidence in them that I have—I would send them out as most other makers do—unmarked.

My Index tells of lamps and their chimneys, fully and interestingly. Let me send it to you—it's free.

Address, MACBETH, Pittsburgh.

WE OWN one-half interest in World's Fair champion boar Tip Top Notcher. Have a fine lot of spring boars by Ambition, 1st prize boar Ill. State Fair 1905, and Big I Am, 1st prize boar Ill. State Fair 1904. Write for prices. Inspection invited.

Thomas & Hogsett, Golden, Ill.

WANTED 10 men in each state to travel, distribute samples of our goods and tack advertising signs. Salary \$80 per month, \$3 per day for expenses. Sauaders Co., Dept. 7, Jackson Blvd., Chicago.

WANTED Men to learn Barber Trade. Few weeks complete tools given, positions waiting, qualified instructors, steady practice, registered diploma, board provided if desired. Write nearest branch Moler Barber College, Chicago, Kansas City, Omaha.

Telegraphy Taught thoroughly. Typewriting free. Write for catalog. Wichita Tel. College, 201 S. Main St.

Wanted men to learn Telegraphy; write J. P. Tighe, care Santa Fe Ry., Arkansas City, Kan.

The three daughters of L's Tecumseh offered are out of Silver Mine and are among the last litters of this noted sire. They are large, regular breeders and this may be your last chance to get such blood. The stock is in just the right condition to do good work in other hands. Some of the sows have suckled late litters—they will sell probably below their worth. Send for a catalog and look over the blood lines. They are gilt-edged. If attendance is impossible, write Col. Geo. P. Bellows to pick out some of the bargains.

Mr. C. A. Steele, of Ogden, Iowa, has some Poland China boars which he is offering for sale in his advertisement that appears on page 24. "Their sire, Defender," writes Mr. Steele, "is by the renowned Corrector and out of the sweepstakes sow, Margaret by P. I. K. Defender is a show hog, every inch of him, and he is now at the head of Mr. J. T. Judge's herd, at Carroll, Iowa. The pigs that I am offering for sale are out of sows by Perfect Perfection, L's Keep On and Top Chieftain. They are as good as the best, and sure to please." If Homestead readers desire something good, they should write Mr. Steele at once, before the pigs are all sold.

Mr. John C. Miller, of Harlan, Iowa, calls our attention to the fact that an error was made in his advertisement of last week. We stated that he had Single Comb Brown Leghorn cockerels for sale, when we should have said Single Comb White Leghorn cockerels. He also has White Holland turkeys to sell. His advertisement appears on page 16 of this issue.

Readers of The Homestead who are pestered with rats should read the advertisement of Mr. S. W. Harr, of Riverside, Iowa, breeder of thoroughbred Scottish Terrier dogs, which will be found on page 16 of issue. He has some very fine pups from recorded parents for sale. Write him for prices, mentioning The Homestead.

Cutler, Reil & Cooper Duroc Sale.

Saturday, October 27th, occurred the first annual sale of Messrs. Cutler, Reil & Cooper, at Ferris, Ill. Many of the farmers in the immediate neighborhood were busy shucking corn and the boar demand was on this account lessened. Messrs. Thomas & Hogsett, of Golden, Ill., topped the offering, securing the first-prize gilt under six months at Minnesota State Fair at \$100. Mr. Victor Johnson, of Red Oak, Iowa, secured a fine boar pig by Pilot Boy, he by Pilot Wonder, at \$37.50. Colonels McCowan, Reppert and Keil conducted the sale in a satisfactory manner. Animals selling for \$25 or over are listed below:

Lot.	Price.
1. Thomas & Hogsett, Golden, Ill.	\$40.00
2. Same	100.00
6. J. H. Norris, Bowen, Ill.	42.50
11. S. Smith, Carthage, Ill.	30.00
14. J. W. Lowrie, Ferris, Ill.	67.50
15. Same	60.00
16. Victor Johnson, Red Oak, Iowa.	82.50
17. J. G. Reil, Ferris, Ill.	36.00
19. J. H. Norris	26.00
32. N. B. Cutler, Carthage, Ill.	45.00
33. Ed A. Baxter, Pawnee, Ill.	40.00
35. McNeil Bros., Bowen, Ill.	41.00

Jayne's Tonic Vermifuge

gives rosy cheeks and active health to pale, sickly children.

And it is good for their elders, too.

Ask your druggist for it.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

SOLDIERS-TAXATION.

A Subscriber, Delhi, Iowa.—What exemptions from taxation for road or other purposes are allowed by the law of Iowa to honorably discharged soldiers of the Spanish-American war?

Answer.—There is no law exempting soldiers of the Spanish-American war from the payment of road or other taxes.

RENTING CONTRACT.

A Subscriber, Green Mountain, Iowa.—A owns a farm in Iowa which he rented to B for one year, with the privilege of more. B agreed to haul out the manure on the place, and did haul 130 loads last spring, and some more this fall. Recently A notified B that he had rented the place to C for the coming year. Is A required by his agreement to haul out what manure still remains to be hauled?

Answer.—By the terms of the contract the law would require B to haul out the manure remaining to be hauled, or pay A what it would cost to do so.

A FAIR DIVISION.

A Subscriber, Bradford, Ill.—A rented B's farm on shares upon the following terms: Each of them was to furnish one-half of the power, stock, tools, and expenses, and A was to furnish all the help necessary, and they were to divide the income equally. Afterwards A rented twenty-five acres for corn from another party, giving as rent two-fifths of the crop. In raising this crop A used the teams and tools furnished by him and B. What would be a fair division of the three-fifths of the corn crop between A and B?

Answer.—This is hardly a legal question, but we will make a guess on it, which is that A should have two-fifths, and B one-fifth of the crop.

ADMINISTRATION IN OKLAHOMA.

Mr. M. C. H., Hope, Kan.—An insane unmarried woman owning real estate in Oklahoma died at the home of her parents in Indiana. Before her death a guardian was appointed for her in Oklahoma, who, after her death was appointed administrator of her estate. The expenses incurred in caring for the woman during many months of sickness preceding her death were all paid by her parents. Her real estate in Oklahoma has been sold by the administrator, and the money therefor has been received by him. He has been using the money under a claim that the court authorized him to do so by paying interest thereon. The woman left no debts to be paid, and there was nothing to pay out of the estate except the expenses of administration, including compensation to the administrator. (1) Is it lawful for the administrator to use the money as stated? (2) When must final settlement be made? (3) Who is entitled to the dead woman's estate upon such settlement?

Answer.—(1) It is lawful for the administrator to use the money until the estate is finally settled, if so ordered by the court, and by paying interest thereon. (2) The final settlement of such an estate as you mention, should be made as soon after the expiration of one year from the date of letters, as possible. If the administrator makes delay

after a year from the time he was appointed to settle the estate, the father of the dead woman should employ an Oklahoma lawyer to start proceedings to compel a settlement. (3) The property of the dead woman lawfully goes to her father.

COLLECTION OF JUDGMENT.

A Subscriber, Hinton, Okla.—A got judgment against B for \$700 in Iowa about twenty years ago. Can A collect said judgment by law?

Answer.—If B lives in Iowa and has property there not exempt from execution, an execution can be issued on the judgment, levied on the property, and the property sold to satisfy the judgment, provided the judgment is not twenty years old. If it be older than that, it is barred by the statute of limitations.

MOVING HOUSE-TELEPHONE WIRES.

Dr. E. C. Hellman, Ida Grove, Iowa.—A party in the city of Schaller, Iowa, moved a building from one part of the city to another. In order to accomplish the move it was necessary for the telephone company to cut its wires at two places—in the middle of the street and on the side of the street where the building was placed on the lot. (1) Must the owner of the building pay for cutting and repairing the wires at both places? (2) If the owner must pay, what amount is he required to pay?

Answer.—(1) The law would require the owner of the building to pay for cutting and repairing the wires at both places. (2) Such reasonable sum as would compensate the company for the trouble and expense of cutting and repairing the wires.

CURIOUS BANKING METHODS.

Mr. A. L. Severson, Ottosen, Iowa.—I gave my check for \$2 on the Farmers' Savings Bank, payable to A or order in payment for goods. For several years I have had money on deposit continually at said bank. A did not present the check at that bank, but got it cashed at another bank in a neighboring town. When it was returned, five cents had been added to the face of it. I presume for exchange, and the sum of \$2.05 was deducted from my deposit at the Farmers' Savings Bank, instead of \$2. Has a banker any right to collect exchange in that manner?

Answer.—He has no such right. The banker where A got the check cashed had a right to charge A with exchange for collecting the money for him from the bank on which the check was drawn, but no one had any right to add anything to the face of the check without your consent; and the Farmers' Savings bank had no right to deduct from your deposit a cent more than the \$2 called for by the check.

DRAINAGE LAW.

A Reader, Sac City, Iowa.—(1) Under the drainage laws of Iowa, can a tax be levied upon land which is in no way benefited by a drainage system or improvement? (2) Where a tract of land has been drained and damages paid for outlet, and papers for the same recorded, and the party receiving the damages agreed to protect the same, can such land be subsequently taxed for the construction or establishment of a drainage system?

Answer.—(1) To the first question we must answer no and yes—theoretically, no—practically, yes. When a drainage district is established, the board of supervisors appoints three commissioners to personally inspect and classify all lands benefited by the location and construction of the drainage system, and make report thereof in writing to the board. A day is set for the hearing of this report by the board. Theoretically, of course, it is assumed that the commissioners will not report any land as benefited, which is not so, but if they do, there seems to be no remedy, for the law provides as follows: "When the day set for hearing shall have arrived, the board of supervisors shall proceed to hear and determine all objections made and filed to said report, and may increase, diminish, annul or affirm the apportionment made in said report, or any part thereof, as may appear to the board to be just and equitable; but in no case shall it be competent to show that the lands assessed would not be benefited by the improvement, etc." This is a curious law (see Sec. 12, Chap. 68 laws 1904, page 64). (2) It can be so taxed if found to be benefited by commissioners and the board of supervisors, although it may have been previously drained by private arrangement of the land owners.

POLL TAX-SOLDIER.

A Subscriber, Delhi, Iowa.—Is a Spanish-American soldier exempt from the payment of poll tax, according to the laws of Iowa?

Answer.—He is not.

LOST CERTIFICATE OF DEPOSIT.

A Subscriber, Stillwater, Okla.—B deposited money in a bank in Oklahoma on a time check which drew interest. He lost his deposit check. (1) What will he have to do to get his money? (2) Will the check ever become outlawed?

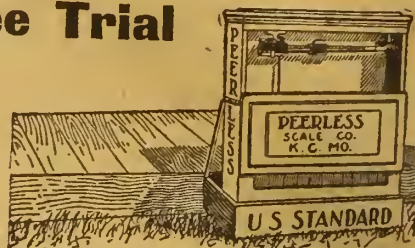

Answer.—(1) Perhaps the bank will upon his request issue to him a duplicate certificate of deposit. It could do

Get This Peerless Pitless Scale

on 30 Days Free Trial

Direct From Factory

No Money In Advance
We Pay the Freight.

Don't Pay Two Prices: If the Peerless was sold through dealers you would have to pay from \$65 to \$80 for it.

If it had a steel frame you would pay from \$60 to \$100 for it anywhere. Peerless Frames Are Of Wood—the others, costing 33 1/3 to 100% more, are steel; all inside working parts are practically the same.

We can sell this high grade U. S. Standard Scale at \$46.50 because we pay no profits to Salesmen, Agents, Jobbers or Dealers.

We can offer you a genuine free trial because the Peerless will stand the test.

The Peerless will do the work as well as any high priced Pitless Scale and better than the best old style pit scales, because more convenient to operate and saves you the big expense of digging and walling a pit.

A Peerless Scale is portable, too. You can move it to any point on your place, wherever it is most convenient for you to do your weighing.

Is it good business for you to take chances on the other fellow's weights

being right when you can absolutely protect yourself from loss at an outlay of \$46.50?

You might lose that much on one or two transactions!

If you weigh your grain, stock or anything else on a Peerless you know you're right and no one can contradict you.

The Peerless is Standard.

It's not a "cheap" scale at a "cheap" price. It's a high quality scale at a low factory price.

\$46.50

Send For The Catalog

and you will be convinced. It describes every feature and every part of the Peerless in detail. You will make a big mistake to buy a high priced scale of any kind before investigating.

Remember our free trial is a real genuine free trial. No deposit, no notes to sign, no freight to pay, no red tape—

Absolutely no expense or no obligation until you are satisfied.

Let us send you a set on these terms for you to use a month.

Just put this paper down and write for the catalog now, before you forget.

PEERLESS SCALE CO., Dept. G, Wyandotte St. & Milwaukee Ave., Kansas City, Mo.

1856-Sandwich-1906

Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country.

The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, belted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

PILES cured. Most cases get well after one application of medicine without pain one hour, then go about your work. No matter how bad or long standing your case, you should go at once and take this treatment. No knife or scissors used. Pay when cured. Examination free. Dr. J. C. McLaughlin, 351 Junction Bld., Kansas City Mo.

right-of-way, does the law require the railroad company to build a hog-tight fence?

Answer.—The law requires railroad companies to construct along their rights

RAILROAD FENCE-NEBRASKA.

Mr. Wm. Ough, Waunaja, Neb.—Where hogs are kept on land adjoining the railroad

of way, fences sufficient to prevent cattle, horses, sheep and hogs from going upon the track, and provides that if they do not do so they are liable for all stock killed or injured by reason thereof. An owner who has otherwise inclosed his land, may give the railroad company a written notice to build such a fence between its right of way and such land. If the company then fails to do so for six months, the land owner may build such fence, and recover the value of it from the company.

INHERITANCE IN IOWA.

A Subscriber, Prairie View, Kan.—An unmarried man died intestate in Iowa, leaving property there. Both his parents are dead. There are surviving him, brothers and sisters, also children of a deceased brother; also children of a deceased half brother. How would his estate be divided under the laws of Iowa?

Answer.—Between the brothers and sisters and children of deceased brother and children of half-brother equally, share and share alike—that is, the children of the deceased would get just what their father would have received if living, and the children of the deceased half-brother would get just what their father would have got if living and a full brother, instead of a half-brother.

SUNDAY LAW—LABOR.

A Subscriber, Melvin, Wis.—According to the laws of Iowa, can a person be fined or imprisoned for cutting grain, or moving thrashing machines on Sunday, or may such labor be regarded as work of necessity?

Answer.—The Sunday law provides among other things, that if any person be found in any labor on Sunday, except that of necessity or charity, he shall be fined not more than five dollars, nor less than one dollar, and be imprisoned till the fine and costs are paid. If grain was overripe or needed to be cut immediately to preserve it, and if it be necessary to thrash it without delay, then such labor as you mention would be deemed labor of necessity and excusable under the law.

PRINCIPAL AND AGENT.

A Subscriber, Reynolds, Ill.—A is an old man. He owns a farm. He went before a notary public and had B appointed conservator without bonds. Afterwards A sold his farm to B, who was then, and still is, doing business for A. Was the sale legal? (2) Does it release B from the conservatorship?

Answer.—(1) You have stated an impossible situation. A conservator cannot be appointed by a notary public, or by going before him. In Illinois when a person is a lunatic or idiot incapable of managing his property, or is a drunkard or spendthrift who is spending or wasting his estate so as to expose his family to want or suffering, the county court of the county where he resides, may appoint a conservator for his estate, upon the application of any good citizen. There is no other way by which a person can be lawfully appointed a

conservator for another in the state of Illinois. By your statement you may mean that A went before a notary public and there made and executed a power of attorney to B, authorizing him to attend to his business. If this is so, then B became A's agent, and there is no law to prevent A from selling his farm to B. If he did so, and it was a fair and square deal in which B took no advantage of A, the sale is perfectly legal, although B was A's agent at the time. (2) Such a sale would not necessarily terminate the agency.

HOMESTEAD ENTRIES.

Mr. Joseph Morrissey, Moore, S. D.—(1) If a man enters a homestead in Lyman county, S. D., and commutes it, can he enter another homestead on the public land? (2) Is there any public land outside of South Dakota where a man can enter a homestead and commute it after eight months?

Answer.—(1) The act of congress of June 5, 1900, provides that any person who has heretofore made a homestead entry on the public land, and commuted it, may make another homestead entry. (2) There are large areas of public land outside of South Dakota open to homestead entry, and a homesteader can commute his entry after fourteen months—not after only eight months.

CONTRACT—MISREPRESENTATIONS.

A Subscriber, Hillsboro, Iowa.—(1) Last December I bought two cows at a public sale upon the representation made by the owner, that both of them would calve in March. One of them calved in June, and the other in September. Is the owner liable to me for damages? (2) In the fall of 1904 I rented my farm and went to California. A man contracted with me to cut a large Osage hedge which was on the place for one-half of the posts it would furnish. He was to cut it all even with the surface of the ground, and save the wood for me, and burn the brush, and was to have for his labor every other post, taking them as they came. He cut only such portions of the hedge as furnished posts, cutting some of it two feet from the ground, and he did not save any wood or burn any brush. I notified him to not take a post away till he fulfilled his contract, but he divided them to suit himself. Can I prosecute him, and what would be the offense at law.

Answer.—The man is not guilty of any criminal offense, hence you cannot prosecute him at all; but he has violated his contract with you, and you can sue him in a civil action and recover whatever amount of damages you can prove you have suffered.

DO RIGHT AND BE GOOD.

A Subscriber, Morning Sun, Iowa.—A owns a farm and hired B to attend to it at a monthly salary, but for no specified time, only so long as both could agree. Recently A decided that B was not doing enough work for the money paid him, so he discharged him. B lives in a house on the farm. A refuses to pay B the balance of his salary until he gives up the house, and B refuses to give possession of the house until he is paid. The contract between them was verbal. A has not served notice on B to quit, and no suit has been brought. Please give your best advice to this matter.

Answer.—There is but one rational course to take in this matter, and if these two men are sensible, they will take it, and that is for A to pay B what he owes him on salary according to the verbal agreement between them, even though A may think B's work was not worth the money; and then for B to give up possession of the house at once. This is right and just, and if either party refuses to do his part in this kind of a settlement, it will probably cost each of them more than the whole amount involved in the controversy. B can recover his salary by law, and A can put B out of his house by law, but what's the use?

ADJOINING LANDS—DRAINAGE.

Mrs. A. B. Curtis, Dows, Iowa.—I own 100 acres of flat land nearly square in form. There were a couple of ditches or shallow drains plowed through it before I got it to run off the water, but they did no good. I drain tiled my land at a cost of \$15 per acre. My neighbor owns fifty acres of land adjoining mine on the north. When I drained my land I offered to allow my neighbor to find an outlet for his drainage water by running a ten or twelve-inch tile through my land to an outlet. He refused to accept the offer on account of the cost of it, and offered me \$125 for an outlet on my land. I refused this because it would have compelled me to lay extra tile to carry drainage water, not only from my neighbor's land, but also from eight other small farms from ten to thirty-five acres each, the owners of which had paid my neighbor \$35 each for an outlet for their drainage water. My neighbor then dug a hole on his own land near the division line and dropped the water into that. This hole is opposite one of the shallow ditches on my land. At this place his land is lower than mine. I am breaking up my ground and my neighbor objects to it, because it will fill up these shallow plowed ditches above mentioned and so cause the water to back upon his land. He says the ditches were there before he tiled his ground and therefore I have no right to level the ground and fill them up. Have I a right to break up my land, and in so doing fill up said ditches?

Answer.—You have a perfect right to do so. Your neighbor cannot lawfully prevent you from so doing, nor recover damages from you.

The New Superior Fanning Mill

We Have Invented a New Device for Separating, Grading and Cleaning all Sorts of Seed and Grain.

The old Superior Fanning Mill was a pretty good Grain Separator. The Farmers told us it was way ahead of any other mill on the market, and we knew it was, but we were not entirely satisfied with it. It was the aprons interposed between the sieves in the wheel gang that bothered us. We found that they easily got worn out, and that, when they got wet they were entirely useless and also that the grain had a tendency to

stick to these aprons, causing much delay in work and time. And then they were expensive.

During last summer, we experimented a good deal with a new sieve, that Mr. Owens had worked out, and during the last two months we have perfected a machine and subjected it to the most severe test that any grain separator ever was put to. It

A GRAND SUCCESS

The aprons are done away with. We obtain a better and faster separation by using a system of sieves having imperforated sections. These are so arranged, that when separating oats from wheat, if any oats get up on end and drop through one sieve with the wheat, they strike on an imperforate portion of the sieve below, and slide off from this imperforate portion onto the next perforate portion. Whenever any oats drop through a perforated section of the sieve they strike upon an imperforated section of the sieve below. By this means we get a more perfect separation and greater capacity.

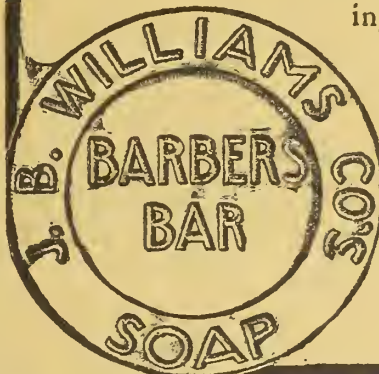

We believe that the New Superior for separating, grading and cleaning all kinds of Seed and Grain, is the most perfect device that human genius can contrive. Unless some one comes along and performs a miracle, the New Superior will always stand at the head in grain cleaning machinery. Now this we are ready to demonstrate and prove to you, and that without the slightest cost on your part.

ARE YOU INTERESTED? Then write us and we will tell you how we can satisfy yourself by actual trial that the New Superior is what we claim it to be. And it will not cost you one cent so write today.

J. L. OWENS CO., 614 SUPERIOR STREET, S. E., MINNEAPOLIS, MINN.

Williams' Shaving Soap

Laundry soap is made to take dirt out of clothes. It is coarse and harsh. For shaving you need a soap made just for shaving, mild, healing and softening. The only real shaving soap is Williams' Shaving Soap. It makes shaving a luxury.

Send 2c. stamp for trial sample (enough for 50 shaves).

Williams' Barbers' Bar, Yankee, Mug, Quick & Easy Shaving Soaps, and Williams' Shaving Sticks.—Sold everywhere. Address,

THE J. B. WILLIAMS COMPANY, Dept. A, Glastonbury, Conn.

Marlin

Why is the Marlin 12 gauge take-down repeating shotgun the best all-around shotgun that money can buy?

Marlin shotguns are made of the best material obtainable for the purpose. They are strong and sure, and work under all conditions. The breech block and working parts are cut from solid steel drop-forgings; the barrels are of special rolled steel or of "Special Smokeless Steel."

The lines of Marlin shotguns are pleasing—the balance is perfect. They pattern perfectly and have wonderful penetration.

The solid top and side ejection assure safety and comfort. This is the gun you have been needing.

Send six cents for our catalogue, which explains every Marlin in detail and is full of other valuable gun lore.

The Marlin Firearms Co., 135 Willow Street, New Haven, Conn.

Low Rates to South Dakota.

On every Tuesday during 1906 Homeseekers' rates to South Dakota points are offered by the Chicago, Milwaukee & St. Paul Railway. These low rates enable homeseekers to investigate the opportunities offered at slight expense. Any ticket agent can sell you tickets to South Dakota, via the Chicago, Milwaukee & St. Paul Railway. It is worth your while to ask him to do so. Write today for new booklet on South Dakota.

RAIS! My Scottish Terriers will make them git. Very fine female puppies from recorded parents for sale. S. W. Harr, Riverside, Iowa.

When writing to advertisers please mention this paper.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

THE FRESH-AIR HOUSE.

Much has been said and written about the fresh-air house. The average reader is liable to get an impression that only one kind of house can be built that will provide this necessary condition. Of course, most articles refer to a specially-arranged house which for the most part is open on one side, or partially so. It is built long and deep, with the opening in the end or side furthest from the roosting fowls, and it is like being out of doors with the sting taken off the temperature. It is claimed to be the best plan for building houses, though a house of this kind may not be the best for all sections of the country. When the mercury gets very low and storms rage with great fury, this plan of a house will not do.

All poultry breeders, amateur as well as veteran, should realize that fresh air is a most necessary element. Many fairly good poultry houses seem to have been built without any provision for its introduction. They are shut up at the approach of the first storm and are kept so until spring. This is a grave mistake. Houses can be made so as to admit fresh air without providing patent ventilators and contraptions that are liable to get out of rig. It simply means having the house in two or more apartments, and when the doors of one apartment are open to admit of fresh air, the poultry may be confined in another. Fresh air can be admitted in the day time and at night the openings can be closed. Cleanliness will assist largely in keeping the air so admitted in a fresh condition.

POULTRY IMPROVEMENT.

For many years the Maine Experiment Station has had in operation a practical poultry department under the management of a master hand and the report of what has been done there shows good results. This station is following much the same lines in poultry improvement as were followed in the development of milk production in cows; that is, the individuals have been selected on the basis of what they can do. This work has been kept up from generation to generation until a fixed type has been established. It is admitted by the station that it is not easy to do this on the ordinary farm, where it would be too expensive to keep up trap nests and to equip a plant.

Improvement in former years of poultry has been along lines of plumage, shape and size of the comb, characteristics of leg and toe covering and other points of excellence which can have absolutely nothing to do with either egg production or culminate in furnishing a fine table fowl. One may as well expect the dairyman to select his cows according to color and spots as to follow this line in poultry improvement.

The Maine station has at last produced fowls with a pedigree. A record has been kept of the mother, the grandmother and even the great-grandmother so far as egg production is concerned. Families have sprung up that show an increase in egg production in each succeeding generation. It is expected that families will be as much in demand as egg producers as certain families are in the dairy.

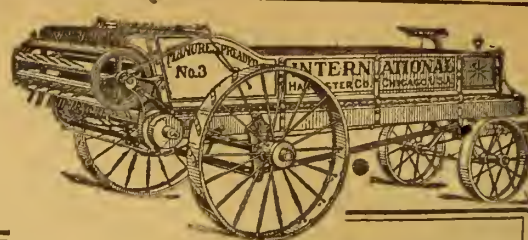

This station has found out that it is the early-maturing pullet that makes the good-laying hen. The pullet that begins laying at the earliest age is most likely to be the biggest egg producer. This point is declared to be beyond the experimental stage and is now positively demonstrated. It is also proposed that such hens should be mated to cockerels from hens with a large production of eggs to their credit, and the eggs from this mating used for hatching.

It is cheering to know that the time has arrived when a hen will be esteemed for what she can do and not for what she looks like.

Seckman's Closing Out Sale.

Mr. Geo. W. Seckman, of Ripley, Ill., held one of the most successful Duroc sales of the year on Wednesday, October 24th. The largest crowd of breeders at any of the season's sales was present and seventy head

I. H. C. Spreader Pointers

A good spreader costs considerable but it is worth more than it costs.

A poor spreader is an expensive luxury, no matter what it costs.

When you buy an I. H. C. Spreader you are buying something standard.

You get for your money—

—A substantial, durable machine

—One that is easily handled

—It handles manure in any condition.

—No spreader made does better work

—No spreader is lighter in draft.

I. H. C. Spreaders are well proportioned machines. They are strong

but not needlessly cumbersome—strong where strength is needed, with due regard for light draft and load to be carried.

The I. H. C. apron is driven at both sides, by both hind wheels. This eliminates all binding, friction and undue strain.

It has a vibrating rake to level the load—exclusive feature.

It has a wide range of feed, consequently a large or a small amount of manure per acre can be distributed. It is the only spreader controlled and operated entirely with one lever.

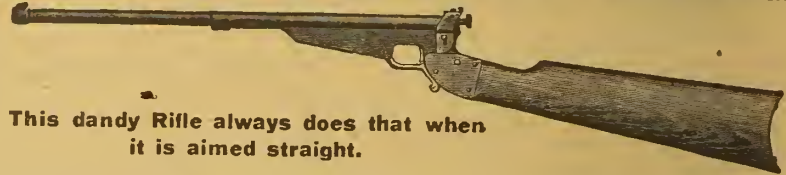

Made in three sizes for each of the two types, Cloverleaf, endless apron, and Corn King, return apron.

Call on the International local agent for catalog and full information or write to home office.

Send three 2 cent stamps for a copy of "Farm Science," Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

International Harvester Company of America, Chicago, U.S.A.
(INCORPORATED.)

BOYS---IT HITS THE MARK!

This dandy Rifle always does that when it is aimed straight.

Unless you want to hit the mark don't get one. But you do—don't you? Everybody means to hit the mark some time. Then write us at once and you'll crack the bull's eye. For you can get that rifle, boys, without a cent of money. Just a few minutes' work among your friends, or your friends' friends—and the rifle is yours, sure thing. It's the handiest and the handsomest little gun on the market. We're giving it to you straight. And it can be earned just as easy as rolling off a log. Write us about it—just a line. Give us your full name and address and say you want to earn a rifle. That will do. We'll pull the trigger, and back will come a letter to you with full particulars, and it is ten to one you will have earned the rifle the same day you get that letter. It's up to you now. Get out your goose quill and address,

THE HOMESTEAD, BOYS' DEPARTMENT,

DES MOINES,

IOWA,

were disposed of in quick order at an average of \$73.50. The Proud Advance Stock Co., of Shannon City, Iowa, topped the offering, paying \$600 for the herd boar Ohio Chief. This was the highest price ever paid for a Duroc boar at auction. Messrs. McNeil Bros., of Bowen, Ill., and J. F. Crum, of Sellersburg, Ind., were the contesting bidders. This boar should produce something extra good crossed on the get of the noted prize-winning boar, Proud Advance. Messrs. Thomas & Hogsett and H. B. Griffith secured the top of the female offering, paying \$305 for Fairview Maid, she by Fruit's Corrector by Waverly. She had a litter of pigs at side by Tip Top Notcher. Messrs. Manlove Bros. secured Goldie O. 40th, one of the best producing sows in the Seckman herd at \$300. Col. F. F. Luther opened the sale with a strong plea for the Duroc Jersey and was assisted in the selling by Colonels McGowan, Reppert, Keil and Riley. Only one animal sold for less than \$25. The list of animals selling for \$25 or over follows:

1 Proud Advance Stock Co., Shannon City, Iowa	\$600.00
2 Geo. Baker & Sons, Pawnee, Ill.	125.00

The Wabash offers the following opportunities for excursion rates:

The Dedication of State Monuments at Vicksburg, Nov. 11th and 12th, Chattanooga, the 16th and 17th, and Paducah for Shilo, the 19th and 20th, at exceptionally low rates and good limits. Via St. Louis is the quickest and best.

From Iowa, St. Louis is the logical gateway.

Homeseekers' tickets to nearly all points, first and third Tuesday, at low rates. Through service from Des Moines to Union Stations at Kansas City and St. Louis.

Address F. C. McMillan, D. F. & P. A., or L. R. Davis, P. & T. A., Des Moines, Iowa.

SPECIAL COLONIST RATES SOUTHWEST.

On the first and third Tuesdays of each month until March, 1907, inclusive, The Chicago Great Western Railway will sell one way colonist tickets to points in states of Arkansas, Colorado, Indian Territory, Kansas, Louisiana, Mexico, Missouri, Nebraska, New Mexico, Oklahoma, Texas and Wyoming at rate of one-half of regular first-class one way rate plus two dollars. For full information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

IOWA MONUMENT DEDICATION.

On certain dates in November the Chicago Great Western Railway will sell round trip tickets to Vicksburg, Miss., Chattanooga, Tenn., Andersonville, Ga., Johnsonville, Tenn., Perryville, Tenn., Selmer, Tenn., Danville, Tenn., Corinth, Miss., and Shiloh Battlefield at very reduced rates. For complete information call on or address E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Echoes From a Kansas Farm

By Henry Hatch

All the talk now is about corn and corn husking. How many rows, so many rods long, it takes to make a load, is of more consequence than who is elected.

There is a considerable of dry rot in the corn this fall—here, at least. It is strange, but too much wet weather is what causes dry rot. The water runs into the husk of the ear, at the point, and cannot get out. The kernels are then rotted.

On October 22d we stopped for a few minutes at a neighbor's, who was just hauling in the last load of alfalfa hay, from the last cutting. At about the same time the mail carrier came along, bringing that morning's daily, which told of two feet of snow in the Dakotas and some snow as close as Colorado. A few hundred miles often makes a difference.

It is cheaper to keep cats than rats. We have four (cats) and they have about cleaned out all rats and mice around the buildings. Enough are continually coming in, however, to keep the cats' ration of fresh meat supplied. Differing from some, we like to have good cats and a good dog on the farm.

There are some who are secretly looking for what they call "a bust of prosperity;" that is, they do not look for the present prices to last, either of what the farmer buys or sells. Many, too, are expecting lower land values. Being no prophet nor son of a prophet, we claim nothing, neither good nor bad.

Nothing is quite so aggravating as the hatful of cold rain that falls at this season of the year. Was just driven in from the corn field with a half-load, by a rain that is now all over. It was enough, however, to make corn husk hard for a few hours. It still husks hard enough, even when dry, as it has not yet had a real stiff freezing.

We still see a few using the old shoveling board in their wagons. Standing partly on one's head when starting to throw out each load of corn isn't altogether nice. The price of three pounds of "chewin'" will buy a good endgate, and, with one such on, a wagon box will hold three or four more bushels. Maybe this is the reason some will have none on.

We never like to be behind getting the corn into the crib. Also, getting the yards cleaned of all manure is work not to be put off too long. Down here in Kansas we do not have to fear awfully cold weather or deep snows, but it sometimes gets muddy, making both husking and manure hauling bad work. It is fine weather for both now, so all else gets the go-by. One team hauls manure, the other is on the corn wagon. When one of us gets tired of husking and the other of manure hauling, there is a change.

Some of the railroad companies have

adopted a new style of fence post, and one that seems should be everlasting. It is made of common galvanized pipe and cement. A piece of pipe about six feet long is imbedded in a small hole filled with green cement. This soon hardens, leaving a post that may be dug up and reset if wanted.

The trouble with most of the so-called farmers' co-operative companies is they are composed of most every other kind of men but farmers. The "rank and file" may be mostly farmers, but the "bosses" are men who have got there because there's money in it for them. Our idea of farmers banding together to fix prices on what they have to sell is no more favorable than towards the trusts that control other industries. The "square deal" means to hit all trusts alike, no matter by and for whom managed.

It is commonly supposed that birds and various wild animals have great knowledge of the weather. It is believed by some that squirrels laying up a large store of nuts means a cold winter ahead. Ducks and geese flying through without stopping is supposed to be a criterion of a storm soon to occur. We do not believe anything has been created wiser than man. By this we mean the average of man. There are some horses and some dogs that appear smarter than some people, but, then, these are exceptions that prove the general rule.

It pays to pick seed corn as you unload it from the field. In this way you get the best of all the farm produced. Down Kansas way we don't have to be so particular with seed corn as northern folks do, but there are many here who are not particular enough. Probably one-half of the farmers still pick their seed from the pile that is left in the cribs, after feeding from it all winter. The usual excuse offered for this is there is no place where seed could be kept separately. It does not take a hall or an auditorium to hold a few bushels of seed corn. We believe we could find room under a dry roof, for a few bushels, on any Kansas farm.

Mr. J. O. James' Poland Chinas.

The Poland China sale of Mr. J. O. James was held at Bradyville, Iowa, on the date advertised, namely, Thursday, October 11th. The sale was well attended and most of the offering went to breeders. In all there were fifty-one head sold at an average of \$33.35. The top price of the sale, \$92, was received for a Pawnee Lad pig, the lucky bidder being Mr. C. E. White, of Hephurn, Iowa. Favorable comment was expressed on every hand on the high character of Mr. James' offering. The following is a complete list of the sales made:

THE YOUTH'S COMPANION

FIFTY-TWO ISSUES FOR \$1.75,
and Extra Free Numbers.

These are some of the attractions provided for subscribers to the New Volume for 1907:

250 CAPITAL STORIES

—humorous stories, character stories, stories of life on the farm, in the great cities, on the sea, in the wilderness, including SIX SERIAL STORIES.

TILL THE DOCTOR COMES

Fifty-two articles on hygiene and emergency treatment of the utmost service in the household. They tell how ill health is incurred, suggest simple remedies for simple complaints, and prescribe the measures to be taken in serious cases while waiting for the physician.

100 INSPIRING PAPERS

Officials high in the national service, men of prominence at home and abroad, great travellers and authors will contribute articles full of encouragement to all about to begin their life-work, showing the worth of wisely directed ambition.

2000 ONE-MINUTE STORIES

The Companion is distinguished for the number and excellence of its sketches and stories which take not more than a minute to read. But they are always new, always well told, and in great quest by preachers and after-dinner speakers.

The Editorial Page. Notes on Science. Children's Page, Etc.

As much reading in the year as would fill twenty 400-page novels, or books of biography or history or travel ordinarily costing \$1.50 each.

EVERY NEW SUBSCRIBER

Who cuts out and sends this slip (or mentions this publication) with \$1.75 for The Companion for the 52 weeks of 1907 will receive

FREE ALL THE ISSUES OF THE COMPANION FOR THE REMAINING WEEKS of 1906.

FREE THE THANKSGIVING, CHRISTMAS AND NEW YEAR'S DOUBLE NUMBERS.

FREE THE COMPANION'S 12-COLOR FOUR-LEAF HANGING CALENDAR FOR 1907.

\$16,290 in cash and many other special awards to subscribers who get new subscriptions. Send for information. Sample Copies of the Paper and Illustrated Announcement for 1907 free.

THE YOUTH'S COMPANION, BOSTON, MASS.

The NEVER LEAK Roofing

A strong phrase, but it's a good name, for Congo. Perfect rolls, carefully made and every one inspected and tested. No imperfect rolls will reach you. That's why it never leaks. There are no flaws, no thin places, no weak spots. Once it is on the roof, the water will not get through.

A sample will show you why. Send for it to-day; it's free.

ADDITIONAL FIELD NOTES.

BURGE'S SHORT-HORNS.

Mr. G. H. Burge, proprietor of the Wayside Farm, herd of Short-horn cattle, Mt. Vernon, Iowa, in furnishing the copy for his advertisement that appears on page 28 of this issue, writes: "I have sold twelve head of cattle since my sale, and still have seventy-five head left. Mr. Parsons, of Newton, Iowa, said he considered Mildred's bull calf a better calf than Money Musk was at the same age. Half of my herd are Scotch."

HEREFORD BULLS AND HEIFERS.

On page 28 of this week's Homestead will be found the advertisement of Mr. Z. T. Kinsell, of Mt. Airy, Iowa, one of the most prominent and one of the best Hereford breeders in this country. Mr. Kinsell is now offering fifteen young bulls for sale, ranging in age from twelve to twenty months. Also fifteen heifers ranging in age from twenty-four to thirty months, and safe in calf. These are sired by St. Elmo of Shadeland, McKinley and Advancer, all well-known prize-winning bulls. Mr. Kinsell will be pleased to hear from anyone wanting good young bulls or heifers. Write him at once and mention The Homestead.

ALLEN'S SHROPSHIRE EWE SALE.

The annual sale of Mr. George Allen, Lexington, Neb., one of the foremost Shropshire sheep breeders in the United States, will be held at the sale pavilion, Kansas City, Mo., November 14. He will offer 300 head of yearling and two-year-old ewes, bred to first-class imported rams. These will be sold in pens of three and carefully mated. They will be selected from the George Allen flock, which is one of the very best in the United States, having been the World's fair flock at Chicago, as well as one of the leading winners at St. Louis, and the Illinois, Iowa and Nebraska State Fairs. It will be the greatest offering of Shropshire ewes that will be made at public sale this year. Write Mr. George Allen, Lexington, Neb., for catalog at once, and kindly mention this paper.

B. C. MARTS' DUROC JERSEY SALE.

Mr. B. C. Marts, of Polk City, Iowa, held a Duroc Jersey sale on Friday, October 26th, as advertised. A representative crowd of breeders was in attendance and the outcome of the sale was highly satisfactory to Mr. Marts. The twenty-seven head sold averaged \$31.20, the top price being \$105 on an April boar by Colonel Perfection. Mr. Marts' offering was notably uniform and men on every hand could be heard praising the general character of the Marts Durocs. Most of our readers are aware of the fact that Kan't Be Beat Again is now at the head of Mr. Marts' herd. He is considered by many competent Duroc judges the best Kan't Be Beat hog now living. Sows in pig to this great hog should be in good demand next January and February.

LAST CALL FOR HARVEY & SON'S SALE OF POLAND CHINAS.

The man who wants a good useful Poland China boar or a good brood sow cannot do better than to attend the sale of Poland Chinas to be held at Maryville, Mo., on Saturday, November 17th, by Messrs. J. H. Harvey & Son, of Maryville, Mo. Thirty-three boars and twenty-eight sows are to be sold and all are the practical kind, bred and raised by practical hog men. No fancy prices are expected by these gentlemen, yet they will sell a number of hogs that should go good breeders and at good prices. The offering being large will afford many good opportunities to buy at reasonable prices. Col. Geo. P. Bellows will do the selling and bids may be sent to him in care of Messrs. J. H. Harvey & Son.

DO YOU WANT A GOOD FARM?

To anyone that wants a good home, the farm that is advertised in this issue by Messrs. L. A. Briggs & Co., of Kansas City, Mo., is certainly an attractive proposition—480 acres, with two sets of improvements, one house having twelve rooms, with bath, hot and cold water, etc., two windmills, three wells, 4,000-bushel graugary, two barns, sheds, implement house, etc., rural route, telephone. A new railroad is to be built through this section and there is a chance for a town site on or near this land. This is surely a bargain at \$30 per acre. This farm will be taken off the market if not sold by January 1st. Messrs. Briggs & Co. are anxious to get in touch with those who want to buy. Look up their advertisement on page 24 and write them for terms and full particulars.

BROWN'S CLOSING OUT SALE.

One of the good Short-horn sales to occur the latter part of November is the dispersion sale of Mr. John Brown, of Doniphan, Neb. The offering will consist of eighteen cows and heifers of breeding age and eight bulls, including the herd bull, Golden Dale 216868 by Parkdale Champion 172108. He extends to those who may be interested a cordial invitation to attend this sale, Monday, November 19th, at the farm near Doniphan or Hastings, Neb. Parties may easily reach the farm from Grand Island or by way of Hastings. Free conveyance from either Doniphan or Hastings and entertainment while at the farm. The cattle are in good thriving condition and will be put into the sale without extra preparation to sell on their merits as breeding herds, having sufficient individuality to warrant this statement. Some of the cows are with calves by their side and will be sold together, except some of the older calves which will be sold immediately after dam. Remember Mr. Brown is selling

them all and it gives the breeder who is looking for seed stock a chance to pick up what could not be bought otherwise. Mr. Brown is the first to sell in this great week of Short-horn sales and has the goods to offer. Catalogs now ready and can be had by addressing Mr. John Brown, Doniphan, Neb.

ANDREWS' POLAND CHINAS.

One of the most modern and best equipped hog farms in the state of Nebraska is that of Mr. Ed Andrews, of Kearney. At this farm you will find that the hog business is conducted in a manner that only one with years of experience is able to do. Mr. Andrews believes in raising them on largely bone and muscle-producing foods which can be had in the large alfalfa fields on this farm. One of the last additions to this great herd is the boar, Immense, purchased from Mr. W. C. Welch, of Harveysburg, Ohio. This hog was a winner for third place in class at the Ohio State Fair and was said to have had many friends for a better place. He was sired by Golden Rule 85737 by Perfect Perfection 55617, he by Chief Perfection 2d 42559. His dam was Fruit's Perfection 19482 by Chief Perfection 2d 42559. He is a line-bred fellow, and a hog that is liable to make them go some in the show ring next fall. He will weigh right at 650 pounds; is as smooth as a ribbon. He has a wonderful ham, good, even side lines, plenty of depth and a set of limbs that would be a credit to any hog. Mr. Andrews will hold a brood sow sale the latter part of January, and there will be several sows in this sale bred to this hog. Watch for the sale date in The Homestead and go and buy a sow bred to this good hog.

E. S. TURNER, OF COLFAX, IOWA, SELLS SHORT-HORNS AT NEWTON, IOWA, NOVEMBER 28TH.

On the day following the Parsons and Stewart sale of Short-horns in the pavilion at Newton, Mr. E. S. Turner, of Colfax, Iowa, will sell forty-eight head of choice Scotch-topped Short-horn cattle, forty-seven of which are females, and a Scotch bull, Red Victor. Red Victor was bred by Mr. H. D. Parsons and has proven a very valuable sire in the hands of Mr. Turner. He is a rare bargain for some one who desires a strictly up-to-date Scotch herd bull. This offering is exceptionally attractive in one way at least. Fully fifteen of the cows will sell with calves at foot, and forty of these females are now of breeding age and will have calves at foot on sale day or be bred to Red Victor, the above named bull. Mr. Turner has made a specialty of rapid-breeding, heavy-milking Short-horn cattle, that showed an adaptability to take on flesh rapidly as soon as dried off from milk. We have carefully inspected each and every animal in these offerings and will have considerable to say in future issues relative to their individual merit. In the meantime all Homestead readers should make application for catalogs. For the Turner sale apply to Mr. E. S. Turner, of Colfax, Iowa.

SHORT-HORNS, POLLED DURHAMS AND POLAND CHINAS AT AUCTION.

On Thursday, November 15th, Mr. J. C. Glaser, of Avon, Ill., will offer for sale forty-five head of Short-horn and Polled Durham cattle. Mr. Glaser has been a very successful breeder of Polled Durham and Short-horn cattle, as well as Poland China hogs, but is compelled on account of sickness and the scarcity of help to close out his cattle and hogs at public auction. The most fashionable families of the breeds have been drawn upon for breeding stock and the cattle, while not fat, but in good, strong breeding condition, are such as will prove valuable additions to many herds. Several of the cows go into the sale safe in calf to the herd bull, Bell Boy, a son of the noted breeding and show bull Golden Hero, an unbeaten show-yard winner. Bell Boy is also included in the offering and some breeder in search of a good Polled Durham bull should not overlook this opportunity. Several other good young bulls are included in the offering, many of which are old enough for service. Dewey's Cambridge Lad by Cambridge Lad 3d, and Maggie's Marshall by Marshall Abbottsburn Jr., are two very good yearling bulls that should attract breeders throughout the entire country. Mr. Glaser is also offering for sale a fine lot of Poland China hogs of the useful sort. They are mostly sired by boars of Perfection family and are in nice shape. The farm is also to be sold that day and by referring to the advertisement a full description may be obtained. Catalogs are now ready and will be sent to all who write, kindly mentioning The paper, as per announcement on page 37 of this issue.

STANSELL & MATERN'S DUROC SALE.

Every breeder of Duroc Jerseys should plan to be present at McNabb, Ill., on Wednesday, November 14th, to attend the annual fall sale of Messrs. Stansell & Matern. These two breeders have a very fine lot of young stuff included in their sale that should prove a valuable addition to any herd. At the head of their herds they have two very good boars, Chief of All, a grandson of Ohio Chief and one of the best breeding boars to be found anywhere, and Kant Bee, a son of Kant Be Beat and out of Queen Ruby by Top Notcher. The majority of the entire offering is sired by these two boars. They are uniform in type, color and conformation and will do the buyers much good. The writer representing this paper has during the past season had the opportunity to repeatedly inspect this herd and is pleased to recommend it as one of the best-bred and most useful to be found anywhere.

OUR RED LETTER

Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Date 1900.

Homestead Company, Des Moines, Iowa:

Enclosed find \$1.25, for which please send the following five newspapers and magazines for one year to my address: Iowa Homestead, Chicago Weekly Inter Ocean, Kansas City Weekly Star, Farm Gazette and Homemaker; as per your special offer to Homestead readers.

Name

Postoffice

Rural Route State

A gilt and boar farrowed April 14th by Chief of All and out of Lottie Wilkes II. by Exchange are an unusually good pair of pigs and should go to some good herd. A March 30th gilt by Chief of All and out of Thick Girl 4th is a very good pig and some breeder who wants a good sow will find what he wants in this gilt. There are a number of very fine gilts included in this offering, which breeders will find will make them good money in their brood sow sales. They should not be overlooked, as they are in excellent shape for breeding purposes. The boars are equally as good, and the breeder or farmer who is in the market for an extra good boar will find what he wants in this offering. Catalogs are now ready and will be sent to all who will write as per advertisement on page 32 of this issue. Bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. Plan to be present sale day.

THE LAST CALL FOR THE GODDEN SHORT-HORN SALE.

The sale of Short-horn cattle belonging to Messrs. J. & I. J. Godden, will be held at their farm near Bradgate, Iowa, on Wednesday, November 14th. Forty-six head have been cataloged for the sale, eleven head of which will be bulls, including their Scotch herd bull, Prince Malcolm. The latter bull is four years old and is a son of the Gerlaugh-bred bull, Malcolm, he by Royal Favorite out of Imp. Missie May. This bull has been used with marked success on the Godden herd and is now sold because they are retaining his heifers in the herd. He is a red in color and is a good breeder, and here is the place that some man will get a Scotch bull and get him right. Most of the younger bulls, and there are about ten head of them, will be sired by Prince Malcolm. Blossom Prince is No. 5 of catalog and is a two-year-old Orange Blossom heifer. She is sired by Gloster Prince, a richly-bred Duchess of Gloster bull, and her dam is a daughter of King Victor. No. 6 is Gloster Lady, a yearling daughter of Prince Malcolm, and she is a royally-bred Duchess of Gloster heifer. They are putting in some good Scotch-topped females, most of which have four and five top crosses. The Duchess and the Sanspareils, of which there are quite a number, have been good producers in the herd and a great many of them will have calf at foot by Prince Malcolm, and some rebred again to him. The cows are good milkers

and always raise their own calves. All in all it is a very practical, money-making lot of Short-horns and it will be a good place to buy. Those of our readers who are looking for some good bargains should attend this sale. Their catalog is ready for distribution. Write for it at once and kindly mention The Homestead.

McLEMORE'S SHORT-HORN DISPERSION.

A sale of Short-horns that is looked upon with much interest by breeders and farmers of the West is the dispersion sale of Mr. W. M. McLemore, of Kearney, Neb. It is with deepest regret that Mr. McLemore parts with this grand herd, but having sold his farm and having no place to put these cattle, he will offer to the public that which has taken him years to produce. Mr. McLemore has made the Short-horn business a life-time study and as a cattle judge or breeder he has few equals in the business. Mr. McLemore has selected these cattle with great care and reserved only his idea of a dual-purpose critter with great scale and substance, and could this herd have been kept together, properly cared for, it would have, no doubt, some day made one of the great show herds of the West. Twenty-six of these grand females will have calves by side and most of them are bred back to one of the three great herd bulls now in service in the McLemore herd, and we can say without fear of contradiction that they are as useful a lot of the right type as will go through the sale ring this fall. The bull offering is a very strong one in both breeding and individuality. One of the good bulls to be offered is the three-year-old Cruickshank bull, Second Baron, a Parson's-bred bull sired by the great Baron Victor. This great sire, Baron Victor, is the sire of the six highest-priced bulls ever calving in Iowa—one of them going to California at the neat sum of \$4,000. We wish to call the attention of those looking for a good yearling to Lot 2 in the catalog. This massive youngster, Royal Aberdeen, is a pure Scotch bull, with breeding and quality enough to head any herd. He is a very smooth, heavy-boned fellow, with extra good lines; is a roan, and is conceded by those who have seen him one of the best calves they have had the pleasure of seeing this year. We wish to extend a very cordial invitation to all lovers of the good Short-horns to attend this sale, whether they wish to buy or not and look over a grand lot of dual-purpose cattle. Catalogs are now ready and can be had by dropping a card to Mr. W. M. McLemore, Kearney, Neb.

DON'T BUY GASOLINE ENGINES

alcohol engine, superior to any one-cylinder engine; revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs less to buy—less to run. I Sell Scales My Scale is Used by the U.S. Government Which Proves Its Quality

Direct From the
Factory on

30 Days
Free Trial

No Jobbers,
No Dealers,
No Agents,
No Money Down,
No Notes to Sign.

I AM willing to PROVE that the Knodig Pitless Scale is the scale you want. I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial. You have nothing to pay until you are satisfied. No deposit, no notes to sign, nothing to do but give the Knodig a fair, honest trial at MY risk. If it doesn't please you, send it back, and I will pay freight BOTH ways. No other scale is sold this way.

DID you ever stop to think, that you are making a big mistake by not having a Farm Scale? Everything you SELL and everything you BUY is weighed and priced by the "other fellow." When you sell a bunch of Steers, the buyer weighs them on HIS scales, which it is safe to say, never make any mistakes in YOUR favor. When you dispose of a drove of Hogs, you not only accept the buyer's PRICE but his WEIGHT. As well, he always has the whip hand of you. Yet when you turn around and BUY Flour, Sugar, Feed, Ham or Bacon (made, perhaps, from the very Hogs you Sold,) you THEN accept the SELLER'S price and weight. It is the same way with your Grain, Hay, and other farm produce. —You are the ONLY person in the community who is never SURE of getting full value for the things you buy and sell. Isn't that so?

Dear Sir:

If you expect to buy a scale now or at any future time, the thing for you to do today, — right now, while you think of it — is to write for the "Knodig" Pitless Scale Catalogue.

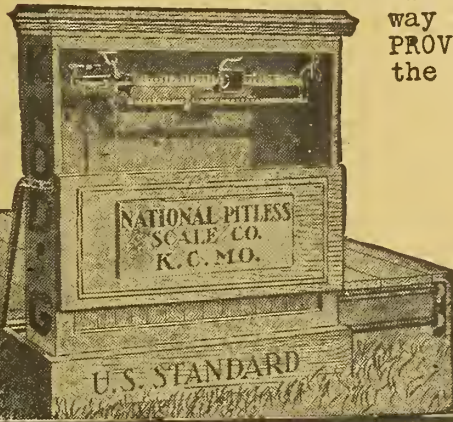

It is the most complete and attractive scale book ever printed. It contains over 40 handsome illustrations of interest to every Farmer and Stock Raiser in the land. It shows just how you can save from \$35 to \$50, and at the same time get the best scale made. It explains why this saving is possible as a result of the "Knodig" direct-from-factory selling plan, — how you get the profits that usually go to the Jobber and Dealer. And it tells you how you can buy the "Knodig" Scale on a month's free trial, without the advance payment of one single penny.

You simply can't afford to buy a scale until you know all about the "Knodig Pitless." Yes, I mean just that. And I say it more for your sake than for my own. While I earn my bread and butter making and selling "Knodig" scales, yet one more customer means less to me than getting the right scale at the right price means to you. So, cut out the Coupon below, fill it in, sign and mail to me, and I will send you the "Knodig" book right away. Or, if it's more convenient for you, just say on a postal card, —

"Send me your free scale catalogue." Either way will suit me. All I want is a chance to PROVE that the "Knodig" is the best scale for you.

Yours very truly,
Gen'l Mgr. NATIONAL PITLESS SCALE CO.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

THE SHEEP BUSINESS.

In this day of a mania to "get rich quick" one ought not to look very far for a business that will pay big. Prosperity seems to be on every hand, and values have doubled in the past decade, the demand for mutton has increased proportionately and prices for both wool and mutton have gone skyward. Why should a man look for a more lucrative business? The mental picture of "the golden hoof" is about to become practical in all its aspects.

A constant change in the sheep business of the United States is going on. Not long ago almost all the sheep in the United States were found in the East. Wool was then the sole consideration. Later flocks came west until now two-thirds of the sheep of the nation are west of the Missouri river. Then there was a clamoring for more wool of a more excessive fineness—now the desire is for more mutton of a better quality. The reason for this demand is apparent—there are more mutton eaters.

The range is gone, or practically so, with its free grass, and there will be a more urgent demand for farm sheep. This means that better sheep must be kept and they must have better care, and the breeder must cater to the demands of his nearest or best market.

We believe now more than ever that the sheep business will never be overdone. The army of mutton eaters is

increasing faster than the flocks are increasing. Were this the only string to the bow it would be worth catering to, but there is another—wool, which has been selling and is now selling at remunerative prices. Sheep are subject to disease as is almost any other animal, but no disease with which we have met is so hard to combat as cholera in hogs. Most diseases of sheep yield to treatment, and many can be averted by proper care. A sheep never dies in debt to its owner. It will convert into mutton weeds and coarse fodder which would otherwise go to waste.

PERIOD OF HEAT.

I have bought some ewes and I would like to know how long it would be after the ram is turned in before I can reasonably expect that the ewes are with lamb. V. R. D.

Longworthy, Iowa.

The period of heat in ewes is fourteen days, and if the ram is what he ought to be two weeks would be plenty. It is better to prolong the period of breeding for the reason that occasionally an over-fat ewe will not conceive at the first copulation. Sometimes difficulties will arise that are unlooked for, and for that reason it is better to delay taking him away. Watch the ewes closely after two weeks to see if they again come in heat.

DO SHEEP ENRICH THE SOIL?

For many years chemists have been experimenting along certain lines to ascertain, if possible, the amount of fertility removed from the soil by grazing. Some scientists have claimed that pasturing with sheep will exhaust the fertility supply. If the laboratory teaches this, it is exactly contrary to the experience of hundreds of sheep men who know practically nothing about chemistry. We know that constant grazing of sheep on the same pasture for a number of years increases the productiveness of the soil, though no doubt in the matter of pounds of fertility there is a lessening of the supply.

We have on our farm a pasture that has been to bluegrass for twenty-five years, during which time no other kind of stock has been pastured on that part of the farm. It will pasture double the number of sheep that it would in the 80's. The season of pasturage is longer, the grass better, and there has been a constant increase in available fertility as exhibited by the amount of grass

Dip

Chloro-Naphtholeum Dip

For Cows Hens Hogs Sheep Horses

KILLS—Ticks, Lice, Pests. **CURES**—Scab, Mange, Germ Diseases. **HEALS**—Wire Cuts, Sheer Cuts, Sores, Bruises. **Disinfects**—Hens Houses, Hog Pens, Barns, Privies. It's needed most in cold weather, when your stock is confined closely and breeds lice and gets all sorts of pest or germ diseases.

I'll send you a GALLON—enough to last all winter—prepaying freight east of the Rockies. You'll know the good it's doing in 30 days. If it is worth \$1.50, just send me the money. If it isn't worth \$1.50 to you, just send back the can and what you haven't used—at my expense. No obligation to me—I want you to try it. I know that Chloro-Naphtholeum Dip has saved thousands of farm animals from death and thousands of dollars to farmers. Write for a gallon today.

it produces and the number of sheep it will keep.

No other animal makes a more thorough distribution of excrement than the sheep. No kind of fertilizer can so readily be taken up by the soil as manure from sheep. We shall continue to believe, until practical experience and a chemical analysis in unison teach us otherwise, that sheep grazing does improve soils.

A Successful Combination.

BIG FARM PAPER A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsomely printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published on its own \$20,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people. Its circulation reaching every state in the Union. Address with stamp Valley Farmer, 675 Jackson street, Topeka, Kan.

Save \$25.00 On FUEL this Winter

\$25.00 is the wages of one man for 30 days. It is 5 per cent interest on \$500.00 for one year. You can save this amount this winter, and every winter that your home is heated with a Cole's Hot Blast Stove.

The big expense in heating your house is the fuel, not the first cost of the stove.

You are wasting DOLLARS in high priced hard coal through leaky joints and poor radiating surface. You also waste HALF the Gas Half, the best heating half of coal, by imperfect combustion.

Cole's Hot Blast Stove

saves all heat and fuel wasted with other stoves.
Cost of Stove More Than Saved
In Fuel Each Winter

Gives cleanliness and even heat day and night with soft coal you never dreamed possible. Uses less hard coal and gives more heat than any base burner. Your home dealer will set one up in your house on our guarantee backed by his guarantee, at

\$10 and Up

GUARANTEE

- 1.—We guarantee a saving of one-third in fuel over any lower draft stove of the same size with soft coal or slack.
- 2.—We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with the same size fire pot.
- 3.—We guarantee that the rooms can be heated from one to two hours each morning, with the soft coal or hard coal put in the stove the evening before.
- 4.—We guarantee that the stove will hold fire with soft coal thirty-six hours, without refueling.
- 5.—We guarantee a uniform heat day and night, with soft coal, hard coal, or lignite.
- 6.—We guarantee every stove to remain absolutely air-tight as long as used.
- 7.—We guarantee the feed door to be smoke and dust proof.

Built on Honor—Cole's Original Hot Blast was invented after 12 years' continuous experimenting to find a way to save the enormous waste in fuel through the escape of gas and heat up the chimney in the ordinary stove. Our reputation as manufacturers of the Original Successful Hot Blast goes with every stove; and will not be sacrificed by the use of inferior material or cheap workmanship.

Would You Lose \$50 in Fuel to Save \$1.00 on the cost of Your Stove?

That is what you do when you buy a cheaply constructed, putty jointed, showy made stove.

Like all successful inventions Cole's Original Hot Blast has many inferior imitations, avoid them. They lack our patented top Hot Blast construction, the patented steel collar connection for the elbow casting to stove body, making an everlasting tight joint which cannot open by action of the fiercest heat; the patented compound hinge for ash door, the guaranteed smoke-proof feed door, which prevents dust, soot or smoke from escaping when fuel is put into the stove, and other patented features which are essential to the success of our stove. Do not let any dealer persuade you to buy anything but Cole's Original Hot Blast. See the name "COLE'S HOT BLAST" from Chicago, on the feed door of each stove. None genuine without.

The best dealer in every town generally has the agency for Cole's Original Hot Blast Stoves. Write us for names of local agent and for FREE BOOKLET on the scientific combustion of fuel, which also tells about Cole's Hot Blast. In towns where there is no agent, mail order purchasers are protected by the above guarantee.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

A woman well known in the literary world has for her motto: "If you have not what you like, then like what you have." There are a host of people whose happiness, not to speak of that of those who live with them, would be improved by taking this motto and making an effort to live up to it.

There is Mr. Discontented who is eating his heart out because he is only a renter, while his next neighbor owns 120 acres, which he inherited. Of course it would be pleasant if Mr. Discontented owned his land, but he has possessions which are far more valuable than mere acres; he has a jewel of a wife and three fine children. The thing for him to do is to give up thinking about his "lucky neighbor," and study how to make the most of his rented farm, and seek for the happiness which might be his in his home. As it is, if he pity himself hard enough and long enough he'll lose heart and energy, his health and his work will suffer, and the first thing he knows, he'll be on the down grade.

Mrs. We-Never-Have-Anything-Like-Other-Folks has a fresh grievance every little while. Just now it is that since they moved to the farm the poor children, lads and lassies between the ages of seven and thirteen, have a mile to walk to school and will surely get sick from wet feet. In town they lived in a flat, and school was just around the corner on the next block; in consequence the children got little fresh air and practically no exercise. Instead of bemoaning herself, Mrs. We-Never-Have-Anything-Like-Other-Folks should be congratulating herself that her children will become hardy and healthy roughing it, and that they will grow up much better fitted for the struggle of living than they could hope to be under the conditions of city life.

Mrs. Without-a-Maid wails over the unhappy fate which compels her to do her own work. If she were wise instead of sighing for the moon—a servant is out of the question—in the morning she would say to herself, "What a blessing it is that I am well and strong." At noon it would be "How helpful John is growing, and so appreciative, too; it makes the work ever so much easier for me." Then at night, as the children "washed up," it would be, "Well, it is good for the children that we have no girl; they're learning things that may be very useful to them someday."

Mr. and Mrs. Ambitious are unhappy because their children cannot have the advantages which their cousins are enjoying. Now, there is no harm in desiring advantages for the children. Far from it. But if the coveted advantages are beyond the power of the parents to give, is it not wisdom to bow to the inevitable and make the most of the opportunities which are, or may be brought within reach? It may be that what the children need most is not a college education, but a sunnier, happier home life, the making of which would chase gloom from the eyes of father and bring smiles to the face of mother.

Too often we weary ourselves chasing distant and unattainable pleasures when we might be richly blessed if we would but open our lives to the joys close at hand. There is both good sense and sound philosophy in liking what we have if we can't have what we like.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

All honor to him who wins the prize. The world has cried for a hundred years; But to him who tries and fails and dies, I give great glory and honor and tears.

—Joan Miller.

Soon or late, to all that sow,
The time of harvest shall be given;
The flowers shall bloom, the fruit shall grow,
If not on earth, at last in Heaven.

—John G. Whittier.

About the only reward offered for virtue is the thing itself; but it's worth while.

A CURE FOR COLDS.

Here is a sure cure for colds of any kind. It has been tested repeatedly, and has never failed, and as I used to catch cold, which resulted in a bad attack of bronchitis, I can speak from experience. In cases of pneumonia it will not fail to cure if taken in time. Make a ball of cotton batting about the size of a small marble, saturate it well with alcohol, then drop on it six drops of chloroform; cover it lightly with a thin piece of cotton batting, hold to the mouth and

Why "BUFFALO CALF" Shoes Outwear All Others

Most new shoes you get have to be "broken in." They "draw" your feet and make them smart and burn. That's because the leather is "stiff," and full of tan bark juice and acid that should have been worked out before it was cut.

When cattle are three years old; age wrinkles begin coming around their necks. Hides from such cattle are stiff and need powerful chemicals to tan them. We buy all the hides from which "Buffalo Calf" shoes are made before they are tanned, and get only those from young cattle. We take them only from "inside raised" cattle, not over 3 years old, killed in July, August and September. Outside raised cattle get age wrinkles sooner than "stable kept" cattle, and those slaughtered in Winter and Spring have hides with long hair which makes their fibre "loose" and "flaky." Much of the toughness of any hairy animal's skin goes into its Winter coat. That's why we buy only "short hair hides," and have them tanned by our own special Dongola process which sets the fibre together and adds toughness and wearing quality. And, after tanning, instead of softening the leather by artificial greasing, leaving the tan juice all in, we "board" it and work it by hand just as Indians do buckskin. That's why Buffalo Calf Shoes are soft and pliable when new, and always so. They will not "draw" your feet and, if you wet them, they do not harden up, but will dry out as soft as before. The soles of Buffalo Calf shoes are made from Hemlock tanned Texas side hides and the heels, counters, insoles and all pieces are all solid leather. We do not use any "horn fibre" nor "moulded" counters.

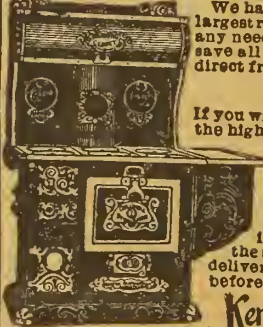

The shoe you see here has vamp and upper all in one piece—no seam to rip. The back seam is "cylinder fitted"—extra strength there. The vamp goes clear to the sole over the toe so that, if your toe cap wears through, the vamp toe is still there. We line our shoes with heavy lined duck—one piece linings—no inside seams with edges to chafe and blister your feet. Ask your dealer for

If your dealer does not have "Buffalo Calf" shoes, write us and we will send you one of the little Buffalo Calves, so you can test the leather and tell him about it. The toughness of the hides we buy and our way of tanning and handling the leather cause "Buffalo Calf" shoes to outwear all others. They stand the hard knocks. And they do not cost as much accordingly as inferior shoes. We make all sizes—men's, youths' and boys'.

inhale the fume, inflating the lungs well. It will open and expand every lung cell instantly.—Woman's Home Companion.

CABBAGE WAYS.

Rice With Cabbage—Boil separately well-washed Carolina rice and a small spring cabbage; drain the cabbage and cut into tiny pieces; mix with it the drained rice and add one ounce of butter, salt and black pepper. A little cream and a tablespoonful of Parmesan cheese may also be added, and will be liked. Stir over the fire until quite hot; serve with croutons of fried bread.

Swiss—Remove the center, fill with sausage meat and put thin layers of sausage meat between the leaves; tie securely in a cloth, boil till tender, drain, pour over a cupful of hot vinegar and serve. The sauce recommended for hot slaw may be used with this dish.

Fried—Chop cold boiled cabbage and press out all possible moisture; season with melted butter, pepper, salt and three or four tablespoonfuls of cream or rich milk; add two well-beaten eggs and cook in a buttered frying pan till smoking hot, stirring constantly, then cease stirring long enough for it to brown on the bottom; turn out on a serving dish and garnish with hard-boiled eggs. Has meat value.

WINTER BULBS.

There is nothing so sure to bloom in the ordinary home window as the hardy bulbs, and it is time they were put to work. The hyacinths are the favorites, but there are many others that are beautiful and easily grown. Among those grown in water are

JONES HE PAYS THE FREIGHT

\$40. Will get one on trial from

JONES OF BINGHAMTON
Box 378A Binghamton, N. Y.

the Chinese sacred Lily, narcissus, crocus and hyacinth. If they are planted in water they should have sand or small stones to anchor the bulb and keep it in place, otherwise the roots are apt to push the bulb out of water. They can be set anywhere that does not freeze, and when the roots begin to put forth they should have the sunshine, or strong light. If set in soil, they must be set away in a dark place for six or eight weeks, keeping them moist, not wet, and the roots will form, giving stronger blossoms.

Before planting a Chinese lily bulb, carefully pare off all the dark part and cut two or three slits half an inch deep up and down the side of the bulb; this causes

the shoots that are too weak to burst through the tough outer layer, to come out, and each shoot will have blossom stalks. When the leaves are about eight inches high, cut the tops back, and the bloom stalks will start earlier. Do not allow the water in the vessel that holds the bulb to become sour; flush it every few days with fresh, tepid water, taking care not to disturb the bulb. The water can be readily changed by overflowing the vessel.

The narcissus bulbs, especially the paper white and the golden sacred lily, are as satisfactory as the Chinese lilies, which they resemble. They may be treated in the same way. The Roman hyacinths, either single or double, are fine; but the single-flowered ones are by far the best bloomers for water treatment. Crocus bulbs are very cheap—about sixty cents per hundred, and can be grown in sand and water.

Tulip bulbs are cheap, and one can begin with the extra early Duc Van Thols and keep right on with some from each class, till the late Bizzards are reached. One can have them in bloom for about ten weeks, thus, and those who have never grown them will be surprised at the beauty of the border during the flowerless, stormy, early spring months. Give them good soil, no raw unrotted manure, and plant tulips full five inches deep. Try at least a few bulbs in the border, if not in the window; but "try to try" both ways.—Helen Watts-McVey.

AMONG OURSELVES.

General interests have suffered somewhat during the discussion precipitated by Aunt Ruth. Today I propose that we go back a little. It will be remembered that we were swinging off into a discussion of family matters when the subject of woman's work in the field switched us off. At that time Mrs. Fell wanted to express her opinion on President Roosevelt's attitude regarding the size of the family; we shall hear her now:

Mr. Roosevelt better pass his salary around to some of the poor mothers of large families, to hire help (or come himself and take up her duties for a month or two) so

she can go off on a "hunt." I know by the time the month (or even half of it) is up he'd think a few children enough for one poor, weak woman to rear; he'd find that washing, ironing, baking, churning, scrubbing, sewing, mending, etc., and so on, day in and day out, with over so many pauses for whines and howls from a dozen children isn't quite so much fun as meeting here and there all over the continent for social gatherings. Borrowing neighbors! We have had enough experience to do us! It's lots of fun to loan machinery and not have it returned when you ask for it; then do without it rather than take time to go after it. When you just can't do without it any longer you go and gather it up by the piece and make it over again before you can use it. I loaned a dress pattern to my neighbor last spring. She knew I had a new wrapper pattern, so, I suppose, she thought I didn't need but one pattern at a time, as she has never returned the one I let her have, so I just ripped up an old dress to get the pattern again. She even asked me for the new one before I had ever used it myself. Now don't I wish I had "loaned" (or given) it to her, too? I think a society club for the farm ladies would be an enjoyable affair. I wish our ladies would start one. I will give up the floor now to newer and more interesting subjects. Should my letter be appreciated I will feel paid for the few minutes it took to write it. Now, could some of you give me a good recipe for removing rust from young plum trees?

Mrs. Wilcox has also a word for us on the first subject touched upon by Mrs. Fell, a word which will commend itself to many:

As to large or small families, I believe the woman is the happiest in the end who takes cheerfully the burdens of married life as they come to her, be her babies few or many. "Stepping Heavenward" is a helpful book to read in connection with this subject. Then, another subject touched upon—of the farmer's indifference to his wife's wishes for better home surroundings. Now, I am a "bred in the bone" farmer. When driving through the country I always notice the different farm homes, and, quite often, you will see things spick and span around the barn lots and the dooryard full of cans, rags, sticks, papers, etc. Now, I claim that is the woman's fault. Let her keep things tidied up around the yard. There is a lot of tact, too, that must be used. If having a nice lawn and flower garden is your hobby, keep talking about it and have it all planned. A small one gives the best results, and fall is a good time to begin it. Some noontime or evening take the husband out and tell him what improvement you want to make in the yard and coax him right into your scheme, and then begin at once with the work. Still another subject—of the wife's pin money. I am a firm believer in two pocketbooks, or the wife carrying her own pocketbook; let her keep account of all the poultry, eggs, and butter or cream that she has personally attended to. Even if she does spend the money for necessities it will give her an independence to know how far it went towards helping along, and it hardly ever takes it all when the woman spends it herself.

We also believe very strongly in the financial independence of the housewife. If she is inclined to be economical she can be trusted with her own well-filled pocketbook just as well as the husband. We know of many women who receive a monthly allowance and on this are expected to run the household. The amount is arrived at from past experience and where it is necessary to practice economy this is made as nearly as possible to meet the requirements. Where a husband can afford to do so it should be a pleasure to him to be somewhat liberal in this matter of allowance. The difficulty is in finding both husband and wife equally interested in saving the family stipend.

We were talking a while back about the age when girls should marry. Since then two letters have been received which I think the circle should not miss. Katherine Rose will speak as a maid, Dutch Cousin Madge as a wife:

I have been an interested reader of Among Ourselves for some time and as the young people are asked to write I am happy to add my mite. I think it is much better for a girl who has a good home to wait to marry till she is at least twenty-three. This gives her an opportunity to make it pleasant for dear mother. Give mother a chance to travel some and visit her friends and then hear her laugh and make jokes as you didn't know mother could. A person must learn to be happy single if they would live a happy married life. Every girl should, if possible, be given some time for music, for what a delight it is in the home! What a help to herself in expressing the emotions of her soul, whether of joy or sorrow! I wonder if any of the readers live far away from church and Sunday school, and are longing anxiously for such privileges for themselves and children. If any of you are, why don't you ask the pastor of a neighboring church to help you organize, and some of the young people of the Young People's Christian Society who are anxious to do missionary work to help you with the singing and teaching? A country school house is a very good place to hold the Sunday school. I have worked in a Sunday school like this all summer, so I know what a success it can be and how it has broadened my own life.

To mothers I would say: If your daughters are old enough to get married, do not hesitate to let them marry a foreigner if he is a good sensible young man. But, girls, know the boys and their parents before you marry them. And by all means, girls, do respect yourselves and never under any circumstances submit to a young man's passion. Many an inno-

What You Can Do

With This Oil Heater

With a Perfection Oil Heater you can heat a cold bed-room, make a sick-room more comfortable, warm a chilly hallway, heat water quickly, and do many things better than can be done with any other stove no matter what fuel it burns. The superiority of the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

lies in the fact that it generates intense heat without smoke or smell. The oil fount and the wick carrier are made of brass throughout, which insures durability. Gives great heat at small cost. Fount has oil indicator and handle. Heater is light and portable. Absolutely safe and simple—wick cannot be turned too high or too low. Operated as easily as a lamp. All parts easily cleaned. Two finishes—nickel and japan. Every heater warranted. If not at your dealer's write nearest agency for descriptive circular.

The Rayo Lamp

can be used in any room and is the best all-round house lamp made. Gives a clear, steady light. Is the safest lamp you can buy. Brass throughout and nickel plated. Equipped with the latest improved burner. Handsome—simple—satisfactory. Every lamp warranted. Write to nearest agency if you cannot get it from your dealer.

STANDARD OIL COMPANY

W. L. DOUGLAS \$3.50 & \$3.00 SHOES FOR MEN

W. L. Douglas \$4.00 Gilt Edge Line cannot be equalled at any price.

W. L. DOUGLAS MAKES & SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER IN THE WORLD.

\$10,000 REWARD to anyone who can disprove this statement.

If I could take you into my three large factories at Brockton, Mass., and show you the infinite care with which every pair of shoes is made, you would realize why W. L. Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe.

W. L. Douglas Strong Made Shoes for Men, \$2.50, \$2.00. Boys' School & Dress Shoes, \$2.50, \$2.17, \$1.50.

CAUTION.—Insist upon having W. L. Douglas shoes. Take no substitute. None genuine without his name and price stamped on bottom. Foot Color Evident used; they will not wear brassy. Write for Illustrated Catalog.

We buy our goods at sheriff's and receiver's sales. **CHICAGO HOUSE WRECKING CO., 35TH & IRON STREETS, CHICAGO.**

cent young girl has ruined her reputation in this way. The man promises, "We'll get married," then he never does marry you, and even if he did, it is a terrible disgrace, and also an awful sin; so, girls, be on the watch and pray the Lord to help you to refrain from this sin which is cursing our nation. If the man really means to make you his wife he will respect you all the more because you honor yourself.

The need for such a warning as Dutch Cousin Madge utters is impressed upon me by some half-dozen letters received recently, each one of which deals with girls who have fallen. Some time after the new year I hope to make place for some of these letters; meantime I feel constrained to ask that every mother and every daughter in this circle lay to heart the words just spoken, and listen carefully to what Mrs. Lowater has to say:

While we are discussing the ethics of "many things," I would like to ask the sisters what they think of the mother who allows her young daughter, often sixteen or younger, to go away alone with a young man, to attend a celebration or an evening entertainment. I have heard mothers say, "I do not like to have her go, but I cannot help it." The other girls in her set go, and she would feel terribly abused if I did not allow her to go." As a general thing these girls have grown up from the children we lately discussed, who were allowed to become a terror to the neighborhood and a nuisance in every house which they entered, because their mothers were too selfish and indolent to take the trouble to control them. And it is now too late for her to attempt to control their conduct in any way. It is from these young people, thrown together without supervision or restraint when too young to know anything of life, human nature, or social propriety, that the lists of forced marriages, unhappy families, and di-

SEND US COON, MINK, POSSUM and other furs, hides, roots, etc. We charge no commission. We stand express charges on shipments of furs amounting to \$10.00 or more. Write for tags, price lists, etc. **ST. LOUIS FUR COMPANY, D 224 N. Main St. St. Louis, Mo.**

voices, are largely made up. I have no sympathy for the mothers in such cases, but my pity goes out to the young man or woman who was never taught to control himself as a child, and must reap the harvest of a ruined life in consequence.

Terribly distressing are the unspoken things that lie behind such letters as the last two. They are things we hardly dare speak about in a circle like this,

and yet they should be spoken about somewhere, spoken about with pure minds and clean speech, spoken about so forcefully and earnestly that the horrible evils hinted at may grow less and less until they disappear.

How many evils there are, and how many of them touch us, some in one place and some in another! Mother Matilda, who is a child-lover, is moved to expression by a wrong that is being done children:

It seems that when we get waked up in this circle we make things move, and the subject of girls working in the field has been well thrashed out. I say amen to those who oppose it, but another thing is on my mind—Is it right for us to keep our boys and girls out of school to work? If I was to say fathers and mothers who do so were robbers, you would hold up your hands in horror, but are they not robbing their own dear children of something which they can never return to them? It makes me heart-sick to see fine, manly boys out of school husking corn and helping with the fall work. Fathers and mothers, these are the ones God gave to the world to take our places, and as we can look back and see so many lost opportunities, can't we do better and make up some of them to our sons and daughters? I, for one, think that it is next to a crime to keep them out for work. The corn had better go without husking rather than lose one month of precious schooling. Time is so short our babes of today are out in the world tomorrow. It is "up to us" to give them the best and all of it, at that, that we can. Mothers, don't keep your daughters out to clean house or wash. The house had better go dirty and the washing wait until Saturday rather than to have your dear ones behind in their classes.

Parenthood is an altar of sacrifice on which self is, or should be, daily offered up. Those who shrink from its sweet martyrdom should not assume its obligations because to do so is to sin against helpless childhood. Just how much children have an absolute right to is something of a problem, but, in our day, an education is among the necessities. To deprive a child of it is to commit a crime.

One of the delightful things about this circle is its power in bridging distance. Mrs. Dodge away up in Canada speaks and Mrs. Lawrence here in Kansas rises with outstretched hand:

Mrs. Dodge's letter interested me at once. She seems to be one of those happy individuals who find beauties and pleasures in spite of trials and adverse environment. She has moved from an eastern state, to try life in a new country. We are glad she has taken the opportunity to give us a little glimpse of the nature life in her Canadian home and incidentally has expressed a desire to belong to a club. By all means, Mrs. Dodge, start a club. Let me tell you a little experience of a friend of mine, a former member of Minervian Club. Two years ago she moved to western Kansas, leaving the home of her childhood, her parents and brother and sister. We missed her very much in our club work; were all sorry

to have her go. Last summer I visited her in her new home. I was greeted with "Oh! you must stay till next week. Our club meets then." Our club? Yes, she had organized a club, as soon as she became acquainted with her new neighbors. She first told them of the pleasures and profits found in her old club and invited the ladies to meet with her in her home. Much interest was shown and soon they had a good working club of their own. In this instance many of the ladies had to drive seven to ten miles, so they arranged matters with the "gude mon" at home and made an all-day affair of it, meeting once every two weeks. Mrs. D. will observe that a new country is no obstacle to forming a club, nor is a small house, as the gathering will likely be small where neighbors are few and far between. We will hope in course of time to hear of the Dodge Club.

Another club letter has been received, but has unfortunately gone astray. Will the friend who wrote telling about the Chautauqua course be so very kind as to write again? I want the circle to have just the information she gave, and I regret exceedingly that her letter cannot be found.

Dressmaking and Millinery—No. 542.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

In a way, fashions in furs may seem a little out of our line, and yet a few suggestions as to the correct things to select in this line may prove helpful to those who do not have access to a large assortment from which to choose. Fur pieces or garments are really more often ordered through the home merchant than they are selected direct from the stock, and before placing an order it is wise to study the subject, and for this purpose a fur catalog will prove a great aid. One of these may be obtained from any large fur dealer, and you will find the advertisements in any of the magazines. In these all the varieties of furs are described, their colors are given, as well as a general idea of the prices and the prevailing styles. But after all this you will perhaps spare yourself grievous disappointment by allowing your dealer to purchase for you. The flat neck pieces retain their favor, and while boas and storm collars are favored, the latter especially because of the comfort they afford, the flat stoles and throws lead as to numbers. Muffs, too, are usually of the flat shape, and are large or medium large. In the selection one must be governed largely by the price, it is true, but another point for consideration that is too often overlooked is that of becomingness, and when one thinks of it this is surely of as much importance in the matter of furs as it is in the selection of any part of the wardrobe. Not all furs wear equally well. If asked in regard to the matter your dealer will give you information on this point that may save you grievous disappointment. In selecting a fur coat or jacket the wise woman will avoid the novel shapes that will be "out" in a season or two, for these garments are altered only at considerable expense, and will purchase something in the simple fitted or semi-fitted form that will not be "out of date" even

The Standard Calicoes

"Simpson Prints" were first made in the days of thoroughness, and made to last; made so well that they became the standard, and have been ever since. The same old principles are strengthened with new ideas. Better designs are used than ever before and Simpson-Eddystone Prints are now far ahead of what they used to be.

Ask your dealer for Simpson-Eddystone Prints. In Blacks, Black-and-Whites, Light Indigo-Blues and Silver-Greys, Shepherd Plaid Effects and a large variety of new and beautiful designs. Thousands of first-class dealers sell them.

The Eddystone Mfg Co (Sole Makers) Philadelphia

How and Where to Buy a Washer.

The market is flooded with poor washing machines, free offers, premiums, etc. That is not the cheapest way to get a thoroughly reliable washer. Most of them are expensive and provoking in the long run. Get a guaranteed washer, made by the reliable manufacturer. That's what we want to say to you about the

O. K. WASHER.

It's the easiest washer to operate, the simplest to understand. Our guarantee is tucked inside of every machine. The O. K. Washer will handle your biggest washing and do it so much better that you cannot afford not to have one. A beautiful machine, too, painted in maroon and fitted with gilded hoops. No warping because the lumber is Louisiana Red Cypress. The lid is steam proof.

SEND US YOUR NAME TODAY. Also the name and address of your dealer. We'll tell you where and how to get the O. K. washer, and full particulars. Address the factory.

Buy Advance Fence direct from factory and you can try it 30 days free, and pay us factory prices if you decide to keep it. If it doesn't prove satisfactory to you in every way, you can return it and we will pay all freight. Advance Fence has the continuous

ADVANCE FENCE CO., 3486 Old Street, PEORIA, ILLINOIS

stay wire—the stay is one piece, running continuously up and down for many rods without an end. This distinctive feature makes Advance the strongest fence. Our catalogue tells all about it, and gives wholesale delivered prices. Ask for it.

should she wear it for years without alteration.

No. 5475 pictures a Princesse dress for girls from six to twelve years of age, and this season it is one that is very popular. The

[5475—Girl's Princesse Dress, 6 to 12 years.]

lines are very simple and the design is adapted for dresses for all purposes, whether for dressy occasions or for school or every day wear. In the selection of material and trimming one will be governed by the purpose of the dress, but as shown it is developed in plain blue cashmere, and trimmed in blue and white banding. The chemisette is of tucked white taffeta, but lace or silk may be used instead. The long lines of trimming on the seams give a slender effect, and these lines may be continued on the back seams if liked. The pattern provides for elbow or full length sleeves. The dress is made with fronts, side-fronts, backs, side-backs, and under-arm gores. Pattern 5475 is cut in sizes for girls of 6, 8, 10 and 12 years of age. Be very sure to give age when ordering.

A neat and very stylish pattern for skirt is illustrated in No. 5483. It is cut in seven gores, these being so shaped as to give the desired circular effect. Three forward turning pleats at each side of the front give a panel effect. Circular frills encircle the skirt terminating within a few inches of the pleats

The Iowa Gate

FOR THE FARM

Hog Tight-Sheep Tight-Chicken Tight

IOWA gates can be hung close to the ground but will never drag because the outer end is adjustable. Hog tight mesh and stretchers on every wire. Gate fastened at both the top and bottom, plain strong hinges, no wearing parts.

The Rolled Steel Tubing used in the frame instead of gas pipe makes them proof against any stock.

"A chain is only as strong as its weakest link." Why not use IOWA gates to match your good fences. You will find them strong but easy to handle—convenient in winter and summer—will swing up hill or down hill as you wish.

Cheaper Than Wood. Write now for our low prices and a dozen reasons why every farm should have them.

**IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA**

that outline the front gore. Circular frills also cross the front gore. These frills may be omitted and any other mode of trimming liked may be used instead. Pattern No. 5483

[5483—Seven Gored Skirt, 22 to 30 waist.]

is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure. Be careful to give size when ordering pattern.

The International Sunday-School Lesson.

Fourth Quarter. Lesson VI. Matt. XXVI, 36-50, November 11, 1906.

Jesus in Gethsemane.

The harvest moon lighted coldly a weird scene, pale faces of tombs peering down into a shadowy valley; a brook on its way to a Sea of Death, and running red with the blood of 200,000 lambs slain that day; gnarled old olive trees, whose twisted trunks seemed to express for the vegetable world that tribulation under which the whole creation groaneth.

As Jesus passed the snowy porches of the temple, and came down into the forbidding chasm, would He not recall to Him how His great progenitor, thrust out of the same city, had crossed this very brook Cedron with face toward the wilderness; how as he went up the farther side, he wept and had his head covered and went barefoot?

The separation of the disciples into two bands was not an act of caprice or favoritism. In this instance, paradoxically, the station most remote from the Shepherd was the safest. The feeling that can be touched for human infirmity showed itself in the very disposition which Jesus on this occasion made of His followers. And if even on the burning edge of His inscrutable sorrow He could still think of and provide for the safety of His own, will He neglect us now that He is exalted to the right hand of the Majesty in the heavens?

The two who had asked to be baptized with His baptism, and the one who had first acknowledged Him the Son of God—these three, the same who had gone with Him to the Transfiguration height—were deemed best insured to go with Him into the depth of His humiliation. Jesus wanted the consciousness that human sympathizers were near; wanted to be guarded from intrusion, wanted that there should be witnesses so that the scene might be transmitted to the Church. The disciples were drowsy, but not wholly disqualified for this threefold purpose. Even to these comparatively hardy companions He does not bluntly announce the nature of His ordeal, lest He should terrify them. He says only, and considerately, that He goes to pray.

The source and nature of Jesus' agony is inexplicable. If you say it was natural shrinking from the hour and article of death, then I must say Jesus appears to have died less heroically than many a martyr—nay, even infidel, heathen, or apostate. The suffering of Jesus seems to be unlike in nature, and to surpass in degree human anguish with which we are familiar.

I suggest that, though the suffering manifested itself in His physical nature, the chief seat of it was in His moral nature. It was reversed on Golgotha. There only one word out of seven indicated any degree of moral suffering.

Away with the idea that Jesus had a sense of personal condemnation, as

if He were the object of His Father's wrath, and so that, in that sense, Gethsemane was the "Hell of the Son of God!" It occurs to me that He so became one with us as to appreciate the grief and sorrow of the whole race with such a keenness and to such a degree as that it became his very own, and well-nigh insupportable. May not this have been that cup which, if it were morally possible, He wished might be supplied by some other?

It is with Him only a question of means. His unshaken purpose is to do His Father's will. The Father is not harrying the Son on to something from which He revolts. Father's will is Son's delight.

The loneliness of Jesus is nowhere more conspicuous and touching than in Gethsemane. He coveted human sympathy. It failed Him. He looked for comforters, but found none. He trod His wine-press alone, unhelped.

The quality of Jesus' submission is not depreciated by the agony through which He passed. It is rather enhanced. Its perfection is manifested thereby. The Captain of salvation is made to appear—as He really is—perfect to us through the medium of His suffering.

It is sweet to think that from the top of this same mount, at whose base Jesus suffered such agony, He ascended in triumph until the cloud of the Divine presence received Him out of the sight of man. He stooped here; He conquered there.

Analysis and Key.

1. Approach to Gethsemane. Scenes and incidents. An historical parallel.
2. Separation of disciples. Object—Principle of classification.
3. Agony inexplicable. Source and nature of. Not shrinking from death. Seat of it in moral not physical nature. Reversed on the cross. Not sense of personal condemnation.
4. A suggested explanation. Jesus' identification of Himself with human race. So complete that total of human sorrow is assumed by Him.
5. Father and Son's oneness of purpose.
6. Loneliness of Jesus illustrated.
7. Jesus' perfection manifested through the medium of His suffering.
8. Scene of triumph next to that of humiliation.

The Teacher's Lantern.

Gethsemane was one of Jesus' trysting places. Oft on a starry night had He communed with His disciples there. In its deeper depths, a stone's throw from the nearest of them, He had often met His Father in completest fellowship. The ground was already hallowed for this final ordeal.

His Father's face was not eclipsed even by Gethsemane's midnight gloom. No shadow of a doubt of His Sonship or even

Rambler

Do you remember the horse power of twenty-five years ago?

There is no more reason in using a horse to carry you over the roads today than there would be in using one of those antiquated horse powers to do your annual threshing.

Why spend half a day traveling behind a horse when a modern automobile will take you there in one-fourth of the time and at less expense.

Progress is the order of the day, and the automobile bears the same relation to old methods of travel that the modern reaper does the scythe and cradle.

ROOFING THAT WILL LAST.

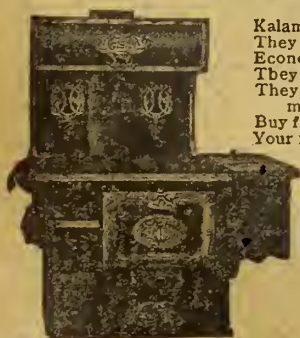

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

acceptance with His Father crosses His mind. "Father! Father!" is His confident and reiterated address.

The exudation of blood from the pores is not a physiological impossibility; but it is not affirmed. A comparison only is expressed. The moisture was not first evenly disposed and afterwards gathered in drops. As in the death sweat, it was pressed out at once in the form of drops or beads, which of their own weight tell to earth.

How true to nature the account of the Savior's prayer! The dying and those in extreme distress commonly repeat the same words.

Stier pronounces the Epistle to the Hebrews, chapter v, verses 7, 8, as the "most apostolical commentary on Gethsemane."

Spirit willing, flesh weak, is one of the best perverted Bible texts. It is used as a salve to conscience. Meanest vices are excused and justified by it. The text does not belong to the sinner at all. Only of the regenerated son of God can it be truly said, "His spirit is ready, willing to do as God wishes." But even such a one needs to be ever alert against the susceptibility of nature. In the sinner the flesh is willing as well as weak. His spirit is not willing to do at all as God wishes.

DENVER AND RETURN.

John Rasmess' Short-horn Sale.

These annual festivities held by Mr. John Rasmess, at Lake City, Iowa, at which time he always makes a fair division of his choicest Short-horns with the breeders that he has invited to attend the sale, have always brought forth favorable comment. This sale held by Mr. Rasmess November 1st proved no exception to the rule. A goodly number of Iowa breeders were present and appreciated the good things offered by Mr. Rasmess. However, there were some bargains, as is usually the case in all sales. The only buyer outside the state was Mr. J. McNeft, of Luverne, Minn., who purchased the Scotch matchless bull, Keystone, at \$250. Mr. C. R. Steele, of Ireton, Iowa, secured the Miss Ramsden bull, Prince Victor, at \$240 on a mail order, while Mr. J. R. Ballard, of Ames, Iowa, secured Lavender Fitz, a choicely-bred Lavender bull by Fitz Eustace, at the bargain price of \$230. The contention for all the best females lay between Messrs. John Lister, of Conrad; Thos. Flynn, of Flynn Farm Co., Des Moines, and Hector Cowan, the buyer. Mr. E. R. Silliman proved a potent factor in pushing many of the better cattle up to near the selling point. Mr. Rasmess presented his cattle in their everyday clothes, a number of them being quite thin in flesh because of suckling calves and because of being fresh from the pasture. The weather conditions were ideal, aside from a high wind blowing. A telegram came before the sale opened from a Dr. Haggard, of Lincoln, Neb., announcing that Col. F. M. Woods had been taken suddenly ill and could not attend the sale. This was a great disappointment to Mr. Rasmess, as well as to Col. Geo. P. Bellows, who was to assist Colonel Woods. However, being a man of the hour, Colonel Bellows arose to the occasion and made a very neat little speech and said that he did not attempt to fill Colonel Woods' shoes, knowing that this was impossible. Certainly Colonel Woods never had a higher tribute paid him by a brother auctioneer than was paid him by Colonel Bellows, after which he opened the sale by selling the beautiful red cow Imp. Gladys of Dalmeny and bull calf for \$470 to Mr. Hector Cowan, of Paulina, Iowa. We understand that the bull calf was afterwards sold at \$250. Mr. Cowan also paid \$435 for Imp. Dalmeny Princess 9th. These were the top prices paid for females. Mr. Tom Flynn secured the six-year-old cow Lavender Pearl, at \$400; this is a daughter of Collynie Archer. Other breeders of Short-horns who chased these best females up to near the selling price were Messrs. J. T. Judge, of Carroll, Iowa; A. P. Furmeister, of Churda; Fitzgerald Bros., of Varina, Iowa; Theodore Vest, of Jefferson, Iowa; W. I. Toope, of Auburn, Iowa, and other Iowa breeders whose names we do not call to mind. The sale from every point of view must be considered a success, according to the way other sales have been going this fall. The appended list will show buyers' names and postoffice addresses of all cattle selling at \$100 or over:

FEMALES.

Imp. Gladys of Dalmeny, seven years, sire Scottish Sailor, and b. c., Hector Cowan, Paulina, Iowa \$470
Imp. Dalmeny Princess 9th, six years, sire Scottish Sailor, Hector Cowan 495

Iowa corn and stock farms. Lists free. Smith & Armstrong, Shenandoah, Iowa.

W. E. Marrs' Sale of Durocs.

The weather man was anything but kindly disposed on October 23d, the day Mr. W. E. Marrs, of Albany, Mo., had selected for his sale of Duroc Jerseys. A cold rain fell the entire day, yet some twenty to thirty people gathered at Mr. Marrs' farm. Only a few breeders were present, and these were breeders who live within a radius of twenty-five miles from Albany. The representative of this paper was compelled to leave before the sale had been concluded, and Mr. Marrs writes us that on the thirty-nine head sold an average of \$25.75 was made. The top of the sale was \$65, paid by Mrs. Anna Gregory, of Albany, Mo., for Lot 1, a yearling boar got by Cole's Duroc and out of Improver Rose, a daughter of Improver II. Cole's Duroc and Improver II. were the two great show boars of 1903, each winning in their respective classes and Improver II. carrying off the championship. Mrs. Gregory is to be congratulated on securing the yearling grand son of these boars to head her herd. All sales of animals selling for \$25 and over follow:

Lot	Name	Price
1	Mrs. Anna Gregory, Albany, Mo.	\$65
2	Same	25
10	Same	25
2	C. Folgate, Stanberry, Mo.	21
3	Jef Constant, Grant City, Mo.	31
5	Hills Hill, New Hampton, Mo.	31
14	Same	26
26	E. Milton, New Hampton, Mo.	36
30	J. Patton, McFall, Mo.	26
Gilt	E. Jonegan, Albany, Mo.	26
Sow	S. H. Smith, Bethany, Mo.	36

The Rockefeller Hereford Sale.

The sale of Herefords from the herd of Mr. F. Rockefeller, held at Kansas City, Mo., on October 17th, 18th and 19th, was very poorly attended and a few buyers absorbed the 142 head that were sold at an average of \$87.35. Car loads went to the various buyers and many good bargains were picked up by the careful buyer. The cattle were offered in just pasture condition, they not having had any special preparation. As bull buyers were noticeable for their absence only a few were sold.

"Improvements" are the order of the age as indicated by the Litchfield people in this week's argument on page 5.

The Homestead and The Homemaker \$1.25 per year.

LANDS AND HOMES FOR SALE.

PRESIDENT ROOSEVELT

BEST IMPROVED FARM IN OKLAHOMA.

480 ACRES near Colony, Okla. Two sets of improvements, new 12-room house, bath, hot and cold water, two windmills, 3 wells, 4,000-bushel granary, two barns, black locust trees all around farm, stock scale, tower and tank, buggy and implement sheds, 13 acres in orchard, (made \$400 last year from orchard alone) 300 acres in cultivation, land comparatively level, well fenced into 40 and 80-acre tracts, rural delivery, phone, near good school. Also 1,000 acre improved farm near Seabula, Mo. Price \$30 per acre, write L. A. BRIGGS & CO., 206 HALL BUILDING, KANSAS CITY, MISSOURI.

Two Mo. Farms For Sale

380 Acres: A desirable stock or grain farm in Montgomery Co., Mo., near the booming new town of Bellflower, on the Burlington railroad, 85 miles from St. Louis. This farm consists of 30 acres blue grass pasture, never mowed; 60 acres new meadow; 70 acres sowed in wheat; 20 acres feed lots, etc., about the buildings; 110 acres pasture, of which 20 acres is timber; 40 acres detached timber coal land. All except the last 40 is fenced, mostly with hog fence into 7 fields. 320 acres is first-class prairie land in a high state of cultivation. There are several ponds, two good cisterns and one living well. The buildings consist of a 1 1/2 story dwelling, frame, of 7 rooms, 2 halls, and porch; a large barn 48x92, a 2 room lean-to house, ice house, cellar house, and other out buildings, some fruit; telephones with splendid connections in house; daily mail, R. F. D. A bargain at \$45.00 per acre.

308 Acres: A first-class stock farm in Audrain Co., Mo., on C. & A. railroads, and eight miles from the Burlington. 308 acres fine prairie land, lies well; 60 acres is somewhat broken blue grass pasture land, with about timber extending from prairie to creek; and 40 acres good bottom land, in pasture, mostly blue fields. This farm is all under fence and subdivided into seven cultivation, of which 88 acres is wheat, stubble sown to timothy; 40 acres oats stubble; 30 acres meadow; 40 acres in corn; 10 acres in pasture and lots about out buildings; a good one and one-half story 8 room frame house; barn 36x40; good cistern, good pond, running stream through farm; some fruit; daily mail R. F. D. Telephone line with extensive connections passes house. There is an excess of 11 acres, making actually 319 acres in this farm. A great bargain at \$35.00 per acre.

THESE very low prices are made to make quick sales, and will not hold good after the first day of February, 1907. Will carry as much as 60 per cent of the purchase price at 6 per cent almost any length of time to suit purchaser. Am the owner of these farms, and in dealing direct with me you save agents' commissions. Address, L. D. MUDD, MONTGOMERY CITY, MO.

TEXAS LAND

ARE YOU INTERESTED?

WE have for sale lands in the Texas Panhandle, on the line of R. R. all the way from Oklahoma to New Mexico, from 1/4 section to 10,000 acres, at prices ranging from \$5 to \$20 per acre. Why go from 10 to 40 miles from it, to buy lands when you can buy it at the same price along the railroad—and frequently near large towns? Stop and give this question your attention, and write to us or call and see us. Correspondence solicited. Join our next excursion for Texas.

Kansas City, Mo.

CHOICE VIRGINIA FARMS

From 25 to 2,000 acres with buildings, timber fruit, good water etc. \$8 per acre and up. Lands level, with enough slope for natural drainage. Annual yield per acre—more than the cost of the land. Many men from the level west country settling here. Prices advancing steadily. Good opportunities for general farming, stock raising, dairy, poultry etc. Unsurpassed climate, fertile soil, fine markets and near to churches and schools. Excellent rail and water transportation. Sell your high priced land and buy cheap but equally productive land in a climate where you can enjoy life. Landed investments are sure to prove profitable here.

Write Today for our Real Estate Herald containing full account of the advantages of Southside Virginia and descriptions of desirable farms.

PYLE & CO., Inc., Petersburg, Va.

PAYS 15 PER CENT AS RENTAL.

I HAVE 2,000 acres, Central Nebraska, sure crop country, having missed but one crop since 1898, upland and bottom land that does not overflow. Fine, improved or unimproved, all sizes, all near three towns, with 7 elevators; 3 Flour, 1 Oat Meal and 2 Alfalfa Meal Mills, and the largest feeders in the state, making top prices for all crops. Finest corn and alfalfa land in state, black soil 35 feet deep, timber. These lands have for the past 10 years paid over 15 per cent on any price just as crop rental and I will guarantee that you cannot duplicate one of them for \$10 an acre more than my price in entire county. I must have the money to pay for another business I have purchased. For full descriptions, plans, photos of buildings and farms, write the owner, H. J. Hill, 1802 B. St., Lincoln, Neb.

"On to Canada!"

Get a Home and Farm in the Heart of Saskatchewan, the World's Great Wheat Bin. First Crop Nearly Pays for the Land.

Western Canadian Farmers Raised a \$60,000,000.00 Wheat Crop This Year.

Farmers, come out into Western Canada and Live. Come out where the soil is three feet deep—rich enough to grow anything—where crops never fail—where every farmer has money in the bank—where paupers and poverty are unknown.

Come to where the average yield of wheat is 25 bushels to the acre. Where the first crop from virgin soil nearly pays for your land—no clearing to be done—the soil is ready for the plow.

Come out and Live, among an intelligent, industrious and prosperous people—most of them from the States. Give the young folks a chance, let them enjoy the advantages of Canada's fine schools and churches—bring them up to rugged manhood and splendid womanhood in this great land of health and opportunity.

Let us tell you more in a personal letter about this wonderfully rich agricultural region, and send you our Free book, "The Home Builder," which tells why the country is rapidly filling up with the best and most intelligent farmers in the whole world.

It tells you how newcomers from worn-out farms get independently rich in a few years.

"The Home Builder" tells you everything you naturally want to know about this Great Wheat Region of Western Canada—about the healthy climate, the abundance of pure water and cheap fuel, the social and educational advantages.

Remember that land values are advancing rapidly and there's no time to lose. You can buy a 160-acre farm from us now for cash at the lowest price, or on easy payments, if you prefer, and our Company will give you a **Guarantee Bond**, stipulating that if at the end of five years you are in any way dissatisfied, we will buy back the land at an advance of 50 per cent over the purchase price.

We make this guarantee offer because we know the fertility and crop-producing power of the land, and that five years from now, under cultivation, it will be worth very much more than what you paid for it.

Over 125,000 people are coming into Western Canada this year. "On to Canada!" is the watchword of the hour. Come over while the choicest land that lies outdoors is yours at much less than its actual value. Write for free book F at once, and ask as many questions as you wish. They will be cheerfully answered.

Saskatchewan Realty & Improvement Company

(Capital \$250,000.00)

312 Jackson St., St. Paul, Minn. Regina, Saskatchewan, Canada.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands at low prices, but also get located in the finest climate, where crop failures are unknown; no bugs, flies or rust; freedom from electrical and destructive wind and hail storms; where fruits of all kinds do well. This is no experiment, as the country has been thoroughly tested. Special inducements to parties buying this fall. Railroad fare refunded to purchasers. Write for pamphlet to

THE BIG BEND LAND CO.,

UNIMPROVED FARM LANDS

In Osceola County, Michigan.

THIS group of lands was covered at one time with hardwood timber, some hemlock, but no pine. Soil is heavy and rich, clay or gravelly loam, well watered. Crops: Good hay and grain lands; ideal for potatoes; all fruits do well. These lands are guaranteed to be as fine as any in the state, but are still wild and covered with some timber and must be cleared. Markets are plentiful and close and on good railroads. Good schools, churches, roads and telephone lines already built. Terms: Lands sold for cash or one-quarter down, balance in five annual payments, interest 6%. Price, \$12 to \$15 per acre. Write for booklet.

H. W. MARSH, MANISTEE, MICH.

Mr. Harmon Gruver, of Brewster, Minn., offers some good Duroc boars and sows for sale.

Twenty-five Duroc Jersey boars are offered for sale by Mr. M. M. Elmendorf, of Lacona, Iowa.

Messrs. Sheldon Bros., of Shannon City, Iowa, have some good Duroc Jersey boars for sale.

Mr. Smith Brown, of Waterloo, Neb., has a number of very choice Duroc Jersey boars for sale.

Mr. Geo. Allen, of Lexington, Neb., one of the greatest breeders of Shropshires in the United States, offers some splendid rams for sale.

Mr. Geo. H. Lawshe, of Harlan, Iowa, has some grand good Chester White boars and sows for sale. Read his advertisement on page 35.

Mr. J. E. Wehr, of Portsmouth, Iowa, writes: "Kindly say to Homestead readers that the boars must go and anyone that wants a good Duroc Jersey male pig can get one, and get him right, if they write me

during the next thirty days. Just say they must go."

Dr. H. Pritchard, of Wisner, Neb., has the big Poland China boars. Write him if you want one.

Some good Poland China boars are offered for sale by Messrs. Sandquist Bros., of Oakland, Neb.

Good Duroc Jersey boars are offered for sale by Messrs. Jos. Skinner & Son, of Bedford, Iowa.

Twenty-five good Berkshire boars are offered for sale by Mr. C. S. Buckley, of Holstein, Iowa.

Chester White boars and sows are advertised for sale by Mr. A. A. Rogers, of Inwood, Iowa.

Registered Shropshire rams and ewes are offered for sale by Mr. Willard Miller, of Anita, Iowa.

Some splendid young Scotch bulls are offered for sale by Mr. J. D. McDermott, of Wlota, Iowa.

Messrs. Wm. Ray & Son, of Defiance, Iowa, have some splendid young Poland China boars for sale.

White Wyandottes are offered for sale by the Forest Home Poultry Farm, Box 253, Audubon, Iowa.

Messrs. Manley & Co., of Lyons, Neb., have some good Orion boars for sale, also a few very choice sows.

Short-horn bulls and Duroc Jersey boars are offered for sale by Mr. Jas. T. Dollison, of Sac City, Iowa.

Ohio Chief boars, and good ones at that, are offered for sale by Mr. W. D. Pittman, of Lohrville, Iowa.

A choice lot of Duroc Jersey boars are being offered for sale by Mr. M. A. McWilliams, of Wall Lake, Iowa.

Mr. D. M. Norton, of Sanborn, Iowa, offers special prices on farm Shropshire sheep during the next thirty days.

Some good Hereford bulls and cows and heifers are offered for sale by Mr. J. G. Von Seggern, of Wisner, Neb.

A choice lot of White Plymouth Rock cockerels are offered for sale by Mrs. T. A. Baldwin, Emmetsburg, Iowa.

Mr. J. C. Danner, of Yale, Iowa, claims January 30th as a date to hold a public sale of Duroc Jersey bred sows.

If you want a good Percheron stallion or a few good mares go and see Messrs. L. H. Humbert & Son, of Chariton, Iowa.

Messrs. Chandler Bros., of Kellerton, Iowa, have a grand lot of imported and home-bred Shropshire rams and ewes for sale.

Mr. F. P. Healy, of Bedford, Iowa, announces a Short-horn sale at South Omaha, Neb., to take place on April 27, 1907.

If you want a Duroc Jersey boar and at a price that will please you, then correspond with Mr. Delmar McCann, of Kennard, Neb.

Write that veteran breeder, Mr. W. N. Booth, of Danbury, Iowa, if you want a right good Poland China pigs and at a living price.

Good Duroc Jersey boars are for sale by Messrs. Clark & Tryon, of Wausau, Neb., and they are offering them at reduced prices during November.

If you want a Duroc Jersey boar sired by either of the two great winners, Junior Jim or Glendale Critic, write Mr. Austin Renshaw, of Blair, Neb.

Two hundred Duroc Jersey boars and sows, or the pick of these, and at the most reasonable prices, are offered for sale by Mr. W. J. Wendt, of Marcus, Iowa.

Mr. W. J. Prather, of Russell, Iowa, offers some very choice Duroc Jersey boars, sired by his second prize winning boar at the Iowa State Fair this year.

Special prices are offered on Duroc Jersey boars by Mr. J. P. Lentz, of Earlham, Iowa. He must close them out, because he is leaving the farm. Write him at once.

The great Shropshire ewe sale of Mr. Geo. Allen, Lexington, Neb., will be held at Kansas City, Mo., November 14th. It promises to be one of the greatest sheep sales of the year.

The Poplar Grove herd of Chester Whites, owned by Mr. W. R. Webb, of Spencer, Iowa, is now ready for business, and they can ship you a boar or a sow at any time you want one.

Poland China breeders who want a good boar pig should read the advertisement of Mr. J. C. Hoag, of Manson, Iowa. He has some of the tops and he can please the most discriminating buyer.

Mr. W. A. Peterson, of Lyons, Neb., owner of the Logan Valley herd of Duroc Jerseys, is offering some good boars and some choice gilts sired by old Dandellon, the former herd and show boar of Messrs. Manley & Co.

Mr. E. O. Walcott, of Gilmore City, Iowa, offers fifteen spring Poland China boars, six fall boars and a two-year-old herd boar for sale in this week's Homestead. Look up his advertisement on page 37 and write him.

If any of our readers want Large Yorkshires, and want good ones, they can get them, either sex, of Mr. F. Rabeller, of Leigh, Neb. Nearly all of their stock is imported, so you will be sure to get the very best.

Mr. Roy E. West, of Churdan, Iowa, has a splendid lot of Duroc Jersey boars for sale. They are big, heavy-boned, wide-backed fellows, sired by a son of Proud Advance, Orion and Adjuster. Try him with an order.

An eighty-acre improved farm, all under cultivation, located two and one-half miles from Anoka, Minn., is for sale by its owner, Mr. Chas. McGraw, of Anoka, Minn. This farm is only thirteen miles from Minneapolis and is priced very reasonable. The advertisement appears on page 25.

Mr. O. L. Mossman, breeder of Duroc Jersey swine, of Polk City, Iowa, writes: "I have decided not to hold a winter brood sow sale. Now, I offer at private sale gilts of superior breeding, many of which will weigh 200 pounds from the Crimson Wonder, Gold Dust Jim and Proud Advance families. I also have a few choice boars for sale, two by Ohio Chief; one by Tientsin, a half brother to the sow that took first in the junior yearling class at the state fair in 1906; one by Chief Perfection, out

SCOTCH MYRTLE.

The subject of the above illustration is the beautiful roan cow, Scotch Myrtle, five years old, owned by Messrs. Smith & Barnhardt, of Harper, Iowa. She is one of the great cows of the breed, being a Scotch Short-horn, sired by Scotch Fame, an imported bull sired by Scotch Thistle and out of Lady Dorothy 20th by Eastern Star. Her dam, Imp. Scottish Myrtle, was sired by Scottish Victor. A Cruickshank Victoria sired by \$6,000 Brave Archer and other noted celebrities of lesser light. The above is a 1,700-pound cow that will be sold in the combination sale of Messrs. Smith & Barnhardt, M. Yocum, Grove & Weuger, at Harper, Iowa, on November 15th, particulars of which are on page 29.

of Lady Orion by Orion, the best thing I have seen this year. He will weigh 280 pounds." See advertisement on page 39.

Mr. A. H. Brett, of Mason City, Iowa, claims December 18th as a day on which to hold a public sale of Short-horn cattle, and Percheron and Clydesdale horses.

Six good Duroc Jersey boars, sired by Corn Cracker 14205 and out of a Luther Top Notch dam, are offered for sale by Mr. Z. T. Kinsell, of Mt. Airy, Iowa. Price \$25. Write him at once.

Mr. J. C. Hughes, of 635 Mulberry St., Ottawa, Kan., announces a dispersion sale of land and stock. He has 800 acres of good land, well improved, near Emporia, Kan. See advertisement on page 24.

Mr. R. T. Cameron, of Ottumwa, Iowa, breeds thoroughbred chickens exclusively. His advertisement offering stock for sale, both yearlings and young fowls, will be found on page 16 of this issue of The Homestead.

Mr. J. F. Lentz, of Earlham, Iowa, is closing out his entire boar crop of Duroc Jerseys, and in order to clean up says for us to announce that special prices will prevail for the next two weeks. Write him if you want a boar.

Mr. V. A. Lathrop, of Marion, Iowa, in a recent letter says: "I still have some good Chester White boars and gilts of March farrow for sale cheap, as I must close them out before bad weather." See his advertisement on page 35.

Messrs. E. M. Castle & Son, of Joy, Ill., have an extra good Champion Paul boar for sale at a reasonable price. Those of our readers who are in need of a well-bred and good Duroc boar should write Messrs. Castle at above address, mentioning The Homestead.

The proprietor of the Mondamin Farm of White Bear Lake, Minn., is offering Yorkshire swine for sale in his advertisement which will be found on page 33 of this issue. He has seven boars now ready to ship at low prices for quick sales to make room for fall litters.

Owing to the fact that he expects to move, Mr. D. W. Boydston, of Nevada, Iowa, is offering his Buff Orpington hens for sale. He has thirty two-year-olds from the famous Williams & Vass strain. These are worth double the price he is asking for them. His advertisement appears on page 16.

Messrs. Wm. Ube & Sons, of South Omaha, Neb., offer some splendid Ohio Sunshine boars for sale. Those of our readers who want Poland China boars, and of this particular strain, can get some good ones of this firm. They are reliable breeders and will treat you fair if you place an order with them.

In a recent issue of The Homestead it was stated that Messrs. Watson Bros., of Creston, Iowa, had Duroc Jersey boars for sale. They write us under recent date that this was an error, as they have no boars at the present time for sale. Their advertisement offering sows for sale appears on page 33 of this issue.

Mr. S. J. Butts, of Mason City, Iowa, breeder of Duroc Jersey swine, writes: "My stock is in good shape; not fat, but ready for business. I have fifteen Duroc Jersey spring boars, about a dozen good gilts and some aged stuff for sale. Corn husking has commenced and an extra good crop will be cribbed." See advertisement on page 37.

Mr. S. J. Miller, of Kirksville, Mo., writes that he will sell a good Percheron colt coming three years for \$700, and also that he would like two rattling good salesmen. Here is an opportunity for a good bargain in Percherons. Two good hustling salesmen will

HEAD NOISES BOOK FREE

I will send my new book on head and ear noises and how to cure them to any sufferer from this trouble. I will send it absolutely free of charge and it is full of the very best help and medical advice that all who have head and ear noises need. My book tells just what causes those distressing ringing, buzzing noises or that snapping in the ears when the nose is blown. It explains how they are the signs of serious and sometimes very dangerous trouble in the inner parts of the ear, and how, if neglected, they too often result in that terrible affliction—Deafness. Fine pictures of the inside passages of the head and ears, where the trouble starts, illustrate the book. Best of all, however, it points out how head and ear noises can be cured, easily and painlessly, right at home, so that the ear will be in perfect condition and the hearing clear and distinct. Don't suffer with head and ear noises any longer. Let me send you this book that will tell you just what to do. You're gladly and freely welcome to it; it shall not cost you a cent. Write your name and address plainly on the dotted lines and mail the free book coupon to Deafness Specialist SPROULE, 473 Trade Building, Boston.

find a very profitable job with Mr. Miller. See page 34 for Mr. Miller's advertisement and address.

In our report of the American Royal held at Kansas City we stated that Messrs. Alexander Galbraith & Son, of Janesville, Wis., showed the only aged mare, consequently won first prize. In this we were wrong. The Galbraith mare, Flossie, won first prize over the winning Clydesdale mare at the Illinois State Fair, owned by Mr. Soderberg, of Osco, Ill.

Mr. M. D. Yard, of Crawfordville, Iowa, has a new advertisement in this week's issue on page 36, in which he is offering to exchange his two-year-old Brawth Bud hull, Fairview Royal Bud 259037. He is a straight Cruickshank, sired by the great bull, Lavender Royal 135256, running back to Imp. Generosity by Bampton, a beautiful red, good, kind and docile.

Messrs. J. W. Reynolds & Son, of Defiance, Iowa, write as follows: "Will you kindly say to your readers that we have a grand lot of good Duroc Jersey boars on hand, and as we need the room we are content to make a cut in price for the next thirty days. Size and quality considered, they cannot be duplicated elsewhere for the money. Just tell the boys to write us or come and see the boars."

On page 25 this week appears the advertisement of the Rex Poultry Farm, a beautiful place near the city of Des Moines, Iowa, which can be bought at a bargain. It is covered with fine fruit trees and berry bushes and the improvements are also in elegant shape. The owner is obliged to sell on account of ill health and hence will make a good bargain for some man who would like a nice small fruit and chicken farm near the best city in the state.

Mr. W. A. Kirkpatrick, of Lincoln, Neb., in a recent letter enclosing new copy for his advertisement, which will be found on page 38, writes: "My herd is doing fine and I am going into the winter with a flattering prospect of having a fine lot of growthy gilts to offer in my February 13th sale. They will be bred to one of the best grandsons of the great Glendale Critic, and are mostly granddaughters of the famous Crimson Wonder."

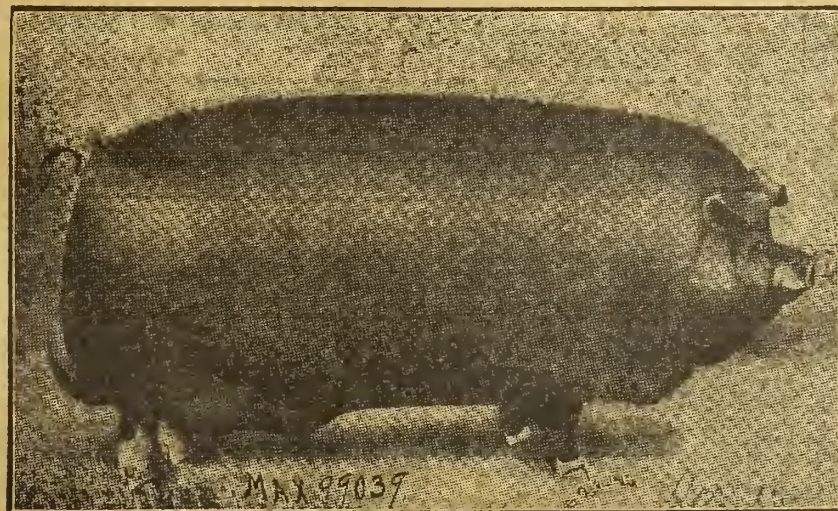

The Deer Lake Park, Severy, Kan., is offering live deer of all ages, white swan, California quails, Belgium hares, parrots, jack-rabbits, wild geese and other fowls and animals for sale in their advertisement which appears on page 28 of this issue of The Homestead. They have no catalog, but ask that you write your wants. They will also buy all kinds of rare animals and birds of any of the kinds mentioned in the advertisement above referred to.

Mr. A. C. Berry, of Unionville, Mo., is offering thirty Scotch and Scotch-topped Short-horn cows and heifers, eight Scotch and nine Scotch-topped hulls. The heifers and bulls are by his great breeding bull, Imp. Mutineer, a Marr Missie hull, and a half brother to the champion, Whitehall Marshall. The cows are in calf to his service and several have calves at foot by him. Mr. Berry offers the lot at a bargain price and any of our readers who are in the market for desirable, well-bred cattle would do well to investigate.

Mr. D. W. Richardson, of Ogden, Iowa, breeder of Duroc Jersey and Chester White swine, whose advertisements will be found on pages 38 and 35 of this issue, writes: "I have as good pigs as I have ever raised, six Chester Whites and six Duroc Jerseys and if I do not get them sold by the next two weeks I intend to sell them for pork. They are big, lusty fellows. I sold one the other day that weighed 236 pounds. I also have a few gilts which I will sell bred or open. They are extra good and I guarantee them to be as I describe them."

On December 13th, Mr. T. A. Baldwin will sell a draft of forty head of Short-horn cattle at his farm adjoining the town of Emmetsburg, Iowa. He will include his Scotch bull, Grand View Chief 244020, bred by Mr. George Isaac, Bomanton, Ontario, also the imported cow Primrose 6th, bred by Mr. John Cran, Keith, Scotland, and one of her heifers. There will also be two daughters of the noted St. Valentine in the sale, and several of his granddaughters. He will also sell ten head of young bulls, nearly all of which are sired by Grand View Chief. In due time the advertisement will appear in these columns, and we will then have more to say about what goes into the sale.

Those wishing to buy young bulls at private sale should write at once to Mr. T. A. Davenport, Belmont, Iowa. Eight well-bred ones are offered, from ten to fifteen months old. Four of these are got by Imp. Charmer 157082 and four by Baron Gloster 8th 230700. The dams are some of the best in English and Scotch blood lines. All of these youngsters are a nice red in color, and are thrifty

Max 99039, the sire of a large number of young boars and gilts offered in Mr. William Crownover's sale, at Waterloo, Iowa, November 13th. The prepotency of this boar will at once be seen when his get is shown. He gets them with strong backs and full, plump hams. Write for catalog at once to Mr. William Crownover, Hudson, Iowa, and please mention The Homestead.

WHAT!!! GRAY'S TONIC PREVENTIVE DID FOR THIS MAN

THE ARIZONA CENTRAL BANK, Flagstaff, Ariz., May 16, 1906.
THE E. E. GRAY CO., Hinsdale, Ill.

GENTLEMEN:—Enclosed please find draft for \$2.00 for which please send me another bottle of Gray's Tonic Preventive. It certainly "Bikes 'Em Fat." The bottle that I am now using has proven to me that it is certainly what we want for a horse that needs a tonic.

F. E. POLLOCK, President.

We have dozens of letters like the above come in every day. We can do for your ailing horse what we have done for others. Write us at once if your horse has cough, cold or distemper. It will only cost you \$2.00, express prepaid, for two weeks' treatment and this wonderful remedy is positively guaranteed. If it fails to benefit your horse we will refund you the purchase price and no questions asked. Be sure and state your express office. Address

THE E. E. GRAY CO., 322 CHICAGO AVE.,

HINSDALE, ILL.

fellows that should make good wherever put. The advertisement appears on page 36, and Mr. Davenport will gladly answer all inquiries. In writing, please mention The Homestead.

Messrs. G. W. Baker & Sons, of Pawnee, Ill., claim January 23d as the date of their brood sow sale. This firm have one of the good hords of Durocs to be found in Illinois and recently added much strength to it in the purchase of the good boar, Silkworm, a son of Dotie, the champion sow at the World's Fair. The sire of Silkworm was Oom Paul II. by Oom Paul. Silkworm was purchased by Messrs. Baker in the recent sale of Mr. Geo. W. Seckman, at Ripley, Ill. Messrs. Baker will have a select lot of good sows bred to this noted boar in

their brood sow sale. Further particulars will be found in future issues.

On December 21st, at Manning, Iowa, a combination Short-horn sale will be held under the management of Mr. Joseph Wilson. About forty head will be sold, among which will be a number of good young bulls. Mr. Barney Mitchell, Vail, Iowa, will be one of the largest contributors to the sale, and is sending some good cattle. Messrs. Alex Campbell, Botna, Iowa; Joseph Wilson, Manning, Iowa, and other breeders in that vicinity will also contribute to the sale. The sale will be held the day following the Audubon sale. Those wishing catalog should write to Mr. James Wilson, Mgr., Manning, Iowa, mentioning The Homestead.

Mr. E. J. Trumbauer, of Patterson, Iowa, breeder of Chester White swine, in furnishing copy for his new advertisement which appears on page 23 of this issue, writes: "I have had good sales this fall so far. I still have a hunch of hogs on hand on which I will make bargain prices during this month. These pigs are strictly good ones and should give entire satisfaction to anyone wanting a good, strong, growthy Chester White hog. I invite my old customers, as well as new, to write and get prices and descriptions before buying. The yearling sows I am offering for sale are exceptionally good ones and are suckling nice even litters of pigs now and are very cheap at the prices I am quoting on them. There is no sickness among my bogs and they are doing fine. Thanks to The Homestead for the many sales it has made."

The Homestead is pleased to call the attention of its readers this week to the advertisement of Messrs. J. C. Fuller & Son, of Alden, Iowa, who have Duroc Jerseys weighing from 175 to 200 pounds for sale, both boars and gilts, and at prices which are low for the quality of stock which they have for sale. In furnishing copy Messrs. Fuller write: "We have pigs sired by Sensation Jr., Col. K., Major S. and Hobson and their dams carry the blood of Tip Top, Notcher, Orion of Alden, Higgins, Model and others. Our pigs are all good ones, the best we have ever raised and anyone wanting a good pig will find good ones here. The following letter from Mr. Henry Harvey, of Goldfield, Iowa, is an evidence of the quality of stock we have for sale: "I received the boar all O. K. and will say that I am well pleased with him, and he is a dandy. He will be a good advertisement for you, as I have had

BIG 2 DAYS' SALE OF SHORT-HORN CATTLE

AT NEWTON, IOWA, NOVEMBER 27TH AND 28TH.

I Will Offer for Sale at the Sale Pavilion in Newton, Iowa, the Day Following the Parsons & Stewart Sale

48 HEAD CHOICE SCOTCH TOPPED SHORT-HORN CATTLE

I will offer forty-seven head of females and my Scotch herd bull, Red Victor. All the cows in the sale will either have calf at foot by him or be bred to him. Fifteen cows will be sold with calf at foot. Forty of my females are of breeding age and will either have calf at foot or be bred to Red Victor. Table back Short-Horns that are great milkers is the class of cattle I am offering. My herd bull, Red Victor, is offered for sale. He is a straight Scotch bull, sired by Victor Baron 216682 and out of Imported Mabel. My catalogs are ready for distribution and will be mailed by addressing me.

E. S. TURNER, - - - **COLFAX, IOWA.**

COL. F. M. WOODS AND ASSISTANTS, AUCTIONEERS.

good luck selling boars this fall. I am trying to work up trade by having good stuff to sell and I may want some gilts next winter."

Write Messrs. Miller & James, of Meade, Kan., for information in regard to lands in the Artesian valley, as per advertisement on page 24.

A cracking good lot of Duroc Jersey boars are offered for sale by Messrs. Edmunds, Shade & Co., of Kingsley, Iowa. A great many of these are sired by the undefeated sweepstakes boar, American Royal. Write them or go and see what they have to offer.

Mr. H. B. Griffith, of Bowen, Ill., is offering several good boars for sale sired by Ambition, Tip Top Notcher, Hanley, Top Notcher Chief and other noted sires, at greatly reduced prices. Write him at once, as per advertisement on page 28 of this issue.

Writing in regard to the Partridge Cochlin chickens which she is offering for sale on this page. Mrs. Floy Collins, of Viola, Iowa, says: "In regard to my birds, I will say I never had better ones. I have some grand, handsome pullets ready for the fall shows."

Mr. O. M. Healy, of Bedford, Iowa, writes: "The prospects for my Short-horn sale at South Omaha, Neb., December 11th, are very encouraging. My cattle are coming along in good shape. Nearly all my cows in the sale will have calves at foot, and I am including some of my best animals. There will be about fifteen head of the Duchess tribe, about that number the get of Old Airdrie Duke of Hazelhurst (a noted sire in Messrs. Elbert & Falls' and Bigler & Sons' herds). This will be the last opportunity to buy in one sale as many sired by the old bull, as he is dead. My offering will be Bates cattle in their purity, as my entire herd is of straight Bates breeding."

Mr. C. F. Shaffer, Poland China breeder, of Weiman, Iowa, who maintains one of the best herds of hogs to be found anywhere, writes: "Orders are coming in from all directions, having sold as follows: Male and two gilts to Mr. P. S. Peiffer, male pig to Mr. Nick Schmilt, male pig and two gilts to Mr. C. P. Bunch, all of Keota, Iowa; male pig to Joe Becker, Sumner, Iowa; male to Joe Peiffer, Keota, Iowa; male pig to Frank Jenkins, Washington, Iowa; young herd of five young gilts and one male to Mr. E. C. Jones, male pig to Mr. William Vorel, both of Weiman, Iowa; male pig to Mr. Harvey Cox, Montezuma, Iowa. I have a choice lot of male pigs on hand and they are the kind that sell on sight. They are sired by my two great herd boars, Black Chief 99535 and G's Perfection Jr. 89471. These are two of as good breeding boars as can be found anywhere. My pigs have good length, good heavy hoes; are on short legs, stand up on toes; have nice, straight, black coats of hair, with fine head and ear; deep hams and shoulders and carry their width from one end to the other. These pigs are good enough to ship to responsible parties on approval. Write for pictures of my herd boar: free on application. I also have a choice lot of young Short-horn bulls, six to twelve months old, of the low-down, thick-fleshed, early-maturing kind. Herd headed by the prize show bull, Laurel Knight, assisted by Scottish

Sultan. These bulls are all reds and will be priced very low." Look up advertisement on page 36 and address Mr. C. F. Shaffer, Weiman, Iowa, kindly mentioning Homestead.

Messrs. Rood Bros., of Lake Park, Iowa, offer fifteen good Duroc Jersey boars for sale sired by Red Ribbon and King Edward, their former herd boars, and by Fortune Maker and Bell's Model. They will also price a few gilts at any time. They now offer to sell Lady Belle II., the best sow in their herd. She was sired by King Duroc 7851 by old Duroc King, and her dam is Lady Belle by Pericles Chief. This sow won first premium at the Minnesota State Fair in one and under two-year-old class in 1903, and she has always been considered one of the best sows in northern Iowa. An even \$100 takes her. Write them if you want boars or sows, as they have them, and are ready to ship.

On December 11th, at Rock Valley, Iowa, Mr. W. J. McLean, one of the best-known breeders of Short-horns in northwest Iowa, will sell a draft of fifty head of Scotch and Scotch-topped cattle from his herd. There will be seven head of Scotch cows and heifers and four Scotch bulls, representing such choice families as Victoria, Mysie, Generosity, Bloom, Narcissus and Matchless tribes, together with a splendid lot of Scotch-topped cattle, having four and five richly-bred crosses. Individually, the cattle are a splendid lot of well-bred and well-kept Short-horns and there will be one of the best bunches of heifers go into this sale that has been sold this year. The entire offering is worthy the attention of our best Short-horn men.

Mr. S. E. Newhouse, of St. Louis, Mo., has 240 acres of farm land located in New Madrid county, Missouri, which he is offering for issue. This farm has 120 acres of corn on sale in his advertisement on page 24 of this issue at present which will average eighty bushels to the acre. The balance is in wheat and timothy meadow. If interested write Mr. Newhouse and also ask him for his literature on the Garden Spot of Missouri. This part of Missouri lies adjacent to Sikeston and embraces part of Scott, Stoddard, New Madrid and Mississippi counties in the southeast part of the state. For a distance of twenty miles in any direction from Sikeston the soil is very fertile and productive. It varies from five to fifteen inches in depth. Corn and wheat are equally productive on this wonderfully rich soil. It will pay any reader of The Homestead who thinks of buying land in Missouri to write Mr. Newhouse for this pamphlet.

Mr. Gus A. Pederson, of Ocheyedan, Iowa, well known to Homestead readers, and one of the best Duroc Jersey men we have in the northern part of the state, now offers for sale twenty boars sired by Osceola Chief, a grandson of Van's Perfection, and he is a boar that has done him a wonderful lot of good. He also has pigs by Proud Perfection, a son of the Iowa State Fair winner, Perfection Chief, and by Gruver's Orion, a son of old Orion. He won first prize on Osceola Chief at his county fair and he breeds the same type as himself. While visiting the herd we saw a lot of well-developed and

TOO LATE TO CLASSIFY.

**KERR'S
O. I. C.'S**

I AM now offering boars that are rich in the blood of the champions Kerr Dick and Big Mary. It is the blood of this pair that made my December sale average \$49.35 and my April sale average \$84.95. Herd headers among these. Write me.

O. L. KERR, Independence, Mo.

to D. Worthington, Rochelle, Ill.; a bred heifer to B. Barrett, Gardner, Ill.; three cows to R. D. Menaugh, of Mazon, Ill.; a twelve months hui to W. A. Patterson, Durand, Ill.; and a six months hui calf to S. R. McCulloch, Donnellson, Ill. Mr. Patterson has

bought of us before and this time got a very promising bull in Lord Snowdowne 2d, an imported Scotia, with dam by Idio Knight, the bull we sold as a yearling for \$1,050. We showed Lord Snowdowne 2d at the Irquois, Kankakee and Grundy county fairs this fall, winning first on him in each case. He weighed close to 1,000 pounds and was of the type that responds readily to the feed box." See advertisement on page 35.

Mr. Thomas H. Canfield, of Lake Park, Minn., writes: "We have made the following sales of 137 Large Yorkshires for breeding purposes since our September report, and the demand is better than ever before at this time of the year: In Minnesota: H. Beche, Hawley; John Kofarnus, Welcome; Emil Tussen, Perham; Theo. Foslien, Brandon; George Ballmes, Adrian; Hans Johnshov, Starbuck, and Swift & Co., S. St. Paul. In Iowa: Thomas Weldman, Red Oak; Joe Telford, Ottosen; Harry Colliprest, Ruthven, and John Morrell, & Co., Ottumwa. In North Dakota: William Huggins, Grand Forks; G. H. Gessner, Penn; H. H. McNair, Portland, and B. M. Turnbull, Fessenden. In South Dakota: A. J. Lohr, Vermilion; Fred G. McIntosh, Bowdler; A. H. Nitz, Canova, and William Heppner, Voiga. In Nebraska: J. S. Stanek, Virginia. In Wisconsin: F. B. Woodard, Bloomer; George Bauernfeind, Elkhart Lake, and Theodore Mathew, Chippewa Falls. In Kansas: Clark Osgood, Florence. We have now on hand 175 last spring gilts which we will commence to breed now for litter next spring, and they will be ready for shipment some time in the middle of the winter." See advertisement on page 33.

Messrs. Osborne Bros., breeders of high-class Poland China swine, of Osborne, Iowa, write: "We beg leave to report the sale of Onward to Mr. C. L. Thayer, of Fostoria, Iowa. Mr. Thayer gets, in this boar, a very toppy animal and one of as good breeders as there are anywhere. His pigs are among the best we ever raised and he is the sire of the litter we mention in our advertisement. We have also sold to Mr. Charles Hunsberger, of West Union, Iowa, a very toppy fall boar, sired by Osborne's Sunshine 90931. Our local trade has been good and we have sold to all old customers where we had pigs not akin to those we sold in former years. The dam of the pigs we mention in our advertisement is a great sow and could be made to weigh 800 pounds. She is a show sow and her sire is the great Osborne's Perfection 62957. We have a few extra good young boars that we will make a very low price on, in order to close them out, as we need the room for our fall pigs. Everything on the place is in perfect health and in the best of breeding condition. Corn in this locality is the best grown in years; other crops were good, except hay, which is very short." See advertisement on page 36.

Among the Duroc Jersey men in northern Iowa that are rapidly coming to the front is Mr. C. L. Strayer, of Ocheyedan. He now has considerably over 100 head in the herd, headed by Star Perfection 41267, a grandson of old Duroc King, and he is not only a very good hog himself, but he is the sire of some good stuff on the Strayer farm. When laying the foundation for his herd he purchased five sows from that noted Minnesota breeder, Mr. Wm. Malcolm, of Bigelow, Minn., and these were sired by Malcolm's Model and King of Minnesota. With Star Perfection as the sire, backed by the blood of old Duroc King, coupled on these Malcolm Model and King of Minnesota sows, with the blood of the famous old Top Notcher behind them, he has succeeded in breeding a splendid type of Duroc Jersey hogs. This year he showed at the Ocheyedan fair where he won a number of the best premiums, including first on gilt and a number of second and third premiums. He now has about twenty good boars for sale and he is pricing these right just to move them. He will make a brood sow sale in January, at which time he will put the tops of this year's crop. If any of our readers want a boar pig they can get them from Mr. Strayer and at a reasonable price.

BARBER'S CHESTER WHITES.

Anyone wanting a good Chester White boar or a few good gilts can get them from Mr. J. L. Barber, of Harlan, Iowa. All his stock are sired by prize-winning boars and he has the very best. You can depend on him to send you good stock and good individuals.

WEIGHTON'S DUROC JERSEY BOARS.

Anyone wanting a Duroc Jersey boar, one that is fit to head a herd, should read the advertisement of Mr. John Weighton, of Audubon, Iowa. He has a number that are ready to ship and they are all right. Read his advertisement on page 38 and write him at once.

GLENWOOD CRITIC BOARS.

Anyone who wants a good young Duroc Jersey boar can get one of Mr. A. W. Lamb, of Monroe, Neb. He formerly owned Glenwood Critic, a son of Glendale Critic, and he was one of the best boars fitted for the shows this year. His pigs are toppy and they are good. Write Mr. Lamb if you want one.

MCCUTCHE'S BERKSHIRES.

Mr. Fred McCutchen, of the Ardmore Stock Farm, Holstein, Iowa, writes: "Just say to your readers that in all the years we have bred Berkshires we never had as good a bunch of boars and gilts on the farm as we have at the present time. We are ready to ship gilts open or bred and we can please anyone looking for a good Berkshire boar."

AUCTION SALE OF ABERDEEN ANGUS CATTLE.

Mr. J. Nissen, of Meservey, Iowa, will hold a sale of thirty-five head of Daddies at his Pleasant Hill Farm, adjoining the town of Meservey, on November 23d. Mr. Nissen purchased the entire Leslie & Burwell herd of Angus cattle after the death of Mr. Leslie, and has since been adding to some of the choicest specimens of the breed. The old Leslie & Burwell herd at one time was most conspicuous in American show yards. It was known as the Cottage Grove herd and nearly all animals bred there bore the name of Cottage Grove. Notices of Cottage Grove being common. It was Mr. Nissen's good fortune to secure from Mr. McHenry, of Denison, Iowa, the Pride bull, Baltimore of Glendale. A goodly number of cows and heifers will have calves at foot by this old Tyson-bred bull. This sale furnishes a splendid opportunity for buyers of northern Iowa and Minnesota to secure as choicely-

bred Angus cattle as can be found any place. The announcement can be found on this page.

CLOVER WAVE DUROCS.

It is with pleasure that we call our readers' attention to the Duroc Jersey advertisement of Messrs. Stowe & Gingrich, of Hamburg, Iowa. With the blood of the great Nebraska Belle, Orion, Jumbo Red and other noted winners they are prepared to furnish the best in the land. In this herd will be found some of the greatest sows of the breed, and they have the best bunch of boars that they have ever offered for sale. If you want a good one you will write them or go and see their herd.

J. P. SPEARMAN, AUCTIONEER.

With this week's issue we again renew the card of Mr. J. P. Spearman, of Papillion, Neb., one of the best young auctioneers in the West. Mr. Spearman has done good work for a large number of western breeders and his work has been very satisfactory; so much so that this year he has some of the very best breeders to sell for. He is well posted on pedigrees, a good judge of values and is a good worker. We recommend him to any of our readers who want the services of a conscientious and pains-taking auctioneer.

REUBEL BROS.' POLAND CHINAS.

Readers of The Homestead who want good a good business Poland China boar, one with plenty of size and ample quality, should read the advertisement of Messrs. Reubel Bros., of Rockwell City, Iowa. They have a good bunch sired by R's Keep On, half brother to the great Prince Alert and Impudence, both sweepstakes boars at the Iowa State Fair. Then they have a number by Iowa Chief, the best Thickset boar in the West. Just read their advertisement on page 37, and write them and do it at once, before the good ones are all gone.

CHANDLER'S LATE SHROPSHIRE IMPORTATION.

One of the best importations of Shropshire sheep that has ever been brought across the water is the recent purchase of Messrs. Chandler Bros., of Kellerton, Iowa. They secured the top of five of the best herds in Europe, and now have imported rams and ewes for sale that can go out and win their share of the money in the best show rings in America. If you want an imported ram to head your flock you can get the very best of the above firm. Write them at once and be sure to get a good one.

HULBERT'S POLAND CHINA BOARS.

One of the best bunches of Poland China boars that we have seen this season is offered for sale by Mr. Chas. M. Hulbert, of Oakland, Neb. These are sired by his great boar, Oakland's Prospect, winner of second premium at the Nebraska State Fair, and he gets the size on his pigs, as well as the bone and quality that the boys all want. He also has pigs by Chief Enterprise and Nemo L's Oakland. Mr. Hulbert says that he will make special prices for next thirty days, and he certainly has some good boars on hand. Write him at once or go and see the pigs. Kindly mention The Homestead when doing so.

GEORGE ALLEN'S GREAT SHROPSHIRE EWE SALE.

On November 14th, at the sale pavilion, Kansas City, Mo., will be held the Shropshire ewe sale of Mr. George Allen, Lexington, Neb., one of the foremost sheep breeders in the United States. He will sell 300 head of yearlings and two-year-olds, and they will be selected and sold in pens of three. They will be carefully mated to first-class imported rams, and they will all be registered and the best known English pedigree furnished with everything sold in the sale. The Allen flock has been one of the best-known Shropshire flocks in America, and was the World's fair winner at Chicago, as well as being the leading winner at St. Louis and the Illinois, Iowa and Nebraska State Fairs. If any of our readers want Shropshire ewes, they should by all means arrange to be at Kansas City on November 14th. Catalog can be had by writing to Mr. Geo. Allen, Lexington, Neb., and mentioning this paper.

Angus Cattle Sale

TO BE HELD AT

PLEASANT HILL FARM, ADJOINING MESERVEY, CERRO GORDO CO., FRIDAY, NOVEMBER 23.

40—HEAD—40

Comprising thirty-four cows and heifers—fifteen will have calf at foot—and six bulls. Three bulls and most of the heifers are sired by Baltimore of Glendale, the noted old sire of prize winners formerly at the head of McHenry's herd. The cows are a good useful lot of good-size without coarseness, and most of them are bred to Baltimore or have calves by him. Write for catalog.

Meservey is located on the C. G. W. Railway, 23 miles Southwest of Mason City, 7 miles North of Alexander on the Iowa Central.

Sale of Short-horn and Polled Durham Cattle

ALSO POLAND CHINA HOGS.

TO BE SOLD AT SCOTLAND VALE STOCK FARM, NOVEMBER 15, 1906. SIX MILES SOUTHEAST OF SOUTH ENGLISH AND SEVEN MILES NORTHWEST OF KEOTA, IOWA.

The offering consists of 26 Short-horns, 8 bulls and 18 cows and heifers, and 25 Polled Durhams, 5 bulls and 20 cows and heifers, of as well-bred a lot of stuff as will go into any sale. Animals of high individual merit, including 5 head of the well-known Short-horn show herd of L. W. Barnhart. In the Short-horn offering is included Imp. Dora 3d and other pure Scotch cattle, such as Golden Rule and Golden Rule 2d, sired by Imp. Golden Fame and out of Imp. Ruby 32d, and Scottish Myrtle out of imported sire and dam, and other nicely Scotch-topped cattle. Many of the cows have calf at foot, others safe in calf. The Short-horns are contributed by L. W. Barnhart, South English, Iowa, and M. Yoakim, Webster, Iowa. In the Polled Durham offering are two as well-bred Scotch bulls as the breed contains, Scottish Archer by Prince of Pallas and out of Imp. Ruby 32d. Claudius by Ottawa Gauntlet and out of Imp. Claudie 4th. Dora of Sittytown by Prince of Pallas and out of Imp. Dora 3d, and others of high individual merit and good breeding. Polled Durhams contributed by S. B. Wenger, South English, Iowa; T. S. Gore, South English, Iowa, and M. Yoakim, Webster, Iowa. The Poland China offering is a dispersion of the herd of S. B. Wenger, 45 in number. Eleven sows and one herd boar by Perfection I Know. Three sows by L's Tecumseh and others equally well bred. Perfection I Know's get have taken more premiums at Iowa State Fair the last three years than the get of any other hog, at any state fair. For catalog of hogs address S. B. Wenger, South English, Iowa. Hog sale 10 a. m. sharp. No catalog sent without application. Cattle sale 1 p. m. Sale in big tent. For catalog of cattle sale address L. W. Barnhart, South English, Iowa.

GREAT COMBINATION SALE OF

..... SHORT-HORN, CATTLE

TO BE SOLD AT

HASTINGS, NEBRASKA, WEDNESDAY, NOVEMBER 21, 1906.

Thirty-two head of choicely-bred Short-horns from the well-known herds of Saddle Bros. and C. N. Moore. Thirteen females and nineteen bulls, the tops of four good herds.

Saddler Bros., Hastings, Neb., Props. C. N. Moore, Hastings, Neb.
COLS. T. C. CALLAHAN AND I. R. DOTY, AUCTIONEERS.

Last Call for the Donohoe & Cash Sale of Aberdeen Angus Cattle.

This will be the last opportunity for us to direct attention to the very important sale of Aberdeen Angus cattle to be held at the new sale pavilion in Holbrook, Iowa, Tuesday, November 13th, by the following well-known doddle breeders: Messrs. P. J. M. H. and Mike Donohoe, John and Mike Cash, all of Holbrook, Wm. Cash, of Williamsburg, and Pat Leahy, of Parnell. The sale management fell to Mr. Wm. Cash, the big-hearted, whole-souled, congenial breeder of Aberdeen Angus cattle who will leave no stone unturned to make this sale the success that it deserves. As has been before stated, these breeders have built up a herd of Angus cattle second to none in the entire West. We have had considerable to say concerning the high character of the herd bulls that have been used, namely, Black Woodlawn and Woodlawn Blackbird Lad, the latter being included in the sale. In building up the herd keen good judgment has been exercised in securing not only cattle of fashionable and aristocratic breeding, but individual merit has been one of the prime factors constantly in the minds of these modest breeders, the results of which can plainly be seen, for good on sale day. Inasmuch as the Baker & Smith sale, the day following theirs, was recognized as being one of the great sales of the year, being a dispersion sale, these enterprising breeders surrounding Holbrook have delved deeply into their herds consigning much of their best stock, including some twenty odd famous Blackbirds, in order that they might not take second rank, so far as the importance of their sale was concerned, in the eyes of the breeders of Aberdeen Angus cattle in America. The first notable bull used by these breeders was the great show bull, McHenry King 2d, a bull that stood at the head of Mr. W. A. McHenry's young herd, winning sweepstakes at the Omaha Exposition in 1898. After using this bull as long as was profitable, or until another bull was needed to use on his heifers, he was then sold to Mr. S. Van Winkle, of Vans Harbor, Mich., where he went to head his great herd. After this the Holbrook breeders purchased the Blackbird bull, Black Woodlawn, the international champion at Chicago in 1902, and conceded by many good judges to be the greatest living Aberdeen Angus bull. His get in the show yard this year and for several years have proven his worth and given him the right to claim this proud distinction, coupled with his great individual merit, which is undoubtedly second to no other Aberdeen Angus bull in America. This bull sired the great Glenfoil Rose, the many time champion heifer shown by Mr. E. T. Davis, of Iowa City. He also sired the first-prize bull calf at the International in 1903, Woodlawn Admiral. He was also the sire of many first-prize winners at the leading fairs of 1905 and 1906, and there will probably be as many, if not more, of this great bull's get shown at the prominent exhibits in 1907 than of any other living bull of the breed. This bull has had an able assistant in recent years in another Blackbird bull, Woodlawn Blackbird Lad, the very best son of the famous champion, Lord Woodlawn, the latter bull being included in the sale. The last named bull has been not only a prominent state fair winner, but also a winner at the International Exhibition, and has sired many prize winners. The good cattle listed for this sale are so very numerous as to make it utterly impossible to individualize on the offering, hence we must content ourselves to treat this matter in a general way, assuring our readers that they cannot possibly be disappointed in this offering of Aberdeen Angus cattle which will take place on the above named date. The new pavilion at Holbrook in which this sale will be held is the largest and best-constructed pavilion in the state. Its existence is due to the enterprise of these self-same breeders who are making this choice offering of doddies. The same enterprise that was exhibited in building this \$5,000 pavilion characterizes all of the doings in a business way, that permeate and influence the action of these reputable breeders in all their undertakings. All who attend this sale can be made comfortable, as the sale is held under roof, with comfortable, permanent seats for the visitors. Parties coming from either the north or south over the Milwaukee system should leave cars at Parnell, where free conveyance will be awaiting them to transport them to the sale pavilion. Parnell is on the Kansas City division of the C. & M. & St. P. Ry. between Ottumwa, Iowa, and Cedar Rapids, Iowa. Missouri and southern Iowa parties will find the location easy to reach by way of the Milwaukee railway, going diagonally across Iowa through Missouri; while parties from the east and west on the line of the C. R. I. & P. should change cars at South Amana, where the Rock Island crosses the C. & M. & St. P., and go south to Parnell, which is the third station from South Amana; while parties coming from the east or west on the Muscatine & Montezuma branch of the Rock Island road should change cars at Webster at the intersection of the Milwaukee and go north to the third station or Parnell. This sale will undoubtedly be the most attractive, as well as the most important, ever made in this part of the state, as it is the best lot of cattle, from every point of view, that has been offered in this vicinity. Each and every contributor to the sale is an upright and honorable gentleman, whose word goes without question. Parties attending this sale will find it convenient to leave Parnell in the evening and get to Cedar Rapids so as to attend the Baker & Smith sale the following day.

Wayne County Short-horn Breeders' Sale

At Corydon, Iowa, November 30, 1906, at 12:30 o'clock, will begin the first annual sale of the Wayne County Short-horn Breeders' Association. This organization is supported by thirty of the best farmers and breeders of Wayne county, and the number of cattle owned totals about 1,000. As this is the first sale, very careful preparations are being made for its success. The sale will be conducted in a comfortable sale barn and by good talent. Corydon is easily able to take care of visitors and is reached by two trains east and two trains west daily on the C. B. & Q. road and all trains on the Rock Island will be met at Allerton by hack. The officers in charge of this sale wish it understood that the offering is to be representative in every respect. All animals consigned have been carefully inspected and nothing but the best has been entered. No culls whatever will be included, but good, serviceable stock, all registered and guaranteed to be as represented. All stock has been reared under natural conditions, so that the farmer looking for foundation blood should have no hesitancy in attending and making purchases. There are some splendidly-bred animals some straight Scotch and Scotch-topped which should command the attention of the best breeders who desire some good, thrifty, vigorous additions to their herds. While the offering is mostly young stuff, there is a herd bull offered, Sanspareil King, and a few cows with calves at foot which should prove most profitable investments as they combine good milk and beef qualities. Those who have consigned stock are Messrs. J. E. Crosby, secretary; H. E. Miller; I. G. Davis; A. W. Bennett; Frank Showalter; Nelson King; Gedney & Son; Wes Snyder, all of Corydon; also Geo. Miskimmins, Cambria; E. W. Blakely, Russell; C. W. Montgomery, Promise City; C. H. Conklin, Allerton; W. E. Dotts, Russell; D. T. Harris, Mystic, and John Rutter, Sewal. In the forenoon of the same day Mr. D. T. Harris, a member of the association, will sell twenty-three head of Poland Chinas. The six boars will include the herd boar bred by Peter Mouw, Orange City, Iowa. Some of his get is in the sale. Some of the young boars and gilts are sired by Sunshine Tom out of Missouri Sunshine, first at Des Moines, 1900. Four brood sows bred by Messrs. Winn & Mastin are sired by Corrector, Perfect I Know, Lamplighter and Mischief Maker. This addition to the cattle sale should make the day an especially attractive one for stockmen. Catalogs may be obtained from Mr. J. E. Crosby, secretary, Corydon, Iowa. Come out and help to encourage the breeding of good stock and mention The Homestead when writing.

H. D. Parsons' and Andy Stewart's Annual Sale of Short-horns.

The announcement is made by the well-known breeders of Short-horn cattle, Messrs. H. D. Parsons and Andy Stewart, of Newton, Iowa, that on Tuesday, November 27th, at the sale pavilion in Newton, Iowa, they will sell from their well-known herd something like thirty-five head of Scotch cattle and thirty head of Scotch-topped. Mr. Parsons contributed from sixteen to twenty bulls, including ten or twelve Scotch bulls, and a very select lot of Scotch females. Mr. Stewart sells ten Scotch females and no bulls. This will be in all probability the largest offering of Scotch cattle that has ever been sold in this pavilion at one time. The name of Mr. H. D. Parsons is so well and favorably known by the Short-horn breeders throughout the middle West that it would seem that nothing need be said concerning one of his sales, other than the fact to mention the date on which his sale was to be held. There is no man in America breeding Short-horns that stands higher in the estimation of his fellow breeder than does Mr. H. D. Parsons. His word is regarded among breeders and hankers as absolutely good and equaling a government bond. So careful is Mr. Parsons of always being right that he would not for one moment affiliate in a sale with any other party (knowingly) whose word, character and standing was of less value than his own. This is the character of man that we find in Mr. Andy Stewart, who joined Mr. Parsons in this sale. Mr. Stewart has been reared under Mr. Parsons' gaze, so that he has confidence in his opin-

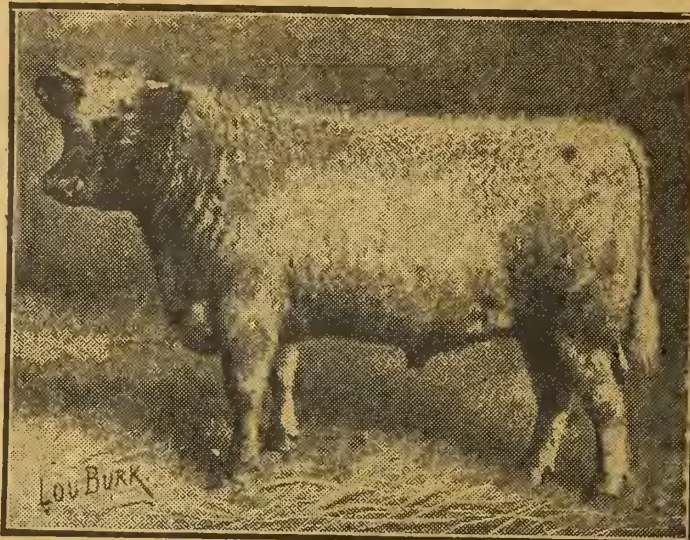

BIG SOUTHERN IOWA SALE OF

45
HEAD

SHORT-HORNS

45
HEAD

On Nov. 15, at E. C. Holland's farm, adjoining the town of Milton, Ia., will be sold 45 head of select Short-horn cattle from the well known herds of E. C. Holland, Dr. Guernsey, Sample & Sample, E. C. Holland contributes 24 head, Dr. Guernsey 15 and Sample & Sample 6 head, including their herd bull.

A goodly number of cows with calves at foot or well forward in calf are offered. Dr. Guernsey sells 9 beautiful 2-year-old heifers all bred. Sample & Sample sell 5 cows well forward in calf and 12 of the Holland consignment are all bred to the splendid Scotch bull Prince Charles 166137.

For particulars concerning this sale and for catalog application should be made to

E. C. HOLLAND, COL. R. W. BARCLAY, **MILTON, IOWA**
Auctioneer.

Aberdeen Angus Cattle.

65
HEAD

THE DONOHUE & CASH SALE

OF
65 Aberdeen Angus Cattle

Will be held at the sale pavilion in

HOLBROOK, IA., NOV. 13, 1906.

We will sell twenty Blackbirds, a number of Prides, Queen Mothers and Ericas. Twelve bulls will be listed including the champion show bull of 1906, Glenfoil Thickset 2d, first at Des Moines; first and junior champion, Kansas City. Fifty-three head of females, mostly bred to Black Woodlawn, or Woodlawn Blackbird Lad. Two of the best Angus bulls in America. Woodlawn Blackbird Lad is included in the sale. The consignors to this sale are P. J., Mike and M. H. Donohoe, William, John and Mike Cash, and Patrick Leahy. Cols. Woods and Igo, Auctioneers. Free conveyance from Parnell, Williamsburg and other surrounding railroad points. Mention this paper when writing. Address for catalogs,

lion that Mr. Stewart adds dignity and character even to a Parsons sale. A personal inspection of the offering of each of these gentlemen at once convinces us that the offering in every way is exceptionally attractive and will present an opportunity for breeders of the United States to secure found-

dation stock for new herds and some splendid additions to any well-established herds. Col. F. M. Woods and assistants are expected to part the ownership of some very worthy cattle on the above named date. Application for catalogs can be made to either of the above named parties at Newton.

Grand Dispersion Sale OF SCOTCH & SCOTCH-TOPPED

SHORT-HORNS

TO BE SOLD AT

DR. ANDERSON'S SALE BARN, SEWARD, NEB., SATURDAY, NOV. 24, 1906
**43 COWS &
HEIFERS
7--BULLS--7**

Twenty-six of these cows with calves by their side and most of them bred again to one of the three great Cruickshank bulls now at the head of this herd. This offering as a whole is considered to be one of the very best in the state this season and are worthy of the attention of the most discriminating buyers. They combine great beef and milking qualities that every breeder and farmer should be looking for. The bull offering is a very strong one in both breeding and individuality. Included in this sale will be the great Parsons-bred bull, Second Baron, sired by that noted sire, Baron Victor. Royal Aberdeen will also be sold and is no doubt one of the best yearlings that will be sold this year. Write for a catalog and mention The Homestead.

Last Call for the Prominent Sale of Short-horn Cattle to be Held at Mil- ton, Iowa, November 15th, 1906.

As per previous announcement, a very important sale of Short-horn cattle will be held on the farm of Hon. E. C. Holland, at Milton, Iowa, November 15th, the consignors being Hon. E. C. Holland, of Milton, Iowa; Dr. J. E. Guernsey, of Keosauqua, Iowa, and Messrs. E. B. & A. F. Sample, of Lebanon, Iowa. None of these gentlemen need an introduction to the Short-horn world at this time, because of the fact that they have all been permanently identified with the business for many years. Nevertheless, they are all modest gentlemen who have been content to breed good cattle and sell them at modest prices rather than make much stir or ado about their business. Mr. Holland, however, has been an exhibitor, successfully, too, at the Iowa State Fair and also at the International at Chicago, the greatest of all live stock exhibitions. At this writing, the complete catalog has not been received. Nevertheless, the writer knows something of the breeding of this offering and can say knowingly that some rarely good, useful cattle are being offered. One of the attractions of the sale will be the herd bull owned by Messrs. Sample. He is listed as Lot 1 of the sale catalog, and is Royal Knight 147132. This splendid red bull was calved November 12, 1898. He was bred by Andrew Alexander, of Morning Sun, Iowa. His sire was Plumed Knight, the best Scotch bull that was ever used in Eliza county. Plumed Knight is by Knight of Orleans, and he by Imp. Craven Knight, and out of Imp. Charity 3d was one of the best breeding cows ever brought to this country by the late William Miller, of Storm Lake. Plumed Knight's dam was Imp. Gwendoline by Baron Violet. Royal Knight has for his dam 2d Princess Royal of Cherry Grove, she by Imp. Spartan Hero, while her dam was Imp. Princess Royal 6th by Border Chief. Here is certainly an opportunity for someone to secure a great breeding bull, and as this bull is eight years old, it is altogether probable that he will be secured at a bargain-counter price. Mr. E. C. Holland is listing a few good Scotch bulls, such as Orange Count and Royal Fame, both Orange Blossoms and both are yearling bulls; one is sired by Golden Crown and the other by Secret Scotchman. Included in the offering are a few good Scotch females. Lot 2 is Flora. This is a roan cow, five years old, sired by Campbell of Maine Valley and out of Flora 3d of Orchard Farm. She is only three removes from Imp. Flora 89th by Elucationist. Imp. Flora 89th was a splendid red heifer bred by W. S. Marr and imported as a yearling in 1887 by Luther Adams, of Storm Lake, Iowa. She was purchased by Mr. C. S. Bartley, of West Liberty, who kept her during her entire life and probably produced from her the most valuable cattle ever sent out from his Orchard Farm herd. This is a valuable cow, and one that any breeder would be pleased to add to his herd. The females listed in this sale that are not Scotch are of the choicest American breeding, richly Scotch-topped. Each of the contributors to this sale has been using the very best Scotch bulls that money and good judgment could procure. As evidence of this, we refer briefly to the herd bulls used by Mr. Holland recently, aside from the Royal Knight bull at the head of Messrs. Sample's herd, that has previously been mentioned. Secret Scotchman 168030 is a bull used by Mr. Holland prior to securing his present herd bull, Prince Charles. Secret Scotchman was calved in 1900 and was sired by Starlight, his dam being one of Mr. Cruickshank's Secret tribe. In fact, his dam was the great cow Pearl-ette, a daughter of the Cruickshank bull Imp. Ducal Crown. Her dam, Perfection by Imp. Violet Emperor was also bred by Mr. Amos Cruickshank, while her dam was Imp. Splendor by Royal Victor, the two latter both being bred by Mr. Cruickshank. This great thick bull proved a success in Mr. Holland's herd, and was succeeded about a year ago by the beautiful dark roan bull Prince Charles 166137. Prince Charles is a six-year-old bull sired by Prince Louis, and bred by Mr. Charles Monroe, of Scotland. He was imported by Mr. W. D. Platt, of Canada, and was sired by Prince Charlie 144756. Prince Charles belongs to the celebrated Miss Stamford family, tracing to Imp. Stamford 5th by a bull also called Prince Louis, but bred by Mr. Cruickshank. This Stamford family are recognized throughout the United States as very useful cattle, some good show cattle having descended from this family, as has been proven by the Anoka exhibits by F. W. Harding. Messrs. Sample are selling five head of cows, all bred. Their offering is exceptionally desirable so far as age and usefulness is concerned. Dr. Guernsey is

selling fifteen head; nine head of the lot are exceptional two-year-old heifers and all of breeding age are bred to his herd bull. The catalogs are now ready for distribution and can be had by addressing Hon. E. C. Holland, at Milton, Iowa. Parties attending the all-Scotch sale of Messrs. Thompson & Smith, at West Liberty, Iowa, on November 14th, can leave West Liberty for Burlington at 7:47 the evening after the sale, stay all night in Burlington and leave at about 7:30 on the C. B. & K. C. train for Milton, thus affording a splendid opportunity to witness the sale of about 100 head of choice Short-horn cattle during the two days' series and at the expense, practically, of attending one sale.

The Saunders Short-horn Sale.

On Wednesday, December 19th, at the Greeley Stock Farm, near Manilla, Iowa, that well-known breeder of Short-horn cattle, Mr. Chas. A. Saunders, will sell seventy-one head of the best cattle that has ever been sold from his noted breeding establishment. This sale marks the tenth anniversary of his Short-horn career, and it has been one of the most brilliant and successful of any of our western breeders. With a modest beginning and limited capital he entered into the breeding of Short-horn cattle, and with himself as herdsman he has gradually risen until he is now looked upon by his fellow breeders as one of the best fitters and most competent showmen in our American show rings. He has taken special pains in the selection of cattle that go into his coming sale and when we say to Homestead readers that there will be thirty head of straight Scotch it can be inferred that there will be some great attractions in this offering. Among the females will be three or four imported cows and these have been selected because of their richness of pedigree and individual worth. No. 1 of catalog is Lady Fragrant, a daughter of Marengo's Count, and out of Lady Marengo, the dam of his great young bull, Consumer, that he will show at the International. The latter bull is a rich roan, is fourteen months of age and will weigh 1,500 pounds. Short-horns breeders always look for something good from the Greeley Stock Farm and they will see it again in Consumer. He is the thickest young bull for his age that will be seen at the International this year. His head and horn are ideal and his front is hard to beat. He has two excellent ends on him and his quarters reach down to the hock. He has a good spring of rib and is one of those sappy, easy-feeding bulls. Knight of the Greeley is another good young bull. He is a son of Red Knight 2d and is out of his noted cow, Gladious, also the dam of his well-known bull, King Champion. These two bulls are not offered for sale, but are reserved for show purposes later on. One of the good things that will be offered in the bull line is Lord Champion 2d. He is a son of King Champion and is out of Cherry Sweet Briar by Imp. Lord Banff. His second dam is by Imp. True Briton and his great-granddam is by King James, the sire of old Cumberland. He is a red in color and an excellent individual, and he will be the plum of the bull offering. Mr. Saunders has the distinction of having bred Cumberland's Last and won reserve championship and first on him in his class at the International last year. He will be there again this year with his great heifer, Independence Lady, and she will be one of the most likely propositions in that show. Again referring to his sale, we will say that his catalog will be the finest ever issued by a western breeder. It will be profusely illustrated from cover to cover and will be printed on super calender paper. It will be sent on application and those of our readers who want to be sure of getting one had better write for it at once. Kindly mention The Homestead when doing so.

Combination Sale of Good Short-horns.

A sale of good Short-horn cattle that should attract attention of good breeders far and near is that of Messrs. Saddler Bros., of Hastings, Neb., and C. W. Moore, Hastings, Nebraska, at Hastings, Neb. Hastings is on the main line of the B. & M., and is an easy point to reach from any way. We wish to say that in this sale will be a lot of dual purpose Short-horns that will be hard to equal. They have the breeding and, above all, are extra good individuals. In this sale will be a draft of young bulls that are very choice and should be sought for by leading breeders, and a man that could not be suited in this bunch would be a hard man to sell to. The cows are extra large, broad-backed individuals that show

First Annual Sale

**WAYNE COUNTY SHORT-HORN
BREEDERS ASSOCIATION**
15
Males
CORYDON, IOWA
FRI., NOVEMBER 30, 1906
Held in Sale Barn, 12:30 P. M.
45
Females

This is the Association's first sale. It is to represent the best animals out of thirteen herds. The committee in charge of sale have allowed nothing but the best to be cataloged. All stock will be presented in just good breeding condition. The bulls are a good lot and have been grown under natural conditions. They are mostly Scotch, topped, with a few straight Scotch. All bulls are under two years with the exception of one herd bull Sanspariel King. The cows and heifers are of good breeding and offer a variety of blood lines. Those old enough will be bred or have calf at foot. Many of the aged cows will have produce in the sale. Some have pronounced milking qualities. The heifers are the largest part of the female offering and have been kept growing from birth. They will make good material for a foundation. The following sires are represented by get in the sale: Choice Goods, Junior, Sanspariel King, Victor of Evergreen Park, Imperial Victor, and Scarlet Prince, and others. All animals are registered and guaranteed to be as represented. The committee will assure you of good treatment. In the forenoon twenty-three head of Poland Chinas will be sold by Mr. D. T. Harris, Centerville, Iowa. Their breeding is representative of the best blood lines. The catalog includes both sales and may be obtained by writing

J. E. CROSBY, CORYDON, IA.

Committee: J. E. Crosby, H. E. Miller, I. G. Davis.
Auctioneers: Cols. Geo. P. Bellows, John Fennel, Capt. Ben Wells.

CLOSING OUT SALE OF

SHORT-HORN CATTLE

AT DONIPHAN, NEB., MONDAY, NOV. 19, 1906.

26---HEAD---26

Including my herd bull, Golden Dale 246863, got by Parkdale Champion 172108. I am offering as good a lot of dual purpose cattle as will go through the sale ring this fall. Write for catalog and mention The Homestead.

JOHN BROWN,
**Col. T. C. Callahan,
Auctioneer.**
DONIPHAN, NEB.

great qualities, both as beef producers and milkers. Most of the older cows have calves at foot; some by Choice King, 241113 by Choice Goods O. K. 203905, he by the great Imp. Choice Goods 186802, conceded the greatest show and breeding bull in America,

being imported to this country at \$10,000 and recently sold to Mr. Howell Rees, of Piiger, Neb., at \$5,500. Catalogs now ready and can be had by dropping a card to any of these breeders. Arrange to attend this sale and get some of this breeding.

Last Call for the Baker & Smith Dispersion Sale of Aberdeen Angus Cattle.

As the time draws near when the famous herd of Aberdeen Angus cattle known as the Cloverland herd, owned by Messrs. Baker & Smith, at Mt. Vernon, Iowa, will be dispersed, we would be derelict of our duty did we not impress upon the minds of our readers that now is an opportune time to send for the catalog of this most prominent Aberdeen Angus dispersion sale. This sale is a very remarkable one in many respects. In the first place, six crops of calves have been dropped on the farm since the partnership of Messrs. Baker & Smith was formed, and there has been one calf each year for every breeding cow on the farm, and a surplus of two to go on. This is made possible by the fact that there have been two pairs of twins dropped. Another attraction in this sale is the fact that every animal in the herd has been thoroughly tested for tuberculosis. This is a feature that should not be lost sight of, as every breeder who desires seed or foundation stock wants it to be healthy. A word concerning the herd bulls used prior to the time of the introduction of the present herd bulls, Black Keillor 3d and Blackbird Man, whose pedigrees were analyzed in our review of this herd in The Homestead of November 1st. We refer now to the pioneer bulls, such as Captain Forbes, Heather Black Jim, Key of the West and Cloverland Pride. Key of the West was a son of Black King, and he by Black Monk, out of Blackcap 5th, while Key of the West, had for his dam the champion show cow, Key of Chicago, by Zaire 8th, and he, in turn, by Black Monk. Key of Chicago's dam was Kenwood, and she out of Key of Harris. Heather Black Jim was a choicebred Heather Bloom sired by Blackbird Jim, and he by Imp. Jim Jams. We had not intended to have made any individual mention of any of the famous Blackbird females, simply to have treated them in a general way, for the reason that to individualize on a part and not on the entire offering would be an injustice to those left without mention. So good and useful is the entire lot that this is the situation. However, there is one beautiful Blackbird cow that has made such a reputation for herself as a breeder that to pass up the Blackbird family without mentioning her would be like the play of Hamlet with Hamlet left out. We refer to Blackbird of Cloverland 2d, Lot 18 of the catalog. She is a daughter of Key of the West and out of Blackbird of Cloverland, she by Heather Black Jim; her dam, Blackbird 5th of Woodlawn by Moon Eclipsor, she out of Blackbird of Creston. This beautiful little cow is a typical doddie from every point of view. She is straight in her lines, low down and thick set. She has every mark of the ideal breeding cow; is a mass of beef, with the flesh evenly laid, notwithstanding this is one of the most rapid breeders at Cloverland. She is the dam of Black Beauty of Cloverland, winner as a calf of the third prize at the International. She is also the dam of Black Beauty of Cloverdale 3d; in fact, she has produced five heifers, every one a star. When such bulls as Key of the West, Moon Eclipsor, Heather Black Jim, Blackbird Jim, Ermine Bearer, Jim Jams, Black Knight, Blackbird King, Black Monk, Abbottsford, Paris and Rugby appear in her pedigree, with Knight of St. Patrick thrown in several times, is it any wonder that she is a great one? More than a half sister to this cow is Blackbird of Cloverland 4th, also a daughter of Key of the West. She has three heifers in the sale and is one of the richest of the rich-bred Blackbirds in the offer. We shall not attempt to mention more of the females, but would direct special attention to the beautiful Blackbird bull calf, Black Banner Bearer, Lot 33 of the catalog. He is sired by Blackbird Man and out of Blackbird of Cloverland 9th. Mr. Matt Baker says of this calf that when he first stood on his feet, he looked like a model matured Angus, and that he has changed but little since. He is the first calf on the farm by Blackbird Man, and is out of a daughter of Black Keillor 3d, which demonstrates that when Mr. Baker selected this bull to use on the daughters of Black Keillor 3d, that he made no mistake. In Black Banner Bearer we find a line-bred Blackbird, with all four branches of the Blackbird family represented. His sire is a Blackcap-topped Blackbird of Corskie 2d, while his dam represents Blackbird of Corskie 3d through the sire, and Blackbird of Corskie 4th through the dam. Many of the most noted champion bulls of the breed are represented in this young bull's pedigree, such as Heather Blackbird, Heather Lad 4th, Gay Lad, Young Wellington, Blackcap King, Blackbird Jim, Black Knight, Knight of St. Patrick and Black Monk. Could richer breeding with more aristocratic prize-winning ancestry be found? We would not attempt to portray a richer Blackbird pedigree, or at least a pedigree containing more noted sires than can be found in the tabulation of Black Banner Bearer's breeding. A splendid eighteen-months-old bull will be found in Lot 32, Bobby Burns of Cloverland. His sire was Black Hero of Cloverland; his dam was Black Beauty of Cloverland by Black Keillor 3d. Bobby Burns has four grand parents that are each of the Blackbird family. His sire is a double Blackbird, while his dam is an International prize winner. This bull is the making of a very smooth and desirable animal; with the breeding back of him he should certainly make a great sire. A splendid young Blackbird bull is Lot 34, Burbon Boy. He is not a Kentucky-bred bull, as his name, Bourbon, might imply, but was bred at Cloverland and was sired by Black Keillor 3d. His dam was Blackbird of Cloverland 5th, previously described and mentioned. Mr. Baker contends that this bull, with deep body, straight lines and good back is a better prospect for a herd bull than was his illustrious sire at the same age. Be this as it may, he is good enough to command recognition of thoughtful breeders, and should find a place at the head of some good herd. Richer breeding in Blackbird lines cannot be found. He is of splendid disposition and is a full brother to Black Banner 2d. We shall not attempt to mention other individual animals in the offering. It is superfluous to do so; in fact, little need be said about such an

offering as this, other than to state the fact that of the forty-eight head listed in the sale which includes everything owned by Messrs. Baker & Smith, that thirty-five of the offering are Blackbirds, all as richly bred; in fact of the same dentical lines of breeding as the few of which we have made mention. We can only urge upon Homestead readers the importance of attending this sale, and of the immediate action in applying for one of the sale catalogs and studying the tabulated pedigrees on the rich lot of Aberdeen Angus breeding from a Blackbird standpoint, that has ever been offered to the public on either side of the water. It will certainly be an easy matter for Colonels Bellows and Igo to find plenty of interesting data on which to talk in selling this very desirable lot of cattle. All parties attending the William Cash sale of Aberdeen Angus cattle at Williamsburg on November 13th can come to Cedar Rapids the evening after the sale and be in position to catch a morning or forenoon train on the main line of the C. & N. W. to Mt. Vernon, which is only about thirteen miles east of Cedar Rapids.

Last Call for the All-Scotch Short-horn Sale.

The above heading may seem a little strange to many of our readers, for it has been a long time since anyone was able to truthfully put such a heading to their announcement of a Short-horn cattle sale. Messrs. Thompson's Sons, of Iowa City, and William M. Smith & Sons, of West Branch, Iowa, have decided to sell about forty-five head of all-Scotch Short-horn cattle at the West Liberty Fair Grounds in the new heated pavilion on November 14th. There will be a goodly number of young bulls; in fact, there are thirteen Scotch bulls, and all Scotch, including Messrs. Smith's herd bull, Scotch Ringmaster, mentioned at some length in last week's paper. There will be thirty females, all told—all Scotch, as before stated, of the following families: Mysie, Alexandrina, Rosemary, Miss Ramsden, Lovely, Lavender, Princess Royal, and Aurora. These families, and these only, comprise the offering. There, perhaps, has not been in many years such an offering of all Scotch cattle. Messrs. William Smith & Sons sell exclusively of the one family, the Scotch Rosemarys. So uniform are these cattle that it would be nonsense to attempt any individual description. They are of the choicest breeding, all descending from the one cow purchased by Messrs. Smith of Mr. S. H. Thompson, Sr. several years ago, and from this one cow have been propagated the entire Smith herd. It has been demonstrated by practical experience that seventy-one head of cattle can be produced from one female and her produce in ten years, providing heifer calves are born half of the time and they are bred at two years of age. Messrs. Smith have sold a goodly number of bulls from their herd and now present eighteen Rosemarys, all descending from Rosy Gem 4th. This has not only been a profitable family to them, but a very prolific one. Messrs. Thompson's Sons make the principal offering of bulls and are offering some herd material in as rich lines of Scotch breeding as can be found in the American Short-horn herd books. The elder Thompson in founding the Pleasant View herd was very careful to select cattle of the highest quality individually, as well as those whose pedigrees were richest in the blood of the famous old Sittytton herd as founded and maintained by Mr. Amos Cruickshank himself. Mr. Thompson, Sr., was also very tenacious of the red color, and the herd is pre-eminently a red one. This is also true of Messrs. Smith's herd, from the fact that it was founded by the purchase of this Rosemary cow above referred to from the Pleasant View herd. In addition to that, up to the present herd bull, Scotch Ringmaster, which was bred by the Cooksons, all the other bulls used by Messrs. Smith were Thompson bulls, and as the entire Thompson herd was originally founded on purchases from the Cookson herd, it will be readily seen that the offering is practically one and the same thing in breeding throughout its entirety. A careful perusal of page 40, where some sample pedigrees are shown will reveal the lines of breeding that we have previously described. We can say little more at this time of interest to Short-horn breeders other than to remind them of the fact that there will probably be no such opportunity offered in the near future where foundation stock of such high Scotch character can be purchased as at this coming sale. Any young breeder who is a careful and judicious feeder can buy one or more of these Scotch females and in a very few years duplicate the grand showing made by Messrs. Smith & Sons on the purchase of a single Scotch cow, the record of which has been previously enumerated. The catalogs can be had at this writing from either Messrs. S. H. Thompson's Sons, of Iowa City, Iowa, or Mr. William M. Smith & Sons, of West Branch, Iowa, by mentioning The Homestead when writing.

• Hamilton Has Good Ones.

In looking over this herd of Polands we find that Mr. Hamilton has some males to offer the trade this fall that are right in every respect. At the head of this herd we find the grand old boar, Moss Chief 19503, a hog of fourteen years of age, and as active as most hogs at the age of four. He is a son of old Chief Tecumseh 2d, and is believed to be the only living son of this grand old sire. He is assisted by Grand Chief Tecumseh 3d by old Chief Tecumseh 3d. This hog has proven a good breeder and a great benefit to this herd. At this time Mr. Hamilton has about 100 pigs by these two sires and some that ought to go to good herds. There are two litters here by Impudence, 97557, he by Keep On 61015. This hog was a winner of first and sweepstakes at the Iowa State Fair in 1905 and any man should feel proud to own a litter sired by him. Among the good sows of this herd is Nellie Wilkes by Presser's Choice, he by Foster's Chief Perfection. This sow is a fine individual and has proven a good producer. Her sire is a half brother to Perfection E. L. This herd is rich in the blood of the most noted strains of the breed, and anyone looking for a male pig may do well by writing Mr. Hamilton.

HARLAN, IOWA, TUESDAY, NOV. 13, 1906.

A Choice Lot of Scotch and Scotch Topped Cattle From the Herds of

J. C. NYRUP, J. A. O'BRECHT, H. W. LITTLETON, J. G. WESTROPE, G. H. MILLER, OLE OLSON, V. L. DAYTON, AUG. SONNELAND, W. F. KILPATRICK, G. E. MILLER, C. W. DAWS & SON, R. C. RASMUSSEN.

30 Cows and Heifers and 15 Bulls

The cattle that go into this sale have all been inspected by a committee selected to pass upon them and nothing but the very best was allowed to be cataloged. There are some particularly high class herd bulls in the offering, some of which are straight Scotch. The cows and heifers are also a very high class lot of the beefy, early maturing, and well bred lot of cattle and many of these will have calf at foot. When writing for catalog, address

C. W. DAWS, MGR., - HARLAN, IA.

Col. Geo. P. Bellows, Auctioneer.

NOTICE

Having concluded to make a change in placing Stallions before the Public account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stud from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars. The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stud, where we have over 300 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered. Send for catalog.

TAYLOR & JONES,

WILLIAMSVILLE, ILLINOIS,
IMPORTERS AND BREEDERS OF
**PERCHERON, SHIRE
AND BELGIAN STALLIONS.**

**WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND
SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN
ANY OTHER FIRM IN AMERICA.**

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DU HAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

LAKEWOOD FARM

**LAKEWOOD FARM PERCHERONS MADE A
RECORD NEVER BEFORE EQUALED IN AMERICA.**

At Minnesota

We won championship stallion, championship on mare, and the grand sweepstakes prize open to all draft breeds on stallions showing four of his get, and grand sweepstakes on mare showing two of her produce. In addition we won the Percheron Society of America gold medals for champion stallion, champion mare, champion 3 mares and champion display of 5 American-bred Percherons.

**At Iowa**

We won sweepstakes on stallion and his get; grand display bred by exhibitor; Percheron Society of America Special for champion stallion any age; champion mare and champion group of 5 American-bred Percherons.

In addition to the foregoing specially mentioned prizes the Lakewood Stud won twenty-two other class and special premiums at these two greatest state fairs ever held—more prizes than fell to the lot of all other Percheron exhibitors combined.

230 PERCHERONS ON HAND; 100 STALLIONS, many of them show horses. Special prices during the fall months. Every stallion fully guaranteed. Send for new handsomely illustrated catalog.

Trumans' Pioneer Stud Farm, BUSHNELL, ILL.

**S. J. MILLER, KIRKSVILLE, MO.**

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

My importation this year was composed of young stallions and mares that attracted the attention of all importers and lovers of fine horses. Prize winners in Paris are among the Percherons. Two coachers, one a two-time winner, are also in my barns. I have two-year-olds that weigh right at 1,900 pounds. No better strains are found in France. All are young, black, dark grays and bays. They are quartered at my barns at Kirksville, Mo., where I would be pleased to show them. If you need a stallion this year I am better prepared than ever before to sell you something extra and at a price that will save you money. By making my own selections in France, selling them myself and at the barn door enables me to do this. I can also sell you some fine mares. To the man wanting an absolutely first-class jack I will say that I have him well marked and big. Come to my barns and let me show you. I will treat you right every way. I can also sell you smooth-coated Fox Terriers, the rats' enemy. Priced at \$3 to \$7.50 each.

Kirksville is on the Wabash and Burlington railroads.

SHORT-HORN

I CATTLE I

ON WEDNESDAY, NOV. 14TH

59 Head of Short-horn Cattle 59

Will be offered for sale by J. & I. J. Godden, Fairlawn Farm, Bradgate, Ia. At our fourth sale we will sell 48 cows, heifers and calves—11 bulls.

THE females are of the good reliable kind, Duchess of Gloster Orange Blossom, Duchess 10, Sanspareils and good American families. It will consist mostly of young cows two, three and four years old. All shy and doubtful breeders have been sent to market and we are keeping the old cattle on the farm. It is an offering of well bred and good individuals. The cows are bred to Prince Malcolm 201060 by Malcolm 171375, bred by C. E. Gerlaugh. Ohio Malcolm is out of Imp. Missie May of the celebrated Missie Family. There will be eleven cows with calf at foot. The bulls are a smooth, even lot with color, breeding and quality from nine to eighteen months old from good milking cattle. Your presence is kindly invited if you wish to buy or not. Lunch at noon. Parties from a distance will stay at the hotel as our guests. A postal card will bring you a catalog. Send for and arrange to be with us. Bradgate is on the Eagle Grove and Hawarden branch of the C. & N. W. Railway. Bids can be sent to the auctioneer and will be well protected.

J. & I. J. GODDEN, BRADGATE, IA.

A. P. Mason, Auctioneer—R. J. Johnson, Clerk.

DISPERSION SALE OF THE CLOVERLAND HERD

OF

Aberdeen

ANGUS CATTLE

WEDNESDAY, NOVEMBER 14, 1906.

On November 14th, in order to dissolve the partnership existing between Baker & Smith, the entire herd of Cloverland doddies will be sold at auction. The most remarkable offering of Aberdeen Angus Cattle ever placed before American breeders. Forty-eight head of first-class, highly-bred doddies of the market-topping sort. Thirty-five head of the world's most famous family, the BLACKBIRDS. No such an aggregation of the famous Blackbird family has ever yet been offered on either side the water. The two Blackbird herd bulls, Black Keillor 3d 41587 and Blackbird Man 72244.

Nine bulls are included in the sale, the remainder all being females. Show yard material as well as great foundation stock will here be found in abundance. Auctioneers, Cols. Silas Igo and Geo. P. Bellows, with assistants. Mt. Vernon, the place at which the sale will be held, is thirteen miles east of Cedar Rapids on the main line of the C. & N. W. Ry. Attention is called to the choice offering of Angus cattle by Wm. Cash and others at Holbrook, Iowa, on November 13th. Parties can attend both sales.

For Catalogs, address

MATT BAKER,

ALL SCOTCH Short-horn Sale

THE only sale of absolutely all Scotch Short-horn cattle to be held this fall will be the sale of S. H. Thompson's Sons and W. M. Smith at West Liberty, Ia., Nov. 14th. S. H. Thompson's Sons sell 27 head; W. M. Smith & Sons, 18 head, the Smith contingent being a dispersion, all of the Scotch Rosemary family. Thompson sells 17 females, all but three with calves at foot, or are bred, ranging from one to five years of age—all but one bred by themselves. Ten Scotch bulls are listed, of the Lavender, Alexandrina, Lovely, Mysie, Princess Royal, Duchess of Gloster and Rosemarys. Wm. Smith & Sons sell their herd bull, Ringmaster, a son of Young Commodore. Fifteen of the 18 contributed by Smith & Sons are females. Some show yard material, as well as some great breeding stock is listed. Sale will be held at West Liberty in the heated pavilion.

Lot 31. Scotch Ringmaster 245069
Red; calved March 20, 1904; bred by Cookson Bros., West Branch, Iowa; owned by William M. Smith.

VOL. LI. NO. 46.

DES MOINES, IOWA, NOVEMBER 15, 1906.

WHOLE NO. 2574

VALUE OF INTERURBAN RAILWAYS.

The corn belt has not been hasty in establishing interurban electric lines. However, there is not a state in this area into which this new method of transportation has not been introduced, and we predict that during the next five years there will be the largest interurban railway development in the central West that has ever taken place in this country. We base this belief on the fact that these roads wherever they are established have become exceedingly popular.

Every man in the corn belt is directly or indirectly interested in this modern railway. They are beginning to branch out from populated centers in such a way as to very materially affect the value of land in the townships through which they pass, and in the very near future it would not be surprising if no point in the corn belt were more than a very few miles from an interurban electric line.

It has been demonstrated beyond doubt that interurban railways do not injure small towns, but on the other hand the experience is that their introduction means increase in population, increase in business and certainly greater comfort to the residents of such towns. True it is that these roads change the character of the business that is transacted in towns through which they pass, but where a people instead of fighting the system adjust themselves to the new order of things it only means growth. The records up to date indicate that the interurbans not only increase the population of the towns adjacent to largely populated centers, but that the townships through which they pass are affected in the same manner.

It goes without saying that the establishment of interurbans increases the price or value of agricultural land. Land ordinarily doubles in value in five years after the establishment of an electric line. This is due to the fact that such land is more desirable for farming purposes. It means, of course, that old-fashioned methods can no longer be employed in farming land worth \$100, \$150 and \$200 per acre. Improved crops must be grown on such land, and likewise improved live stock. One can no longer keep a cow that will only make 200 pounds of butter a year or raise a steer that weighs 500 pounds at twelve months of age. It means the application of scientific principles to practical agriculture, or, on the other hand, dispose of the land and let the next man try it.

But the greatest effect of interurbans on rural communities is to increase the attractiveness of the farm. When churches, theaters, lecture halls, etc., are easily accessible to rural people life on the farm becomes to many a different proposition. Isolation because of poor roads or poor transportation facilities generally spells in too many instances monotony, which results in discontent and finally in the boys and girls leaving the farm. Those without practical experience along this line might think that the opposite would be true, namely, that the electric lines would tend to make the city more popular in the esteem of country boys and girls, but this is not true. All the advantages of the city are easily obtainable where these lines are established and yet along with this there is the independence of farm life.

Interurbans to some extent solve the help problem in rural districts. Men will much more readily leave the populated centers for rural districts on these

lines than they do over the wagon road. This has been proven beyond any question of doubt. It is as true when applied to help inside the house as it is when applied to help outside. This means an improved situation generally, because there will be fewer idlers in the city because the work and the man will be brought together.

On general principles, therefore, we have no hesitation in advising all of our readers to do everything that is reasonably possible to encourage the establishment of electric lines. We have known men to fight these lines just as if they were undesirable innovations, but it would be just as sensible to fight the introduction of the telephone, new farm machinery or anything else that is modern.

MOLASSES FOR FATTENING STEERS.

Sugar-refining companies in Texas are selling molasses at six cents per gallon. The cost of barrels and filling adds three and a half cents per gallon to this price. The cost to consumers depends somewhat on the amount of freight that is added to this valuation. At these prices the question arises as to the value of molasses for feeding purposes.

The Texas station has recently conducted experiments testing the value of black strap molasses in the feeding of steers. The conclusions arrived at by the authors of the bulletin in which the report of these steers is made are as follows:

1. In our experiments the addition of molasses to a fattening ration has always produced an increased gain.
2. Addition of molasses to a ration of cottonseed meal and hulls lowered the cost of gain.
3. When molasses was added to a balanced ration it gave larger gains and improved the appearance of the cattle, but did not lower the cost of gain.
4. There was no undesirable result from feeding yearling steers one gallon of molasses each per day, and there is good reason to believe that larger amounts might be used.

5. Molasses returned from three to thirty cents per gallon. The lower value was obtained when molasses was added to a ration already balanced, and when in the early part of the feeding period an unbalanced ration was fed the higher value was obtained.

A full report of the feeding operations involved in this experiment is made in Bulletin 86. It may be obtained upon application to the Director of Experiment Station, College Station, Texas.

MACHINE OR HAND POWER.

Mr. J. C. Bott, of Jasper county, Iowa, sends the following communication:

I have been much interested in what has been said in your columns regarding the use of the corn binder, or harvester as it is generally called. I own one of these machines, but I sometimes doubt if it pays to use one. You can get corn cut at ten cents a shock, which makes about \$1.70 or \$1.80 per acre. They sometimes get as high as \$1.75 per acre here for cutting with the binder, but supposing we figure it at \$1.25. In addition to the twine required for an acre, which amounts to twenty-five cents, this makes a total of at least \$1.60. It has still to be set up, and the average man will not set up more than forty or fifty shocks a day. At \$1.25 per day for a man this would amount to forty cents per acre. You have then the entire field to go over because the machine knocks off a good deal of corn. At the prices I have mentioned it will cost from \$1.70 to \$1.80 per acre to cut and shock it by hand, while with the binder the total cost would be at least \$2.10 per acre and you have yet the corn to pick up.

We think the cost of cutting with the binder is placed altogether too high in this instance. If a man owns a binder he will be able to cut all the way from eight to twelve acres a day, using four horses. Good wages for this outfit would not amount to more than \$4 a day. If ten acres were cut it would total up to forty cents an acre, together with the twine amounting to sixty-five cents per acre. Of course one has his investment in the binder, but allowing 10 per cent for interest and wear and tear the cost

is still a good deal lower than hand work, especially so if any considerable acreage is to be put in shock.

The most important factor has not been touched on by this subscriber. We refer to the question of labor. In many communities it is almost absolutely impossible to find men who will cut corn by hand. On a quarter section of land where the owner and one hired man perform all the labor, it would be almost impossible to find the time to cut and shock twenty or thirty acres by hand. By the use of the binder two men could easily put in shock thirty acres in one week of fine weather. Half this acreage would hold the average owner and the average hired man for one week if the fodder were put up by hand.

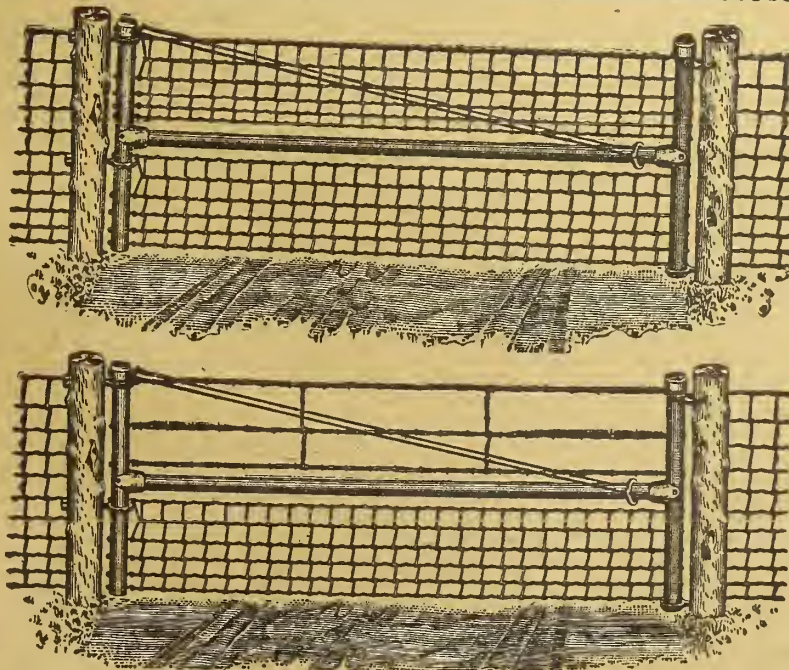

Even though the cost were the same in each instance, that is, hand cutting and machine cutting, we would still advocate the use of the machine for the reasons mentioned above, namely, that it enables you to get the work done; whereas if you depend upon hand labor weather conditions may be such as to delay matters and thereby run into the feeding period and get your fodder nipped. The man who has but a small acreage can no doubt put up his corn fodder more economically by hand, but under average conditions where as much as twenty, thirty or forty acres are put in shock the corn harvester is the thing. Of course the season for cutting fodder is past this year, but as this subscriber brings up the subject we consider the topic seasonable.

GENERAL MANAGER SKINNER RESIGNS.

Among men who have to do with the management of expositions there are few better-known individuals than Mr. W. E. Skinner, general manager of the International Live Stock Exposition of Chicago. Since the establishment of this exposition Mr. Skinner has presided over the destinies of this great show, and to a large measure the success which has come to the International is due to his ability.

Recently word comes to us to the effect that Mr. Skinner has been obliged to tender his resignation to Pres. J. A. Spoor, of the International, on account of the health of his wife and daughter. Mr. Skinner has been offered a responsible position as assistant to the president of the stock yards in Denver, and as that climate has been recommended for Mrs. Skinner, the position has been accepted.

The resignation of Mr. Skinner does not take effect until January 1st, so that the 1906 International will in no way be affected by his resignation. Already an appointment has been made in Mr. Skinner's place, and one that is in our opinion exceedingly fitting. He is succeeded in office by Mr. Bernard Heide, a gentleman who has always been closely identified with the International. Mr. Heide, or "Barney," as he is better known by stockmen, has always been a favorite among exhibitors of pure-bred stock and we feel safe in saying that the news of his appointment will come as a glad tidings to men who exhibit at the International. Mr. Skinner's splendid ability will be missed in the future, but the members of the International Live Stock Exposition are fortunate indeed to be able to find one so familiar with the work, so competent to originate new plans, and one so thoroughly able to bear all the responsibilities placed on him by the directors of this great exposition.

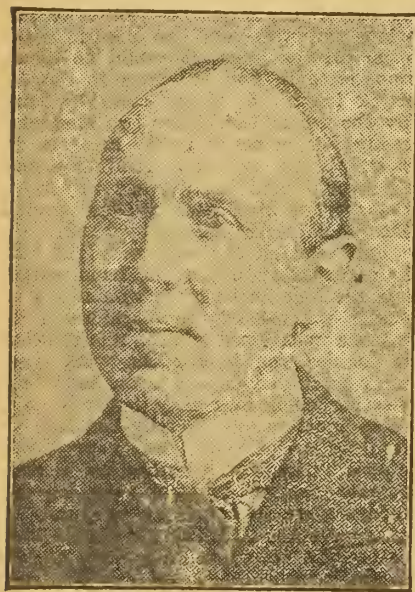

These are gates made by the Iowa Gate Company, of Cedar Falls, Iowa. There are fifty thousand of them in use and every man who has ever used an "Iowa" gate praises it profusely. They have been found to be not only strong and durable, but light and easy to handle, as they are made from a special high carbon steel tubing. One of the twelve-foot gates can be swung with several men hanging on it. It will swing either way and will raise over uneven or sloping ground. In the winter the entire gate can be raised over any snow. A gate like this gives a farm a fine appearance, in addition to its superiority over common gates. Write for catalog to the Iowa Gate Company, Ninth St., Cedar Falls, Iowa, and mention this paper when you write.

KANSAS STATE DIRECTOR.

Dr. C. W. Burkett, recently elected director of the Kansas Experiment Station, comes to Kansas from Ohio, but he has had a varied and valuable experience. He is a native of Ohio and was educated in the public schools and the state university and agricultural college of that state. After graduation he remained there for four years as instructor in agriculture, when he was called to New Hampshire as professor of agriculture and agriculturist of the Experiment Station. When he went there he found two students electing to take agriculture, no equipment and no special buildings. At the end of three years, he left a fine agricultural building in course of construction with sixty-five students choosing the agricultural course.

When Mr. Aycock was elected governor of North Carolina he declared that that State Agricultural College must make agriculture the leading feature. The trustees of the agricultural college selected Dr. Burkett to organize the work in North Carolina. He found there no special equipment and eleven students electing agriculture. At the end of five years he left nearly 200 regular students in the agricultural course and a \$140,000 agricultural building—one of the finest in the United States.

These signs of work done indicate that Dr. Burkett will be a valuable addition

DR. C. W. BURKETT.

to the force of unselfish workers at the Kansas Agricultural College, who have served the state in college and institutes. But he has done much public work which proves that he is the kind of a man needed. While in New Hampshire he did considerable work in farmers' institutes and public meetings but in North Carolina he was a missionary to farmers and to their children. He was closely associated with the state board of agriculture in organizing farmers' institutes in all parts of the state, holding district and state conventions of farmers, holding for the last three years at the college in July a big convention with a thousand farmers who came and stayed a week; a two hours' walk over the farm each morning from six to eight and the lectures from ten to twelve; from one to three and from three to five on cotton, corn, tobacco, dairying, horticulture, stock raising, etc.

In addition to this work he was associated with the state superintendent of schools for educating the children in agriculture. To this end a law was passed requiring agriculture to be taught in the rural schools and the teachers had to be trained.

District institutes and state meetings of teachers were held, enrolling more than 3,000 teachers each year where instruction was offered in the elements of agriculture. This was kept up until now agriculture is required by law to be taught in the rural schools of North Carolina, a subject that the average country teacher can teach better than she can teach grammar or physiology. Last winter the regents of the Ohio State University called Dr. Burkett back to Ohio to become the director of the short courses in agriculture, and other forms of extension work. He went to Ohio in May, 1906, and inaugurated a system of lectures on agriculture before the school teachers of the state. When the Kansas Board of Regents offered him the position here of director

of experiment stations, the offer proved so inviting that he asked the Ohio University to release him. He is now in Manhattan with his family and hard at work. He will be assigned this year to considerable institute work where the farmers may meet him and it is also hoped that more than a thousand farmers, young and old, may meet him in Manhattan this winter at the state institute, December 27th to January 5th. In addition to several bulletins on agricultural subjects, Dr. Burkett is the author of "Agriculture for Beginners," a text book, and a book on "Cotton" and a joint author with Professor Hill of a new series of school readers, a series that are full of the breath of country life.

A SHORT ROUTE FOR FARM PRODUCE CONSUMER.

This is a day of close connection between the producer and consumer. In every line of business the middleman is being eliminated. A large amount of the goods now used by the farmer is being purchased direct from the factory. This practice has made him money. So much for the changed methods of buying on the farm.

But the farmer still sells in the old way in too many instances. He still supports a large class of middlemen who year after year demand more commission. This may be justifiable in many cases, as there is much perishable goods to be handled, consequently some loss. Large stock growers are independent of the local buyer. Not so with farmers doing business on a smaller scale. A great amount of his produce he can market to a decided advantage at the doors of the city resident. Ordinarily butter, eggs and garden produce are sold at the stores. Often the market is glutted. Often you get no more for good eggs than some one else does for stale ones. It is not the fault of the merchant so much, for grades of quality for farm produce are not very well defined in country stores.

If farmers only knew how glad city and town people are to get fresh farm produce, that can be depended on to be fresh, farmer folk would realize much more for the result of their labors. We know some farms where this plan of marketing direct has been tried and discontinued. But where such has been the case, the trouble was that the farmer or his wife overdid the thing. They tried to sell everything in this way. One case we know of is that of a woman who attempted to do baking besides selling a lot of butter, eggs and fruit in season. It required too much work and sales were not nearly so sure as where a specialty was made of one or several things, which could be prepared for market with sufficient time to insure the quality of the goods always being uniform and standard.

We know of farmers who make a specialty of just one thing. Butter in neat packages from one to five pounds in weight is always salable, and once the demand for a first-class article is established, a first-class price can be secured. Another farmer we recall has a big trade in home-made hominy. He sells bushels in only a fair sized town. The marketing does not demand such regularity as, for example, dairy foods, and is rather enjoyable as well as highly remunerative. The hominy is sold in paper-board boxes similar to those which are used for oysters.

Many people are prejudiced against poultry as it is slaughtered in the large killeries. The demand for this kind of meats will soon be at its height. Those who can fatten poultry properly and put it on the market in prime condition could soon build up an immense trade. This same principle applies in other cases. Home-cured ham and bacon are not difficult to make and market. Once your farm becomes noted for such goods, the supply will always be short.

Some farmers have quit the plan of selling direct because city people, like all others, want to buy at the lowest possible price. This is only true of human nature. Name a price that is in keeping with the quality and reputation of your produce and treat all alike and there will be no trouble about price.

To establish a successful trade selling direct, and to make a reputation for your goods, the following suggestions must be put in practice. Make a specialty of one or two articles. Select those not in abundance on the local market if possible. Market produce in a neat and

original manner, different from that which is ordinarily seen at the stores. Establish a reputation and individuality for your goods. Always maintain the quality and treat all customers alike, and your goods will soon be in high demand.

MEETING AT INTERNATIONAL DECEMBER 1ST TO 8TH.

In addition to the practical demonstrations of the breeders' and feeders' art in cattle, horses, swine and sheep on exhibition in single groups and carload displays, we are to have this year meetings of breed associations where the foremost breeders and feeders of our day are to discuss their work. Papers of practical value to the agriculturist and live stock men of America, on subjects of immediate interest that now confront our people, will be read and discussed.

On Monday night, December 3d, the annual meeting of the International Exposition Association is to be held.

On Tuesday night, the following breed associations meet:

Percheron Society of America.
American Shire Horse Association.
American Cotswold Sheep Society.
American Oxford Down Association.
American Suffolk Flock Registry.
American Clydesdale Horse Association.
American Southdown Breeders' Association.

On Wednesday evening:

The American Short-horn Breeders' Association;
The American Aberdeen Angus Association;
The American Galloway Breeders' Association;

The American Berkshire Association, and
The Hampshire Down Breeders' Association, will hold their annual meetings.

On Thursday afternoon the American Red Polled Cattle Club meets, and in the evening The American Poland China Breeders' Association, and the Yorkshire Swine Association meet.

The hour, room and other particulars concerning each of these meetings will be posted on the bulletin boards of the show grounds during the week. Every one interested in live stock of any kind should make an effort to attend these meetings.

FATTENING PIGS ON CORN AND TANKAGE.

Bulletin 94 of the Nebraska Experiment Station gives a discussion of the feeding of tankage and ground bone to hogs.

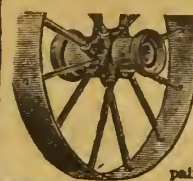

Tankage is a concentrated protein meal made from scraps of meat trimmed from beef carcasses in the packing house. When dried and ground it looks very much like dark-colored wheat shorts and is shipped in hundred pound sacks to the trade. Tankage is being quite commonly fed by progressive breeders and feeders of hogs in the state. It is specially used where breeders wish to get rapid growth on pure-bred hogs or where feeders wish to get large and quick gains, putting their hogs on the market early.

One hundred and nine pigs were used in the four experiments conducted.

In these experiments the cost has always been lessened by the use of 5 per cent tankage along with corn, or five pounds of tankage for each ninety-five pounds of corn. This would be equivalent to 280 pounds of tankage for each 100 bushels of corn fed. In Experiment III the cost of the gains was lessened sixty-eight cents per hundred by the addition of 5 per cent tankage, while in Experiment II the tankage lessened the cost of gains only sixteen cents per 100 pounds, but made corn pay out twenty cents per bushel more than where fed without tankage. In Experiment I tankage lessened the cost twenty-one cents per 100 pounds. The hogs in Experiment I were in a dry lot. In Experiment II they were on alfalfa pasture. In Experiment III they were also on pasture.

It will be noted in this bulletin that while 5 per cent tankage added to the corn proved very profitable, the feeding of 10 per cent tankage was not so profitable; in fact, in some of these experiments the gains so made cost more than where corn was fed without tankage. A notable advantage in feeding tankage is seen in the more rapid gains made by the hogs and the consequent shortening of the fattening period. In all experiments where tankage was fed, the hogs consumed more feed, made larger gains, and were not easily put off their feed, while the hogs fed upon straight shelled corn consumed less feed and were more easily thrown off feed after the first six weeks of fattening. This bulletin indicates that it is profitable to feed tankage along with corn to breeding or fattening pigs.

Experiment IV of this bulletin is a test of the breaking strength of the

STEEL WHEELS

with wide tires double the usefulness of the farm wagon. We furnish them any size to fit any axle. Cheaper than repairing old wheels. Catalogue free.

EMPIRE MFG. CO., Box 103A, Quincy, Ill.

bones of the leg in pigs which had been fed upon corn alone, corn with 25 per cent shorts, corn with 10 per cent tankage, and corn with 10 per cent ground bone. The tests indicated that both the ground bone and the tankage very greatly increased the breaking strength of the bone in the animal so fed, and indicated that the feeding of either tankage or ground bone or a combination of the two to young breeding animals would tend to strengthen the bones in these animals and give them more perfect feet and legs.

HOW J. O. ARMOUR'S \$5,000 SCHOLARSHIP WILL BE AWARDED.

The board of directors of the International Live Stock Exposition, in their annual meeting, held Thursday, October 18, 1906, upon accepting the \$5,000 annual scholarship award offered by Mr. J. Ogden Armour, appointed a committee consisting of Mr. Leonard, Mr. Sanders and Mr. Ogilvie, to meet with the deans of the agricultural colleges, to arrange details concerning the distribution of these scholarship awards beginning with the 1907 exposition.

The committee issued a call to the deans for a meeting to be held Friday, November 2d, in the rooms of the Saddle and Sirolo Club, Union Stock Yards, Chicago. This meeting was attended by Professors Wilson, South Dakota; Nichols, Kansas; Kinzer, Kansas; Plumb, Ohio; Dalrymple, Louisiana; Wing, Cornell; Boss, Minnesota; Skinner, Purdue; Humphrey, Wisconsin; Mumford, Illi-

J. O. ARMOUR.

nois; Curtiss, Iowa, and Messrs. Ogilvie, Leonard and Skinner, showing a wide interest taken by the colleges in the generous scholarship fund to be presented by Mr. Armour.

In addition to those present, there were letters from the deans of fourteen other colleges, stating their inability to attend to present their views upon the subject.

The discussion, which was participated in by all, brought about the following plan of distribution, the scholarships to be divided among the colleges whose teams do the most efficient work in the students' judging contest, as follows:

For best work on—
Horses 1
Cattle 1
Sheep 1
Hogs 1
Corn 1
Grains, feed and forage exhibit..... 1

For the college whose teams do the most efficient work in all of the classes, one, thus providing for seven of the scholarships.

It was then agreed to distribute the remaining thirteen scholarships on the basis of cash prizes won by the colleges in the open classes for International Exposition money only, and the money of the exposition that is won on the grain and forage exhibit not to be counted in this item.

It was then agreed to restrict the number of scholarships, that any one school could be allotted to 40 per cent of the whole.

Farm Furrows

Turned by a Practical Farmer.

It always looks so foolish to see another fellow suffering with the tooth-ache.

It does not take as long to scoop out a load of corn as it does to husk it, but it requires more back muscle and greater endurance than it does to gather in the ears.

Why are there so many "common cattle?" Just because it requires less effort to produce the common kind. The scrub bull and the grade bull are responsible for the common kind.

The Kansas Experiment Station has been studying the practical value of a milking machine. It is to be hoped that an honest verdict will be rendered in the report of the experiment.

Did it ever occur to you that the man who sulks loses lots of time and money, to say nothing of the good times he could have? Did you ever stop to think how much misery he causes others?

Dry farming has been eminently successful this year in the dry country, which is probably due to the fact that there was plenty of rainfall there. Dry farming is all right when we have sufficient rain.

When I was a teacher in a country school I had for my motto, which was always printed on the blackboard, "Order is heaven's first law." The motto for the dairy should be "Cleanliness is the dairyman's first obligation."

Professor Burbank, who has succeeded in growing blue roses, spineless cactus, seedless apples and various other freaks of plant life, says he can't obtain one seed of horseradish and he offers \$1,000 for an ounce of seed of the horseradish.

One cannot always tell a good corn husker by the height of the "bat boards" on the off side of his wagon, but as a rule plenty of bat boards is an indication of a good husker. A wagon box should hold all the corn one can husk in a half-day.

I feel sorry for the man who would rather dig in a fourteen-foot sewer for \$1.75 per day when he can get four cents for husking clean corn, and when the same amount of labor would make for him \$2.40, to say nothing of board. Queer, isn't it?

There ought not to be different sizes of half-bushel baskets, but there are. The half-bushel basket in which peaches are packed and sold to consumers is not nearly so large as the one used in buying. If a half-bushel basket isn't, what right has it to be called such?

*The real importance of clover is not as well known by farmers as it should be. The class of farmers who understand it form a small percentage of the whole in central states. Just note how few clover fields you will pass in going about over the country. This tells the story.

That sow which had a big litter last spring and the spring before will be a good sow to retain for another year. The measurement of value of a brood sow does not always rest in size, age and quality, but these things should be considered among other good qualifications.

At one of the fairs it was my pleasure to see an ordinary farm wagon converted into an automobile. It consisted of a four-horse-power gasoline engine, belts, pulleys and other devices for carrying power to the rear wheels, and a cultivator wheel answered for a steering device.

A schoolmate of mine just back from a visit in his boyhood home in the state of New York, tells me that many farms in that state are absolutely worn out, and are often sold for only a fraction of what the buildings cost. The methods employed there have been to get all that could be obtained from the soil until the fertility has become exhausted. The average farmer there is not as enterprising as western men and many western men are coming in there, buying those worn-out farms and by the pursuance of

push they are making them productive and valuable.

During a trip recently it occurred to me that many of the country school sites were chosen in the most unattractive places possible to select. Many of them seem to have been located on land that could be used for nothing else. Some were so small as to provide no playground and some of them looked as if they would have been better fitted for graveyards.

The first farmers of a new country depend largely on virgin fertility to produce large crops. When they fail to obtain profitable crops with indifferent farming they feel that the land has become worn out and they sell out and go further west. In nearly every country fertility has been increased under the best methods of farming until now many farms are yielding better crops than when they were first brought under cultivation. A Pennsylvania farmer wrote a friend in 1778 that he "raised on virgin soil a crop of wheat, yielding seven-

teen bushels per acre." The same farm this year, 128 years later, produced thirty-four bushels of wheat to the acre. The thing that brought about this hundred-fold increase is "science," or common sense.

A farmer went to a bank recently to get his note renewed and the banker asked him if his implements were out in the weather. Upon being told they were, he was informed to go home and house his farm machinery and then come in and renew his paper. If some farmers knew their own business as well as some bankers do theirs, there would be fewer implements rusting out in the elements.

Pasturing winter wheat in the fall of the year is a dangerous practice. Experiments have been conducted in Oklahoma to ascertain the advantage or disadvantage of this practice. Occasionally there will be a year when the growth is so rank as to not be injured by judicious pasturing. Grazing in the spring usually decreases the yield and should be discouraged. In my own experience I

never thought it necessary to pasture winter wheat at any season of the year.

A friend recently told me that he had an electric light system in his residence, operated by a windmill. Upon inquiry I found that he had a windmill that provided a compressed air water system. The force is obtained by pumping air in the water boiler. By the aid of this force and a water motor, a dynamo is operated which furnishes the electric current sufficient for incandescent lights.

Quack grass is one of the most pernicious weeds the farmer has to contend with. Cultivation encourages and spreads the roots. Constantly seeding and cropping fields in the ordinary way has a tendency to increase the area each year. Starving is the method to be pursued in killing this tenacious plant. Keeping the tops down and disturbing the roots but little will do the work. Small patches may be smothered by a covering of straw. Dense growing crops like buckwheat, millet and rape, will often choke out this grass.

Montgomery Ward & Co.'s No. 75 Catalogue **FREE** Now Ready

Nearly 1300 large pages, thousands of pictures, 127,000 articles. The biggest bargain book ever printed. Beats all Catalogue records for quantity, quality and low prices. Full of many things you want that you cannot buy near home and multitudes of things of better quality and at lower prices than any other catalogue or store offers you.

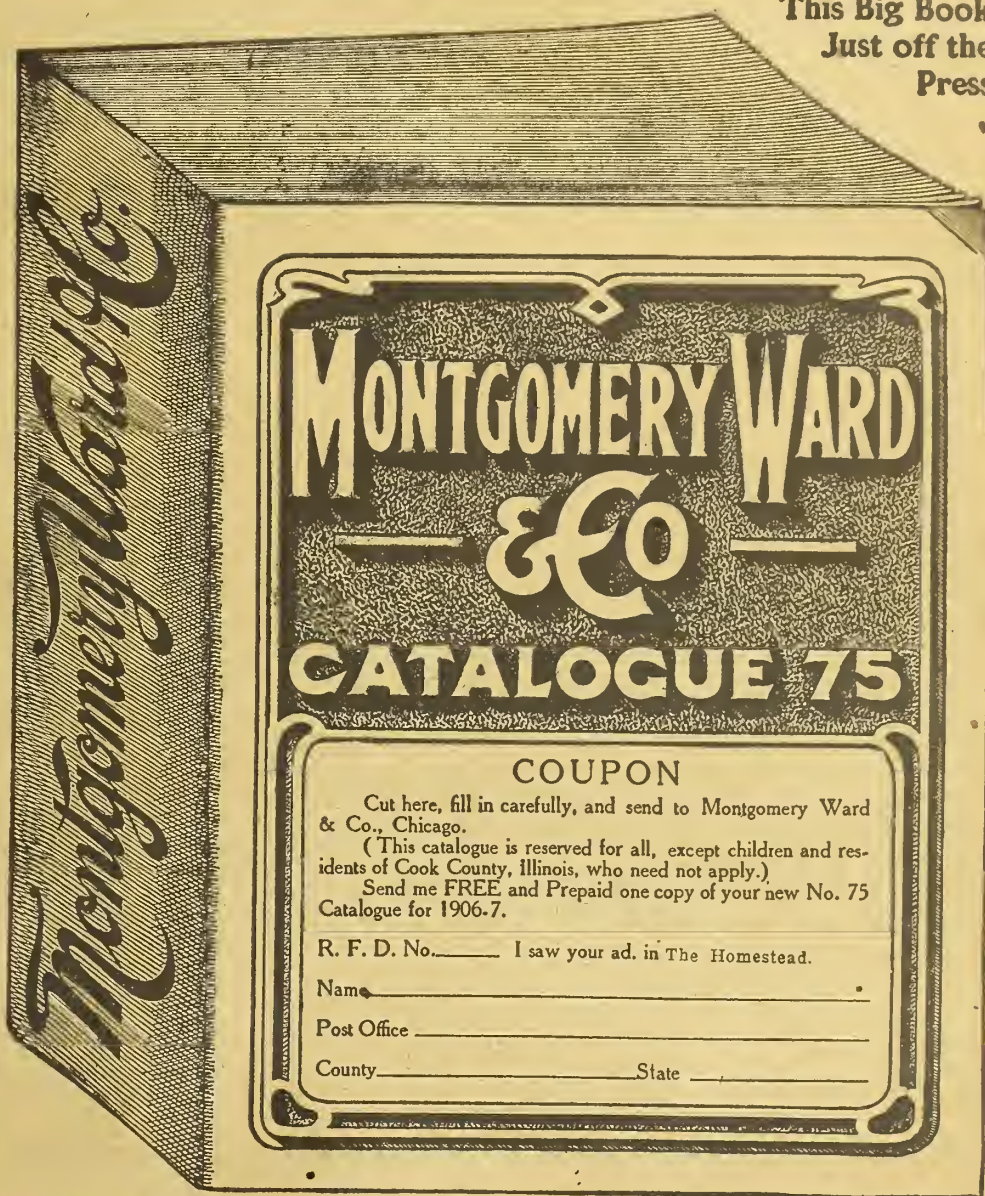

Send for Your FREE Copy Today.

\$50.00 a year, at least, is easily saved by every one using this No. 75 Montgomery Ward & Co. Catalogue to order goods from. Many write us of saving hundreds by being our regular customers. It pays others, it will pay you. We are the originators of the Catalogue business. We have been square with our millions of customers for 35 years—we will be square with you.

Valuable Premiums Free

In this new No. 75 Montgomery Ward & Co. Catalogue is an entire section devoted to our new **Free Premium Plan**, which illustrates and describes all the many valuable articles we give free to our customers, including Pianos, Buggies, Sewing Machines, Watches, Jewelry, Diamonds, Morris Chair, Couches, Chairs, Saddles, Books, Shoes, Carpets, Curtains, Tools, Scales, Harness, Stoves, Lamps, Violins, Guitar, Music Boxes, Sporting Goods, Clothing, Furniture, Dinner Sets, and very many other choice articles, all given to our patrons. It is worth your while to get this big No. 75 Montgomery Ward & Co. Catalogue for 1906-7 just to see this wonderful **Premium List** of things that await your selection if you become our customers.

Send your name and address carefully written on a postal card or in a letter, or attached to your next order, or fill out coupon in the picture; either way that is easiest. Just say "Send me free and prepaid one copy of your new No. 75 Catalogue." Do this before you forget it, right now. We will then send it at once.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to
THE HOMESTEAD COMPANY,
Des Moines, Iowa.

OUR DEPARTMENT OF CLASSIFIED ADVERTISING.

One of the most popular features of The Homestead during the past year was the department of classified advertisements. Hundreds of our readers who are not regular advertisers availed themselves of this convenient medium of offering for sale or exchange their poultry, live stock, pet animals, lands, machinery, etc., and supplying their various wants in these and other lines.

The season for this class of advertising is again at hand, and the department of classified advertisements will be resumed in our first issue in December and continued regularly thereafter.

Instead of having different rates for different classes of advertisements, we will make one uniform rate of five cents a word for all headings of classified announcements, no insertion being accepted for less than \$1.20, and cash invariably to accompany the order, as we keep no books for this class of advertising. In computing the cost of an advertisement, every number, initial letter and abbreviation counts one word. No display type or illustrations are admitted in this department.

Although five cents a word is a very reasonable rate for advertising in The Homestead alone, with its over 85,000 circulation, we have made special arrangements whereby our classified advertisements will also be published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge. The Wisconsin Farmer has a circulation of 30,000 and The Farmer and Stockman of over 50,000, making a grand total circulation of over 165,000 for the three papers. If five persons are reckoned as the average farmer's family, your advertisement therefore reaches a farm population of at least 825,000, not including the neighbors of the subscribers, who often read the papers and increase the purchasing power of their constituency.

For Heavy Loaded Party Lines
"ELLIOTT" TELEPHONES
Bona-Fide "World Beaters." 18 Years Experience. Extra Powerful High Grade. Guaranteed to Ring 25 to 40 Phones on one line, loud and clear. Space too small here to name many valuable features of "ELLIOTT" Phones. Be wise, write for elegant Catalog, now ready, ask for our Special Offer on first order from your section. You'll not regret it.

The T. M. Roberts Co-operative Supply Co.

Dept. H77 Minneapolis, Minn.

These three great farm papers circulate very largely throughout the states of Wisconsin, Illinois, Iowa, Minnesota, North and South Dakota, Nebraska, Missouri and Oklahoma, the great corn, wheat and live stock region of the middle West. Five cents a word is a very low rate for reaching such a vast army of wealth-producers and spenders.

To insure insertion, these classified advertisements should be in our hands on the Saturday of the week preceding publication. For the first issue of December, in which this popular department will first appear this season, copy of your advertisement should reach us on or before Saturday, December 1st. That is only about two weeks away, hence we advise early attention to this matter, which will be very important to many of our readers.

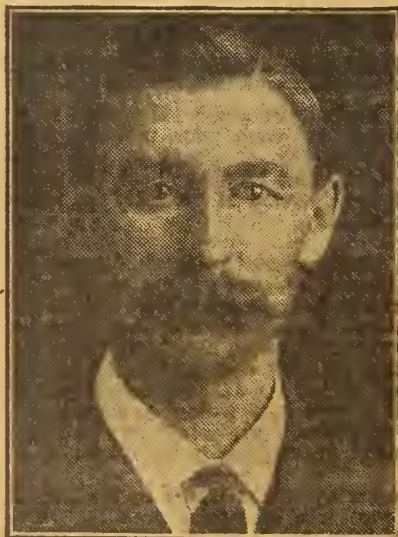

DEATH OF O. L. KERR, INDEPENDENCE, MO.

Many of our readers have been aware for some time of the fact that Mr. O. L. Kerr, of Independence, Mo., has been an exceedingly sick man. His last annual O. I. C. swine sale was held on November 2d, on which date Mr. Kerr made a highly creditable offering, though on that date he was a very sick man.

Word comes to hand now just as we go to press relating to Mr. Kerr's death. This we realize is sad news to all his friends and to the great body of O. I. C. breeders throughout the corn belt. Mr. Kerr's success this year with his herd at the American Royal show indicates that he was no common breeder, and it is singularly sad that one with such splendid ability should be cut off so early in life. His death was due to typhoid fever.

OFFICERS OF THE NATIONAL DUROC JERSEY ASSOCIATION.

Announcement was made in these columns a few weeks ago to the effect that

C. E. PRATT,
President National Duroc Breeders' Record Association.

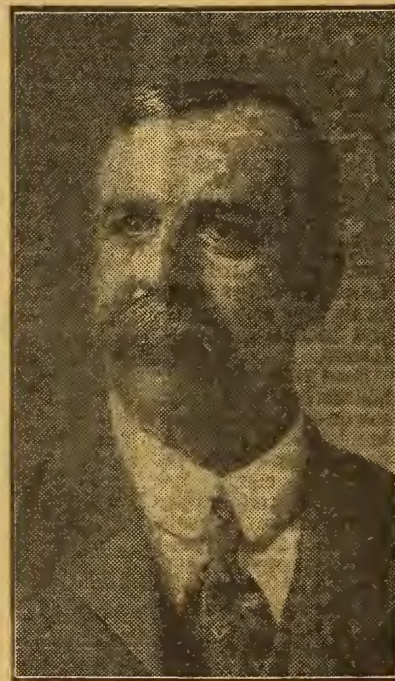

Mr. C. E. Pratt, of Frankfort, Kan., had been elected president of the National Duroc Breeders' Record Association.

GUNS, HUNTING CLOTHING, RIFLES AND SPORTING GOODS GUARANTEED

Is Like Looking Through Our Big Store. The Largest, Cheapest and Most Wonderful SPORTING GOODS HOUSE in the World. WRITE FOR IT. It's No. 932
10,000 GUNS *Schmelzer Arms Co.* KANSAS CITY MISSOURI

Since the retirement of Mr. Evans from the office of secretary the duties of the office have been faithfully discharged by his successor, Mr. H. C. Sheldon, formerly of Shannon City, Iowa.

There are thousands of Duroc breeders in the corn belt, and while many are more or less acquainted with the officers,

H. C. SHELDON,
Secretary National Duroc Jersey Record Association.

Messrs. Sheldon and Pratt, yet we have thought that our readers who have never met these men would be pleased to meet them even in this distant way, and we duce Messrs. Sheldon and Pratt to all hereby take pleasure in formally introducing our readers, and especially to those who are interested in the great Duroc Jersey hog.

Men on every hand express themselves as believing that the affairs of the National Association are in good hands and it is believed that the great growth in the popularity of this breed that has been made in the past will be equaled, if not exceeded, in the future.

The stockman cannot be too careful in the selection of dips for his stock. This is especially applicable to dips for sheep. A poor preparation will do more harm in discoloring and weakening the fibre than it will do good in other ways. The Hygeno is a dip that is being widely indorsed by stockmen. It does no injury to the animal in the least. Write to The Hygeno Disinfectant Company, 582-588 Citizens Building, Cleveland, Ohio, for prices and please mention that you saw their advertisement in this paper.

On page 5 of this week's Homestead is published a substantial statement concerning the way the Litchfield Mfg. Co., at Waterloo, Iowa, back up their machine and what they advertise it to do.

The Homestead and The Homemaker \$1.25 per year.

Handling a Thirty Thousand Acre Farm in Missouri.

Mr. David Rankin, of Tarkio, Mo., is without doubt the most famous farmer in the corn belt today. He is the acknowledged corn king of America, and produces annually more than one million bushels. This corn is fed to cattle and hogs and there is fed in addition not only the entire crop produced by Mr. Rankin, but also thousands of bushels

DAVID RANKIN.

purchased from neighbors. He feeds and markets train-loads of cattle every year, and has made an enviable reputation as a breeder of prime beef.

Mr. Rankin's premier place among farmers of the corn belt has been attained with his coat off, as it were, and today he can be found in the fields and feed-lot superintending in detail the affairs of his mammoth farm. Mr. Rankin's system of crop rotation, together

by no means uncommon for him to raise over a large acreage a yield of upwards of one hundred bushels per acre.

The work of making a thirty thousand acre farm profitable will appear to the average man to be a most difficult task on account of the labor question, and on this very point is shown Mr. Rankin's superior ability. He has always been a believer in labor-saving machinery and has lost no time in introducing these at the earliest possible moment. For many years his greatest difficulty was to give his large corn acreage the required number of cultivations. This problem was solved by introducing the two-row cultivator. He went into the manufacturing business and is now president of the company located at Tarkio that manufactures the Midland Two-Row corn cultivator. Hundreds of these may be seen in his fields during the season of cultivation. The same firm of which Mr. Rankin is president manufactures the two-row disk cultivator and hay stacker. Mr. Rankin claims that his men were able to do better work with these two-row cultivators and two-row listers than can ordinarily be done with a single-row machine. What he has done on a large acreage he considers entirely practicable on the average farm of the corn belt, and he has repeatedly expressed his belief that every man in the corn belt who plants as high as forty or fifty acres of corn will find the two-row corn cultivator profitable.

Profitable Farrowing Dates.

To the Editor of The Homestead:

If it is profitable to keep sows a year for one litter of pigs, it certainly can be made more profitable to raise two litters a year, and if early litters are desirable as breeding stock, they are equally desirable for the fattening pen. In order to give the fall litters a chance to do their best they should be farrowed by the first half of September, so they can attain as much size and age as possible before cold weather. If they are farrowed as soon as the

first half of September they will make quite a growth on grass and pumpkins and such cheap feeds as are found on all farms at that time of the year. I believe two pigs farrowed near the first of March and first of September are worth more than three farrowed the first of May and November, either for the feed lot or for breeding, let it be male or female. Some practice breeding young sows all the time and let them farrow about May or June and then fatten and sell. I think this practice will have a tendency to make the pigs small-boned and weak. The better plan is to keep mature and

old sows as long as they will farrow a satisfactory number of good pigs. I breed my sows in November, about the latter half or as near that time as possible. I let the pigs suck two months, then wean them and breed for the fall litter. I keep my sows as long as they prove themselves good breeders and sucklers.

I admit that a pig farrowed in May is less bother than the March pig, and if such a pig were equally desirable for breeding stock and the feed yard it would have great advantage over the pig farrowed in March, but such a pig is not so good for either purpose.

Chas. L. Hardman.

Marion county, Iowa.

A WONDERFUL OIL HEATER.

It Solves the Problem of Fall and Spring Heating and Supplements the Regular Heating Apparatus in Mid-Winter.

With the passing of the summer months comes autumn, and with it the chilly nights and mornings which force us to turn our thoughts to the problem of heating our houses, and we begin to look over our stoves and furnaces and get them in repair for the cold winter months.

To start stoves and furnaces in the early autumn brings more or less discomfort for the reason that they furnish too great heat during those portions of the day when the heat of the sun is still considerable. For such times the Perfection Oil Heater, equipped with a device which prevents all possibility of smoking, solves this hitherto perplexing problem.

There are also many times during the

WHAT WE ADVERTISE AND AGREE TO DO.

ONE OF THE cardinal principles of our company is to make no agreement we cannot fulfill nor offer a machine to the public that we cannot stand squarely behind in every detail. In producing the Litchfield Spreader, this machine has been no exception to the Litchfield established rule.

This Manure Spreader is built on honor. It is not made good by any false "friendship" for our customers, but as a matter of excellent business policy. This machine is good all through. It not only looks good, but is the same material through and through, where it cannot be seen the same as where it can be carefully inspected.

No short-sighted policy has been followed in establishing a record for this modern machine. It has not been the policy of this company to jeopardize the future sales because in so doing a larger immediate business could be secured.

It was the belief of this company a few years ago that a spreader could be made that could be guaranteed for five years. The results that are now being daily proven with this modern Litchfield Spreader, have demonstrated that such a guarantee can be made; and every customer who buys one of these machines is getting the benefit of the quality that is necessary to make a guarantee of this kind conservative.

No cheap material or cheap construction, no light-weight parts or complicated pieces are possible if the spreader is to back up the very strong statements made for it. Manufacturers have been backward in guaranteeing manure spreaders simply because there were so many complications in the way of parts and pieces, that a guarantee would naturally mean an endless amount of expense and trouble, if made on a machine of this kind. The Litchfield Spreader with half (or less than half) the pieces used on most other machines, makes this guarantee question much easier.

Simplicity of construction is not the whole thing, but if results better than the complicated machines can possibly give, are obtainable with simple construction, then it must be admitted that we have the advantage.

We are not out looking for trouble in the future, but when we have got a good thing and know it is a good thing and have proven that it is a good thing, we believe that it is right and fair that we get behind this with our guarantee.

Don't forget us next week.

PINKERTON MANUFACTURING COMPANY
LINCOLN, NEB. 1027 NORTH 14TH ST.

cold winter months, while the furnace and stoves are in operation when they may not be equal to the task of warming remote rooms, hallways, etc. This is more apt to be true in the early morning before the full efficiency of the regular heating apparatus is developed. In many houses there are rooms not reached by direct heat. At such times and in such places the Perfection Oil Heater will be found a very valuable auxiliary. It will enable the household to eat its breakfast in comfort instead of shivering with the morning chill.

The Perfection Oil Heater produces a surprising amount of heat immediately after lighting and will heat an ordinary room in a remarkably short time. They are strong and well made in a design pleasing to the eye, and they are light enough to be easily carried from room to room as required.

In these days of numerous devices for illumination, there are still many who have not provided themselves with satisfactory lamps. The Rayo Lamp makes it possible for everyone to have adequate light at a small cost. The Rayo Lamp is the best lamp for all-round household use. It is made of brass and beautifully nicked, and is an ornament to any room whether in palace or cottage.

The Perfection Oil Heater and the Rayo Lamp form a combination that makes home bright and comfortable. Their absolute safety and very moderate price make them a valuable and easy acquisition to any home. Both heater and lamp are warranted.

American Duroc Jersey Swine Breeders' Meeting.

The American Duroc Jersey Swine Breeders' Association will hold its twenty-fourth annual meeting on Thursday, December 6th, 1906, at 7 o'clock p. m., at the Windsor Clifton Hotel, Chicago, Ill. Mr. T. B. Pearson, of Thornton, Ind., secretary, is exceedingly anxious that a full attendance of breeders be present. Matters of considerable importance will come before this meeting and more intelligent action can be taken on these questions if a large attendance is present.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for 25 years.

The Homestead and The Homemaker, \$1.25 per year.

High Grade Door ONLY 80c

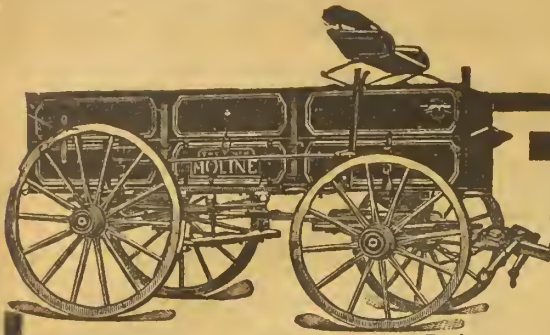

2-0 x 6-0, All White Pine. Regular Price, \$2.00

If you have any use for doors, windows, storm sash, moulding, porch brackets, columns and millwork, for your own buildings, or as contractor, don't buy elsewhere at any price or under any circumstances until you get the Grand Millwork Catalog which makes a clean saving of 60% on any dealer's price. It makes no difference where you live. If you intend to build, or if you need millwork for any purpose, do not think of buying until you get our estimate. Our goods are high grade as well as wonderfully low in price. Our lumber is first air-dried and then, as an extra precaution, is put through a scientific drying process. Joints are made with heavy hardwood dowel pins, glued with imported glue, pressed together by heavy steam power press. There is no "come apart" to our work.

Door panels have a heavy raise on both sides. The panels are sandpapered on a special machine of our own invention before the door is put together, and the entire is then smoothed with fine-grained sandpaper. We guarantee our goods to be strictly up to the official grade adopted by the Sash, Door & Blind Manufacturers' Association of the Northwest.

We operate the largest mill in the world—163,000 feet of floor space (four acres)—have been in business since 1855—own our timber lands, sawmills and lumber yards. We carry a large stock and can therefore ship promptly. We have no traveling men—sell only for cash. We are the only large manufacturers of sash, doors and blinds selling direct to the consumer. Our prices will astonish you. Don't buy anything in our line until you get our catalog, the grandest woodwork catalog published. It's Free—write for it today. Address

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

Mr. B. W. McClelland, of Ohio, sends a sketch of a convenient rat trap to the Practical Farmer and writes: "The box, A, should be made from one-inch boards of hard wood so that the rats will experience difficulty in gnawing out. Piece B should be four inches higher than the front. D is the platform; it is hung on two pins, E, one on either side. The platform extends four inches beyond the front and on its lower side is driven a nail as shown in the sectional drawing. The platform should be made of light material. The bait is tied or laid on the projection F; when the rat gets about half way from E to F the platform will tip and the gentleman will be precipitated below and the rubber elastic will cause the platform to assume its former position ready for another rat."

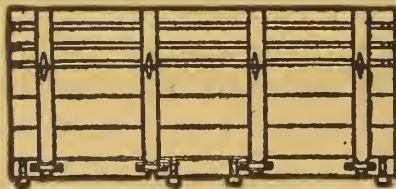

"In your paper you have often spoken about a car for carrying manure from the stable," writes Mr. Martin Wilson, of Madison county, Iowa, "and I wish you would give us a convenient plan for making one in your hints and devices department." The illustration shown herewith shows a home-made device for hauling manure from a stable and can be installed by any farmer who is at all handy with tools. A few old pulleys or wheels may be needed to construct it as it should be, and the ingenuity of the farmer will suggest how it should be made for his own barn and environment. The track can be made by spiking two pieces of 2x4's to make a smooth track. These should be sized and dressed. Rods of half-inch iron will make good hangers and the wheels may be made of an old hay carrier or some similar piece of abandoned machinery. The piece under the track, forming a part of the car should be made of the same width as the track. The side arms of the car can be made of pine. The box can be made two feet wide and four feet long constructed of matched material so as to retain the

liquid manure. Two sprocket wheels are located on one end with a dog to turn the car when emptying. A manure car of this kind can be installed very easily and cheaply and will save much time and labor in cleaning and managing a stable. We are indebted to the Prairie Farmer for the illustration.

Mr. A. J. Small, of Illinois, writes: "I have been very much interested and edified by your hints and devices department and wishing to contribute something that may do some one else good, I send you sketches of a handy home-made wagon box that may be used for hauling wood, hogs or bulky stuff and at the same time will be found economical and

handy when in use on the farm. For sills I use two timbers 1 1/4 x 8, twelve feet

long. For the floor take six pieces of flooring and for the top I get wide boards for the bottom of the rack and three three-inch strips for the top. For nail strips I use three-inch stuff. The front end gate is made solid like that shown in the lower left hand corner of the illustration; the tail gate is shown in the lower right hand corner. This rack can be used for a rack by turning the sides down."

In feeding meal to pigs I have a large box ten or more feet long, made so animals can eat from either side, writes Mr. F. O. Sibley in the Successful Farming. The end of the self feeder in the illustration is left open to show the interior construction of the box. The floor consists of two inclined planes. Feed passes through apertures in sides and thence in troughs on the outside. The

lower part of the sides should be made to slide up and down in grooves so that feed can be shut off entirely or adjusted to suit the conditions. A part of the roof should be hinged so as to render it convenient for putting in feed. With a trough full of clean water nearby it will be possible to feed pigs so that they will soon make hogs of themselves by eating and not by fighting and pushing each other out of the troughs. By the adoption of this plan the weaker pigs can have an even chance with the stronger ones. Mastication will be better and digestion made easier. It is not a good plan to wet meal or even dampen it so

pigs can devour it quickly. To do them the most good it should be fed to them in dry condition.

Special Christmas Catalog.

Soon the time for money making will be at hand. Suggestions for holiday goods are in season. The matter of knowing just what will be most pleasing for father, mother, brother or sister is one of the problems that confronts many a gift-giver. The spirit to give generously to all suggests that one's Christmas money must be made to go as far as possible. For many years the T. M. Roberts Co-operative Supply Co., Minneapolis, Minn., has gladdened the hearts of its patrons with timely hints and bargains for the candle-lit evergreen. Their special new catalog should be in the hands of every holiday shopper. Its pages are full of every imaginable seasonable gift. Moreover, prices are within reach of all, practically wholesale. The catalog is for the asking. Turn to page 4 for the advertisement and kindly mention The Homestead when writing.

BIG FARM PAPER A WHOLE YEAR FREE

We will send you our great farm paper absolutely free for a whole year if you will do us a small favor. Just send us names and addresses of five good farmers and enclose two-cent stamp. The Valley Farmer is a handsomely printed farm journal, established fifteen years, edited by the ablest agricultural writers of the country, published on its own \$30,000 rotary magazine press by the largest publishing house in the West, and read by over a quarter of a million people, its circulation reaching every state in the Union. Address with stamp Valley Farmer, 675 Jackson street, Topeka, Kan.

Onward 106001, a son of the great Keep On, and one of the litter that won at the Iowa State Fair in 1904. Now offered for sale or trade by Mr. A. C. Lanham, of Battle Creek, Iowa.

DAY BY DAY

Agricola

I met a neighbor in town the other day, and he was buying lag screws to fasten down his windmill pump. He said the platform planks would get too rotten to hold down the pump in a little time. Lumber is not what it ought to be considering the cost. I told him that I had no such trouble. My platform is made of concrete and bolts set in it when made, the pump base set over the bolts and the nuts drawn tight and they stay tight. The pump can not budge. But his well is a dug well for the first twenty feet and so a wooden platform is more conveniently made.

My well is drilled from the top, cased with gas pipe to solid rock, and so is water tight, air tight, and insect tight. The concrete platform sets tight to the gas pipe, the pump base rests on the top of the gas pipe, and the water is pure.

I do not like the underground water tank because of the impossibility of cleaning it out. It is very nice, I admit, to have a pressure tank and have confined air send the water out fizzing—very nice when it works all right—but when you have trouble you have the bad kind.

Another of the small concrete affairs which suits me is a concrete base for the cream separator. Machines running at high speed need to be held so they cannot quiver.

Concrete floors for cornerbirs are being built. With a stone or concrete underpinning, and a concrete floor for the base of a cornerbir is a permanent thing. But the corn must be well dried or it will mold a little in the middle of the floor. As for that, such conditions are sometimes met with on a board floor.

I like the idea of a concrete feeding floor for hogs, but am not so favorably impressed with concrete sleeping floors. Stone, even if artificial, is a cold thing to be next to in winter, and keeping it bedded just right is a job.

Take the large plates of a cornplanter and have the blacksmith drill them out larger so they will drop five or six

DR. W. P. HALL, ADRIAN, MO.

Cures Cases of Bright's Disease and Diabetes With Swain's Backache and Kidney Pills.

This is Convincing and Adds More Proof and Cures to This Noted Medicine, Which Has Never Failed to Cure any Case of Kidney Disease, No Matter of How Long Standing and of What Nature.

Adrian, Mo.

As a rule physicians do not endorse or recommend proprietary medicines, and this is my first in thirty-five years of practice and dispensing drugs; but I will deviate from this established rule to say that I have cured some very obstinate cases of kidney troubles with Swain's Backache and Kidney Pills. Some cases of diabetes and Bright's disease I thought incurable and have been cured by this medicine. I think this remedy is a specific for every form of kidney troubles; in fact, I would recommend it in place of anything else.

W. P. HALL, M. D.

This is startling and should be convincing to every sufferer of these terrible diseases that kill more people than any other known ailments. You can obtain this treatment at 50c per box, or \$5 per dozen, at druggists, or Swain Medicine Company, Kansas City, Mo., Dept. 12.

If above statement does not convince you they will cure kidney diseases send us 10c for postage and packing and we will send you a 50c box FREE.

CANCER, TUMOR, ULCER,

SORES and all Skin Diseases successfully treated by The McLaughlin Painless Remedy. Most cases get well after One Application of the medicine on the disease for one hour without PAIN, then go about your work. No matter how long standing your case, you should go at once and take this treatment, the most wonderful medicine known in the world for Cancer & Tumors. Abundant proof and advice free. Dr. J. C. McLaughlin, 351 Junction Bldg., Kansas City, Mo.

Do Not Stammer!

NORTHWESTERN SCHOOL FOR STAMMERERS, 1022 15th Ave., S. E., Minneapolis, Minnesota.

kernels and you can mix pumpkin seeds with the seed corn and plant both together. This is not the Agricola way, but a neighbor follows the practice and he likes it. The vines get started earlier than when you wait for the corn to come up and then "stick them," and they get the start of the "bugs." He plants but a few acres this way, and of an early kind, and gathers corn and pumpkins together and feeds to the pigs. It makes a splendid ration, but there are too many small ears for an impatient man to husk.

I have not plowed the garden at this writing, but I am anxious to do so before the ground is frozen for keeps. I like to plow it late in the fall so as to disturb the cutworms and throw them out into a cold relentless world. But I like to plow oat stubble in August. Then the shattered oats will grow and lay hold of fertility which would otherwise leach away. Early plowed land, if not left bare, seems to keep fertile, but the garden is fertilized heavily and kept rich and does not need to be fall plowed early.

I found much difference in the size of ears this fall, those on the ridges being much larger than the ears growing in the "dead furrows." This was not strange, but it did not hold true with the pumpkins on the same ground. The biggest pumpkins seemed to be in the dead furrows. No, they did not roll down there, nor were they planted there, but on the ridges, and the vines which ran to the dead furrows had less shade, because the corn was smaller.

School directors say they have difficulty in finding teachers for the rural schools and they are offering higher wages now than they did a few weeks ago. If high wages will procure really good teachers, then boost up the wages. The rural school is still the hope of the nation, and nothing is too good for it. The town school can fit teachers to the different grades, but with all grades in one room, as in the rural school, it takes a well balanced brain and tactful use of it.

In the country, the school district should be the social center, and the teacher the queen of society—a pattern for the children to study. More is learned from the teacher than from text books, if the teacher is capable and devoted.

Creamerymen tell me that they are discarding "tar color" for butter and going back to vegetable colors. The tar colors have no tar in them, but they are distilled from coal tar and mixed in cotton seed oil, about seven per cent being the color from tar. But this color is a poison and it does not sound well to put poison into a food product. In the proportions used, it is harmless—one pound of color to 1,000 pounds of butter—but they want to say that their butter is, like Caesar's wife, "above suspicion." The vegetable colors used are made of annatto in a solution of cottonseed oil.

Annotto is the pulp of the seeds of a shrub which grows in South America and the West Indies. The botanical name is bixa orellana. The yellow principle is called bixin. As a color, it is inferior to the tar color, as it is weaker and subject to fading. But it sounds better to use a vegetable color. But let no one feel uneasy about eating butter for fear it has tar color in it. If it were strychnin in the same quantity it would have no perceptible effect.

I needed a pole yesterday, yes, two of them. Should I go to town and buy telephone poles? They would be too bulky, and the problem admitted an easier solution. I simply went to the ash grove and cut what I needed. One pole was fourteen feet long and the other nine feet, and they both came from one tree. This small grove was set out many years ago as an experiment, setting the yearling trees out like corn in rows both ways, four feet apart. We used to plant corn further apart than we do now.

The white ash is the variety. Being set thick they stretched up for sun and air, and trimmed themselves, and grew into poles instead of wide spreading trees. One can gather the seeds in abundance along Iowa rivers, and no cleaner, thriftier, handsomer tree can be desired.

Once I saw one the train a man with the unmistakable missionary gleam in his eyes, and he was preaching tree-

Wonderful Edison Phonograph OFFER

Read Every
Word of
This
Straight-
forward
Offer.

Free Trial

Try it in your home, play the stirring waltzes, marches, two-steps, concert pieces, minstrel dialogues, beautiful vocal solos, and other beautiful Edison gold moulded records, play all these, and if then you don't care to keep the outfit send it back at our expense. We charge you nothing for the trial. After the free trial, if you find this kind of entertainers acceptable, you can send the cash or pay on terms as you prefer. Your credit is good. We know from experience that we can trust honest people all over the country the same as we trust the people here in Chicago.

Mr. Edison's latest improved phonographs are by far the finest talking machines ever made now offered at such remarkably low prices that imitators of Mr. Edison's patents, with their inferior and much more expensive machines, simply cannot compete. You will be surprised when you get our catalog and see the wonderfully liberal offers on genuine Edison instruments.

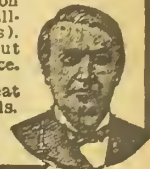

\$2.00 A MONTH

A nickel to a dime saved a day will buy a genuine Edison without interest on payments—and at exactly the lowest net cash price.

Don't delay. If you are a responsible person and want this great offer write at once for free Edison catalog and free list of 1,500 Edison records.

FREDERICK BABSON, Edison Phonograph Distributors, 149-150 Michigan Avenue, Suite 3248A, Chicago

Thomas A. Edison

setting, and said he desired no greater honor than the credit of introducing the hardy catalpa. I was converted and set out some in the grove. They never fulfilled expectations as post timber, growing sprangly and crooked. I have been told that I should have cut them down when young, let one sprout grow from each stump, and that sprout would shoot up straight.

Then there was Douglas of Waukegan, the black cherry enthusiast. He sent me trees all the way from his nursery as a gift to "see how they will grow in Iowa." They were precisely like those which I later found along the nearest river. Douglas is dead, so are the trees he so kindly sent me. They are not large growers, and when they get their growth they soon decay. The catalpa trees are still alive, but the ash are worth more to me, and the cherry is only a remembrance.

AWFUL PSORIASIS 35 YEARS.

Terrible Scaly Humor in Patches All Over the Body—Skin Cracked and Bleeding—Cured by Cuticura.

"I was afflicted with psoriasis for thirty-five years. It was in patches all over my body. I used three cakes of Cuticura Soap, six boxes of Ointment, and two bottles of Resolvent. In thirty days I was completely cured, and I think permanently, as it was about five years ago. The psoriasis first made its appearance in red spots, generally forming a circle, leaving in the center a spot about the size of a silver dollar of sound flesh. In a short time the affected circle would form a heavy dry scale of a white silvery appearance and would gradually drop off. To remove the entire scales by bathing or using oil to soften them the flesh would be perfectly raw, and a light discharge of bloody substance would ooze out. That scaly crust would form again in twenty-four hours. It was worse on my arms and limbs, although it was in spots all over my body, also on my scalp. If I let the scales remain too long without removing by bath or otherwise, the skin would crack and bleed. I suffered intense itching worse at nights after getting warm in bed, or blood warm by exercise, when it would be almost unbearable. W. M. Chidester, Hutchinson, Kan., April 20, 1905."

A lady said to us one day this summer, "If it wasn't for that telephone, when John is away in the fields and the children are all at school, I'm sure I'd be the most lonesome mortal in existence." We believed her, for when mother was asked what she would do without the telephone her look was suggestive of the incredulous. Everyone agreed that such a convenience and comfort had come to be a necessity on the farm. Its trifling cost is repaid over and over again in the saving made in marketing. Who can estimate its value in time of sickness with the doctor five miles away? Or in other times of danger such as fire

I Am Perfectly Cured

This is the testimony of thousands who have consulted us. If you are weak or diseased due to habits, excesses or over work and are discouraged and despondent, don't give up, but instead consult us and be cured. or robbery. You owe it to the family and business to install a telephone. In this connection some good reading matter is offered for the asking by the Stromberg-Carlson Telephone Manufacturing Company, Chicago, Ill. Just write them and say: "Send me your 52-page booklet G12, as advertised in The Homestead. More information regarding these people on page 10.

To Kill Rats.

There are many plans for ridding a place of rats. Some are better than others, but one that is sure to do the work of cleaning out the "rat holes" is Rat Bis-Kit. It gets them all, for those which are not destroyed the first time will be on their return trip. Rat Bis-Kit will keep for months and is the cheapest way of killing vermin of this sort that can be found. The effect of the poison causes thirst. This brings the rats out of their holes and they may be found dead near water. This is one of the good points in the working of this poison as ordinary poison leaves their bodies to raise a stench where they cannot be removed. If this preparation cannot be obtained at your store send a quarter for a box to The Rat Biscuit Company, Dept. F. 11, Springfield, Ohio. Their notice is on page 26 Mention our paper when writing.

The word "guarantee" has been so much misused and abused under various conditions and circumstances, that it does us good to see the manner in which this is made plain and clear by the Litchfield Mfg. Co., on page 5.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

Testing Cream.

To the Editor of The Homestead:

You submit to me the following inquiry:

I have just read in your paper the question asked by a Nebraska subscriber, and as we are interested in the butter tests and butter yield, etc., and have been selling cream for some time and are not satisfied, I would like to have your judgment in our case. I had a can of twenty-six pounds of cream. The man who gathers our cream stirred it up and poured out fourteen pounds of the cream and took his test from the fourteen pounds. The twelve pounds remaining I churned and the butter would not separate until I put some water with it because it was too thick to move in the churn until thinned. Out of that twelve pounds of cream I got five pounds of butter, lacking part of an ounce. Now, the creamery test was twenty-eight on the fourteen pounds. Do you consider that a correct test? Our creamery man took three cents for making during the summer, but now that butter has gone so high he is taking the overrun.

Replying to this inquiry regarding the correctness of the sample of cream which you mention, this depends entirely on how the cream gatherer stirred the cream before pouring out his fourteen pounds. If cream or milk is merely stirred with a dipper or other stirring rod, it only partially mixes the fat with the other constituents of the milk. The greater portion of cream remains in the upper part, and the thinnest of the milk remains near the bottom of the vessel. The only way to take a correct sample of a batch of milk or cream is to pour the entire contents several times from one vessel to another. The sample is then taken and an accurate test made. If the cream gatherer stirred your cream with a dipper and poured off from the top his fourteen pounds of cream, it should have tested more than the remaining twelve pounds. If the remaining twelve pounds of cream produced a fraction less than five pounds of butter, we will say for example 4.99 pounds, the per cent of butter in the cream was 41.66 per cent; but creameries do not pay for butter—they pay for butter fat; therefore, we subtract six from 41.66 per cent on account of the 16 per cent overrun which butter contains over and above that of butter fat, which gives us 35.66 per cent of butter fat in the twelve pounds of cream.

To find the amount of butter that can be obtained from a given amount of cream, multiply the pounds of cream by the per cent of fat it contains, divide by six, and add the result: Twelve pounds cream multiplied by 35.66 per cent fat, equals 4.279 pounds butter fat; 4.279 divided by six equals .713; 4.279 plus .713 equals 4.99 pounds butter.

Of course cream must not only be properly mixed before testing, but great care must also be exercised in operating the tester, or decided variations will frequently occur. For instance: The temperature of milk makes a difference of from 1 to 5 per cent in the test of cream at average skimming temperature, greater variation being caused in extreme cases. The amount of flush water used with average skimming temperatures makes a difference of from 1 to 3 per cent, in extreme cases making a difference as great as 10 per cent.

The variation in steadiness of the bowl makes a difference of from 2 to 16 per

cent, depending on the amount of vibration.

The variation of the speed of the bowl causes a difference of from 1 to 13 per cent in the test of cream, depending on the variation of speed.

The amount of milk allowed to flow through the separator bowl from one-half to full capacity makes a difference of from 1 to 6 per cent, depending upon the divergence from full capacity of the machine.

The amount of acid in the milk causes an irregular variation in the test of the cream, depending upon the amount of acid it contains. Where the acid reaches a high point, .3 to .4 per cent, for instance, and the separator is used continuously for an hour or more, it will eventually clog, the same as in the case of cold milk. The cream will then become thicker until the separator is entirely clogged. The extent of the clogging will depend on the amount of acid in the milk and the size of the machine. The higher the acidity and the smaller the machine, the sooner the separator will clog.

There may also be a variation between measurement and weight of a given amount of cream. The richer the cream, the more fat it contains, consequently, the lighter it is, and vice versa. For instance:

Cream testing 15% equals 8 lb. 7 oz. per gal.; cream testing 20% equals 8 lb. 6 1/2 oz. per gal.; cream testing 25% equals 8 lb. 6 oz. per gal.; cream testing 30% equals 8 lb. 5 1/2 oz. per gal.; cream testing 35% equals 8 lb. 3 oz. per gal.; cream testing 40% equals 8 lb. 1 oz. per gal.; cream testing 45 per cent equals 7 lb 15 oz. per gal.; cream testing 50% equals 7 lb. 14 1/2 oz. per gallon.

Kansas. G. W. Melick.

Intensive Dairy Farming.

To the Editor of The Homestead:

You submit to me the following communication received from one of your subscribers at Soldiers Grove, Wis.:

I have recently read statements to the effect that from twenty to twenty-five cows could be kept on an eighty-acre farm. How this can be done without buying a good deal of their living is a difficult question for me. I will describe the conditions on my eighty-acre farm and ask your advice how to handle it, to keep the greatest number of cows. It is rolling land inclined to wash. About fifteen acres of this is wood-lot, three acres in orchard, yards, etc., leaving sixty-some acres to farm. The way I look at it, it will take twenty acres, including the wood-lot, for pasture, and it seems to me that twelve to fifteen cows at the outside is all that could be wintered on what would grow on the balance of this farm. A silo is out of the question. There is none in this section and no machines for making ensilage, although this is quite a dairy country. I wonder what would be the best kind of cows to keep: Jerseys are not popular here and I believe, all things considered, that the Durham or Short-horn would be the most practical, although I am highly impressed with the Holstein.

The question asked by your correspondent is a hard one. The most encouraging thing about it is the fact that the owner of this farm has shown by the letter that he has an inquiring mind. To be dissatisfied or disgusted with one's condition and say nothing, does not aid development, but if a man continues to revolve in his mind the question of a profitable development of his farm and he tries to get such light as he can from various sources, he will certainly make progress if he keeps on inquiring.

It is more difficult to give definite instructions for the proper management of such a farm as described, than it is for a physician to prescribe the best remedies for a sick patient by mail. No one at a distance can tell this man or any other man exactly what treatment to give his land, or the feeds to buy for his stock.

Suggestions must necessarily be generalities. In giving these I would place first the recommendation that he take a ten days' or fourteen weeks' short course in some agricultural college during the coming winter. Such a use of his time will undoubtedly be very profitable, even if it necessitates selling all his stock, closing up his house and deserting the farm for the winter. By devoting a few months' time to study at some agricultural college, any man who owns a farm ought to be able to get points enough to begin anew and make progress in one year that without such a training would possibly never be made.

Second, intensive farming will undoubtedly help such a farm. The farmer will probably want to know at once what is meant by intensive farming. Briefly, it is accumulating fertility by tilling the land, planting such crops

TIME IS THE TEST

of durability in a high-speed machine like the cream separator. No other machine a farmer uses has harder use. Run twice every day, winter and summer, it must not only do thorough work, but to be permanently profitable, it must be durable.

U.S. CREAM SEPARATORS

are built for long service. A solid, low frame encloses entirely all the operating parts, protecting them from dirt and danger of injury. The parts are few, simple and easy to get at. Ball bearings at high speed points, combined with automatic oiling reduce wear as well as insure the easiest operation. Such careful and thorough construction is what enables the U. S. to better

STAND THE TEST

than any other separator. You don't have to buy a new one every year or two. And remember: the U. S. does the **cleanest skimming** all the time. Look into this. Write today for a copy of our handsome, new separator catalogue. Ask for number 81. It is finely illustrated and tells all about the U. S. Address

Are You Looking for Perfection in a Separator?

If so, send for **Free Trial** proposition made only by us—manufacturers of the

National Cream Separator

We want to prove to you that it is in every way the most perfect separator on the market.

It would take too much space to advertise all the good points of the National, but here are a few:

It is made of the most finely tempered steel and best of other materials obtainable, by high-priced, skilled workmen who have had years of experience in the business.

It is built on scientific principles, with absolute accuracy in every detail.

It is a wonderful example of mechanical simplicity, with fewest parts and no complicated mechanism.

It never gets out of order if handled with ordinary care, which means saving of repair bills.

It only has two parts to clean, which don't take 5 minutes—others have from 5 to 40.

It does its work quickly—no lost motion—parts all working in perfect harmony.

It is the easiest in the world to operate—runs so lightly and smoothly that a child's strength is enough to turn it.

It is most convenient—the top of milk can be only four feet from the floor—does away

with high lifting of heavy buckets.

The National gets all the cream with less effort and more quickly than any other separator on the market.

It leaves the cream in perfect condition to produce the highest quality and largest quantity of butter.

It brings immediate gains and pays for itself with only three or four cows in a very short time.

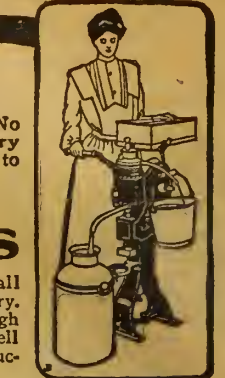

It is the most durable separator made and you can use it ten years from now as well as today.

In every detail the National represents the highest possible stage of perfection in a separator, and we'll prove it if you will only give us a chance.

You can learn still more about the National if you send for our free Catalog and Dairy Guide—the most valuable book of its kind ever published.

Address nearest office, ask for No. 109.

THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or

HILLCREST Butter-berd Holstein Bull Calves. The best money maker to head dairy herds. Write to-day. No females to sell. G. C. Mosher, 605 Bryant Bldg., Kansas City, Mo.

and feeding such grains as will constantly increase the fertility of the land without exhausting it by selling crops. Dairying is the best line of farming to accomplish this end. There is no good reason why the number of cows cannot be gradually increased and when nothing but cream or butter is sold from the farm, these cows will be one important factor in contributing to the fertility of the soil. There is a farm in this state where a man keeps

sixty head of cattle on sixty acres. He sells cream only, and has kept this up for years. Feeding silage and buying such feeds as bran, oil meal and gluten meal, which are good milk producers, aid greatly in improving the fertility of the soil.

The building up of a farm from a run-down condition to one in which one cow per acre may be profitably kept is in some cases a slow process, but the quickest way to accomplish it is to

devote one's mind to the task, and as I have already suggested, begin this mind training by taking a short course in some agricultural college.

The question of selecting a breed of cows for any farm or farmer is about as hard, if not harder, than advising at long range what to do with the farm. In this case, one of the four dairy breeds will undoubtedly be the best for him to choose, but which one is a question that must be decided by the man himself. It certainly is a great deal better for a farmer to handle the particular strain of stock for which he has a fancy, than for him to attempt to stock his farm with a breed for which he has not this individual preference.

CHEESE-MAKING SIMPLIFIED.

We cannot urge it upon our readers too much to make their own supply of cheese. At twenty cents a pound for only a fair grade article, the farmer, or his wife, or one of the older children, can well afford to spend a few hours and spoil a few pails of milk in learning to make this splendid article of food.

Two new discoveries have greatly simplified the making of cheese. Formerly the curd was put in a mold and pressed, but now after the curd has drained as much as possible it may be pressed into oiled tin pails and placed upside down so as to drain for several days. Then the top may be sealed over with melted paraffine as one would fruit. In this way the bother of oiling or buttering the rind is done away with and there is much less waste to the rind. When the cheese is ripe it may be cut out of the pail as used and there will be little opportunity for it to dry out, as if it were fully exposed to the air.

We have tried this plan and know it will work and simplify matters much. Ordinary gallon sirup pails were used, while a potato masher packed down the curd in the pails.

Cheese may now be cured at comparatively low temperatures. This will make it possible to cure the curd in winter, placing it on clean shelves in the cellar, where the temperature will be quite uniform. As low a temperature as 40 degrees has been found to produce a nicely cured curd, though, of course, more time was required. Our first cheeses were made with a list of apparatus no more extensive than a galvanized tub for the vat, a wire toasting screen for the curd cutter and a cider mill for the press, though even a rail or plank will do the work, placing the

press under and near one end, which is shoved under some stationary object.

Do not expect to make a prime cheese at the first attempt. There are many details which will seem to make the process complicated at first, but a few times through will make the work rather enjoyable. Since from eight to ten pounds of cheese can be made from 100 pounds of milk, it will be immediately seen that milk made into cheese will bring a good price.

The busy season will soon be at an end on the farm, so secure some simple directions found in almost any good cook book or in bulletins, start with inexpensive apparatus and you will be surprised when you cut the first cheese in several months what a good job you can really do. Cheeses that are not so good in flavor can be used in omelets and scalloped dishes.

McNeil Bros.' Duroc Sale.

One of the most successful sales of Durocs throughout the entire season was that held by Messrs. McNeil Bros., of Bowen, Ill., on Tuesday, October 30th. This firm have been among the best pushers of the Duroc business. If an animal suits them, it is not a question of price with them, but the fact that an animal will add strength to their herd. They have been good buyers and liberal bidders at many of the best sales of the middle West and own one of the best herds in the country. A large number of breeders from Iowa, Nebraska, Indiana, Missouri, Kansas and Illinois, were present, while other states were represented by mail bids. Col. F. F. Luther, in opening the sale, called attention to the growth and uniformity of the type, color and conformation of the offering. Mr. H. E. Browning, of Hersman, Ill., the well-known breeder of Durocs, topped the offering, paying \$400 for a fall yearling gilt by The Great Conqueror. Mr. H. B. Louden, of Clay Center, Neb., secured a hargain in a spring gilt by Cantine Boy at \$150 and was a liberal bidder on the entire lot. Mr. Ed A. Baxter, of Pawnee, Ill., secured another good hargain in a March spring gilt by Hanley at \$92.50. Hanley is proving himself a breeder of the best class and the breeders were quick to secure his get at remunerative prices. Messrs. Cutler & Cooper, of Ferris, Ill., secured a daughter of Hanley at \$100 and another went to Mr. B. W. Hale, of Laddonia, Mo., at \$97.50. Col. Fred Reppert, of Decatur, Ind., assisted Colonel Luther in disposing of the offering. An average of \$70.50 was secured on the entire offering. A list of animals sold follows:

O. L. Kerr's O. I. C. Sale.

Mr. O. L. Kerr's sale of O. I. C. winners and descendants of winners was held at Independence, Mo., on Friday, November 2d. Unfortunately Mr. Kerr was not able to attend the sale on account of sickness, he having been a very sick man for the past ten days. No one knows the O. I. C. better than does Mr. Kerr and his explanations of his various reasons for mating certain hogs in order to further the improvement in the O. I. C. would have added many dollars to the total of the sale. As it was, Mr. Kerr's brothers, the auctioneers and the newspaper men worked in harmony to make this sale a success. Several animals that should have sold up in three figures went for less than \$100, yet on fifty-five head an average of \$12.12 was made. The champion boar, Kerr Garnett, topped the sale as was expected, going to Mr. John Cramer, of Beatrice, Neb., at \$625, the record price for an O. I. C. boar. Mr. Cramer and Messrs. Blodgett Bros., of Beatrice, Neb., work together and will own Kerr Garnett jointly. Mr. G. W. Mathews, of Grant City, Mo., held the best hind under the \$625 and would have bought Kerr Garnett, but he owns a full brother to him. A mail bid of something over \$500 was sent by Ohio parties. New York, Ohio, Iowa, Nebraska, Kansas and Missouri furnished the buyers. A representative of this paper called on Mr. Kerr after the sale and at Mr. Kerr's request we take this means of thanking those who attended and helped to carry his sale through successfully. Following is a list of all sales of \$25 and over:

Lot.		Price.
1.	Champion boar, Jno. Cramer, Beatrice, Neb.....	\$625
2.	Frank Schwietterman, Montezuma, Ohio.....	29

Iowa Stock Food

FREE!

To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing.

Gentlemen:—
I purchased some of the Iowa Worm Powder last February and I don't think I ever made a better investment. The Iowa Worm Powder can be depended upon. I had some of it left that I fed to my spring pigs and it surely done the business.
I gave your Mr. Deal an order today for some more of the Worm Powder, as I want it on hand. An occasional feed of it keeps the worms from accumulating in my pigs. Feeding to prevent sickness beats curing after pigs are sick. Most of the pig losses are due to worms and the Iowa Worm Powder is sure death to worms.
Truly yours,
Alex. Norman.

Castle's Duroc Sale.

Messrs. E. M. Castle & Son, of Joy, Ill., held their first annual sale of Duroc Jersey hogs at the sale pavilion of Mr. A. G. Bridgford, on October 16. A large crowd of breeders and farmers were present and a quick, snappy sale resulted in an average of nearly \$24 on fifty head. Colonel McGowan, in opening the sale, called attention to the increased value of the pork products the past season, and the popularity of the Duroc. He was assisted by Col. C. C. Kell, Mr. E. B. Conkling, of Mediapolis, Iowa, topped the sale, paying \$80 for a spring boar by Tip Top Notcher. Messrs. A. W. Harris & Son, of Morganfield, Ky., topped the female portion of the auction, paying \$50 for a daughter of Royal Plummer. List of animals selling for \$20 or over appears below:

OUR COUNTRY'S SCOURGE—CATARRH.

This great country of ours would be ideal to live in, were it not for the sudden changes of temperature, which produce many and complicated diseases—the commonest of all is catarrh, which very frequently leads on to that scourge of our climate, consumption. There are many great and noble men, devoting their lives to the bettering of humanity, by curing this disease. One man stands out from all others—Catarrh Specialist Sproule; a true and genuine benefactor, who has perhaps cured more cases of catarrh than any man living. We publish his announcement on page 12 of this issue. It will be well for all catarrh sufferers to avail themselves of his generous offer.

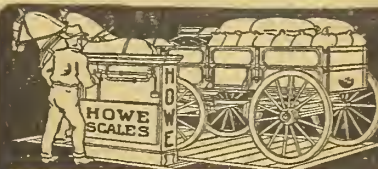

Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

Iowa Dairy Separator

Write today for catalog 25, and let us send you plenty of proof to back up all we say in this advertisement. Separator made in all sizes from 250 to 750 pounds. Invest one cent in a postal card and learn how to save \$100. Do it today.

Clean Skimming Means Good Living

The hog trough is no place to put butter.

Wide awake farmers want the cream separator that skims the cleanest. It means more profit—better living. That separator is the Sharples Dairy Tubular—the separator that's different.

Sharples Dairy Tubulars have twice the skimming force of any other

separators—skim twice as clean. Prof. J. L. Thomas, instructor in dairying at the agricultural college of one of the greatest states in the Union, says: "I have just completed a test of your separator. The skimming is the closest I have ever seen—just a trace of fat. I believe the loss to be no greater than one thousandth of one per cent."

That is one reason why you should insist upon having the Tubular. Tubulars are different, in every way, from other separators, and every difference is to your advantage. Write for catalog S-12 and valuable free book, "Business Dairying."

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

BANKRUPTCY—MISTAKEN ANSWER.

Mr. C. W. E. Snyder, Belle Plaine, Iowa.—I am an interested reader of your paper, especially of the legal notes, and believing that it is a good department for your readers, I would call your attention to the issue of October 18th, 1906, under legal notes where-in it is stated that a person engaged chiefly in farming and the tillage of the soil cannot become a voluntary bankrupt. I think your editor on re-examining will find that the law is that such a person cannot become an involuntary bankrupt. It is possible that some of your readers, relying on your statement of October 18th, might be deprived of this privilege, believing that the statement was correctly made in your paper.

Answer.—Mr. Snyder is correct. A person engaged chiefly in farming or the tillage of the soil can become a voluntary bankrupt, but cannot be adjudged an involuntary bankrupt. We thank Mr. Snyder for calling our attention to the matter.

TELEPHONE DISCRIMINATION.

A Subscriber, Jones county, Iowa.—Is there any law requiring interstate telephone companies to afford connections with farmers' telephone lines when they meet in the country?

Answer.—Section 2161 of the Code of Iowa provides that if any telegraph or telephone within the state, or the person having the control or management thereof, refuses to furnish equal facilities to the public, and to all connecting lines for the transmission of communications in accordance with the nature of the business which it undertakes to carry on, it or he shall not be entitled to the benefit of the laws giving to such companies or persons, rights of way and other privileges. The law is loosely framed, and the penalty for its violation is difficult of enforcement.

WILL—INSURANCE—GUARDIAN.

A Subscriber, Newton, Iowa.—A has three life insurance policies, one of them names his wife as beneficiary; another names a daughter as beneficiary, and the third names his estate. Can A by his will constitute a certain person as guardian of the daughter in case she is a minor when A dies, such guardian to take charge of the insurance money coming to her by virtue of the policy?

Answer.—In case the daughter beneficiary should be a minor when A dies, a guardian would have to be appointed for her by the district court, and the insurance company would have to pay the amount of the policy to the guardian. Now as to whether the court would appoint the person whom A named in his will as such guardian, depends upon circumstances. If such person was shown to be reliable and honest, financially responsible, able to give a good bond, and otherwise a proper person, the court would most likely appoint him guardian. A guardian of a minor gets his legal power to act, not from a will, but from the order of the court appointing him.

BOUNDARY LINE—PROMISSORY NOTE.

A Subscriber, Guthrie Center, Iowa.—(1) A owns eighty acres of land, B and C own forty acres lying east of A's land. There is no corner stone or other mark at the middle of the quarter section. B claims that the line should be about a rod farther west than it now is, at the center of A's eighty, and he wants to hire a surveyor to fix the corner. A wants to measure the land and fix it up without the expense of a survey, but B claims that will not be legal. Can B have a survey made and change the line and move the partition fence to such line without A's consent? (2) A bought eighty acres of land and gave his note and mortgage to B, the note being made payable at a bank in this county. B resides in Minnesota. By the terms of the note A can pay any or all of it on the first day of any year, at his option. Should A require B to send the note to the bank when he makes payment on it, so that he can see for himself that such payments are properly credited on the note?

Answer.—(1) If A will not consent to changing the boundary line, B cannot have it changed or the fence moved by merely having a survey made. The only way to change a boundary line, where one of the parties refuses his consent, is to bring a suit in the district court for that purpose, and then if the old division line has been recognized for more than ten years as the boundary line, the suit would fail. (2) A should insist that the note be sent to the bank when he pays money on it, so that he can see that the payment is properly credited on the note. It is the only safe way. When the day arrives that it is

YOU WANT THIS FREE BOOK

Here is a book—yours for the asking—which should be in the hands of every progressive farmer in America. From cover to cover it is brim-full of facts of vital importance to you. It comes from the greatest independent telephone house in the world—the house that has been most instrumental in bringing the blessings of the telephone to hundreds of thousands of farm houses all over the land. It shows you how simple and easy and inexpensive it is to own a

Stromberg-Carlson Telephone

system—a system that is a money-saver every hour in the day—a convenience and comfort you shouldn't even try to do without, and a protection against sickness, robbery, danger and fire that pays back its trifling cost over and over and over again. You owe it to your business and your family to get this book at once and read every line in it. Your letters will get personal attention and you'll have the help of experts from this great factory in every move you make toward owning a telephone. Sit right down now and say: "Send me your 52 page booklet G12 'How the Telephone Helps the Farmer.'"

Stromberg-Carlson Telephone Mfg. Company

ROCHESTER, N. Y.

CHICAGO, ILL.

due, offer the money at the bank and demand credit on the note, before the money is turned over.

UNITED STATES LAND OFFICES.

An Old Subscriber, at Nichols, Iowa, wants to know the names of the towns in the various states where United States land offices are located.

Answer.—There are 117 towns where United States land offices are located. These towns are scattered about over twenty-nine states and territories. It would require too much space to mention all these places. If our correspondent will be a little more definite and specific as to what particular region he has in mind, we will gladly furnish him information.

AVOID A LAWSUIT.

Mr. D. H. Leshner, Robins, Iowa.—About three years ago the proprietor of a furniture store agreed to sell for me on a commission of 5 per cent three show cases, which I then put into his possession for that purpose. He was not to sell them for less than \$7 each. Soon afterwards he sold one of them and paid me the net proceeds of it. Sometime after that he was burned out and claimed that one of my show cases was destroyed, but he saved the other. Later he claimed that I had never brought him but two cases, that he sold one and his clerk one, and that he had fully settled with me for both of them. This is not true. He settled with me for but one of the cases. I have a dozen or more witnesses to the transaction. (1) Can I recover the value of the case he refused to settle for? (2) Can I prosecute him criminally for his outrageous conduct? (3) Would it pay me to go to law about it?

Answer.—(1) You can recover the value of the case if he has sold it, by a law suit. (2) We think not. (3) It would not. Your lawyer's fee would be more than your claim.

Thomas & Hogsett Duroc Sale.

One of the snappiest Duroc sales of the season was held at Golden, Ill., on Thursday, October 25th, by Messrs. Thomas & Hogsett. These two gentlemen have been among the best buyers of past seasons. Careful selections in making purchases has resulted in most excellent herds and the stock presented to those present sale day was truly appreciated. All stock cataloged, with the exception of one, was sold, and an average of \$66.75 was secured on thirty-seven head. Mr. A. M. Peck, of Clayton, Ill., a comparatively new breeder, topped the sale, paying \$225 for a daughter of Big I Am (now dead), one of the best sons of Buddy K. IV., champion Illinois State Fair 1905 and second-prize aged boar in 1906, and out of a sow by Tip Top Notcher. Mr. S. R. McNulty, of Golden, Ill., secured a litter sister at \$200, also a daughter of Ambition at \$130. Colonel McGowan opened the sale with a strong plea for the betterment of stock throughout the country and was assisted by Colonels Reppert, Keil and Reynolds in conducting the sale. A list of animals selling for \$25 and over follows:

ONE WAY SETTLERS' RATES.
To points in Nebraska, eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

LAMENESS.

I have a gray horse eight years old, weighing 1,300 pounds, that is lame in his right leg. I think it is in the shoulder. I have put a seton in shoulder two different times and when I do this he gets over his lameness, but when the wound heals it comes back. He steps with his foot forward and when he picks it up he rolls it back. He has been a little lame for six months and there appears to be fever in the shoulder joint.

'Clip hair from shoulder joint and blister severely with cerate of cantharides; then allow one month's rest in box stall.

COUGH—TUMOR—DIRT EATING.

(1) I have a spotted cow four years old that has been coughing for two or three months. I thought perhaps it was caused by the hot weather, there being no shade in the pasture, but she still keeps it up. She looks well and has a good appetite. Her bowels seem to be regular and also her kidneys. I fed her a little corn all summer, as the pasture was short. What can I do for her? (2) I also have a sow that has a bunch in one of her teats. It came there about two months ago when I weaned her pigs. It is about the size of a man's fist and is all raw on one side. What can I do for it? (3) What do pigs want when they eat dirt? Is it a sign they have worms? If so, what can be done for them?

(1) Have the cow tested with tuberculin, for should she be proved by this test to have tuberculosis, you would not want to use her milk or have her among your cattle. For cough, you would find ounce doses of glyco-heroin highly effective, but no medicine should be given in a chronic case of cough in cow before testing with tuberculin. (2) The tumor is due to the fungus known as "actinomycosis," causing lumpy jaw. It would be best to have it cut out by a veterinarian. (3) Dirt eating indicates depraved appetite, and may well indicate presence

of worms or other cause of indigestion. Stop feeding corn and substitute a nitrogenous ration including middlings, tankage and flaxseed meal. Give a teaspoonful of turpentine in milk or slop three mornings in succession for each eighty pounds live weight of pigs treated. Charcoal, wood ashes and lime should be freely supplied to all hogs.

WORMS.

Please give remedy for worms in young shoats through your Veterinary Department. They cough considerably. I have fed stock food and other remedies, but to no avail.

Give the pigs three mornings running a teaspoonful of turpentine per eighty pounds live weight. Mix the medicine in slop and the pigs will take it readily if hungry. Sulphate of copper may also be used as so often advised in the columns of this paper. In connection with the treatment of worms, care also should be taken to perfectly cleanse water and feed troughs; also to clean up, disinfect and whitewash the pens. Clean quarters for hogs tend to prevent worm trouble.

SPLINTS.

I have a bay mule two years old that has a bunch on the inside of each fore leg; the bunch is two or three inches long and one inch wide and is hard. It has been coming on for the last six months. Can you give me a remedy?

Although you do not say so, we presume the "bunches" are located just under the knee, on cannon bone, and in that case they would constitute splints and we would advise you to treat them by clipping off the hair and painting with tincture of iodine every other day. When skin becomes irritated, stop painting and apply lard once daily until skin is sound again, when the painting may be commenced again if found necessary.

LAMENESS—TUMOR.

I have a gray mare eleven years old that has a colt four and a half months old. A mare kicked her while working on the binder two months ago and the left hind leg swelled some next day from hoof to knee. In a couple of days the swelling was gone. In about a week she began to limp. The trouble seemed to be in the hip; then the whole leg seemed to grow gradually stiff and swelled some above the knee. Four weeks ago I called a veterinarian and he said it was a sprain in the hip. He used a blister. The swelling is going down, but leg is stiff and muscles of the leg are shrinking badly. The mare runs in the pasture and eats well, but is thin. I am not feeding grain. What can I do for her? Shall I feed grain, wean the colt and keep her in when cold and wet? I was afraid to keep her in the barn. Shall I keep her in at night? (2) I have an eighteen-months-old red steer that had a round lump the size of a small plum under its jaw when born. It has always been healthy and grown well. The lump is now as large as a goose egg, is round and seems all on the outside. There is no other swelling. It is about half way from the nose to the throat. The lump hangs down as in a sack and is about as hard as ordinary flesh. Can I remove it?

(1) Wean colt and feed mare well on oats and hay, adding a bran mash twice a week and giving carrots if obtainable. The recent swelling of the leg probably was due to lymphangitis from standing in barn for a day or two while heavily fed. Have her teeth put in order by veterinary dentist. Stop treatment of leg. If lame when in good condition remove hair from hip joint district and blister well with cerate of cantharides. (2) The tumor may be a "cyst" filled with hair and sebaceous matter. If it can be pulled away from skin so that a string could

You Can Increase Your Feeding Profits

YOU can increase your feeding profits, make more money in less time, and keep every animal on your place in a vigorous, healthy condition, by regularly adding a little Standard Stock Food to the ration.

* * *

Let us tell you what Standard Stock Food does.

A very little of it flavors the entire ration and makes it taste good.

It stimulates the flow of all the digestive juices, enabling the animal to digest its feed more easily, more quickly and more thoroughly so that it gets a large percentage of nutriment from the feed.

It decreases the waste and increases your profits, because it makes every pound of feed you feed go farther.

It tones and invigorates the entire system and puts every unthrifty animal in a thrifty condition. It makes a horse work better; a cow give more and better milk; a steer, a hog or a sheep take on more flesh and finer finish; a colt or calf grow more rapidly.

It makes stock thrive.

made, whether it costs 5c or 15c a pound.

You can easily prove this to your own satisfaction, simply by examining various stock foods and their manufacturers' directions for feeding.

The Standard looks better, smells better, tastes better,

at least cost.

We urge you to investigate before you buy.

You can see for yourself why the Standard gives so much better results.

You run no risk for we sell you on our Square-Deal, Money-Back Guaranty.

We have more than 400,000 satisfied customers who have proved that "It Makes Stock Thrive."

Go To Your Dealer

and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

FREE TO YOU.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

Standard Stock Food

"It Makes Stock Thrive."

And you can use the Standard at less cost to you than any other stock food, because a dollar's worth of Standard Stock Food contains more feeds, will go farther, last longer and produce more and better results than a dollar's worth of any other stock food

ter and is better—stronger, richer, more concentrated—and a much less quantity of it is required at each feed.

That's why it lasts longer and costs you less per animal per month.

It gives the best results

Standard Stock Food Co., 1516 Howard St., Omaha, Neb.

LIFELONG CURES BY A TRUE SPECIALIST

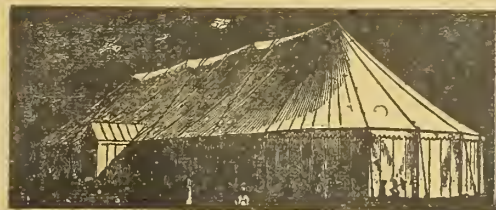

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and proves that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

FLESH CONDITION OF FATTED FOWLS.

In fattening fowls it is necessary to know the influence of feed on the system, because if this is not known and provided for, there is a probability that mistakes will be made, or that the best results will not be obtained. It is possible to add greatly to the weight of fowls by feeding food that is rich in carbo-hydrates, like corn, but the results are often unsatisfactory. The oily, yellow fat produced by feeding corn is objectionable in appearance, and if a bird so fattened is roasted, a greater part of it is lost in the dripping pan. It is not thought desirable to add fat to the system beyond a certain degree.

The food employed chiefly in England consists of ground oats. Not oat meal or partially-ground oats—the oats, hull and all, are ground to the fineness of flour. In Belgium, the feed consists of ground buckwheat, and in France it is ground barley. Of the ground oats a great deal can be said in its favor. It contains 6 per cent of fat and plenty of phosphates or limey matter, which go far towards whitening the flesh. Buckwheat ground is not considered quite so good. It is rich enough in carbo-hydrates, but lacks in albuminoids, or flesh-forming elements.

In the countries named where fowls are being prepared for market the flours named are always mixed with milk, but not made sloppy. In England skim milk is used, and also in some parts of France, but in other localities the whey is used for the purpose of mixing the feeds. The butter fat of whole milk is not required.

In all the feeding processes, fat is added to the milk during the last ten days, the object being to soften the flesh and by causing a distribution of the globules of fat throughout the tissues, making it much more palatable and likewise increasing the weight.

PLAN OF POULTRY HOUSE.

Mr. James A. Dvorsky, of Iowa, writes: "Can you publish some sketches of poultry houses and give some information as to the construction of a handy house about 16x18, or larger? I desire to build a house that is easy to keep clean."

We present herewith two illustrations showing the exterior points of construction

tion and also some points as to ventilation without which it will be impossible to keep the houses sweet and clean, no matter what the arrangement of roosts and dropping boards.

In the first illustration will be seen a perspective view of a house that can be built of the size mentioned by Mr. Dvorsky, or it can be built larger. In building this house we would put the lower side, containing the four half windows, on the south side and would have the entrance door in the east if possible. The scratching portion of the house of the day quarters of the fowls when confined in bad weather should be next to this row of windows and the roosts with dropping boards on the other side and also the nest arrangements. The door should be provided with screen, shown in the illustration, which can be covered with boards or tar paper in the winter. In summer by having the door constructed in this manner it will exclude vermin and at the same time admit of cool air so necessary during summer nights.

In the second illustration can be seen a common method of construction, the houses being seven feet high in front and four in the rear, making them ten feet wide and long enough to hold all the fowls that one wishes to keep. As many windows as may be necessary can

FREE ADVICE ON CURING CATARRH

CATARRH SPECIALIST SPROULE. Read these questions carefully, answer them yes or no and send them with the Free Medical Advice Coupon to Specialist Sproule. You will receive a careful diagnosis of your case without its costing you a cent.

Is your throat raw?
Do you sneeze often?
Is your breath foul?
Are your eyes watery?
Do you take cold easily?
Is your nose stopped up?
Does your nose feel full?
Do you have to spit often?
Do crusts form in your nose?
Are you worse in damp weather?
Do you blow your nose a good deal?
Are you losing your sense of smell?
Does your mouth taste bad mornings?
Do you have a dull feeling in your head?
Do you have pains across your forehead?
Do you have to clear your throat on rising?
Is there a tickling sensation in your throat?
Do you have a discharge from the nose?
Does the mucus drop in back of throat?

Answer the questions I've made out for you, write your name and address on the dotted lines in the Free Medical Advice Coupon, cut them both out and mail to me as soon as possible. I will cost you nothing and will bring valuable information. Address Catarrh Specialist SPROULE, (Graduate in Medicine and Surgery, Dublin University, Ireland, formerly Surgeon British Royal Naval Service), 413 Trade Building, Boston.

Don't suffer with Catarrh any longer! Don't let it destroy your happiness—your health—your very life itself.

Don't waste any more time—energy—money, in trying to conquer it with worthless nostrums.

Don't think it can't be vanquished just because you have not sought help in the right place.

Write to me at once and learn how it can be cured. Let me explain my new scientific treatment—perfected by myself—used only by myself. Thousands of persons, many of them living right near you, testify it has cured them absolutely—completely—permanently.

Catarrh is more than an annoying trouble—more than an unclear disease—more than a brief ailment. It's the advance guard of Consumption. Neglected Catarrh too often becomes Consumption. It has opened the door of death for thousands. Take it in hand now—before it's too late.

I'll gladly send you a careful diagnosis of your case and give you free consultation and advice. It shall not cost you a cent.

LET ME TELL YOU JUST HOW TO CURE CATARRH

Let me show you what I'll do for you entirely without charge. Thousands have accepted this offer—today they are free from Catarrh. You've nothing to lose and everything to gain. Just for the asking you'll receive the benefit of my twenty-one years of experience—my vast knowledge of Catarrh and the way to cure it.

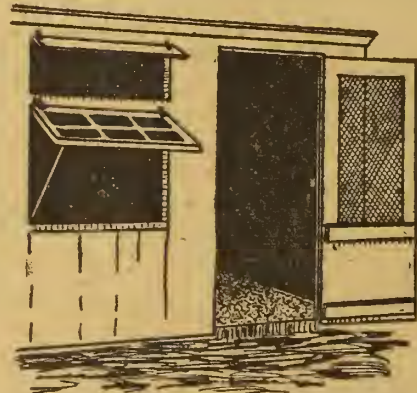

FREE MEDICAL ADVICE COUPON

Catarrh Specialist SPROULE, 474 Trade Building, Boston, please send me, entirely free of charge, your advice in regard to the cure of Catarrh.

NAME.....

ADDRESS.....

be put in houses of this character, the one in the illustration showing the manner of construction. The opening where the sash is located should be covered with poultry netting and the opening above the sash is placed there to assist in ventilation. The sash is also hung on hinges so it can be opened when necessary and may be propped up or fastened in any way ingenuity may suggest.

The later houses are built largely of rough lumber covered with building papers of various sorts. The roof is often made of tar paper or some other kind of roofing material that will make the house both dry and warm.

For purposes of cleanliness have a dropping board of some kind under the roosts placed in such a manner that it can be cleaned often and without much trouble. Provide plenty of light, but not too much so as to make a house too cold in winter.

A. J. Russell & Son's Duroc Sale.

Six successful sales now stand to the credit of this firm. The last, held at Young's Pavilion, Corning, Iowa, on October 27, 1906, brought out a large crowd of buyers largely from Iowa and Missouri. After an exhibit of a litter of Proud Advances the selling was started by Colonel Piper, assisted by Messrs. E. B. Piper and A. C. Mans-

field. The following is a list of animals that sold above \$25:

Lot.		Price.
3	Gilt by Proud Advance, E. A. Poush, Charlton, Iowa	\$2.50
2	Gilt by Proud Advance, E. A. Poush, Charlton, Iowa	52.50
1	Gilt by Proud Advance, E. D. Harris, Fontanelle, Iowa	51.00
6	Gilt by Proud Advance, Earnest Humbert, Corning, Iowa	60.00
6½	Proud Advance boar, Ralph Bristow & Youstin & Co., Corning, Iowa	100.00

WINTER VISITORS. WEEK END RATES.

Commencing November 3d, and each Saturday and Sunday thereafter until December 16th and from January 6th to March 31st THE CHICAGO, GREAT WESTERN RAILWAY will sell tickets to points in Iowa at one fare for the round trip good to return until Monday following. Rates apply to points as far north as Bristow, New Hampton and Onelda and south as far as Blockton. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Ia.

THREE THROUGH TOURIST CARS TO CALIFORNIA

The Chicago Great Western Railway offers choice of three through tourist sleeping cars to California each week via different routes. One car goes via Kansas City and Santa Fe route one via Kansas City and Rock Island El Paso route and one via St. Joseph and Santa Fe. No other line offers such a choice of routes. For full information apply to E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Transplanting Large Trees.

To the Editor of The Homestead:

Of late years the transplanting of large trees has passed from the experimental stage and can be undertaken with as much assurance of success as any other tree planting venture. In all large cities there are persons who make a business of this work, and landscape gardeners have arrangements with these tree-movers to put in large trees wherever their plans are adopted calling for them.

Moving trees which are too large for ordinary transplanting does not require more than ordinary care and skill and can be done by anyone having the necessary equipment. There are details, however, which must be attended to carefully and upon which the success of the venture depends.

The method is to remove the tree with a sufficient block of earth upon the roots so that it will not suffer by reason of the disturbance to the root system. Ordinarily the work must be done when the ground is frozen, and that is the only way to get sufficient earth to cling to the roots. A trench three or four feet deep is dug around the tree at a sufficient distance to allow a good portion of the roots to remain intact. This is done as late as possible before the ground freezes, and as a matter of convenience the hole which is to receive the tree is also dug at this time. As soon as the block of earth surrounding the tree is frozen sufficiently, it is broken off and preparations made for removing it to its new location.

The common method is to set a pair of trucks on either side of the tree or to remove the reach from a strong wagon and place the wheels in that position.

Two heavy timbers are laid across from truck to truck, one on either side of the tree. The lifting is done by means of log chains and jack screws or block and tackle. Where a strong derrick is available very low trucks may be used and the tree raised high enough to allow the roots to rest upon the timbers. Otherwise, the wheels must be high enough to allow the tree to be suspended with most of the block of earth below the timbers. It is often expedient where the trees are quite large to use three sets of trucks and make a triangular formed rack instead of using only two of the timbers.

In adjusting the chains care should be exercised to put them on so they will not slip off. When everything is ready the tree is raised as high as necessary, secured so it will ride safely and removed to the place where it is to be transplanted, where a hole has been prepared to receive it.

In filling in around a transplanted tree, the earth should be packed in as firmly as possible. This for two reasons, namely; the roots have been necessarily exposed to more frost than ordinarily, and if the earth is made firm they will soon thaw out and resume their natural condition. Again, the roots will dry out badly if they are left exposed. The work should not be done on a very cold day, as there is much danger of the branches of the tree breaking if they are frozen through. If any pruning is needed by a tree which is to be removed, it should be done in the fall before hard freezing weather and the wounds carefully covered with a thick paint made of linseed oil and white lead.

Polk County, Ia. Franklin Brown.

Making Home Attractive.

Do you love music? Do you enjoy entertainment? Do you want to make the home cheerful? Are the advantages of the concert, the lecture course, or the recital out of your reach? If such is your case then do not become discouraged with your lot. There are hundreds and

HEAT YOUR HOUSE STORE, CHURCH or SCHOOL HOUSE WITH

Bovee's Compound Horizontal Furnace Radiator 11 YEARS on the MARKET.
THOUSANDS IN USE. BURNS ANY KIND OF FUEL.

Having BOVEE'S Improved Hot Blast Ventilating System and Return Circulating Radiator, which gives perfectly pure air and saves One-Third of the Fuel. Any handy man can properly install one of these furnaces with all connections in a short time. These furnaces absolutely make the best and most durable heating plant in use. Everything guaranteed to be first-class. We can save you 40 per cent on the cost of your heating plant, our price being but little more than good stoves. Send for catalog. We have the largest and best line of furnaces in use, including our Celebrated WATERLOO Furnace, complete for \$43. Manufactured and Sold by the BOVEE GRINDER & FURNACE WORKS, WATERLOO, IOWA.

hundreds of people in a similar position. They are over-coming these drawbacks daily. Would you know how? Their solution of the situation is no secret. In fact, they are proclaiming it to the world daily in letters paying high tribute to the Edison Phonographs. Mr. Edison's latest improved machines combine all the new and important features of phonograph construction. You can now select from fifteen hundred records which will insure you a choice collection. Waltzes, marches, concert pieces, minstrel dialogues, vocal solos, speeches and lectures can all be reproduced from the best artists and speakers in the world right in your own home. The means of obtaining one of the phonographs is within the reach of all. A free trial is now offered, and if everything proves satisfactory the payments may be made in instalments. If interested write for catalog and list of records to Frederick Babson, Suite 3248A, 149-150 Michigan Ave., Chicago, Ill. The advertisement appears on page 7. In writing please mention this paper.

HOMESEEKERS EXCURSIONS.

DON CARLOS 33734

For ten years Don Carlos 33734 (the subject of the above illustration), the greatest son of Anxiety 4th, did service in the herd of Herefords owned by Messrs. Gudgell & Simpson, of Independence, Mo. It was in 1893 when seven years of age that Don Carlos was first brought into prominence through the showing made by himself and his get at the Chicago World's Fair. Some 200 of his sons and daughters were also commanding the attention of all lovers of the "white face." Messrs. Gudgell & Simpson realized that Don Carlos would not live forever, and to succeed him in the herd his best son, Beau Brummel, was selected and reserved. His record as a sire was even greater than was the record of Don Carlos and Anxiety 4th. When mated with the get of his sire and grandsire Beau Brummel produced some of the greatest bulls and cows known to the breed. This convinced Messrs. Gudgell & Simpson that the concentration of the blood of Anxiety 4th was necessary in order to perpetuate the more modern type of Hereford, hence sons and grandsons of Beau Brummel have been retained in the herd, used on the get of their sire, grandsire and great-grand sire with such good results that in the big shows of today more of the blood of Anxiety 4th concentrated through sires and dams is found than is found of any other strain. On Tuesday, November 27th, at South Omaha, Neb., fifty head of these Anxiety-bred Herefords will be offered by Messrs. Gudgell & Simpson. See page 40 for advertisement.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

BREEDING SEASON.

The breeding season is now fairly upon us. Ewes that are mated to a ram in the month of November will yearn in April; to be accurate in this it will require a computation of twenty-one weeks after mating.

It is essential that ewes are in good flesh or in what is known as "coming flesh" when they are bred. Indeed many shepherds resort to what is called "flushing" or forcing them with a rich diet. This brings the sheep up in flesh very rapidly after the period of suckling lambs and it is claimed that they will come in heat earlier and will be in a condition to withstand the ordeal of producing the next lamb crop.

We cannot let the breeding season go by without saying a few words about what should be bred. Experience has taught many sheep men that it does not pay to breed ewe lambs. In all flocks an occasional ewe lamb will become suf-

ficiently mature to yearn a lamb in the spring and all may go well, but where one ewe lamb like this can be found there will be several that will not be sufficiently matured. Try to have enough older ewes so that the ewe lambs can have another year's growth before breeding.

Old ewes that have lost their teeth will not be in as good condition as they should for breeding unless they are given extra care. Such ewes will require extra care all through the period of gestation that they may come to the lambing season in good condition. Sheep with spoiled udders should be sent to the shambles or the fattening pen. They cannot rear a lamb. All broken-mouthed and spoiled-uddered ewes should be put into the fattening pen.

THE SELECTING OF THE RAM AND HIS CARE.

Aside from breed characteristics, the ram should have a wide, deep chest. The front legs should be wide apart and in length should be short and the bone heavy. If these qualities come up to the desired point, it is safe to guess that the remainder of the body will be right. The head of the ram should be broad, heavy and thick, possessing masculine qualities and a good neck is pretty sure to go with such a head.

Size should be a matter of some consideration if common sheep are to be improved. A pony ram sometimes produces rangy lambs but more often they fail to do so. A good, large, rangy ram is an animal to be desired if the breeder is after the lamb that goes early to the market. In the selection of a ram for mutton it is unwise to ignore fleece qualities. We would not recommend a selection of a poor ram with a good fleece. Under no circumstances would we want to use a ram with a long neck, narrow chest, pale skin and with dirty teeth. We do not like to have to reduce rams for service. We would not care to take the risk of purchasing an over-fat ram.

The ram will not eat as he should, in breeding season, unless he is managed carefully. If confined in a lot by himself, another lot contiguous to it should be provided where such ewes that come

Now or Never

same fair this year. My Poland Chinas are easy feeders and bulky fellows. For prices write, F. C. THACKABERRY.

NO. 27493, weight 400 lbs. The Champion Oxford, sired 1st prize Buck lamb, 175 lbs., also 1st prize Ewe lambs at Bureau Co. fair. 2d only to State fair, in hot competition. This winning Buck lamb and four more by same Ram for sale, 130 to 175 lbs. weight. Herd Boar 81697, by Chief Perf. 2d 42559, also took 2d at same fair this year. My Poland Chinas are easy feeders and bulky fellows. For prices write, F. C. THACKABERRY.

FAIRVIEW STOCK FARM, TAMPIO, ILL.

in heat will congregate. These can be bred and turned into a separate lot. Two to four ewes can be bred in a day and when given one or two services they should be removed to the "bred" flock. Where there are but a few ewes to be bred, the plan of turning in the ram at night may be as good as any. Some even take the chances on letting the ram run with the breeding flock all the time. During breeding time the ram should have the most palatable and nutritious food possible. He should be induced to eat a good deal or he will run down in flesh.

One breeder keeps his ram up and each morning he is turned into a pen of ewes. When those in heat have been served they are marked with a little paint to indicate they have been bred. Each week the color of the pigment is changed, so that the week they have been bred can be determined. This breeder likes to turn the ram into the pen of ewes better than turning the ewes into the ram. Managed in this way a vigorous ram will serve forty to fifty ewes.

The Voge Duroc Sale.

The recent sale of Duroc Jerseys belonging to Mr. August Voge, Portsmouth, Iowa, was very satisfactory in every particular, and an average of over \$30 was made on the entire offering. A good local crowd was on hand and a good outside attendance. The top price of the sale was for a son of old Top Notcher, No. 1 of catalog. He went to Mr. E. B. Ryan, Neola, Iowa, at \$152. Mr. R. M. Skilling, of Greene, Iowa, came to buy this pig and ram him up to that price. The second highest-priced boar in the sale was No. 26 of catalog. He was a son of the noted prize-winning boar, Junior Jim, and out of a daughter of Golden Perfection, a sow purchased of Mr. Austin Renshaw, Blair, Neb. He went to Messrs. Wellman Bros., Neola, Iowa, at \$72. It was a splendid offering, and Colonel Luther says was one of the best that he has sold this year. Below we list those selling for \$20 and above:

Lot.	Price.
12 Lee Hopper, Neola, Iowa	\$55.00
20 Aug. Sunnland, Harlan, Iowa	25.00
32 L. S. Motter, Woodbine, Iowa	24.00
1 E. B. Ryan, Neola, Iowa	152.00

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy ram and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs., champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros. Kellerton, Ia.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to lead the choicest herds; also 15 young Scotch bulls from 10 to 15 months old. Public sale at Kansas City of 300 Shropshire ewes, November 14th. GEORGE ALLEN, LEXINGTON, NEB.

APPLETON MANUFACTURING CO.
29 Fargo Street
Batavia, Ill., U. S. A.

ADVERTISING NOTES.

Iowa farms, good ones, for sale or for rent by the Allen Land Company, of Laurens, Iowa.

For good corn and wheat land in Nebraska, read the advertisement of Mr. C. W. Lindsey, of Wilson, Neb., which appears on page 22 of this issue.

The Schmeltzer Arms Company, of Kansas City, Mo., have an advertisement on page 4 of this issue of The Homestead that will be of especial interest to any of our readers who devote any of their time to hunting. This company have just issued a large catalog which is No. 932. Write them for it. It will be sent free.

If looking for land, before buying read the advertisement of Mr. L. P. Sargent, of Gibbon, Neb., who has a proposition to offer to Homestead readers in land around Gibbon, Buffalo county, Neb., the center of the Wood River Valley country. He would like to have those who are interested visit him or write for his new list of well-improved farms which he has for sale.

A half interest or all of a good paying hardware, plumbing and heating business is offered for sale in the advertisement appearing on page 13 of this issue of The Homestead, the address of which is W. care of Homestead, Des Moines, Iowa. The reason for placing this stock on sale is that the proprietor has other business interests which compel him to dispose of it.

There are a great many young men leaving the farm nowadays to seek a place in other lines of business. Their inexperience is often a hindrance to success. The man with some knowledge of the business he is about to enter has many advantages over the man not so prepared. Preparation often means success. That is why there are so many training schools for professions. The National Railway Training School, Inc., 21F, Boston Block, Minneapolis, Minn., are offering a good proposition to prospective firemen and brakemen. They give instruction by mail in your own home. They assist you to a position also. See their advertisement on page 16 and mention The Homestead when you write them.

On page 23 of this issue will be found the advertisement of the W. F. Smith Realty Company, of Kearney, Neb., in which they offer western Nebraska lands for sale at prices ranging from \$3 per acre to \$12 per acre. They state that they can supply everyone who is looking for western lands. If a farm or ranch near Kearney will not suit the purchaser, this company can sell him a farm or ranch further on west. They say: "We will have an advertisement in The Homestead at all times and can sell Homestead readers the cheapest lands in the West. We always have a large list of western and central Nebraska lands which we can sell at prices that defy competition. All of our lands are sold on easy terms." Read the advertisement and write Messrs. Smith for their price list of bargains.

EASTERN OKLAHOMA.

With this issue we are starting the advertisement of Messrs. H. C. Pouder & Co., of Perry, Okla., dealers in real estate. They are offering genuine bargains. Look up their advertisement on page 23. They have a neat folder describing Oklahoma and Noble county. Write them. They will gladly send you one. When you write them please say you saw their advertisement in The Homestead.

EXCURSION TO TEXAS.

In this issue Messrs. Boyer & Peterson, of Kansas City, Mo., are advertising excursions to the Panhandle of Texas. This firm have some very fine tracts of land in the Panhandle and are selling them cheaper than the market price. In fact this firm do not ask so much for their lands, which are near the railroad, as others are asking for land a long distance from railroad. It is certainly a big advantage to the buyer to be near the station when grain and stock are to be marketed. Look up Messrs. Boyer & Peterson's advertisement in the Land and Homes department on page 22 and write them if interested in Texas lands.

FARMING AN INEXACT BUSINESS.

Farming is an exceedingly inexact business even when carried on in a scientific manner. Much has been done in the last decade to change conditions on the farm. The farmer now may know quite accurately "where he is at" in many operations. A good scales should be owned by every progressive farmer. It is one of the best business propositions. In this day of careful feeding of animals it is highly necessary to know what gains are being made. To know when to sell and what stock weighs when leaving for market. Learn the weight of grain, hay and everything that leaves the farm. What if the merchant sold goods to be weighed on the purchasers' scales? A Howe Scale, made by

the Howe Scale Company, 50-52 Lake St., Chicago, Ill., will help you to farm more accurately. Their scales have been standard for a half century. Turn to their advertisement on page 9 and please mention The Homestead when writing them.

"PROOF OF THE PUDDING."

Our readers will find in this issue an announcement of the Swain Medicine Company, of Kansas City, Mo., offering to send a fifty-cent box of Swain's Backache and Kidney Pills to anyone who will send ten cents for postage and packing. This is practically giving away a fifty-cent box of this excellent remedy to prove its merits in the cure of all diseases of the kidneys. The remedy is endorsed by physicians and others as being first class. Read this advertisement on page 7 and send for a box.

A BALL-BEARING FEED GRINDER.

The old, slow-working, heavy-draft feed grinder is a thing of the past. Ball bearings have worked wonders in these machines. Twenty per cent more work can be done in the new way. This is the claim that Mr. G. M. Ditto, Box 12, Joliet, Ill., makes for his latest triple-gear ball-bearing grinders. You simply send for one, try it ten days and if it's what it is claimed to be, keep it; if not, you may return it. Now that's fair. Write for the new catalog. See page 10 and please mention this paper when writing.

THE POOR MAN'S COUNTRY.

To those who are living on rented farms or who have only a small tract of land in Iowa or other northern states we wish to say that the south Missouri country offers a chance to make more money without so much worry and hard work. In this issue will be found the advertisement of the Davis Bros. Realty Company, of Kansas City, who are selling land in Pulaski county, Missouri, at from \$5 to \$15 per acre. Land that grows the finest fruit, vegetables, good corn, grass, etc., is surely cheap at this price. Look up their advertisement on page 22.

EASTERN KANSAS FARMS.

We call the attention of our readers to the advertisement in the real estate columns headed "Eastern Kansas Farms" by the firm of Messrs. W. H. Slaughter & Co. The last two or three years have been favorable seasons for the cheaper western land and land buyers have passed over this country for speculative fields. This firm base their preference for their country in the fact that theirs is the home of all tame grasses; that on the return of the dry seasons to the far western lands this rain belt region with its comparatively low prices will be the best thing to be found in farm lands.

NORTH-MISSOURI FARMS.

Among the announcements in the Lands and Homes department will be found that of Mr. Alvin C. Frisbie, 401-B, N. Y. Life Building, Kansas City, Mo. Mr. Frisbie has recently removed to Kansas City and wishes to invest his money in property there. He owns nine farms in north Missouri which he is very anxious to sell and will close them out at bottom prices. Mr. Frisbie is an absolutely reliable man, having been postmaster at Stanberry, Mo., and will give anyone wanting a farm an opportunity to get one for less than its actual value, as he must sell these places to carry out his plans. Write him.

IOWA FARMS FOR SALE AND FOR RENT.

That is the heading of an advertisement appearing on page 22 of this issue of The Homestead that every reader who is considering the advisability of buying or renting a farm in the near future should read. The Allen Land and Loan Company, of Laurens, Iowa, have a number of farms ranging in size from 160 to 320 acres that they are offering for rent for two-fifths of the crop and \$2.50 per acre for pasture and meadow. They also have a number of farms that they are offering for sale at very reasonable prices and on easy payments, possession to be given next March. They have over 100 bargains for cash, right in the corn belt of Iowa, where land is advancing in price. Write them today for catalog and maps, which will be sent free.

HOME, HOME, SWEET HOME.

"How dear to our hearts are these precious words," write Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo. "We have some lovely homes for someone. The land is good, the location ideal and we are going to make someone happy by selling them a beautiful home. Now we are getting letters in every mail asking about these homes. We answer them cheerfully, but it keeps us rustling to find time to answer them all. We have a great many who have promised to come soon and see these farms, but remember the lucky man will be the one who gets a warrant deed from us before the other fellow comes. We could rent these farms every day in the week, but we want to sell, not rent. Everything looks favorable at Elm Grove Stock Farm. We just finished shredding all our fodder, and the big, lusty Short-horn calves, that are coming every day, will certainly not go hungry for a while at least. We have twenty of the best Short-horn hinds we ever raised. Half of them are Cruickshank and extra good ones. Please look up our land advertisement on page 23, and, if interested, write us at once, describing what you want and don't forget to mention The Homestead."

HATCH CHICKENS BY STEAM.

Hundreds of men and women are making money raising poultry for market—why not you? There's money to be made in raising poultry for market. Any man or woman can soon establish a business of their own, and their otherwise unprofitable hours can be put to account with handsome dividends as the result. It doesn't require a great deal of money to start in the poultry business. Even if you have but a small patch of ground you can make it pay. In fact, a warm cellar or garret, and a good incubator, are all you need to start with. If you are interested in poultry raising, write to George H. Stahl, Quincy, Ill., and get a copy of his interesting book on this subject, and which also gives valuable information regarding the growing of incubator chicks for market. This book is sent absolutely free to those who write for it. Mr. George H. Stahl is widely known as the manufacturer of the famous Excelsior and Wooden Hen incubators. These incubators are recommended by leading poultrymen as being the leaders where results are considered, and they are guaranteed by the manufacturers to hatch a larger percentage of fer-

tile eggs at lower cost than any other hatcheries. The Excelsior and Wooden Hen incubators, when in use, require only five minutes' daily attention. They are the simplest, most perfectly self-regulating and lowest priced incubators made, and thousands of them are today in successful use.

NOBLE COUNTY, EASTERN OKLAHOMA.

The home of the happy farmer, is one of the best counties in the new state. It is there that the products of the North are grown successfully. The crops which are grown in Noble county are corn, wheat, oats, cotton, kafir corn, broom corn, melons and all varieties of vegetables. Mr. A. W. Tucker, who has been a resident of Noble county for thirteen years, is offering some choice bargains in farm lands in this section of the new state. Mr. Tucker resides in Perry, the county seat, a thriving city of 5,000 people. He has an advertisement in this issue on page 22. Write him for list and other particulars. Please mention this paper when you write him.

IT REMOVED THE CANCER.

Mr. Harker Lovett, of Toronto, Kan., writes as follows about Gombault's Caustic Balm: "The Lawrence-Williams Company, Cleveland, Ohio: I have used Gombault's Caustic Balm more or less for about twelve years and have had much success. The last bottle saved me about \$14 in my stock, and I fully believe that it cured a small cancer on my wife's hand. My belief is based on personal experience, as my father had had a cancer on his hand a year before and this one was in every particular like it except not quite so large. The balm did the work and it has now been near eight months ago and no traces of it since. For proof of this statement you can write our druggist, Mr. Tom Finley, Toronto, Kan." All druggists carry this in stock. If yours does not, just write the Lawrence-Williams Company, Cleveland, Ohio, and they will tell you how to get it. Read the advertisement on page 27.

FOR GENUINE COMFORT.

For genuine comfort you want a comfortable shoe. Martha Washington's Comfort Shoes are a joy forever. We don't mean that a pair will last forever. But the fact that they are so easy makes it a constant joy to wear them. There is no "breaking in" period of misery for the wearer. Three styles make it possible to insure a perfect fit. The elastic at the sides expands and contracts with the natural motion of the foot. They are just the thing for house wear. They can be worn the year round, for there are different heights. There are no buttons or laces to bother with, which makes them easy to slip on and off. In fact, a pair of Martha Washington's Comfort Shoes are time savers, patience savers and money savers. A beautiful picture is offered on page 16 by the F. Mayer Boot & Shoe Co., of Milwaukee, Wis. It will be sent postpaid for the asking. Please mention The Homestead when writing.

SANTA CLAUS HAS A GUN THIS YEAR.

A special wireless telegram from the North Pole advises us that Santa Claus this year is loaded down with guns, not only for boys and girls, but for the boys and girls of larger growth—in fact, for all who enjoy a life in the open and who desire to train the hand and eye to accuracy in the wholesome sports of hunting and target shooting. We presume that Santa Claus has been stirred up particularly by the advertising of the Stevens rifles and shot guns that are appearing in our advertising columns about this time. If you will take a look at them you will not wonder why Santa Claus chooses Stevens firearms for his presents this year. If you are interested to learn about the wide range of manufacture in Stevens firearms, their high grade quality, popular prices and suitability for young or old of either sex, read the advertisements and send for the handsome Christmas catalog, which they offer. See advertisement on page 26.

SAVING MONEY ON FIRE INSURANCE.

Every little bit helps. "A penny saved is a penny earned." "No-Tar" Roofing will save you money. Not only on your fire insurance premiums, but in other ways. It is a fact that insurance companies generally give cheaper rates on buildings covered with "No-Tar" than on those not so built. Why? Because "No-Tar" is fire proof. Buildings have burned to the ground, but "No-Tar" has remained intact. If you doubt the fact, send for samples and subject them to any test you wish. A large manufacturing concern once did it. Their chief chemist could not make an impression on "No-Tar." It proved to be weather, water, acid, wear and fire proof, a quintet of qualities that give this brand of roofing an individuality of its own. The Heppes Company, of 2401 Fillmore St., Chicago, Ill., have made the problem of roofing material a study for years. They can now prepare "No-Tar" to suit any condition of climate. It neither melts and runs nor freezes and cracks. Put on simply, anyone can do it. The advertisement is on page 28. Write the company at the address given above, for samples, and mention The Homestead, if you please.

SASH, DOOR AND MILLWORK BARGAINS.

Messrs. Gordon Van Tine & Co., of Davenport, Iowa, are the largest manufacturers in the world of sash, doors, millwork and building material. Their catalog tells all about their own timber lands, their own sawmills, their factories, their enormous capacity, their guarantees of quality and safe delivery, and shows why they save 50 per cent over dealers' prices, no matter where you live. They sell by mail order only, and guarantee safe delivery and quality. To get the benefit of this saving, whether you are a contractor, carpenter or individual user, or whether you want a \$5 or a \$10,000 order; whether you are going to build a handsome home or put storm windows in the old home—first write for the catalog to Messrs. Gordon Van Tine & Co., Station 51, Davenport, Iowa. The catalog is illustrated, and one of the main features is a set of pictures and complete architect's plans for five houses of moderate cost, which in itself saves many a builder the expense of having plans drawn. Other features of this catalog, completely illustrated, are the tables of sizes and prices on front doors, grained doors, painted doors, storm doors, white pine doors, art windows, plain rail windows, storm windows, barn windows, base moldings, casing, sash, thresholds, lattice, moldings, hardwood flooring, window screen stock, door frames, window frames, gable ornaments, colonial columns, turned porch columns and porch newels, stair work, stair

SLICING CORN FOR STOCK.

One of the finest ways of feeding corn to cows and stock cattle is to slice or chop it into small pieces. The old way of doing this is to break the ears on the edge of a basket or bushel. It's a slow job and not very effectual, either. Just the ears that need to be broken up the most are broken only once or twice. Once you have tried a "Dean" Ear Corn Slicer you will know what a saving of labor it means. The work is also done better. It runs easy and cuts fast. See page 27 and learn more about this splendid machine that is made by the Enterprise Wind Mill Company, 24 Main St., Sandwich, Ill. They will willingly send prices.

"BUSINESS DAIRYING."

The above is the title of a valuable little book on the subject of dairying from a practical standpoint. The book is issued by the Sharples Separator Company, of Chicago, Ill. They desire every farmer and dairyman to have a copy which they will mail free with their catalog S-121. The triumphs of their separators are known in every dairy country and at every fair and exhibition. They make the Tubular, so called because the bowl is long and tubular in shape, which makes it very easy. Another strong feature is the low supply can, which a child can pour milk into. In fact, the machine represents a high degree of perfection throughout. Tubulars are thoroughly tested before leaving the factory and are sold under an unlimited guarantee. Look up their advertisement on page 9 and when writing ask for catalog S-121.

STOVE ADVICE FREE—HOW TO BUY A RIGHT STOVE AT A RIGHT PRICE.

It is an important matter, this choosing and buying a stove of any kind. There is no article in household use upon which hinges so much the happiness, convenience and comfort of the family as a range, cook stove or heater. So, one cannot get too much information on the best stove to buy, and the right price to pay for it. One of the largest stove concerns in the world—the Michigan Stove Company, of Detroit, Mich.—write that they have inaugurated an "Advice Department" in their business, under the management of an expert stove man. The business of this man is to give free advice to prospective stove purchasers as to the correct construction of a good stove and as to the right price to pay for it. It does not matter where you expect to buy a stove or what you expect to pay for it, you can take advantage of the "Advice Department" of this company, free. They issue eight books on the question of different stoves, as follows: Cast Ranges—Steel Ranges—Cook Stoves—Gas Ranges—Base Burners—Heating Stoves—Oak Stoves—and Gas Heaters. So, if you are thinking of buying a stove of any kind, we advise that before you make your purchase you write to the manager of the "Advice Department" of the Michigan Stove Company, Detroit, Mich. And on your postal ask for the book you want and tell them the kind of a stove you expect to buy. They have sent the editor of The Homestead all of these eight books, and he finds them full of good practical information on the question of each stove described. We advise our readers who contemplate buying a stove of any kind to write this company at once.

Hygeno

KEEPS THEM ALL HEALTHY

Every good Veterinarian urges frequent use of a coal tar disinfectant. HYGENO is the best coal tar disinfectant made—the best it is possible to make—nothing dirty, gummy, weak or watery about it, yet when prepared for use it costs only about one cent per gallon. HYGENO kills lice, ticks, scab, mites and all parasites on any animal; cures mange, itch, ring-worm, nettle rash and other parasitic skin diseases; destroys germs, foni odors, stomach worms, screw worms, grubs, etc.; heals galls, wounds, cuts, scratches, sore mouth and similar injuries and diseases. HYGENO is endorsed by leading sheep, hog and cattle breeders, horse owners and poultry and pet stock fanciers. Free booklet tells why. Write today, we will tell you where to buy Hygeno. The Hygeno Disinfectant Co., 1262-63 Citizens Bldg., Cleveland, Ohio.

W. L. DOUGLAS

\$3.50 & \$3.00 SHOES FOR MEN
W. L. Douglas \$4.00 Gilt Edge Line
 cannot be equalled at any price.

W. L. DOUGLAS MAKES & SELLS MORE MEN'S \$3.50 SHOES THAN ANY OTHER MANUFACTURER IN THE WORLD.

\$10,000 REWARD to anyone who can disprove this statement.

If I could take you into my three large factories at Brockton, Mass., and show you the infinite care with which every pair of shoes is made, you would realize why W. L. Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$3.50 shoe.

W. L. Douglas Strong Made Shoes for Men, \$2.50, \$2.00, Boys' School & Dress Shoes, \$2.50, \$2.15, \$1.50

CAUTION.—Insist upon having W.L. Douglas shoes. Take no substitute. None genuine without his name and price stamped on bottom. Fast Color Eyelets used; they will not wear brassy. Write for Illustrated Catalog.

OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Drawer 1127, Kansas City, Mo.

WITH THE EDITOR.

One more unfortunate
 Weary of breath,
 Rashly importunate,
 Gone to her death.

Take her up tenderly,
 Lift her with care;
 Fashioned so slenderly,
 Young and so fair!

When I was in England I frequently noticed danger signs posted up for the benefit of cyclists who are numerous in that country of fine roads. Thinking of the number of accidents these warnings have undoubtedly prevented I have resolved to tell a painful story here With The Editor, and to make some comment upon it.

A few Sundays ago a young girl was found dead on the altar steps of the Roman Catholic cathedral in Kansas City. Beside her lay two empty vials labeled "Poison," and a note requesting that her body be sent to her parents.

Like many another country girl this one had wearied of the farm, had wrung a reluctant consent from her parents, and had betaken herself to the city. That was a year or so ago.

All the year held for the unhappy girl we can but guess. At first she worked as "hello girl" in a telephone office, later she seems to have been employed in a local theatrical company. Just when, just where, just how she fell we do not know, but a day came when with two others she went off for a lark with married men. The die was cast: she was committed to a fast life.

We have scripture for it that "the way of transgressors is hard," our eyes leave us in no doubt of the fact when the transgressor is a woman. It was only a little while until this poor girl found herself in a strange city, moneyless, friendless, alone. She seems to have had plans, but whatever they were they miscarried; expected letters failed to arrive, appeals she made for assistance were rejected, despair seized her, she purchased poison, she deliberately crossed the great divide.

If one knew about the surroundings, the parents and home life of this unhappy girl would one find the clue to her tragic fall—I wonder? Her people are reported as "prosperous farmers," but the girl seems to have had little affection for them and little communication with them since her departure for the city. Was the father absorbed in the care of his acres, the mother intent upon household matters and the girl's interests neglected, her youthful craving for life denied legitimate expression—I wonder?

There are girls and girls; some are steady and strong and so armored about by ideals and ambitions that temptations are powerless to harm them; others are all undefended by high aims or noble ambitions; they are like butterflies which fly about gaily in the sunshine, but droop when chill winds blow; they are like moths which flutter about the light whose flame is their destruction. And this girl, only nineteen years old, what of her—I wonder?

When a country girl exchanges a sheltered home for life in the city she enters a new world. The transition from midnight darkness to noonday sunlight is not greater. The glare is dazzling, the noise deafening, the rush bewildering. It is small wonder that the unsophisticated young creature sometimes loses her bearings, sometimes stumbles and falls, and is sometimes trampled under foot. Ours is not to judge or to condemn. It is ours to pity, and to post up "Danger."

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

Beauty and truth, and all that these contain, Drop not like ripened fruit about our feet; We climb to them through years of sweat and pain; Without long struggle, none did e'er attain The downward look from Quiet's blissful seat; Though present loss may be the hero's part, Yet none can rob him of the victor's heart Whereby the broad-realized future is subdued; And wrong, which now insults from triumph's car, Sending her vulture hope to raven far, Is made unwilling tributary of good.

—Lowell.

BOYS—IT HITS THE MARK!

This dandy Rifle always does that when it is aimed straight.

Unless you want to hit the mark don't get one. But you do—don't you? Everybody means to hit the mark some time. Then write us at once and you'll crack the bull's eye. For you can get that rifle, boys, without a cent of money. Just a few minutes' work among your friends, or your friends' friends—and the rifle is yours, sure thing. It's the handiest and the handsomest little gun on the market. We're giving it to you straight. And it can be earned just as easy as rolling off a log. Write us about it—just a line. Give us your full name and address and say you want to earn a rifle. That will do. We'll pull the trigger, and back will come a letter to you with full particulars, and it is ten to one you will have earned the rifle the same day you get that letter. It's up to you now. Get out your goose quill and address,

THE HOMESTEAD,

kitchen, the market, the street, the office, the school, the home, just as faithfully as if we stood in the front rank of some great battle, and we knew that victory for mankind depended on our bravery, strength and skill. When we do that, the humblest of us will be serving in that great army which achieves the welfare of the world.—Theodore Parker.

JUST A FEW SMILES.

Voice from Below—Are you children all in bed?
 Voice from Above—Yes, mamma.
 Voice from Below—Well, I must say it didn't take you long to say your prayers.
 Voice from Above—We divided 'em up an' each took a section an' said 'em all at once.
 "That," said her wooer, as they came in sight of his ancestral home, where the house party was being held, "is the old manse."
 "But he's going to leave it to you when he dies, is he not?" asked she, interestedly.
 "Sensible looking girl across the aisle?"
 "Yes. Like to know her?"
 "No, thank you. Handsome hat she's wearing."
 "Yes. She made it herself."
 "Eh! Introduce me, please!"

THE HUMAN BEING VS. THE HOUSE.

The woman who does her own work should learn how to shirk scientifically. This does not mean that she should neglect work which should by rights be done, or that she should do it in a slovenly way. But there are times when every housekeeper must choose what

shall be crowded out, her rest, her chance to read a little, to keep in touch with what is going on in the world, or the laborious and unnecessarily thorough accomplishment of an insignificant task. In that case she should unhesitatingly decide that the latter is of less importance and let it go to the wall.—Christine Terhune Herrick.

BLACK BEAN SOUP.

One pint black beans, two quarts cold water, one small onion, two teaspoonsful salt, one saltspoon pepper; one-fourth saltspoon cayenne, one saltspoon mustard, one tablespoon flour, two tablespoons butter, one lemon, two hard-boiled eggs. Soak the beans over night. In the morning pour off the water and put them on to boil in two quarts of cold water. Slice the onion and fry it in one tablespoonful of the butter. Put it with the beans. Add a bit of celery root, if you have it. Simmer four or five hours, or until the beans are soft. Add more cold water as it boils away—about half a cup every half

hour—to check the boiling and soften the beans, leaving about two quarts when done. Rub the beans through a strainer, put the soup on to boil again, and add the salt, pepper and mustard. When boiling, thicken it with the flour and butter which have been cooked together. Season to taste. Cut the lemon and eggs into thin slices, put them into the tureen and pour the hot soup over them. Serve with croutons.

PANDOWDY.

At Thanksgiving time we wish to recall all the dainty dishes for which our grandmothers were famous; the pandowdy was one of them. A deep, square pan was lined with a simple buttermilk or sour cream crust. This was filled with well-floured apples cored and pared, another crust placed on top and the whole baked. Then the top crust was carefully removed, and half of it placed up side down on a platter, the soft, juicy apples were taken out into a bowl, sweetened partly with sugar and partly with molasses, and a speck of spice and a lump of butter added. After these ingredients were thoroughly mixed, a layer was spread over the crust on the platter, then the halves of the lower crust were put on with other layers of apples and then the last half of the top crust. This might be arranged with a layer of apples on top or turned right side up and sprinkled with sugar.

Probably the pandowdy was the predecessor of all the thousand and one layer cakes and pies of the present day.

The modern housekeeper does not find it

The Angle Lamp

Our Proposition is to send you a light which, burning common kerosene (or coal oil), is far more economical than the ordinary old-fashioned lamp, yet so thoroughly satisfactory that such people as ex-President Cleveland, the Rockefellers, Carnegies, Peabodys, etc., who care but little about cost, use it in preference to all other systems. We will send you any lamp listed in our catalog \$3, on thirty days' free trial, so that you may prove to your own satisfaction that the new method of burning employed in this lamp makes common kerosene the best, cheapest and most satisfactory of all illuminants.

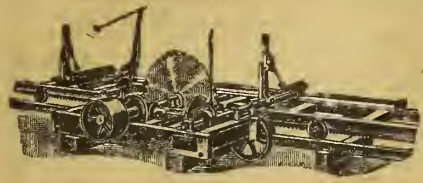

Convenient as Gas or Electricity
Safer and more reliable than gasoline or acetylene. Lighted and extinguished like gas. May be turned high or low without odor. No smoke, no danger. Filled while lighted and without moving. Requires filling but once or twice a week. It floods room with its beautiful, soft, mellow light that has no equal. WRITE FOR OUR CATALOG '83 and our proposition for a

30 DAYS FREE TRIAL.

Do it now—right away. It will tell you more facts about the How and Why of good light than you can learn in a lifetime's experience with poor methods.

feasible to use buttermilk as her grandmother did, nor are the results as satisfactory as with the best baking powders. Try this plan:

Sift together three cups of flour, two level teaspoonfuls of yeast powder, one teaspoonful salt. Rub in one-half cupful lard drippings, and mix into a stiff dough with ice water. Roll out, spread with two ounces butter and roll and fold again. Then line the pan and proceed as directed above. Round pans can be used instead of square, but the original "dowdies" were square.

AMONG OURSELVES.

As was expected, the wives of foreign-born men feel constrained to pick up the gauntlet thrown down by Mrs. Eugenia. In defending the foreign-born American as a husband Mrs. Fairbanks incidentally gives the native-born American husband some good pointers. She should have a cordial hearing:

Being the wife of a foreigner I take the liberty of saying a few words in their defense, or at least in the defense of the particular foreigner whose wife I have the honor to be, so that the uninitiated may see that they are not all the tyrants Mrs. Eugenia pictures them to be. In the first place my husband has always made everything handy for me, thereby "helping me to help myself." It is surprising that there is so little said about this very subject. Even though I am married to a foreigner, I have but little hard work to do in the garden. I make the rows lengthwise and my husband plows it with a small garden plow and one horse, doing in a few minutes what it takes a "woman with the hoe" hours to do. I weed the small "truck," such as onions from seed, by hand. I think it a woman's place to oversee the garden-making if she has not the time nor strength to do the work. Another instance, when we lived in Illinois, where farmers burned hardly anything but cobs in their cook stoves, my husband made a cob box, which made it a great deal easier for me. It consisted of a kitchen table, the front of which was inclosed in order to hide the box, which could be pulled out to be filled, then pushed back under the table, as it ran on castors on track fastened to lower sides of table. He also made a stout shovel to be used exclusively for shoveling cobs into the stove. The box held about five bushel-basketfuls. In winter the men kept it filled, and in the summer, the hired girl or myself. We thought it away ahead of taking them out of basket or barrel with the hands, as I have seen some do. And, again, we have a range with water front, quite a large boiler, and a white porcelain-lined sink beside it. All that was necessary to fill wash boiler was to let pails run full, then empty into wash boiler, but that was not handy enough, so my husband took a small piece of piping and connected it onto hot water pipes back of range. All I have to do is to turn faucet and boiler is soon filled. The men always filled the supply tank for wash day. To be sure, it could have been handier, but the hot and cold water plant were installed in the house when we bought the place. When the children were small he bought a washing machine with large wheel, so a small upright engine could be used for power by slipping belt over wheel. The engine was also used for grinding corn and so forth. I could fill pages at this rate, but this is enough to show that not all foreigners make slaves of their wives. To be sure, it is not always possible to have everything as handy as one could wish if one lives on a rented place, but here in Iowa, where most people own the farms they live on, things could often be arranged better than they are. The foreigner Mrs. Eugenia speaks of as saying that "All American women are lazy"—may he not have lived among a particularly slovenly set of women, thereby becoming prejudiced against them? This would be unjust, but not more so than it is for her to be "soured" just because she happens to have neighbors that make their wives work too hard. I hope Mrs. Eugenia's letter will not induce those of our American girls who have "foreign men" for lovers to say "no" when the all-important question is asked. I think my life-time of experience is worth more than years of observation. Don't you think, Mrs. Walker, that the controversies we have been having Among Ourselves have caused some of its members a great deal of pain? For my part I should like to see something about the care and culture of house plants, both those raised from seeds as well as from "slips." Also, something about the vegetable garden, although that would probably be better a little later in the season. Telling what varieties to plant and so forth, could be made to be very helpful.

As will be seen Mrs. Doty's observation bears out the stand taken by Mrs. Fairbanks:

You ask us to tell you of our observations of American girls marrying foreigners. I collected my thoughts along that line and here in our vicinity the Danes have married our daughters, also the Norwegians and Germans, and I never knew better husbands or kinder fathers than they are in all this country. In thirty-one years of residence I have never known their wives to be slaves to them, and that is a record that I cannot give the American boys, here where we live.

If the discussion were likely to influence girls in the choice of a husband it might be worth while to go more deeply into the matter. As it is Cupid's arrows fly regardless of race or blood and so I doubt the wisdom of prolonging the matter.

It is natural to shrink from things that are painful or shameful, but sometimes it is right that we should nerve ourselves to touch the painful, the shameful thing. I am sorry that the editorial sanctum should be a place of

A Knox Big Grinder

Will Make \$6.00 a Day for You

THERE'S nothing like it for a neighborhood feed grinding proposition.

You know lots and lots of your neighbors grind their feed—rather they take it to the custom mill and have it ground.

If you have a fast grinding mill like the Big Knox you can get nearly all that trade that passes your place.

No trick at all to get it if you go after it, and can take care of it. They pay the town miller 3c to 5c a bushel. You might as well have that.

Mr. B. C. Bennett, Ashawa, Iowa, writes: "I can grind 50 bushels shelled corn per hour with my Knox Big Grinder. Made \$6.00 in 5 hours grinding for my neighbors."

You or anybody else can grind your 50 bushels an hour—easily.

Just figure a little. Suppose you charge the lowest price, 3c a bushel. That's \$1.50 an hour. Grind 4 hours, and you've made your \$6.00.

The neighbors will easily keep you busy that much of the time. And the four hours don't break into your day so very badly either.

Western Harness and Supply Co., Box 53, Waterloo, Iowa.

1856-Sandwich-1906 Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country.

The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous.

We make them in all sizes and styles and capacities—mounted and down, helted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

gloom this week, but I have no apology to offer, and it is not your pardon but your careful consideration which I ask for what is brought to us by "A Dakota Farmer's Wife:"

I wonder how many of us women ever think it worth while to help young fallen women. I say "young" because old women are beyond improvement, but girls who are thrown on their own resources just at an age when they need a mother's hand, and some older women who have had no mother to guide and shield them, are frequently not really bad, and if encouraged in a certain way, by the example and friendship of some truly Christian women, may yet make good wives and mothers, and the love for their own children will naturally show them their errors in youth. I have in mind a young girl of thirteen years of age left without parents and education to fight life's battle. Such a child is snubbed among the more fortunate. Naturally her companions are in the lower circles, and before she realizes what is going on, her reputation is gone. Sometimes this bringing down of a poor girl's reputation is caused by some enemy whom she has snubbed, and again it may be too true that she has let herself be led astray by some "pretender." This girl I have in mind was one of these,

though I was not acquainted with her until after she was married three years. Her husband was a sober man, a good worker, but he had one fault—gambling with money that was very much needed to build up a home. The young woman, then seventeen years old, struggled along as best she could,

trying to be true to her husband and do her best, but soon rumors of her past life spread in the neighborhood. No one would call on her, and she was snubbed whenever a chance meeting brought her face to face with one of her neighbors. She tried to get her husband to quit gambling and fix up the house, but he said, "No one ever comes to see us." Finally she got discouraged, did not take any more pride in keeping things in order, got careless in her own appearance and became very vulgar in her talk (she scarcely heard any other talk in the company in which she was thrown). At last, her husband's recklessness driving her to despair, she left him. This opened his eyes some and he went and persuaded her to come back to live with him, promising to quit gambling. Let me say right here, he kept his word, too. But, then, people again talked about her leaving him and the real cause not being known, the fault was all laid on her shoulders, and the old past raked all over again. There seemed to be no use of her trying to hold up her head at all. About this time we took the farm adjoining this young couple. Of course we were duly informed about these neighbors, after a very short acquaintance with some of our other neighbors, but living so close it was difficult for husband and I not to come in contact with them. They took great care not to force their company upon us, but when fate brought us together, they both seemed very sensible and well appearing. The lady es-

pecially took great pains to converse lady-like; so much so that in spite of the stories about her we invited them to call. They came, but not for a long time, for the woman was very much afraid I would treat her as others had done. Husband and I paid back their call before long. The neighbors got to whispering around about us doing such a thing as that, but we paid no attention to anyone, and whenever I got a chance to put in a good word for the poor woman I certainly did, for I could see no harm in her, and when, a year later, she gave birth to a child, everyone said to me, "You are the one that sowed that child; she would never have allowed herself to have had it only for your influence." She had been married three years, or four, rather, when the child came, but some said for reasons of her own she would never raise a child. I do not know if this was true of her, and will not judge her, but I do know that when we moved away after five years, she had three of the sweetest children that ever lived, and things had changed so that everyone was surprised. She was one of the best housekeepers and cooks, as well as a true wife and a loving mother to her children. Her husband also had changed. He had built a nice house for her, which she certainly did her part to make "Home, Sweet Home." By this time her former critics came to see her as often as they did anyone else, and everyone spoke well of her. She was invited out and treated well at any gathering. You see, kind friends, all that was wanted in this case was a leader. I was not aware of the fact that I had helped so much until she came to me before we left, and told me all about herself and wept tears of gratitude.

In connection with this matter Uncle Abe wishes to ask a question:

There may be a pure young girl in your neighborhood who meets a nice-looking young man and loves, and through love falls. She is not naturally bad, and, repenting, would fain be a good woman again. Do you reach out a helping hand to her? Do you try to help her to recover her lost womanhood? No. You turn a cold shoulder to her and gather up your skirts in passing. Why is it?

The stir of preparation for Thanksgiving has already begun in many homes. Anticipating it with the wistfulness of one who is in a sense outside the home Mrs. B. H. Dean comes to us with a little request:

As Thanksgiving day is soon to be here, let me write a few words to those who will have the pleasure of enjoying the companionship of dear friends. Let me say, please remember those on that day who are homeless and among strangers. We cannot have everything as we would wish, but if you have a home, "be it ever so humble," thank God in your heart for his mercy to you. I am an interested reader of the Home Department and love the Among Ourselves column. I am a homeless woman, working as a despised domestic, but amid the weary round of ceaseless work I find in my heart a gladness, a true "thanksgiving" that the scorn of my more fortunate sisters has no power to efface. Let us be charitable to those who have to struggle alone. A pleasant word spoken to encourage is never lost. When I find a situation where pleasant words are spoken I appreciate them fully as much as the few dollars I receive for my services. Now, let us all enjoy Thanksgiving day and keep it green in our hearts for days to come, and please, dear sisters, be kind to those who minister to your comfort at home, and may we all meet and rejoice together in our Among Ourselves column next year.

Uncle Abe and Mrs. Dean make me feel apologetic for my sex. In the old days there was abundant excuse for woman's narrow-minded prejudice and unconscious cruelty to her less fortunately situated sister woman. There is much less now, but the woman who has never been tempted, the woman who has always been sheltered does not yet bear herself with that tender charity, that loving sympathy which it should be her joy to offer to the sister in need of a helping hand.

Dressmaking and Millinery—No. 543.

Sylvia Silverthorne, Muscatine, Iowa.
[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

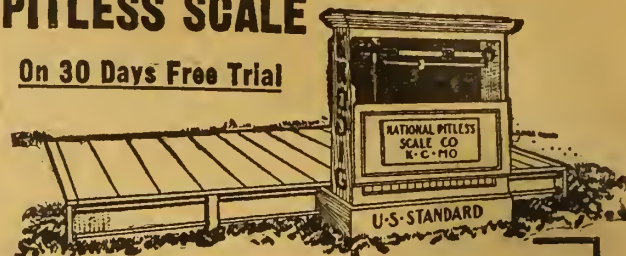

For a number of years there has been little demand for anything in the line of outer garments except a description of the leading designs as an aid to those intending to purchase, but for some reason many are this season attempting the manufacture of garments for themselves, as they would a simple waist or a skirt. This has caused a demand for the patterns, and in response to requests I have shown a number of designs. It is doubtless due to the fact that so many of the designs are simple and easily managed, and also that the materials are of a kind that give satisfactory results in the hands of the home worker. It is never denied that the cost of a garment made at home is much less than that of the same grade and style of garment purchased ready-made. Given these simple modes, and if quite sure you can get a good fit and finish, one may more often make for herself or some member of the family a coat or jacket that pleases her fancy than she may find it in the stock from which she is obliged to select. The plaids lead as to numbers, but there are numbers of new coats in the fashionable shades of red, and these cannot always be found in stock in just the shade desired, while the material is usually readily found. One of the easiest designs to follow is found in the sack coat that is fairly a leader this season, and with this number is illustrated one that is cut in

LET ME SEND YOU A "KNODIG" PITLESS SCALE

On 30 Days Free Trial

Is \$30. to \$50. Worth Saving?

If you think it is don't do a thing about getting a scale until you have heard from me.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "Knodig" Pitless with Protected Bearings.

Ready for instant use when you want them. No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be.

Absolutely accurate, because tested according to U. S. Standard of weights.

My plan saves you all middlemen's profits. Deal direct with me. No Agents, Salesmen,

H. C. GUMBEL, Gen'l. Mgr.,

The Knodig Pitless Scale with the Protected Bearings is used by the U. S. Government which Proves its Quality.

Jobbers or Dealers between you and factory. Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer?

Does it make the scale any better? Does it add one single penny to its value?

Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the Knodig Pitless is the scale you want.

I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you are satisfied,—no deposit,—no note to sign,—nothing to do but give the Knodig a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair.

Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover.

Free. Write for it to-day, sure, to

OUR RED LETTER

Combination Offer

AGAIN OPEN TO THE FARMERS OF THE MIDDLE WEST

FIVE SPLENDID PAPERS and MAGAZINES for \$1.25 A YEAR. SEND US YOUR SUBSCRIPTION TODAY.

The Homestead has never made an offer to its subscribers which proved so widely and immediately popular as did our famous "Red Letter Combination" last season. Thousands upon thousands of farmers throughout the corn belt took advantage of it to supply their families with an abundance of wholesome, instructive and entertaining periodical literature, and we have been asked many times if the offer would again be open to renewals and new subscriptions. Although the profit on such an offer is necessarily small, we have decided to repeat the offer during the present season and have secured the consent of the other publishers interested to advertise it again for a limited time, subject at any time to revocation without notice.

THESE FIVE PUBLICATIONS FOR \$1.25 A YEAR.

The Homestead, the world's greatest farm paper, published weekly at the heart of the corn belt and dealing with agricultural problems from the middle-western point of view; edited by farmers residing upon and operating their own farms; not a one-man paper, but the embodiment of the combined wisdom and experience of a large staff of editors and contributors; with departments covering the whole range of farm life in this section.

The Chicago Weekly Inter Ocean, a grand general family newspaper, giving an abundance of news, literature, poetry, humor, market reports, reading matter for women and children—something for every member of the family.

The Kansas City Weekly Star, an able, fearless, independent newspaper, dealing with the problems of the day from an independent point of view. Literary contents very attractive and uplifting.

The Homemaker, a delightful monthly for the women and children of the farm, readable and valuable from first page to last—brightening and broadening the life of every member of the farm.

The Farm Gazette, a beautiful magazine of profitable agriculture, printed on fine paper, with elegant illustrations and a cover in colors.

If already a subscriber for any of them, your time will be extended for one year.

To secure this great bargain, clip and fill out the following coupon:

Date 190..

New York San Francisco Chicago

The Iowa Gate - FOR THE FARM -

By sliding this ring back the largest hogs may pass under

AND have the run of two lots. Or raise your gate to drive hogs in or out, then your larger stock cannot get out while you are busy. The IOWA gate works fine this way.

Raising the Gate by the sliding ring is simple enough but very handy when your gate swings on uneven ground or when the outer end drags. Rolled Steel Tubing is used in the frame instead of iron or gas pipe. This makes a frame that will not bend and is guaranteed to stand any farm use.

IOWA gates will raise up for winter use—are not bothered by wind, rot, or fire. Are light and easy for women to handle but strong enough for any stock.

Cheaper Than Wooden Gates and will outlast a dozen. Write today for our circular.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA.

plings, or the coat material may be used and stitching form the finish. When the coat is of plaid, cloth of the color of the leading shade may be used for strappings and facings. Lengthwise openings are cut

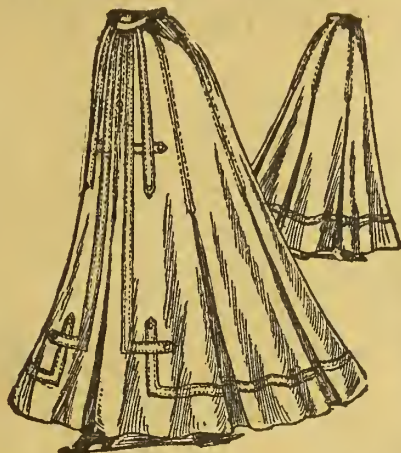

[5506—Misses' Three-Quarter Coat, 12 to 16 years.]

in the fronts in which to set the pockets, but if preferred one may use the ordinary patch pocket, thus avoiding cutting the front. At the back one or three lengthwise straps

may be used. If three, the two not shown would be placed midway between the center of back and the armseye, the space between these and the back one gradually widening toward the bottom of the coat. Pattern No. 5506 is cut in sizes for girls of 12, 14 and 16 years, but I can furnish patterns very similar in design for any age or size. Give age when ordering children's or misses' patterns.

The seven-gored skirt shown in No. 5501 is one having inverted pleats at each seam, these being stitched to part of their depth, below which the fulness flares, giving fullness at the foot of the skirt. The strappings are put on in a novel manner, these being applied on lines indicated in the pat-

[5501—Seven Gored Skirt, 22 to 32 waist.]

tern. These, as shown, are of the cloth, but braids or bands of contrasting material may be used instead. Bands of plain cloth on plaid, or of plaid on plain, are equally stylish. One or three buttons may be used to finish the band, or buttons may be arranged in groups at intervals on the bands. Jet heads are very fashionable for this purpose, and these show especially well on plain material. Pattern No. 5501 is cut in size for a 22, 24, 26, 28, 30 and 32-inch waist measure. Give waist size when ordering.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

The International Sunday-School Lesson.

Fourth Quarter. Lesson VII. Matt. XXVI, 57-68, November 18, 1906.

Jesus Before Caiaphas.

Even to those who believe only in the "manliness" of Jesus, His base betrayal, His ignoble desertion, illegal trial, and superlatively cruel death, are enough to touch their hearts to deepest pity. As Renan says, "His legend will call forth tears without ceasing." To those to whom Jesus is divine, the successive scenes from Gethsemane to Golgotha are cumulative in strong compunctions. Bloody sweat, traitor's kiss, bound hands, hurrying from court to court, false accusations, blow on the mouth, mockery, the cry, "Crucify!" scourging, the Via Dolorosa, the crucifixion—their hearts are like to break under such climatical sorrow.

It is past midnight, but the devotees

of an imperial ecclesiasticism are alert. With murderous jealousy they anticipate the delivery into their hands of one for whom they had just paid a goodly price—one who must be immediately put out of the way, or their honors, powers, and emoluments be the forfeit. Rich old Annas paces the marble court of his palace, and listens for the footfalls of the returning band. He will soon have the satisfaction of looking into the face of the iconoclastic Galilean, who has imperiled his vast revenues by twice cleansing the temple of the traffickers whom he had unlawfully licensed to trade there. He will see those hands bound with cords instead of plaiting cords into a whip to drive out the buyers and sellers with. Caiaphas, also Annas' son-in-law, and acting high priest, is on the qui vive to carry into execution his judgment passed three months before—namely, that it were better that one should perish, without reference to his guilt or innocence, than that the nation should be jeopardized.

The chief priests, scribes, and Pharisees are anticipating with venomous pleasure their retaliation upon one who has publicly denounced them as serpents and vipers; who, with bold hand, has snatched the mask from their unparalleled hypocrisy, and has likened them to whitened sepulchers. So all hell is alert that night to enjoy to the full its short-lived triumph. A sardonic smile passes over the face of Annas as his dull ears catch the tramp of the guard at his very gate. He hurries into his grand salon, and mounts his dais with tottering step. The examination of Jesus here is purely informal. It is just such a courtesy extended by Caiaphas to Annas as, a little later, Pilate extended to Herod. It will have weight, too, with the multitude, that the condemned is first arraigned before one who, according to Moses' law, is still a high priest. And by this device time is gained to "pack the jury" in the only court which Rome recognizes; and there is a scurrying about for suborned witnesses, such as to this day can be had for a price in the lobby of almost any Oriental court.

There sits the Sanhedrim in form of a horseshoe, the high priest at the "toe,"

The

Initial Watch

IS THE VERY LATEST THING IN
WATCHES FOR BOYS AND GIRLS OR
MEN AND WOMEN.

Your own Initial on your own Watch

That is a bright idea and a good one. The wonder is that nobody ever thought of it before. It is really the most fetching novelty of the season, the most popular fad of the moment, and a fad that has come to stay, because it is really not a fad at all, but a sensible idea. Nothing is more distinctively your own than

The Watch You Carry.

Nothing, therefore, deserves a more distinctive mark. What better mark than your own initial engraved in beautiful German text on the case? Of course you want one—you would like to be up with the fashion—but there's your old one. No initial on that, and it cost a lot more than the one we are offering.

That's just the point! This watch

Costs You Nothing.

No money—just a few minutes of your spare time, a few neighborhood calls on your friends and the watch is yours. People change watches now as often as they change hats. Have you had a new one this year with your initial on the case? If not, write us for particulars how to earn one. The chances are good that you will earn it the same day you receive our letter. It is as easy as that.

What Kind of a Watch?

To be sure, we had forgotten that, but thereby hangs a tale:

Not many years ago a young hardware merchant on a down town street in New York took up a line of small

metal clocks and made a specialty of them. They went well. He sold barrels of them; but the demand was all for smaller and still smaller clocks—smaller than anything then made, so he took a trip up into New England, among the Connecticut clock makers, in search of smaller sizes. He found one manufacturer who was willing to make the clocks as small as he wanted them—"pocket size," in fact, if he wanted them as small as that.

With that expression, "pocket size," came a new idea into the hardware dealer's brain, for a pocket size time piece is a watch of course, and this idea revolutionized the watch business of the country. He contracted for half a million pocket time pieces on the spot, the factory's entire output for a year, and this gave him temporary control of the lowest price watch ever put on the market. From this first venture he advanced to the head of the greatest watch manufacturing company in the world. His product now is

2,000,000 Watches a Year

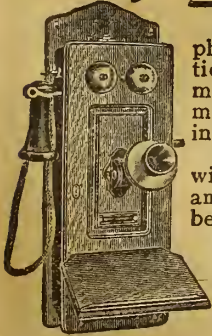

and it scarcely equals the demand. He rolls in wealth and his name is a household word throughout America and England. You know it of course, and when we tell you that this watch is of his company's make and is fully guaranteed by the most successful watchmaker in the world, we have said enough to convince you that the watch is all right.

For full particulars, style and size and method of earning a guaranteed watch with your own initial on the case, address,

THE HOMESTEAD

and a scribe with inkhorn and parchment at either "cork." In the space between the scribes stands the accused, in full view of the semi-circle of venerables, who sit crosslegged upon their crimson cushions. Guilt is on the bench; innocence is in the dock. Not how to deal justly, but how to condemn is the problem of the court. How to find a verdict that will not too palpably outrage the forms of justice, and one which the Roman governor will ratify, a verdict that will involve the extremest penalty—that is the desideratum.

As a sheep before her shearers is

dumb, so the Lamb of God opened not His mouth. Silence is His best defense. The suborned witnesses demolished each other's fabric of lies. Any tribunal not bent upon conviction would have thrown the case out of court with contempt. By His refusal to plead, Jesus denied the validity of the process and the jurisdiction of the court as constituted. The silent, dignified accused is fast throwing the court into confusion. It is at its wits' end, when bold and unscrupulous Caiaphas makes his coup de main. He springs from his red hassock, and, rushing at Jesus with rage in look, ges-

ture, and tone, bids Him answer the witnesses.

But before the vociferating judge, with his soiled ermine, Jesus maintains His imperturbable silence. A last expedient occurs to the fertile mind of Caiaphas. He will put Jesus in the dilemma of denying His Messiahship by persisting in His silence, or affording ground of conviction for blasphemy by affirming it. By most solemn abjuration he puts Him under oath, and then propounds his crucial question. There is not a moment's hesitation. The case against Him having utterly collapsed, He breaks his silence. He furnishes them with the ground of conviction, which they had failed to find. They do not stop to question whether His testimony is true or not. It might readily be shown how His character and career fulfill the prophecies. There are ten thousand witnesses of His Messianic and wonder-working power who might have been summoned. But, no! the case is prejudiced, the jury packed, the court bent on conviction, not truth and justice. With Oriental and dramatic effect, Caiaphas tears his costly robes into shreds from collar to hem, and precipitately finds a verdict, and then proceeds to poll the jury.

Thus Jesus, His hour having come, surrenders Himself into the hands of sinners, and voluntarily lays down a life which no man could have taken from Him.

Analysis and Key.

1. Ecclesiastical trial of Jesus (1) Sanhedrim unlawfully convened. Suborned witnesses. Jesus' silence. (2) Jesus adjured to answer. High priests' sacred oath. (3) Jesus' significant answer.

2. Ecclesiastical condemnation. (1) Death penalty passed. (2) Personal indignity to condemned.

The Teacher's Lantern.

The canons of the Sanhedrim court were that the accused was to be esteemed innocent until proven guilty; it was an axiom. The Sanhedrim was set to save, not to destroy, life; the president was to admonish witness of the value of a human life; counsel was to be provided for the accused; the youngest judges were to vote first, in order that they might not be prejudiced by the voice of the elders; condemnation could only occur the day after the trial had concluded; a capital trial could not begin the day before a Sabbath or a feast; no criminal trial could begin or be continued at night; no one could be executed on the same day on which sentence was pronounced. Every rule

was flagrantly broken in the trial of Jesus.

To retrieve the odium of the legal homicide of Jesus, his enemies invented an ex post facto law, and incorporated it in the Talmud; to-wit, any one who gave himself out as a false Messiah could be tried and condemned on the same day or in the night. They also framed the extraordinary story that a public herald was sent out for forty consecutive days before Jesus' condemnation to summon witnesses in His favor; but none appeared.

Silence on the part of a defendant in an Oriental court is a complete anomaly. Profuse protestations of innocence, dramatic appeal, wild gesture, copious tears—these are the rule. The silent dignity of Jesus arrested the attention and struck the conscience of each court before which He was brought.

The Sanhedrim thought it was condemning Jesus. In point of fact it was condemning itself. The supreme court of the Hebrew nation stands convicted at the bar of history of the foulest crime of all ages.

Infidelity is like the Sanhedrim, in that it is on the search for evidence against Jesus. It is an effort to impeach His character and claims. It is bent on conviction. Where there is this palpable insincerity, the believer does well to imitate his Master's silence.

What occurred in Caiaphas' court has been occurring ever since in the age-long arraignment of Jesus. The witnesses do not agree. One impeaches the other. Each new generation of skeptics presents a new hypothesis, thus denying the sufficiency of the former. Thus Strauss gives the lie to Voltaire, and Bauer to Strauss, and Renan to Bauer. But to this jargon of infidelity Christendom responds, as from the beginning, in its glorious, unwavering credo, "I believe in Jesus Christ."

Baxter's Duroc Sale.

The eighth semi-annual Duroc Jersey sale held by Mr. Ed A. Baxter, of Pawnee, Ill., on Thursday, November 1st, was a pronounced success. Breeders were present from several states and the bidding was prompt throughout the entire sale. The get of Buddy K. IV., first and champion Illinois State Fair, 1905, and second prize aged boar, 1906, found a ready market. As the list of sales which follows shows, the prices paid for stock were very uniform. The stock was offered in good breeding condition and will do well in the hands of those who secured it. Mr. Baxter has been one of the best buyers and bidders to be found anywhere, and his herd contains some of the best blood obtainable. Messrs. McNeil Bros., of Bowen, Ill., topped the sale, paying \$410 for Red Carnation and litter of pigs by Buddy K. IV. Mr. Fred Kraschel, of Macon, Ill., was the competing bidder. Up to the \$400 mark Mr. H. B. Griffith, of Bowen, Ill., was interested in the bidding with Messrs. McNeil Bros. All of the gentlemen named above were liberal bidders throughout the entire sale. Messrs. McNeil Bros. secured No. 5, Lady Cross, at \$225, and No. 11, a Buddy K. IV. fall sow, at \$105. Mr. Kraschel secured a Buddy K. IV. fall sow at \$230. Mr. T. E. Laurie secured a good Buddy K. IV. fall sow at \$200, and two Proud Advance sows at \$112.50 and \$120 respectively. The boar sale was topped by Mr. O. E. Osborn, of Weston, Iowa, who secured a Buddy K. IV. March pig out of a Tip Top Notcher dam at \$111. Messrs. Lamb Bros., of Tecumseh, Neb., were the competing bidders. Col. F. F. Luther opened the sale and was assisted in the selling by Colonels McGowan, Reppert and Sanders. The list which follows tells the story:

Lot.	Price.
1 McNeil Bros., Bowen, Ill.	\$410.00
2 A. L. Lynch, Mt. Airy, Iowa	72.50
3 H. E. Browning, Hersman, Ill.	150.00

Get This Peerless Pitless Scale

on 30 Days Free Trial

Direct From Factory

No Money In Advance
We Pay the Freight.

Don't Pay Two Prices: If the Peerless was sold through dealers you would have to pay from \$65 to \$80 for it.

If it had a steel frame you would pay from \$60 to \$100 for it anywhere.

Peerless Frames Are Of Wood—the others, costing 33 1/3 to 100% more, are steel; all inside working parts are practically the same.

We can sell this high grade U. S. Standard Scale at \$46.50 because we pay no profits to Salesmen, Agents, Jobbers or Dealers.

We can offer you a genuine free trial because the Peerless will stand the test.

The Peerless will do the work as well as any high priced Pitless Scale and better than the best old style pit scales, because more convenient to operate and saves you the big expense of digging and walling a pit.

A Peerless Scale is portable, too. You can move it to any point on your place, wherever it is most convenient for you to do your weighing.

Is it good business for you to take chances on the other fellow's weights

\$46.50

being right when you can absolutely protect yourself from loss at an outlay of \$46.50?

You might lose that much on one or two transactions!

If you weigh your grain, stock or anything else on a Peerless you know you're right and no one can contradict you.

The Peerless is Standard.

It's not a "cheap" scale at a "cheap" price. It's a high quality scale at a low factory price.

Send For The Catalog and you will be convinced. It describes every feature and every part of the Peerless in detail. You will make a big mistake to buy a high priced scale of any kind before investigating.

Remember our free trial is a real genuine free trial. No deposit, no notes to sign, no freight to pay, no red tape—

Absolutely no expense or no obligation until you are satisfied.

Let us send you a set on these terms for you to use a month.

Just put this paper down and write for the catalog now, before you forget.

PEERLESS SCALE CO., Dept. G, Wyandotte St. & Milwaukee Ave., Kansas City, Mo.

The Rue Washer Washes.

THE Rue Washer is the only machine that forces air through the clothes. It is the only machine that employs the same scientific principle used on the old time washboard. It is made of the best quality galvanized iron; it will not dry up and fall to pieces; it will last a life time; it weighs only 60 pounds; it will not tear the clothes; it does the work, better, easier, quicker than any other machine in the market. Every machine is sold under the positive guarantee of the manufacturer. Ask your dealer for it. If he hasn't it write us. We will send it on trial. The price is only \$48 at your R. R. station.

Rue Mfg. Co., Mapleton, Minn.

value to the breeder and farmer. A sumptuous luncheon was served and all were made welcome.

Kraschel's Duroc Sale.

It was thought by many of the Duroc breeders that the sales coming toward the end of a two weeks' circuit would not be well attended, nor the proper appreciation of the stock offered for sale be had. Such, however, was not the case. Messrs. Fred Kraschel & Sons, of Macon, Ill., held one of the most successful sales of the year on Friday, November 2d. An average of \$65.15 was secured on the entire offering. A litter by Mayor Jr., first prize yearling boar Illinois State Fair, 1905, and out of Buddy T. Belle by Buddy T., the sire of Buddy K. IV., brought \$708. They were a show litter all through and brought out much favorable comment and spirited bidding. The offering was sent forward in excellent condition. Mr. Ed A. Baxter secured one of the litter mentioned above at \$200. Messrs. McNeil Bros. secured a litter sister at \$175. Mr. H. B. Griffith, another litter sister at \$125. Mr. T. E. Laurie one at \$110; Mr. Geo. M. McMurry, of Maryville, Mo., one at \$105, and H. E. Browning one at \$75. Mr. H. W. Lineweaver, of South English, Iowa, secured the only boar in the litter at the bargain price of \$43. Mr. T. E. Laurie, of Jacksonville, Ill., topped the sale, paying \$270 for a half-sister to Buddy K. IV. Messrs. J. M. & W. T. Gatton, of Springfield, Ill., secured a litter sister at \$125. Col. F. F. Luther opened the sale and was assisted by Colonels Reppert, McGowan and Banta. List of sales follows:

1 H. W. Lineweaver, South English, Iowa	43.00
2 McNeil Bros., Bowen, Ill.	175.00
3 T. E. Laurie, Jacksonville, Ill.	110.00
4 Geo. M. McMurry, Maryville, Mo.	105.00
5 H. E. Browning, Hersman, Ill.	75.00

PILES cured. Most cases get well after one application of medicine without pain one hour, then go about your work. No matter how bad or long standing your case, you should go at once and take this treatment. No knife or cauterizers used. Pay when cured. Examination free. Dr. J. C. McLaughlin, 331 Junction Bld., Kansas City Mo.

LIVE STOCK SALES

Steward & Hutcheon Hereford Sale.

The sale of Herefords from the herd of Messrs. Steward & Hutcheon, at Bolckow, Mo., on November 7th, drew buyers from Illinois, Iowa, Nebraska, Kansas and Missouri. Messrs. W. S. Van Natta & Son, of Fowler, Ind., had eight bulls in the sale and were also good bidders on the best females of the offering. Two animals sold for \$650. The first to reach this mark was Lot 1, the bull, Parsifal, he going to Mr. Hugh Whitford, of Guilford, Mo. Lot 18, Priscilla 6th and heifer calf, sold for the same figure to Mr. Will Hutcheon, of Bolckow, Mo., and will remain on the farm. Mr. J. G. Von Seggern, of Wisner, Neb., who was a persistent bidder on the better females, was runner up. Prices ruled strong and even and only two animals sold for less than \$100. Col. Geo. P. Bellows opened the sale with a short history of the life of the late John Steward, and of the history of the herd. On the Steward & Hutcheon offering an average of \$223.24 was made. The Van Natta bulls brought an average of \$114.37. Following is a list of sales over \$100:

Lot.	Price.

VAN NATTA & SONS.

The Prather Dispersion Sale.

Those present at the dispersion of Riverdale Short-horns at Springfield, Ill., on Monday, November 5th, were well pleased with the cattle and took them at satisfactory prices. This being a dispersion sale no guarantee was given on the cattle, and this had in some instances to cut prices. Imp. Highland Champion was the greatest snap of the year in the way of a Scotch bull. He went to Messrs. Leeper Bros., of Graham, Mo., at \$510. Pride of Riverdale, a yearling Scotch bull by Pride of the Realm, went to Mr. F. L. Hackler, of Lee's Summit, Mo., at \$350. The top price for females was \$375, at which price the Crulckshank Secret cow, Sihyl, went to Mr. Wm. Oakes, of Laura, Ill., who was a liberal purchaser throughout the sale. Colonel Bellows conducted the sale in his usual satisfactory manner. He was assisted by Cols. Ira Cottingham and Merriman. A list of animals selling for \$100 or over is given below:

FEMALES.

Sibyl, seven years, sire Imp. Banker, Wm. Oakes, Laura, Ill.	\$375
Imp. Vanity, six years, sire Solferino, J. G. Dougherty, Jerseyville, Ill.	350
Orange Blossom Queen 2d, three years, sire Imp. Sovereign, Wm. Oakes	255
Miss Ramsden 14th, seven years, sire Knight of the Thistle, same	185
Rustic Maid, two years, sire Baron Gold-dust, J. K. Alexander, Edinburg, Ill.	215
Princess of Riverdale 2d, one year, sire Imp. Archers Prince, Wm. Oakes	205
Roan Lady of Riverdale, one year, sire Imp. Pride of the Realm, Homer F. Waters, Dawson, Ill.	185

Thos. Johnson's Duroc Sale.

A large gathering of Ohio and Indiana breeders were present at the first annual Duroc sale of Mr. Thos. Johnson, at Columbus, Ohio, on Wednesday, November 7th. Iowa, Illinois, Missouri and Kansas were represented by mail bids. Messrs. Boyd & King, of Hillsboro, Ohio, topped the sale, paying \$200 for a November 16th yearling by Such Goods by None Such. She was a very fine sow and should be heard from in the show rings of the coming season. Messrs. Watt & Foust were the competing bidders and secured several of the best bargains in the sale by their prompt bidding. Messrs. Boyd & King secured a spring gilt of show-yard type out of Wilda, the highest-priced sow up to the time she was sold in either Indiana or Ohio. This gilt was sired by Corrector. The competing bidder was Mr. H. B. Griffiths, of Bowen, Ill., who during the past few weeks has secured some of the best Durocs offered at auction. Mr. Grant Chapin, of Greene, Kan., secured a good boar at \$90. Colonels Vinnedge and Iglehart conducted the selling in a satisfactory manner.

Making Weight

The greatest weight at the least cost is the aim of the business farmer. It is a fact that the organs of digestion are accountable for every pound of weight and every ounce of milk produced. The question of increasing digestion was the aim of Dr. Hess when he formulated this famous prescription. From his experience, and such medical authorities as Professors Winslow, Quitman and Finlay Dun, he learned that bitter tonics improve digestion, that iron was the greatest blood and tissue builder, that the nitrates were essential to heavily fed animals in throwing off the poisonous material from the system.

DR. HESS STOCK FOOD

the prescription of Dr. Hess (M. D., D. V. S.) contains the above ingredients, and will prepare animals for market in sufficiently less time to pay for itself many times over, besides curing minor stock ailments. Sold on a written Guarantee.

100 lbs. \$5.00. } Except in Canada and extreme West and South. 25 lb. pail \$1.60. } Smaller quantities at a slight advance.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

If your dealer cannot supply you, we will. DR. HESS & CLARK, Ashland, Ohio. Also manufacturers of Dr. Hess Foultry Pan-a-coe and Instant Louse Killer.

51. M. R. Grinnell, Yellow Springs, Ohio 30
SUMMARY.
56 head sold for \$2,261; average.....\$40.37

Craig & Foults Sale.

The dispersion sales of Herefords of Mr. L. W. Craig, of Bolckow, Mo., and Mr. John Foults, of Rea, Mo., on October 30th and 31st, drew but a fair-sized crowd. The sale was held at Mr. Craig's fine farm where every convenience was found for the entertainment of those who came. Mr. Craig had his cattle in nice, thrifty condition, but unfortunately all his cows had been dehorned some years ago and breeders are slow to buy dehorned stuff. Bidding was slow, yet on the forty-three head sold Mr. Craig received an average of \$61.10. Mr. N. W. Crockett, of Whitesville, Mo., who bid liberally on all the better stuff, bought several head, among which was the cow, Hulda, got by Sweepstakes, for which Mr. Crockett paid \$162.50, the top of the sale. Lot 73, a half sister to Hulda, also went to Mr. Crockett at \$132.50. Lot 86 also went to Mr. Crockett at \$100. Mr. Joseph Myers, of Guilford, Mo., took a number, among which was Lot 81, at an even \$100. Mr. Geo. Brent, of Rosendale, Mo., took several head, among which was Lot 65, at \$100. Kermit, Mr. Craig's herd bull, went to Mr. Ed Bedford, of Bolckow, Mo., for \$125. Other buyers were Messrs. L. Saunders, of Whitesville, Mo.; Jno. Bryant, of Savannah, Mo.; R. S. Montgomery, of Bolckow, Mo.; R. Hoshmer, of Maryville, Mo.; W. C. Townsend, of Bolckow, Mo.; Jno. Barrow, of Savannah, Mo.; Frederick Breit, of Bolckow, Mo.; S. A. Vanfossal, of Bolckow, Mo., and Hugh Whitford, of Guilford, Mo. Mr. Foults, who had not prepared his cattle for sale, withdrew after selling fourteen head.

Laurie's Duroc Sale.

Mr. T. E. Laurie held his annual fall sale at Jacksonville, Ill., on Tuesday, October 23d. Mr. John Robinson, Jr., of Fairmont, Minn., topped the sale, paying \$12 for a son of He's Our Pride. An average of \$23 was obtained on the entire offering. Cols. Reppert, Keil and Cox conducted the selling. A list of animals selling for \$20 or over is given below:

THE WAGON BOX MANURE SPREADER.

We are reproducing here a cut of the wagon box manure spreader of the William Galloway Company, which is destined from this time forth to cut a considerable figure in the manure-spreader business. It seems that there is to be a saving of just about one-half on the cost of the spreader from prices now prevailing.

The state of Iowa has been good territory for manure spreaders for years. All the manufacturers have invaded it in force. The Galloway Company, located at Waterloo, Iowa, have been the first to take advantage of an excellent opportunity to greatly lessen the price and still, so they claim, not decrease the real value of the spreader. Every farmer has his own wagon gears. Why not use them to carry his spreader? The box with its gears and attachments are the whole of the spreader. The gears are the same as those of the ordinary wagon. There is no occasion for the farmer to buy duplicate gears and tie up \$65 in a spreader truck, useless eleven months in the year.

The new Galloway Wagon Box Spreader is sold at \$59.50, with freight paid to destination. It is also sent out on thirty days' free trial, so that the purchaser may know that it is easily fitted to his wagon trucks and that it is really all that is claimed for it.

The Galloway Company is not unknown to our readers. Many are now using the labor-saving new model Riding Harrow Cart, which was perfected by Mr. Galloway and has had such a remarkable sale for the last few years. The guarantee of the company on the new spreader is backed by a \$25,000 bond.

OTHER MARKETS.

South Omaha, Neb., Nov. 10.—Cattle—Receipts, 800; steady. Hogs—Receipts, 4,500; strong to 5c higher; top, \$6.25; bulk, \$6.10. Sheep—Receipts, 1,000 direct.

St. Joseph, Mo., Nov. 10.—Cattle—Receipts, none. Hogs—Receipts, 6,000; weak to 5c lower; top, \$6.20; bulk, \$6.12½. Sheep—Receipts, none.

National Stock Yards, Ill., Nov. 10.—Cattle—Receipts, 300, including 150 Texas; quiet. Hogs—Receipts, 3,500; 5c higher; top, \$6.30; bulk, \$6.15. Sheep—Receipts, 300; slow.

Messrs. Clay, Robinson & Co. write as follows under date of November 10th:

Receipts of cattle the past week have numbered 74,000 and have included a very considerable portion of western ranchers for so late in the season. Top price for fat cattle for the week is \$7.25, at which price we sold for Mr. Frank H. Trailer, of Marne, Iowa, nineteen head of 1,463-pound beefs of mixed Hereford and Short-horn breeding, full fed since last February. Prices show very little change from a week ago. There has been a good demand from all sources and the increased supply has been readily taken care of. There has been a big demand for feeding cattle the latter part of the week, or since Tuesday in fact, and as feeder buyers have bid on some of the low-price, short-fed, corn-fed stuff slaughterers have been compelled to pay a better price for that kind than early in the week. As the run of western cattle is now practically over, killers will henceforth have to look entirely to the corn belt for their supplies and, as from all advances there is no big number of corn-fed cattle to come to market during the next two months, we look for a very satisfactory trade. All classes of butcher stock is selling about steady with a week ago.

Trading in stockers and feeders was rather dull Monday and Tuesday, possibly due to the election falling on the latter day, but Wednesday there was a big attendance of buyers here and values stiffened considerably. We succeeded in buying on low spots several loads of cattle for customers as cheap as they could have been had at any time this season. On the present market good to choice feeders are quotable at \$1 to \$1.60, good to fancy stockers \$3.60 to \$4.25, medium to fair stockers \$2.75 to \$3.50; fair to good thin young cows \$2.25 to \$2.50, fair to good stock heifers \$2.25 to \$2.75, stocker and feeder bulls \$2.60 to \$2.85.

The run of hogs has been moderate, considerably smaller than last week and over 50,000 smaller than the corresponding time last year. The fluctuations of the past week

Your Farm Pays for Itself in the Southwest

The light shaded portions represent very fertile sections in the Southwest.

It is not uncommon for a farmer in the Southwest to pay for his farm in one year. This can only be done where the crops are big, the prices good, and the land cheap. Precisely these three conditions exist in the Southwest. Good rich land can be bought for a small part of what land costs in your locality. This land will yield 50 bushels of corn to the acre, 30 bushels of wheat, 90 bushels of oats. The average prices received by farmers in the Southwest during the past five years was higher than the prices secured by farmers in your neighborhood.

Now is Your Opportunity!

You can sell your present farm—pay off the mortgage and have enough left to buy a big farm in the Southwest that will make you independent in a few short years.

Send for the "Coming Country."

The "Coming Country" is a very interesting paper published monthly and devoted to the Southwest. It will post you on conditions in the Southwest better than anything that you could read. I'll be glad to have the publisher place your name on the mailing list and send you a copy of the paper regularly for one year for 25c (half the regular price.) Write now to

S. G. LANGSTON, Sec'y., M. K. & T. Land Bureau, 306 Wainwright Bldg., St. Louis, Mo.

THE HOME TOOL KIT.

There is many a nick in many a good tool because it was not properly cared for. If tools are thrown together in a box or drawer, they are soon ruined.

To provide a set of good tools for the home and the proper place to keep them the Keen Kutter Tool Cabinets have been built, containing every tool that is necessary or useful, and each tool belongs to the famous Keen Kutter brand, which is the only complete line of guaranteed tools made.

Keen Kutter Tool Cabinets are the only ones made containing a set of tools under one name and trade mark, and guaranteed to be perfect in every respect.

Keen Kutter Tool Cabinets give the home man an opportunity to possess as good a set of tools, kept in as good condition, as the most experienced carpenter or cabinet-maker.

It is more necessary to have the best tools for the home than for the shop, because few men have the facilities for grinding, sharpening, resetting and restoring dulled or damaged tools at home.

The tools in Keen Kutter Cabinets are sharpened and tested at the factory, and must be perfect before they leave on their errand of service. They will hold their edges, temper, balance and adjustment indefinitely with proper care and ordinary use.

Keen Kutter Tool Cabinets and Tool Boxes are made in all sizes, containing various assortments of tools, and ranging in price from \$7.50 to \$100. All of them contain, in different varieties and numbers, saws, braces, bits, chisels, gimlets, awls, planes, hammers, hatchets, files, pliers, screw-drivers, wrenches, nailsets, reamers, rules, squares and all the necessary accessories that you would possibly need.

The Keen Kutter Tool Cabinet Booklet will be sent free to anyone on request by Simmons Hardware Company, St. Louis and New York, U. S. A.

Galloway Herd Book.

Volume 16 of the Galloway Herd Book will be ready for distribution immediately after the International Show. It will be illustrated with all the noted prize winners of 1906, and will contain a detailed list of awards of all the leading shows of 1906. Members desiring volume 16 immediately after it is issued should remit the usual fee of twenty-five cents to pay postage or express.—(Address Chas. Grey, Exchange building, Union Stock Yards, Chicago.)

Griffitts' Duroc Sale.

The fact that more boars were cataloged in Mr. H. B. Griffitts' Duroc sale at Bowen, Ill., on Friday, October 26th, than there seemed demand for, had a tendency to lower the average. The gilts, however, brought satisfactory figures. Mr. H. B. Loudon, of Clay Center, Neb., topped the sale, paying \$150 for a March gilt by Ambition, a prize-winning boar at Illinois State Fair, 1905, and again this year. The dam of this gilt was by Buddy K. IV., champion boar Illinois State Fair, 1905, and second prize aged boar, 1906. Mr. Loudon was a

INVESTORS AGENT AND COLONIZERS. LARGE TRACTS FOR INVESTORS.

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you, 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal living farm and \$45 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands at low prices, but also get located in the finest climate, where crop failures are unknown; no bugs, flies or rust; freedom from electrical and destructive wind and hail storms; where fruits of all kinds do well. This is no experiment, as the country has been thoroughly tested. Special inducements to parties buying this fall. Railroad fare refunded to purchasers. Write for pamphlet to

THE BIG BEND LAND CO.,

FARMS WANTED, in exchange for income property, residences, hotels, elevators, mills, livery barns, stocks hardware, groceries, dry goods, general merchandise, stallions, registered cattle. Can get good trade. Northern Iowa Land Co., Independence, Ia.

EASTERN KANSAS FARMS! Near Kansas City at \$40.

240 Acres: Sixty miles south of Kansas City, 3 miles from nice little town with two banks, 6 miles from good Catholic town; very nicely improved. Large house, good repair, good barn and outbuildings; lots of apples, grapes, pears, etc. The home place is all in crops and tame meadow fenced and crossed with hedge and wire, lies low and level (don't overflow), deep black soil, good water and a very healthy place. The 80 lies across road and covering only a few rods from barn and is all in pasture, 65 acres has been in other crops, but is now in tame grass, fenced with wire, a little shade; this is also good land (about 10 acres has a little limestone); clean of weeds and clear of encumbrance, \$40 per acre, half cash.

390 Acres: Five miles from above farm and being only better town, in crops as follows: 120 acres timothy and clover, 80 acres corn, 41 acres fall wheat, 60 acres natural blue stem meadow, 40 acres English blue grass, balance Kentucky blue grass; feed yards, large old orchard, immense shade in fine yard; buildings are, 1-room dwelling, newly painted, with good cellar, 6-room tenant house in corner of yard, stone horse barn, hay shed for 200 tons baled hay, cattle sheds, hog sheds, crib, tool house, small stable with 6 box stalls; waterworks supply house, barns, feed lots and pasture. No encumbrance, \$40 per acre, one-third cash, balance five years.

84 Acres: One mile from town near the above farms, 4-room house, quite a large, well-built barn and four or five sheds; good cave, fair orchard, land nearly level and good little farm; land adjoining held at \$50. Can sell this, same quality of land at \$45 per acre.

160 Acres: Two miles from Amoret, Mo., and 25 miles east of last named farm, all tillable except 10 acres of timber, which is mostly pecan. Good 1-room house, all necessary outbuildings; well fenced and cross fenced; fruit of all kinds, about 3 acres fine apple orchard, bearing; all kinds berries, grapes, pears, peaches, pecans, black walnuts; \$47 per acre, can give good terms.

FURTHER, these farms are connected by telephone and are on mail routes; they are either dark red or black limestone soil; is a comparatively smooth prairie country; it is an old settled farming community, where the improvements compare favorably with the homes of the readers of this paper.

WE have been in the banking business in the locality of these farms for a number of years and know of 30 or 40 good farms there offered for sale; we have endeavored to anticipate inquiries concerning the country and if anyone reading this advertisement is desirous of obtaining a good farm home at from \$35 to \$50, two hours' ride from Kansas City, they may come to our office and go with a member of the firm to look at the farm; in the event of a sale, their railroad expenses to be paid by us.

FROM DRUDGERY TO BUSINESS SUCCESS IS A SHORT STEP

Thousands of boys grow to manhood toiling at the hardest kind of work because they do not know that good business positions are within their grasp.

Big commercial houses and railroad companies want capable young men. They have positions as bookkeepers, shipping clerks, cashiers, stenographers, telegraphers, etc., which they can't fill satisfactorily because the right kind of boys are scarce. Banks, wholesale houses, railroads and packing companies have standing orders with Boyles Business College for all the competent young men and women the college can turn out.

FARM BOYS PREFERRED BY ALL BIG BUSINESS HOUSES

They prefer farm boys because of their steady habits and willingness to work and learn. Used to outdoor life farm boys have health and strength. Used to work, they don't shirk. Men at the head of the largest mercantile houses in the United States were once boys on the farm. Business men know this and prefer farm boys.

A boy of ordinary intelligence and industry can equip himself by a course in a business college to fill one of the many good positions waiting for competent young men.

Boyles Business College is the largest commercial school and institute of shorthand and telegraphy west of the Mississippi River. Owns and occupies an entire building. It has a large staff of competent instructors. Graduates are assisted to positions. Students may work stenographers, bookkeepers, or telegraphers. Write today.

BOYLES BUSINESS COLLEGE,

NO-TAR ROOF ROOFING MADE WITHOUT TAR, AS I MAKE MINE, WILL RESIST FIRE. LET ME TELL YOU WHY

I INVENTED many of the good asphalt roofs that are sold.

Five years ago I invented one of my own that resists fire and is better than any of the others.

Send me your name and address on a post card, and I will tell you all about this roof and how it secures lower insurance rates. I will also send you a sample of it to test, and a copy of my FREE book on how to lay roofing with no tools but a

sharp knife and a hammer. My book also tells why my "No-Tar" Roofing is the only roofing that is weather, water, acid and almost wear proof, as well as Fire Proof.

"No-Tar" won't crack in cold weather, won't melt in warm weather, and lasts as long as the building.

You ought to send for my book at once, if you have any roofs that need attention.

Write me a post card today. Do it before the matter has a chance to slip your mind.

O. A. Heppes, Secretary, THE HEPPESS CO., 2401 Fillmore St., Chicago.

FIELD NOTES.

Mr. Grant White, of Afton, Iowa, has a few Duroc Jersey boars for sale.

Six choice Duroc Jersey boars are offered for sale by Mr. Z. T. Kinsell, of Mt. Ayr, Iowa, at \$25 apiece.

Some good Hereford bulls and cows and heifers are offered for sale by Mr. J. G. Von Seggern, of Wisner, Neb.

Thirty choice Single Comb Brown Leghorn cockerels are offered for sale by Mr. Jno. C. Miller, of Harlan, Iowa.

Some very choice White Plymouth Rock cockerels are offered for sale by Mrs. T. A. Baldwin, of Emmetsburg, Iowa.

A brood sow sale of Poland China hogs is announced to take place on February 2d, by Mr. Bert Fry, of Clearfield, Iowa.

Read the advertisement of Mr. J. C. Hoag, of Manson, Iowa, if you want something good in the way of a Poland China boar.

Thirty-five Duroc Jersey boars, sired by the \$300 boar, Glendale Jim, are offered for sale by Mr. J. S. Golder, of Scribner, Neb.

Poland China boars at greatly reduced prices, just to make room, are offered for sale by Dr. H. Pritchard, of Wisner, Neb.

Mr. W. J. Hartung, of Maxwell, Iowa, names February 9, 1907, as a date for holding his public sale of Duroc Jersey swine.

Mr. W. F. Kilpatrick, of Harlan, Iowa, is offering White Wyandotte cockerels for sale and will be pleased to hear from any of our readers.

Pure White Wyandotte cockerels are offered for sale at low prices by Mr. W. S. Gregory, of Keota, Iowa, on page 29 of this issue of The Homestead.

Percherons and Percherons only is the motto of that reliable firm of Messrs. L. H. Humbert & Son, of Corning, Iowa. They also have a few Percheron mares for sale.

Fifteen very choice Hereford bulls are offered for sale by Mr. Z. T. Kinsell, of Mt. Ayr, Iowa. He also offers to sell fifteen of his very best heifers. There is no better breeding than is behind these cattle.

Messrs. Peter Hopley & Son, of Lewis, Iowa, have a grand lot of Percheron, Shire, Suffolk and German Coach stallions for sale, the best they have ever had. They also offer a few very choice Suffolk fillies for sale. Write them about these at once.

Mr. Hal T. Hooker, of Maryville, Mo., claims Mar. 19th and 20th for his sale of Aberdeen Angus cattle, the sale to be held at South Omaha, Neb. Future announcements will tell of the offering. Watch these columns for particulars of the sale.

Corn, wheat and alfalfa farm lands are offered for sale in central Nebraska by Mr. P. H. Marlay, of Mason City, Neb., in his advertisement on page 22 of this issue of The Homestead. He states that these are the very best and extra choice, with excellent and abundant water, in a good healthy climate, always raise good crops, and in a prosperous, intelligent community. Mr. Mar-

lay invites inspection and would be pleased to hear from any Homestead reader who contemplates investing in Nebraska land.

Dept. E. F. P. Agency, of Ames, Iowa, is offering a fountain pen for thirty cents postpaid in their advertisement appearing on page 27 of this issue of The Homestead.

On page 29 of this issue of The Homestead appears the advertisement of Mrs. G. R. Fuller, of Rolfe, Iowa, offering Buff Orpingtons and Buff Plymouth Rock cockerels for sale.

Mr. John H. Krehbiel, of Donnellson, Iowa, has a few Chester White hogs for sale. His advertisement appears on page 36 of this issue. Write him for prices and other information.

A few very excellent Poland China boars are offered for sale by Mr. Henry Dorr, of Remsen, Iowa. These are sired by his great herd boar, Dorr's Tecumseh. Write him at once if you want one of the good ones.

In a recent issue of The Homestead we reported that Messrs. Osborn Bros. had sold their Poland China boar, Onward 102447, to Mr. C. L. Thayer. This was incorrect. They sold their hog to Mr. C. L. Thayer, of Fostoria, Iowa.

Mr. E. J. Trumbauer, of Patterson, Iowa, is offering Chester White swine for sale on page 29 of this issue. He writes that he has weighed a few of these lately and they run from 200 to 250 pounds. If wanting good Chester White boars write Mr. Trumbauer for prices.

Messrs. J. Crouch & Son, of Lafayette, Ind., the well-known importers of German Coach, Percheron and Belgian horses, have a new advertisement on page 29 of this issue which will interest all readers of this paper. Further particulars will appear in these columns next week.

Mr. W. D. Pittman, of Lake City, Iowa, writes as follows: "I recently bought a male pig out of Nancy 8th, sired by old Orion, which cost me \$232.50. I will use him on Ohio Chief, Zoov Orient, Crimson Wonder Jr. and a Tip Nother sow which I will offer for sale on February 6th."

Mr. Edward Dooley, of Selma, Iowa, has Rose Comb and Single Comb Brown Leghorns, White Plymouth Rocks, Silver Laced Hamburgs and Cornish Indian Games for sale as per his advertisement on page 12 of this issue of The Homestead. He also has white Pekin ducks for sale.

The man who has not bought his Duroc Jersey herd boar should write to Mr. Roy E. West, of Churdan, Iowa, and do it right away. He has some good boars for sale and he is making very reasonable prices on them. He needs the room and if any of our readers need a boar they can very easily do business.

Four hundred and eighty acres of land in the Red River valley of North Dakota are offered for sale by Mr. J. R. Hicken, of Peoria, Ill., as per advertisement on page 22 of this issue of The Homestead. There is a new set of buildings on this farm; the land is all plowable and it is located two and one-half miles from railroad town and eleven

1295 Portland-CUTTER

Can furnish cutters for \$12.95 and upward guaranteed equal to those retailed locally for \$10.00 to \$15.00 more than our price. Worth saving. Isn't it? Send for Special Circular. Largest line ever shown. Lowest prices ever known on good work. Many styles built in our own factory. Bob-Sleds at \$9.55. Write today.

MONTGOMERY WARD & CO.
 Chicago and Kansas City.

miles from county seat. For further particulars write Mr. Hicken.

Mr. B. R. Burt, of Coggon, Iowa, breeder of Chester White swine, writes: "I have had a nice sale, but still have left some good boars of April farrow and some very choice gilts of March and April farrow that I am pricing well worth the money." See Mr. Burt's advertisement on page 35 of this issue.

Mr. C. N. Gerard, of Bradford, Ill., is offering Houdan cockerels, Toulouse geese, Rouen ducks and Belgian hares for sale in his advertisement appearing on page 12 of this issue. They are prize winners and he wants Homestead readers to write him for prices and other information in regard to his stock. He guarantees satisfaction.

Mr. L. C. Welch, of Bedford, Iowa, in sending copy for his advertisement which will be found on page 39, writes: "I have five Duroc Jersey boars still on hand and they are good ones. One of them is a top notcher. These fellows are heavy boned, with length, plenty of scale and a good rich cherry color, and I am making prices that will move them."

The new advertisement of Mr. J. A. Bell, of Allison, Iowa, offering Chester White boars of March and April farrow for sale, will be found on page 29 of this issue of The Homestead. Mr. Bell writes: "These pigs are extra length, have heavy bone, good hams and shoulders, good back, good coat of hair and will weigh from 150 to 250 pounds." Mr. Bell will sell these pigs C. O. D. if desired.

The Short-horn man who is wanting a herd header, a pure Cruickshank, and an individual combined, should lose no time in seeing Mr. C. C. Norton, of Corning, Iowa. He has three or four young bulls on hand that are good enough to head any herd in this country, or any other country. They don't breed them any better than these. Write Mr. Norton about these at once, but a better way is to go and see them.

Mr. M. A. McWilliams, of Wall Lake, Iowa, who announces a public sale of Duroc Jersey bred sows on February 22d, writes that his sows are doing extra well this year, and especially his Orion J. gilts. These will be bred to a grandson of Duroc Challenger and other good boars. He writes: "I still have a few choice March boars for sale sired by Orion J. They are fine growthy fellows and are priced at living prices."

Mr. W. W. Vaughn, of Marion, Iowa, has some lengthy, well-formed, strong-boned Chester White boars of March and April farrow for sale. They are ready for active service and will be quoted at moderate prices. He has thirty of these that he wishes to sell at once. He also has gilts, either open or bred, that he will be pleased to quote prices on to Homestead readers. His advertisement in its new form will be found on page 36 of this issue of The Homestead.

Twenty-five pedigreed Poland China pigs of both sexes, at reasonable prices, are offered for sale by Mr. Samuel Locke, of Selma, Iowa, in his advertisement on page 29 of this issue of The Homestead. Mr. Locke writes: "These pigs are of Perfection, Tecumseh and Wilkes breeding. They are large with nice coats, heads and ears. They have good bone, are growthy and cannot help but please the buyer." He has shipped pigs this season to Oklahoma, Nebraska and Missouri.

Messrs. Reubel Bros., of Rockwell City, Iowa, are offering twenty March and April Poland China boars for sale in their large advertisement found on page 29 of this issue. These boars are sired by R's Keep On, Iowa Chief and other noted sires. They are long, growthy fellows, of good color, heavy bone and smooth, out of large, roomy sows and weigh from 175 to 200 pounds. If any reader of The Homestead is in need of good Poland Chinas, we advise them to correspond with Messrs. Reubel Bros. at once.

A few good Duroc Jersey boars, sired by Crimson Wonder Again, the Iowa State Fair sweepstakes boar, and out of a granddaughter of the World's Fair sweepstakes boar, Tip Top Notcher, are offered for sale by Mr. Grant Summers, of Malvern, Iowa. His prices on these are very reasonable, considering how they are bred. He also has some splendid boars, sired by Lottie's Top Notcher, a son of Top Notcher Again, the World's Fair boar. Read his advertisement on page 29 of this week's Homestead and write him right away, as these will go quickly.

The Duroc Jersey herd boar, Crimson Model 41275, a half brother to Iowa Banker, is offered for sale on page 39 of this issue by Mr. L. L. Woods, of Grinnell, Iowa, who also has some of his pigs from sows by Gay Advance 28775 for sale. Mr. Woods writes: "The sire of this boar is Reed's Model 23889, dam Big Nellie 26352, the dam of the great show and breeding boar, Iowa Banker 23891. He was two years old November 1st, is an extra good one and is a bargain for anyone who can use him. I am keeping a lot of his gilts and have no further use for him."

Mr. R. C. Poston, of Corydon, Iowa, is offering fifty topdy Duroc Jersey boars and gilts for sale in his advertisement on page 29 of this issue. He reports that these are a choice lot sired by Junior Jim and Arion. They are of good bone, color and length, and, in fact, on all points are excellent. They will develop into the good hogs their breeding shows they should. He will price these for the next thirty days so they will sell, and if readers of The Homestead want good breeding stock they should write Mr. Poston at once.

Mr. W. J. Prather, of Russell, Iowa, writes in regard to his Duroc Jersey swine, an advertisement of which appears on page 38 of this issue: "I have some good growthy gilts for sale by Proud Advance and Top Notcher Again. Some of them are of extra length. I also have a fine bunch of gilts and as I will not have a sale I will sell them bred or open, with more than sale expenses off. If any reader of The Homestead is in need of something lengthy, I have them sired by the second-prize yearling at Des

Moines this year and the third-prize at the Nebraska State Fair."

Messrs. J. H. Hamilton & Son, of Guide Rock, Neb., wish to announce that they will hold their annual Poland China brood sow sale February 16, 1907. There will be sows in this sale sired by Mogul, sweepstakes boar of 1905, and bred to I Am Allerton by I Am Sunshine, one of the best yearling boars we have had the pleasure of looking at this fall. They also have a yearling Short-horn bull that should go to someone who is looking for a good one. His sire was Lancaster Royal by Imp. Prince Oderic, dam Anna Lec 5th by Sir Richard.

Mr. Fred Ehendorf, breeder of Poland China swine, of Strawberry Point, Iowa, in furnishing copy for his advertisement found on page 29 of this issue, writes: "I am shipping today some Silver Laced Wyandotte cockerels to Nebraska and a good spring pig to Mr. James McKilrick, of Zwingle, Iowa. The boars that I am offering for sale are long, deep, broad backed and are in shape to do the buyers good. They are of Tecumseh and Perfection breeding and weigh from 370 to 400 pounds and are not fat. I will soon be offering for sale a fine lot of bred sows. They will be bred to Hustle On and a son of Impudence, Spellbinder and others."

The White Oak herd of recorded Duroc Jersey swine is again represented by an advertisement in the columns of The Homestead. It will be found on page 39 of this issue. Messrs. J. W. Troy & Bro., of Rosehill, Iowa, are proprietors of this herd and now have a number of well selected boars of March and April farrow for sale. These boars are sired by Top Notcher Model 37663. He is of the same breeding as Top Notcher Chief, that won first prize and first as sire of herd at the St. Louis Fair in 1904. The sires in the White Oak herd are of the blood of Reed's Banker, Advancer, Advance and Top Notcher Chief. Write them for prices and description.

On December 18th Mr. G. W. Harrison, of Washta, Iowa, will make a public sale of Short-horn cattle at his farm near town. He will sell thirty head of cows, many of which will have calf at foot by Scottish Knight and Scottish Knight 2d. There will be twenty yearling heifers in the sale, mostly Scottish Knight heifers, and they are good ones. Iowa Short-horn breeders will remember Scottish Knight as the splendid Scotch bull that formerly headed the H. W. Weiss herd. He was bred by Messrs. John Miller & Son, of Brougham, Ontario, and was a son of that great Cruickshank bull, Northern Light. His dam is Bessie Girl by Imp. Craven Knight, second dam being Imp. Bessie Lass by old Banner Bearer. In his prime he was considered one of the best bulls in the state. As a breeder he is strictly all right yet, and the heifers that go into this sale will speak for themselves. Mr. Harrison is putting in a roan heifer that is going to be a decided attraction to his sale. She is a daughter of the noted bull, Scotland's Crown, that formerly headed the Ames College herd, and her dam is one of the best Victoria cows in the

state. She is bred to Scottish Knight and safe in calf, and she is a good proposition for some enterprising breeder. There will be six or eight bulls sold individually and a car load of bulls sold in a car load lot. The most of these are sired by Scottish Knight. Watch for announcement of this sale in later issues of The Homestead.

In furnishing copy for his advertisement, found on page 29 of this issue, Mr. J. B. McAllister, of Palo, Iowa, writes: "The Barred Plymouth Rocks I have for sale are of the noted Eclipse strain, which have been among the best winners at our great Chicago, Milwaukee and other western poultry shows for years. They are noted for their bright blue barring and excellent style and I am pricing them so low that every farmer can afford to purchase them to improve his flock. I can also mate up pens for best results for those wishing to start in the breeding of this most popular and profitable variety of chickens. My prices are very reasonable, considering the high quality of my stock. My circular is free to Homestead readers."

Messrs. P. S. & S. Barr, of Davenport, Iowa, write: "The Poland China boars which we are offering for sale are large and of good bone and we are having quite a call for them from several states. We have a choice hunch yet all out of a mature dam and sired by one of the best herd boars we could purchase at the Illinois State Fair last season. He is of Chief Perfection fame. We can please customers wanting good breeding, growth, length and breadth. We have one two-year-old herd boar weighing 650 pounds, of extra length and bone, that we can spare soon at \$40. Our spring boars we are selling at \$20 and \$25. We have twenty head of Short-horn cows and heifers for sale at reasonable prices." See their advertisement that appears on page 37 of this issue.

Mr. J. G. Truman, manager of Truman's Pioneer Stud Farm, importers and breeders of Shire, Percheron, Belgian, Suffolk and Hackney stallions, of Bushnell, Ill., writes under date of Nov. 2d: "I am pleased to report the safe arrival home of our Hackney stallions and mares from the Chicago Horse Show, where we have been exhibiting them this week. I believe I am safe in saying that never has there been as good a show of high-class, high-acting horses as the Coliseum show this week. In the class for stallions of any recognized coaching breed for trotters, Cleveland bays, French and German coaches and Hackneys, our Imp. Prickwillow Connaught carried off first, and Dashing King, our three-year-old, stood third. Included in this class was the celebrated Hackney stallion, Tiger Lily, and the trotting-bred stallion Drummer Boy, two of the most noted show stallions in the United States. In the class for mares of any recognized coaching breed — trotters, Cleveland bays, French and German coaches, and Hackneys, our imported mare, Queen of Diamonds, was a very easy winner over the best lot of Hackney mares ever shown in the United States. Both Prickwillow Connaught and Queen of Diamonds are sired by the unbeaten champion harness horse Forest King,

Most makers of lamp-chimneys don't mark their wares—possibly they are ashamed to.

If I didn't make as good chimneys as I do, I wouldn't mark mine either.

I mark mine "MACBETH"—my own name—because I am proud to be known by them.

My Index—it's free—tells other reasons why my lamp-chimneys are marked and why I am proud to put my name on them. May I send it to you?

Address, MACBETH, Pittsburgh.

\$4.50 Buys Best All-Steel Farm Gate
Cheap as wood. Lasts a lifetime. 12 ft. long; 4 ft. high. Resists all kinds of stock. Also Farm Fence, Ornamental Wire and Wrought Iron Fences. Catalogue Free.
Ward Fence Co., Box 302 Marion, Indiana

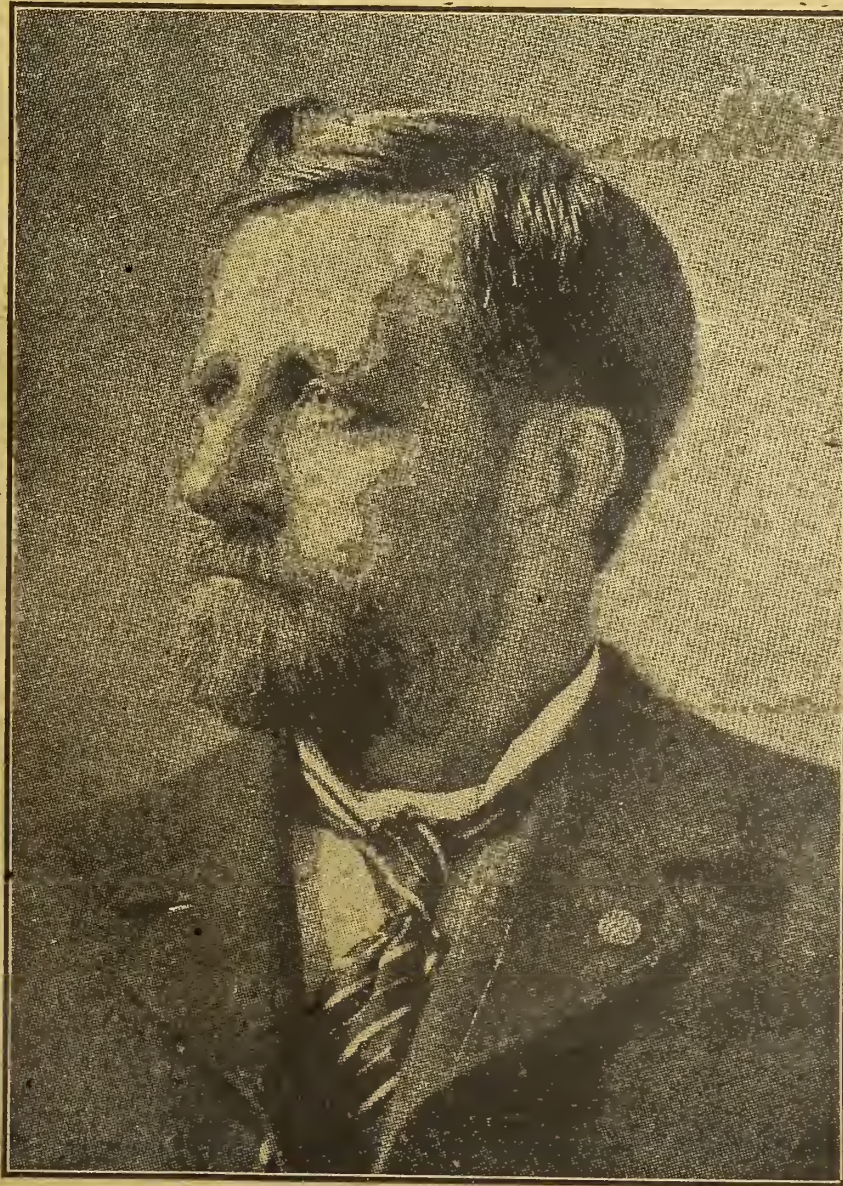

owned by Judge Moore, of New York, and Dashing King is also a grandson of this world-renowned horse. When we take into consideration the class of horses we had to show against, I feel safe in saying it is the greatest victory ever won by any firm in the United States within recent years. In other words, I question very much whether these two prizes were ever before won by any one firm at the Chicago show. I am very pleased to say that trade with us is opening up very good and the prospect for the horse business, either in heavy or high-stepping horses never was brighter. We have recently issued our latest catalog, which we shall be pleased to mail to any of your readers that will mention they saw the advertisement in your paper." See advertisement on page 34.

Mr. T. A. Stevenson, breeder of Chester White swine and Aberdeen Angus cattle, of Shannon City, Iowa, whose new advertisement appears on page 29 of this issue of The Homestead, writes: "I have some very choice Chester White males and females of March and April farrow, and a tip top lot of Aberdeen Angus cattle of both sexes for sale. I will make reduced prices for thirty days. My young things are all sired by my herd bulls, Elidure 73161 and Blackbird's Eclipse 33879, and out of choice females. I have yearlings and one very choice breeding bull four years old which I will sell. I will also sell my herd bull, Blackbird's Eclipse 33879. My Chester White pigs are all sired by two choice boars, Prince I Am 15271 and Dandy Boy 15269. They are out of some of my best brood sows."

Another of the great herd bulls to be sold in this sale is Second Baron 216675, a three-year-old Cruickshank Secret-bred bull. He is sired by the great Baron Victor that did such excellent service in the Colonel Harris herd, and is one of the most intensely-bred Cruickshank bulls in America. He was the first-prize yearling bull at the Iowa State Fair and then sold for \$1,000, a full brother going to California at \$1,000. He is a dark red fellow, very low and blocky and has proven a wonderful sire. Here is a chance for some good breeder to select a herd header that is a credit to the breed. Come and inspect the herd. They will be on exhibition at the sale barn several days before the sale and Mr. McLemore will be glad to explain everything in regard to the herd. Catalogs are now ready and will be sent to anyone who will drop a card to Mr. W. McLemore, of Kearney, Neb.

Mr. O. E. Osborn, breeder of Duroc Jersey swine, of Weston, Iowa, writes: "My Duroc Jersey hogs, at the head of which is Ohio Chief, are doing fine work this season. Ohio Chief is as vigorous as a pig; also Indictor, assisted by Bell's Chief, a son of Ohio Chief and Nebraska Bell, a son of Buddy K. IV. This is a boar that I bought at the Baxter sale at Pawnee, Ill. He is a splendid boar. I have two good Ohio Chief boars that I would sell at a reasonable price. I would also sell Briggs' Prince, a two-year-old boar that I have used with good success. His sire is Morton's Prince, his dam a full sister to Red Lady, the great show sow. He is a good boar all over; good enough to go into any herd. Anyone who wants a boar of this kind will do well to buy him. The first \$100 draft takes him. I have several other good spring boars to sell."

The new advertisement of Mr. J. B. McAllister, of Palo, Iowa, offering Poland China boars and sows for sale, will be found on page 29. Mr. McAllister in furnishing copy, writes: "The Poland China sows and boars that I am offering for sale are all sired by H's T. C.'s U. S. 556011, an 800-pound hog in show condition. His sire was the noted T. C.'s U. S. by Concordia U. S.; his dam, Beauty by Bigger Lad, bred by Mr. Jacob Grossman, of Lanark, Ill. H's T. C.'s U. S. is a great, broad-backed, deep-bodied hog, with good length and heavy bone. He is jet black in color and his pigs take after him. I have twenty boars and forty young sows to offer for sale. They are the finest bunch I ever raised. I am offering them cheap to move them at once. Any of your readers who are looking for a good young boar or some nice growthy gilts should write

Mr. Ed A. Baxter, of Pawnee, Ill., who on October 31st purchased a Proud Advance fall gilt, not bred, at the record-breaking price of \$500. He is proprietor of the Pawnee herd of Duroc Jerseys, at the head of which stands Buddy K. IV., first and champion 1905 Illinois State Fair and second-prize aged boar 1906 at the same fair. Mr. Baxter is one of the foremost breeders of Durocs in the middle West and recently secured an average of \$68 in his annual fall sale. He has a few extra good boars for sale at reasonable prices.

CUT ICE

With the Dorsch Double Row Ice Plow We guarantee it will cut more than 20 men sawing by hand. Cakes are cut uniform, of any size and thickness. One man and a horse will cut more ice in a day than the ordinary farmer and dairy man can use. You can cut for others and make the price of your plow in two days use. Ask for catalogue and introductory price.
JOHN DORSCH & SONS 216 WELLS ST., MILWAUKEE, WIS

THREE
SIZES

me early for prices, as I expect them to sell like hot cakes."

The new enlarged and illustrated advertisement of Messrs. H. C. Dawson & Sons, of Endicott, Neb., breeders of Poland China swine, will be found on page 23 of this issue of The Homestead. These gentlemen have been breeders for over forty years and they claim that their "Big Bone," "Big Litter" kind of Poland Chinas, that make up their "Expansion herd," have always won at fairs when shown. If wanting good Poland Chinas write them for prices or any other information desired.

Mr. S. J. Butts, breeder of Duroc Jersey swine, of Mason City, Iowa, in sending copy for the advertisement found on page 23 of this issue, writes: "My stock is growing and in good condition. They range in weight from 160 to 200 pounds. The old boar is in extra good condition and was bred by Mr. Freed, of Ames, Iowa. The sows are good breeders and right in every way. The young stock I am offering for sale is mostly sired by a big son of Top Notcher Again. My reason for selling my old boar and aged sows is that I must change the blood in my herd."

The new advertisement of Mr. James Cockerton, of Whiting, Iowa, will be found on page 29 of this issue of The Homestead. In writing in regard to his herd of Poland Chinas, Mr. Cockerton says: "The pigs I am offering for sale are an extra good bunch with plenty of length and bone. Some of the March farrow pigs have a bone measurement of seven inches around the hind legs. The length from between ears to root of tail is from forty-four to forty-eight inches. They have good head and ears, extra good feet and legs, with good, strong backs. In fact, they are good all over. At the county fair this fall I won sweepstakes on Standard Chief 2d, also first and second on male pigs. I am Sunshine is the hog that topped the sale of Mr. Podendorf at Council Bluffs this year. I also have a few sows for sale. I guarantee all stock to be as represented. I have bred Poland Chinas for the last ten or twelve years, but have always been able to dispose of my stock to home buyers."

Mr. C. S. Buckley, of Holstein, Iowa, the well-known Berkshire and Short-horn breeder, writes: "Our Berkshires are doing nicely and anyone who wants a good pig had better write or come at once. These pigs are large and growthy, weighing 150 to 200 pounds and are the best lot of March and April pigs we ever raised. (We don't say this every year, but when we do mean it.) They are sired by Conquest 2d, the largest-boned hog we ever say. Conquest 2d was the first-prize pig at the Minnesota State Fair in 1903 and one of the litter than won the championship

over all breeds at the same fair. He has never been shown since. We have two boar pigs farrowed March 17, 1906, by Conquest 2d and out of Pretty Face, the first-prize aged sow at Sioux City this year, that are fit to head any herd. One is the second-prize pig at Sioux City and is a typical Berkshire from the tip of his nose to the end of his tail. The other is an extra good bodied pig, but has not as fancy a head and ear. The balance are out of such sows as Miss Valentine, a daughter of Ideal Lady 15th, the best sow we ever owned; Dolly Varden, a daughter of Pretty Face, for whom we refused \$100; Blue Bell, an extra good sow with an English outcross and whose litter sister we sold for \$75 as a gilt, and others equally good. We have a fine lot of June pigs by Benjamin's Faithful, an imported-bred boar, and a good one, by the great Faithful Commons and out of daughters of the above sows. We have shown and won at international, state and interstate fairs, but will give only our latest winnings, those at Sioux City this year, where we showed thirteen of the sixty-one head shown, and won the following, winning in every class we entered: Second on boar six months and under one year (we still have this boar for sale at a reasonable price); first on boar pig under six months on Ireland, a son of Rose Hamilton and Conquest 2d; second on boar pig under six months on a son of Pretty Face and Conquest 2d; first on aged sow on Pretty Face; first on sow one year and under two on Inez, a daughter of Ida, also the dam of Artful Ida, the first-prize and sweepstakes sow at Des Moines in 1903; fourth on sow six months and under one year; first on sow under six months on a daughter of Pretty Face; second on young herd, and second on young herd bred by exhibitor; third on get of sire; first on four pigs under six months produce of one sow, on the produce of Pretty Face, and sweepstakes sow on Inez. This is a remarkable record, considering we showed spring pigs against aged and yearling hogs. If you want bone, length, size and quality we can surely please you. Our hogs are all perfectly healthy and there is no disease near us. There is no "gush," wind nor lies in the above. If you don't believe us, come and see. For extra good boars this year we have the bull by the tail and a down-hill pull. You may get a cheaper boar, but you will not get a better one."

RAW FURS AND HIDES.

R. L. Percival Company, 1102 Cherry St., Des Moines, Iowa, the largest hide and fur house in Iowa, want Homestead readers to write them for price lists and shipping tags. This is a thoroughly reliable house. See advertisement on page 5.

WHEATLEY & WARD CAN FURNISH ANGUS BULLS.

Those who are in the market for desirable Angus bulls just ready for service should write Messrs. Wheatley & Ward, of King City, Mo. Their herd is headed by three great breeding bulls; their cows are good producers and their stock is cared for in such a manner as to give best results. King City is thirty miles northeast of St. Joseph, Mo., on the Burlington railroad. See page 35 for their advertisement and when writing them kindly mention this paper.

FOR IMMEDIATE SERVICE.

Those of our readers interested in Berkshires will note the advertisement of Mr. Geo. S. Prine, of Oskaloosa, Iowa, in this issue. A strong lot of hogs are now ready for service. They should prove good investments, as their breeding is the very best. The herd hogs are Lord Lee 10th \$4563, first at Missouri State Fair in a strong class, a hog of excellent disposition, vigor and size; also Premier Masterpiece \$7941, a grand young boar showing evidence of great size and typical in conformation. He was sired by Lord Lee 61138, of national fame. The advertisement is on page 33. Please mention The Homestead when writing.

THE JANESVILLE STUD.

The name of no firm in the United States is better known among horsemen than that of Messrs. Alexander Galbraith & Son, of Janesville, Wis. This firm have stood by the Clydesdale horse through dull times and in brisk times and since 1881 this has been the leading Clydesdale importing firm in the country. In recent years the firm has been attracted by the adaptability of the English Hackney horse to certain conditions of this country, and now large importations of Hackneys are annually brought to Janesville by Messrs. Galbraith. Mr. Alexander Galbraith, the senior member of this firm, has always claimed that for cleanness of limb as applied to bone, springiness of pastern, freedom of action and all round quality in limb and in body the Clydesdale horse stands at the top, and judging by the kind of horses that have been brought from Scotland by Messrs. Gal-

Let Me Quote You a Price on the AMERICAN Manure Spreader

30 Days' FREE Trial

To prove all of our claims for the celebrated American Manure Spreader, we allow 30 days' trial on every Spreader we sell.

This permits the customer to use the Spreader on his own farm for a full month to be satisfied that it is just as represented. If not as represented it can be returned to us. We pay all freight both ways—trial being FREE.

The low price I want to quote you on an American Manure Spreader will be for the Spreader delivered at your station.

We manufacture and sell the celebrated American Manure Spreader to the consumer direct from our factory—saving all the middle profits made by jobbers and dealers. These profits are left out of consideration in the prices that I want to make you direct from our factory on an American Manure Spreader.

This means that you can buy from our factory at factory prices—be a Wholesale Buyer.

And that isn't all! We don't ask you to pay cash in advance.

We sell the American Manure Spreader on Time—

liberal time payments—giving our customers easy terms to pay for their Spreaders—letting the Spreader really pay for itself as it earns for you.

We are the only concern in the United States manufacturing and selling Manure Spreaders direct to the user on time and on trial at low factory prices.

The American Manure Spreader has 40 per cent more exclusive features than any other Spreader. It is high-class in every respect—made to last a lifetime.

There is no question about the American Manure Spreader being the standard Spreader of the world.

We Pay All Freight

This price will be for the Spreader on time—this price will be a price that is lower than dealers are charging for Spreaders that are not nearly so good as the American. When you examine all the exclusive features of the American you will agree with me.

Write for my price—and write for my catalogue and booklet. They will tell you all about the American Manure Spreader and give you a lot of good information on the question of fertilizing—a question that every farmer is interested in and wants to know all about.

Just write me today on a postal card. I will see that you get our book and my special price at once.

DETROIT, MICH.

braith & Son it looks as though all the claims that are made for the Clydesdale horse can be sustained. Just now there are about 100 extra good stallions in the Galbraith stud. These have been selected with the greatest care, the Clydesdales in Scotland and the Hackneys in England, and any man looking for either kind cannot do better than write Messrs. Alexander Galbraith & Son, of Janesville, Wis. Please mention The Homestead when you write.

TRAPS THAT CATCH THINGS.

If you are troubled with rats, weasels, rabbits, skunks or any such pests you should have a Newhouse trap, manufactured by the Oneida Community, Oneida, N. Y. Each trap manufactured by this company is perfect, because it is thoroughly inspected and tested. The Victor is the only reliable low-priced trap and no man is justified in buying a cheap imitation. Any trapper will tell you of the superiority of all Victor traps. Twenty-five cents will secure you a copy of the Newhouse Trapper's Guide, which tells of the best methods of trapping and skinning game. Address Dept. A-13, Oneida Community, Oneida, N. Y., and mention this paper when you write.

IAMS AND HIS WINNERS.

Whatever else has been said of Mr. Frank Iams it is freely admitted by all that he does sell stallions. That he has the kind of stallions the people want is proven by the fact that there are few states that have not sent representatives to his great horse emporium to buy stallions, and if the intending purchaser has the money to pay for the same, or can give good bankable security, he never goes home without an animal. This year his barns are again full to the overflowing point, about 150 head being now quartered therein. His last importation arrived August 14th—120 head—and was made up of Percheron, Belgian and French Coach stallions, as well as a splendid lot of Percheron mares. Located at St. Paul, Neb., in the central part of the state, with an equipment of buildings and grounds that surpasses anything of its kind in the West, he has come to the front as one of the foremost horsemen in this land of ours. The name of Frank Iams is known from coast to coast, and from the northern boundaries of Canada to the gulf, and in the most remote region you will find stallions doing service that have been imported or bred by him. In the first place Mr. Iams is an advertiser and his advertising is peculiarly his own. It smacks of originality, and is frank to the extreme, but it reveals

the character of the man behind the gun. In the first place he is a judge of a horse, and we unhesitatingly say that there is not a better judge either this side or the other side of the water. In the next place he buys his own horses without the assistance of an interpreter, as he speaks both the French and German languages. In the next place he sells his own horses, without the assistance of any middlemen, and these and several other reasons are why he can sell a horse cheaper than can be bought elsewhere. As to the kind of horses imported and sold by Mr. Iams, we simply point to the show records of the past few years. As a showman he has few equals, and the great array of sweepstakes ribbons and first, second and third prizes, testify to the fact that he has the horses. Mr. Iams' horses have been shown at the International at Chicago, the Illinois, Iowa and Nebraska State Fairs, and he always gets his share of the ribbons. He made the sensational show at Nebraska this year, winning every first prize and sweepstakes in Percheron class except one, in the two, three and four-year-old classes. He also won every first and second in two, three and four-year-old Belgian classes, and sweepstakes. He showed two coach horses and won two prizes. He was also a leading winner at the Iowa State Fair, and at the Illinois State Fair he got second prize on Bismuth and was only beaten by the noted horse, Pink. It is only fair to Mr. Iams to say that for a long time Bismuth was at the head of his class, and it was after much deliberation that he was placed second. In other words he came very near landing the championship at Illinois. To be beaten only by the great horse, Pink, in the greatest horse show held this year is no disgrace, especially when you remember that there were state fair winners and international winners in the show. Mr. Iams says he is not in the stallion trust and therefore you can buy a good horse for less money than elsewhere. He places insurance on any horse that sells for \$2,200 to \$1,500 to a reliable man or company. The man that has the money to pay for a horse, or the man that can give a bankable note need not go away from Mr. Iams' barns without a horse. There is no question about his having the horses. A visit to the Iams barns will convince the most discriminating buyer, and he sells them for less than the same horse can be bought for elsewhere. If you want a stallion it will by all means pay you to visit Mr. Iams and see his horses before you go elsewhere. Read his advertisement on page 40 and write for his catalog, which fairly bristles with live 'uns from cover to cover, and you will be convinced. Kindly mention this paper when writing for it.

WOODLAND HERD OF DUROC JERSEYS.

A representative of The Homestead for the first time visited that well-known breeder of Duroc Jersey swine, Mr. S. P. Freed, of Ames, Iowa. We had heard much of his great herd boar, Manley Orion, conceded to be the greatest son of that great show and breeding boar, Old Orion. This is one of the best-backed Duroc Jersey boars possessed of sufficient scale, and standing on the best of feet, of which we have any acquaintance, and as a breeder he is par-excellence. He was a second-prize winner at the Iowa State Fair in 1905 in the eighteen months' class, and was also a winner again in 1906 in the aged class. Mr. Freed has had a splendid trade on his male pigs, and at this writing only has a few good ones left for sale. Homestead readers have dealt very kindly with him in taking his crop of boar pigs at fair prices. He has only a few left at this writing for sale. We were much impressed with the splendid lot of gilts and fall yearlings that Mr. Freed is putting aside for his February sale. These will be bred to the best hogs of the breed, and be offered at public auction February 11th. Parties who desire to get some strictly first-class fall yearling sows or choice gilts should keep this sale in mind. We find Mr. Freed exceptionally well equipped for the proper growing and developing of swine, his farm being an ideal one for this business. Mr. Freed is his own herdsman and all his breeding operations are manipulated by himself, so that he takes no one's word for how his stock is bred

or cared for. His announcement appears in The Homestead at all times.

CROUCH'S HORSES.

Messrs. J. Crouch & Son, of Lafayette, Ind., the well-known importers of German Coach, Percheron and Belgian horses, have made an enviable record in the show rings the past season and the string of horses which this firm have on hand for the forthcoming show at the International is one of the strongest lots ever seen exhibited by one firm. Messrs. Crouch have long been known as importers of the best. The question of expense has been overlooked when a good animal was to be obtained. They have now at their stables in Lafayette, which, by the way, are the largest in the country, the Belgian stallion, Perce, said to be the highest-priced horse of the breed ever imported to this country and the greatest horse of the breed ever produced in Europe. This horse weighs in ordinary flesh 2,500 pounds and will be on exhibition at the International. A cordial invitation is extended to readers of The Homestead to inspect the exhibit of this firm while in Chicago, or better still, a visit to their barn is well worth the time and expense. If there is need in your locality of a stallion of the breeds mentioned above write Messrs. Crouch as per the announcement on page 29 of this issue, kindly mentioning The Homestead.

G.S. PERFECTION JR. 89471.

On page 26 we publish an illustration of the great Poland China boar, G.S. Perfection Jr. 89471, the principal herd boar owned by the well-known Poland China breeder, Mr. C. F. Shaffer, of Wellman, Iowa. He is a February two-year-old, sired by G.S. Perfection 77181. The dam of G.S. Perfection is Lady Lightfoot 143252 by U. S. Chief 24609. The dam of G.S. Perfection Jr. 89471 is Nemo G. 183486 by Chief Tec. 3d; second dam by Columbia 3d 107716 by Director; third dam by Columbia 2d by Ben Hur 2d. Mr. Shaffer is one of the progressive Poland China breeders in Iowa and he regards the use of G.S. Perfection Jr. 89471 in his herd as one of the most fortunate moves in his breeding experience. As is shown by the illustration, G.S. Perfection Jr. is a very neatly-finished boar, having an excellent back and crest, very neat head and ear, good underline, full hams and is supported on extra heavy feet and legs. It is this type which Mr. Shaffer has endeavored to produce and that G.S. Perfection Jr. has transmitted uniformly to his get. As is shown in the illustration he is nicely marked. If the writer were to criticize the portrait it would be to say that the artist had failed to reproduce the impressive masculine character which distinguishes this boar and which is a strong feature in any breeding sire. Mr. Shaffer is offering sons and daughters of this great breeding boar on page 37.

SOME GOOD DUROC JERSEY MALES.

Mr. Asa Turner, of Farrar, Iowa, is offering some extra good Duroc Jersey males. These young boars have plenty of length, good, strong bone, good width of hack, smooth shoulders, they are well hammed and nicely colored. They ought to come up to the above description because they are bred in the blue. King Perfection 16235, the well-known sweepstakes hog at the Iowa Fair, is the sire of some of these young boars, while Advancer Lad by Advancer, out of Rosehill Belle, is the sire of the remainder. The dams of these young boars were formerly owned by Mr. G. A. Munson, of Maxwell, Iowa, and most breeders in the corn belt know something of Mr. Munson's winnings at the Iowa State Fair. Among the sows are Prospect 79792 by Shakespeare, out of Countess 2d; also Maxwell Belle 33490 by Ohio Prince, out of Read's Fancy; and the third sow of particular note in Mr. Turner's herd is Miss Luther 33802 by Luther's Chief, Jr., out of Iowa Queen. These young boars must be sold in the next few weeks and Mr. Turner, in order to clean up the bunch, will sell at a very reasonable price. They are all sold under a guarantee to be strictly high class, the individuality corresponding with the rich breeding. You are safe in sending to Mr. Turner for a pig to head your herd. If you are looking for a Duroc male write him at once.

BIG-BONED POLAND CHINA BOARS FOR SALE.

Big-boned Poland Chinas are what the farmers are now looking for. Mr. Joe Steward, the veteran breeder of Poland Chinas at Ames, Iowa, is breeding this sort. A Homestead representative recently inspected the offering of boars of March and April farrow, sired by Gay Perfection 2d. These are a good lot and worthy of places in good herds. These boars are priced very reasonable, considering the present hog market. In order to move them quickly and make room for the breeding of the choice lot of gilts Mr. Steward has on hand, he will take \$25 each for these pigs while they last. Mr. Steward, in connection with the Iowa Agricultural College, has secured a splendid son of that great boar, Thickett, owned by Mr. Ed. Klever, of Bloomington, Ohio. This boar was selected at the Ohio State Fair, where he was a winner, by Mr. Wilson Rowe, who has charge of the swine department of the Iowa Agricultural College. Mr. Steward may be persuaded to part with a few choice gilts bred to this great boar a little later in the season. Fortunately indeed will be the man who secures a Gay Perfection 2d sow bred to this great boar above mentioned. There is probably no better judge of Poland Chinas in Amer-

ica than Mr. Wilson Rowe, and he stated to the writer that this was the best boar that he had been able to find anywhere in the United States that was for sale. Mr. Steward's announcement appears on page 37.

HOW ABOUT THAT BIG LUMBER BILL?

Homestead readers who have had anything to do with building material during the past few years are fully aware of the fact that in order to do a little building now that one needs a national bank behind them. How to escape the terrific prices charged by the lumber combine is the one perplexing question that confronts nearly every farmer who reads The Homestead. A means of escape from this condition of things is what directly interests them at this particular time. There is a way for every farmer to escape these high prices, at least in part. Wherever any fair-sized cottonwood, maple or other trees in artificial groves can be procured, or where some native timber is at hand, a good plan would be to either buy an American saw mill or get some man who owns a thrashing machine to buy one, and saw up a lot of dimension lumber from these native timbers. The writer of this article did this identical act some four years since, and instead of paying \$35 per thousand for dimension lumber secured better material from his own native trees at a cost of \$5 per thousand and we propose as a member of The Homestead staff to do more of this work this coming winter. The Cedar Rapids Machinery & Supply Co., of Cedar Rapids, Iowa, will furnish one of these American saw mills on very short notice and at a very low cost. They also have for sale air-cooled gasoline engines, traction and stationary engines, corn shellers, corn shredders and hay balers. They also repair all kinds of machinery of the above described character. Send for their catalog of saw mills and other commodities which will be mailed free.

DELMAR McCANN'S SHORT-HORN SALE.

The first annual sale of Mr. Delmar McCann, one of the younger breeders of Short-horn cattle in the state of Nebraska, will be held at the home farm, near Kennard, on Tuesday, November 27, 1906. He is selling forty-two head of imported, straight Scotch Canadian-bred and Scotch-topped cattle and he is putting some of the very best he has in this sale. There will be thirty females in the sale and of these fifteen will have calves at foot by his former Scotch herd bull, Red Bud 145102. Many of the heifers in the sale, and there are some very good ones, are sired by this same bull. While speaking of Red Bud it is only fair to say that he is now doing service in the herd of Messrs. Thos. Andrews & Son, of Cambridge, Neb., and this herd has the reputation of being one of the best in the West. Mr. McCann used him with much success in his herd and his calves will show for themselves on sale day. Among the best of the females that go into the sale is Imp. Flora 50th, a seven-year-old cow bred by Mr. Joseph Will, of Kintore, Scotland, and imported by Messrs. H. Cargill & Son, the well-known Canadian breeders. She is a daughter of Director 139622 and her dam is a daughter of the noted bull, Gravesend 98361. She is bred and safe in calf to his present Scotch bull and she is good enough to go into any herd in this country. It is with the greatest reluctance that he puts this cow into the sale, but concluded that as it is his first sale he was going to put something in that any of the boys could well afford to own. He also sells a number of Canadian-bred cows and heifers. Queens-town Maud is among the best of these. She is an 1,800-pound cow with calf at foot by Lord Rosenderry, a straight Scotch bull. She is a roan in color, a cow of wonderful depth and thickness and one of the best things in the sale. There are also several Canadian-bred heifers in the sale and among these are some exceptionally good ones. He also sells Caroline of Ploverdale 2d, a daughter of Baron Lavender out of an Imp. True Briton dam. She is a splendid red heifer and is safe in calf to a straight Scotch bull. There will be twelve young bulls in the sale. One of the best of these is Brawith Lad, a straight Scotch bull. He is only a yearling, but he will make a 2,500-pound bull. He is a son of Golden Lad, that formerly headed the herd of Mr. M. P. Hancher, of Rolfe, Iowa, and he is out of Imp. Rosemary 22th, one of the best cows in the Hancher herd. He is a roan in color and this is an opportunity for the man who wants a young Scotch bull to get one. The other bulls that go

in the sale will be sired by such well-known Scotch bulls as McDiarmid, Prince of Athens, Golden Lad and others. The offering will be a very good one and deserves the attendance and the patronage of our best breeders. His catalog is now ready for distribution. When writing for it address Mr. Delmar McCann, Kennard, Neb., and kindly mention The Homestead.

JOHN BROWN'S DISPERSION SALE.

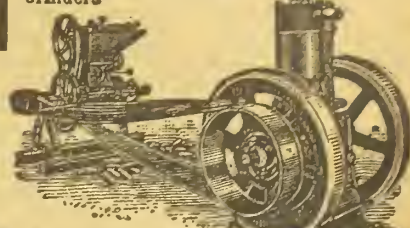

On November 19th, at the farm of Mr. John W. Brown, near Doniphan, Neb., will occur one of the good Short-horn sales of the fall. Mr. Brown is retiring from active farm service and therefore has decided to close out his entire herd, including his choicest breeding cows and herd bull, Golden Dale 246863, he by Parkdale Champion 172103 and out of Miss Maywood by Master Golden. This bull is coming two years old and will be sold in just good breeding condition. He is an exceptionally good individual of blocky type and is the sire of some of the calves to be sold in this sale, and most of the cows are bred to him. The cows are of good breeding and extra large. They are the cows Mr. Brown has selected for his own use and could not be bought except under the conditions mentioned. We consider this a wonderful opportunity to get good breeding stock, as you will have a chance to select anything in the herd. A good cow included in this offering is Lady Scott by Forest Boy and out of Artless 4th by Scotchman. She is a cow of great scale and substance and the best type of a useful Short-horn. Another of the good ones is Varina 7th by Royal Duke 2d and out of Varina 6th by Scottish Lord Jr., tracing to Imp. Victoria 20th. Here is going to be a good place to buy cattle and we trust that there will be a good attendance at the sale. They have issued a good catalog that every breeder and lover of good Short-horns should have at once. Doniphan is located on the St. Joe & G. I. between Hastings and Grand Island, and can be easily reached from either point. There will be free hotel accommodations and conveyance for all to and from the farm. Write for a catalog and arrange to attend the sale.

CHAS. NEFF'S CLOSING OUT SHORT-HORN SALE.

One of the opportunities of the season to buy good Short-horn cattle is at the closing out sale of Mr. Chas. Neff, of Walnut, Iowa, on November 26th. He has not the largest herd in the state, but he has one of the good herds. There will be forty head in the offering, including his splendid Scotch herd bull, Captain Lovely. Here is an excellent herd header for somebody. He is five years old and is a son of Imp. Scotchman, his dam being a daughter of Christmas Gift. He will weigh about 2,200 pounds, is a red in color, a deep-fleshed fellow, a splendid breeder and was sweepstakes winner at the Cass and Pottawattamie county fairs last year and this year also. Some of the best things that go into the sale are sired by him, and the man that wants a uniform breeding bull will find in him a splendid animal. There will also be sold a yearling bull in this sale called Royal Rosamond, a son of Imp. Craibstone, the former herd bull of Mr. C. W. McDermott. He is out of Rosamond Ashburn, one of the best Scotch cows in the herd, also included in the sale. This young bull is an exceptionally good one, both in point of breeding and individuality, and he was a first-prize winner wherever shown. He is the making of a good herd bull and you will not find as good a young bull in but few sales. One of the best Scotch heifers in the sale is Rosamond Lovely, a daughter of Captain Lovely and out of Rosamond of Ashburn. She has been in his show herd and is a nicely-turned heifer, and one that will be a credit to any herd. There will be two daughters of old Cumberland in the sale and they are good ones. One of these is Esther Cumberland, an 1,800-pound cow, a red roan, a show cow and a cow with a wonderful lot of style. Here is one of the best daughters of old Cumberland and we doubt if he ever sired a better one. The other is Cumberland's Pride, a Scotch-topped Victoria. Both of these are half sisters to the great show bull, Cumberland's Last, that now heads the Frank Lowden herd at Sinnissippi. Tidy Girl 2d is another 1,800-pound cow, a daughter of Imp. Gay Monarch and she is another one of the good individuals in the sale. Fourteen cows will have calves at foot by Captain Lovely and Royal Rosamond. There will be an ex-

THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, Kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

The O. S. KELLY WESTERN MFG. CO.
DEPT. B, IOWA CITY, IOWA.

The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeders today know that grain should be mixed with "roughness." The cob is the best mixture for calves and steers. The "Dean" Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2 1/2 inch slices and cuts from 30 to 40 bushels an hour. Calves thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

cellent lot of Scotch-topped cows in the sale, and taking the offering as a whole it contains more good things, individually and otherwise, than is generally found in one sale. His catalog will be interesting to Short-horn breeders, and especially those who want some good cattle. Write for it at once and mention The Homestead.

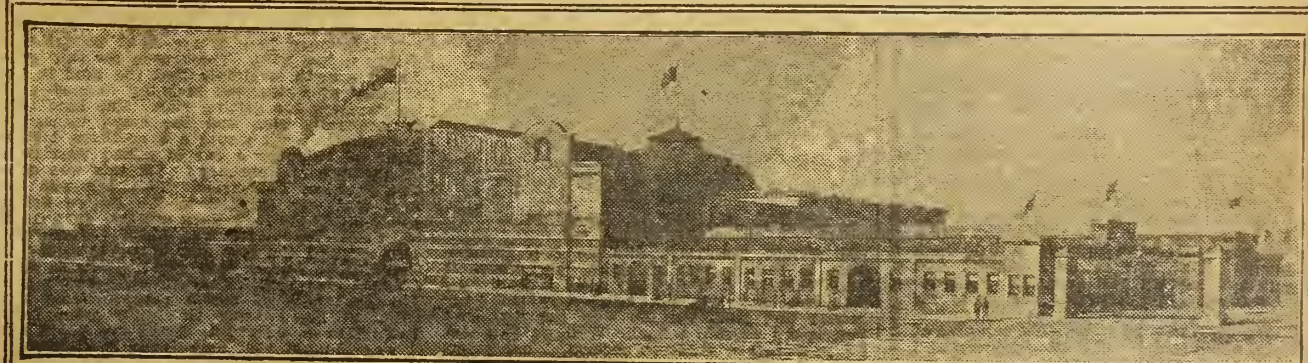

HALF INTEREST IN JUNIOR JIM SELLS FOR \$2,500.

Report has reached this office that a half interest in the sensational Duroc Jersey boar of the season, Junior Jim, has just been sold to Messrs. Manley & Co., of Lyons, Neb., to Mr. F. E. Garrett, of Lohrville, Iowa, and Messrs. John Tryon & Son, of Lyons, Neb., for \$2,500. Junior Jim was shown at the Iowa State Fair this year in the strongest class of aged boars ever seen at that fair and he got second prize. He was the sire of the pig that sold in the J. M. Morrison sale to Messrs. Geo. Briggs & Son for \$415, the highest price ever paid for a Duroc Jersey pig of his age. The dam of the pig was a Proud Advance sow, right in line with the strain that has produced so many of Messrs. Manley & Co.'s winners. Mr. Garrett will breed a number of Proud Advance sows to Jim, as will also Messrs. Tryon & Sons and Manley & Co., and the outcome will be eagerly looked forward to by the entire Duroc Jersey fraternity. This is in line with the chain of breeding that has enabled Messrs. Manley & Co. to produce Alix II., that topped the Renshaw sale, also Proud Lady, that topped their own sale at \$1,275, making her the highest-priced sow ever sold.

Horse Owners! Use GOMBAULT'S Caustic Balsam

A Safe, Speedy, and Positive Cure

The safest, Best BLISTER ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses and Cattle. SUPERSEDES ALL CAUTERY OR FIRING. Impossible to produce scar or blemish. Every bottle sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular. THE LAWRENCE-WILLIAMS CO., Cleveland, O.

Judging Amphitheater and Barns; International Live Stock Exposition, Chicago. The 1906 fair is held from Dec. 1st to 8th.

Alix II. was sired by Orion and she was by Proud Advance. In line with this same breeding they again produced Orion. He was sired by Orion and his dam was the great Kruger Maid, that was one of the sensational sows of her time. The Morrison pig had for a foundation such well-known sires as Orion, Dandelion and Long John that have done so much for the Manley herd. They have bred for a purpose and along certain lines, and the winners they have produced have been no accident. Sixteen sales last winter were topped by sows bred by Messrs. Manley & Co. and along the same line as mentioned above. The sale of a half interest in Junior Jim marks the high price paid for a Duroc Jersey boar this season, and Messrs. Manley & Co. are to be congratulated on their success, as well as the breeders who have purchased the half interest in this splendid boar.

WAYNE COUNTY SHORT-HORN AND POLAND CHINA SALE.

Two events come off at Corydon, Iowa, November 30, 1906. In the forenoon Mr. D. T. Harris, of Mystic, Iowa, will sell twenty-three head of Polands. Six boars and seventeen sows and gilts are offered. The herd boar is Orange Longfellow 109307 by Orange Chief 82233 by Chief Prince 3d 28013. He will be in the sale, as well as a number of his get. Others of the young stuff are sired by Sunshine Tom 317578 by Missouri Sunshine 27779. Four brood sows bred by Messrs. Winn & Mastin sired by Corrector, Perfect I Know, Lamplighter and Mischief Maker are in the sale and should make an attractive investment. All the hogs are in good, healthy condition and their breeding is the best. A comfortable place has been provided for the sale to be held. In the afternoon the cattle sale will take place. The offering comprises sixty head in all, selected with care by a committee, from the herds of seventeen breeders. Only good serviceable animals have been allowed to enter and all stock is registered or eligible for registry and guaranteed to be right. There will be a considerable number of young animals offered, so that it will be possible for purchasers to make up a carload. Among the fifteen bulls there is one herd bull, Sanspareil King, which has proved a good sire. Some of his get will be in the sale. There will also be a few cows with calves at foot. Many of the animals offered are from good milking families and should prove valuable additions to herds in which that characteristic is demanded. The following sires are represented in the sale with offspring. Choice Goods Jr., Sanspareil King, Victor of Evergreen Park, Imperial Victor, Scarlet Prince and others. The committee assures good treatment to all. Come to this sale and encourage the organization. Catalogs may be obtained from Mr. J. E. Crosby, of Corydon, Iowa. Kindly mention The Homestead when writing. Turn to page 33 for the advertisement.

DUROC SWINE—SHORT-HORN—POLLED DURHAM SALE.

Messrs. S. R. Quick & Sons, of Gosport, Ind., will make a reduction sale at their Golden Glen Farm, one mile from Gosport, November 23, 1906. It will be remembered that Messrs. Cunningham & Welch sell Short-horns the day before, Thursday, November 22d, at Martinsville, Ind., only fourteen miles from Gosport, which point can be reached that evening or next morning by the Indianapolis & Vincennes railway. Gosport is also on the Monon railway. The fifty Durocs of Messrs. Quick will sell before noon, as soon as trains are in, and cattle, forty-three head, in the afternoon, as is usual in cattle sales. Lunch at 12:30 o'clock. The Durocs consist of ten yearling boars, ten spring boars, thirty brood sows and gilts bred to one of the herd boars: Beat Him If You Can, son of Kan't Be Beat, sold for \$2,500, one-third interest in which boar cost Messrs. Quick \$1,000; Golden Glen Chief, son of Ohio Chief, sold for \$2,000; Quick's Perfection, son of Perfection, sold last month for \$531; Sure Winner Jr., and Golden Hustler, son of Go Forward and Wamsutta, the sow with five of her pigs that brought Mr. Watson \$599. No better offering of Durocs has been cataloged this year. The Short-horns and Polled Durhams are a careful selection of half the Quick herd—the best half from the view point of quality, breeding, flesh and general usefulness. The ten young bulls are all good and well bred. The special attractions are a yearling son of Imp. Best of Archers, an eight months' son of Imp. Golden Emperor, and a son of Royal Avalanche and Imp. Mountain Maid 17th. These are show calves. Other yearling bulls by Golden Archer are also well bred on their dam's side. The cows and heifers when old enough and not having young calves are bred to bulls mentioned above, Missie's Archer and the Double Standard Polled Durham two-

How we keep American Fence Standard of the World.

Eighty per cent of all wire fence sold is American Fence. It takes fifty thousand miles of fence every month to fill the American farmers' orders for American Fence. That's enough fence to go twice around the world every month.

That makes American Fence Standard of the World and keeps it the Standard.

Tell you why. We make back the cost of thousands of dollars spent in improvements in fence

making it and keeping it "Standard of the World."

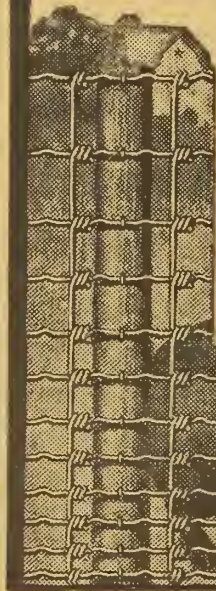

Better galvanizing makes American Fence last longer than ever—cost less per rod per year's wear.

That's why we have gone on making improvement after improvement in

AMERICAN FENCE

NOTE—I want to send you the combination key-ring, shown in the corner, with our compliments, as a continual reminder of American Fence. We register your name and number on our books, and return keys, without cost, if found and sent us.

FRANK BAACKES, Vice-Pres. and Gen. Sales Agt.
American Steel & Wire Co., Chicago, U. S. A.

Drop me a postal and tell me how much fence you will need this year. I will write you a personal letter about American Fence and send you this combination key-ring, screw-driver and bottle-opener.

3762
IF FOUND RETURN TO
AMERICAN STEEL & WIRE CO.
CHICAGO, AND RECEIVE REWARD.

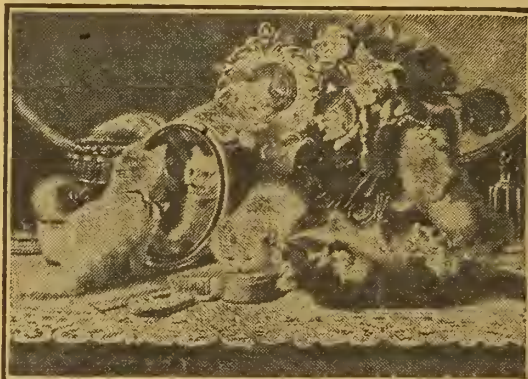

SENT TO YOU FREE

year-old bull, Cruickshank Secret, a richly Scotch-hred Polled Durham bull. He will also be sold, as he is related to many in the herd. He presents a great opportunity for a Polled Durham herd bull, being tried and not found wanting as a breeder or dehornor. Among the straight Scotch cows are Lady Missie, a daughter of St. Valentine; Princess Clipper and Imp. Mountain Maid 17th. The sale is made on eight months' time at 6 per cent. Send for catalog and investigate this offering.

AMERICAN AUCTION SCHOOL.

On December 17th, Col. Harry W. Graham, of Chillicothe, Mo., president of the American Auction School, will open the second term under the most favorable conditions. Graduates from the American Auction School report most favorably of the good done them through having taken a course, that they feel that no young man who contemplates entering the profession can afford to miss a term at the American Auction school. In addition to the testimonials which appear in the advertisement we here-with submit others from auctioneers who are making a success in their chosen profession: "Clarence, Mo., Sept. 1, 1905. Col. H. W. Graham, Chillicothe, Mo. My Dear Sir: It gives me great pleasure to speak a word in behalf of the American Auction School to any one thinking of taking such a course, and no one should think of entering the auction profession without taking a course in such a school. The four weeks' course gave me what it would have taken me four years to get in the open field. The good workers in all professions

FREE! "PLAYFUL KITTENS" FREE!

One of the cute kittens is looking into a hand mirror, another listens to the ticking of a clock, another is tasting of the cream, another catches the odor of the beautiful roses, while the fifth touches a glove, carrying out the actions of the Five Senses which the picture represents.

Rich in coloring, exquisite in execution, the original is one of the best animal-life paintings. Our reproduction is an exact duplicate in every tint and color. Sizes 15x20 inches.

OUR OFFER: Farm and Home, our 32 page national Farm and Family semi-monthly, now reaches over 400,000 homes. To introduce it into thousands of homes where it is not now taken, we will send you FARM AND HOME six months for only 20 cents (two dimes or ten 2-cent stamps). Further, if you will send us at the same time the name of one other person to whom we can send a free sample copy of FARM AND HOME, we will send you postpaid, this beautiful work of art.

MORE STILL You will also receive our beautiful Illustrated Premium List, containing over 200 useful articles and the most remarkable offers ever made. Agents wanted everywhere. Liberal commissions. Address, mentioning this paper FARM AND HOME, Marquette Building, Chicago, Ill.

Chillicothe, Mo. It is a grand institution and I can faithfully and conscientiously recommend it to the public as a thorough, practical and up-to-date school. Very respectfully, P. J. Hariff." Colonel Graham's catalog is ready for distribution. He is making special inducements for the December term and those of our readers who contemplate entering the profession should write Colonel Graham at once. See page 29 for advertisement and when writing, kindly mention this paper.

FALFURRIAS, IN THE GULF COAST COUNTRY OF TEXAS.

Men have called many spots on the earth the "Garden of Eden," but Roosevelt called Texas the "Garden of the Lord"—and it would seem that he was right. No state in the union produces such a number of different crops as Texas. No state is richer in agricultural possibilities. The northern man or woman who has not visited Texas and made a study of its soils and products has very little idea of conditions there, and especially of the wonderful change which has been brought about in the last ten years. There was a time, not many years ago, when Texas was one vast pasture. It is not so today. In southwest-Texas on the Arkansas Pass railway is located the town of Falfurrias—meaning "Hearts Delight." Two years ago this town had twenty-eight inhabitants. Today it has 1,500. The reason for this wonderful growth is simply that the land in the vicinity of Falfurrias is being farmed—and the farmers are getting rich. The land here is unusually rich and the crops unusually profitable. What would a northern farmer think of shipping a car of mixed vegetables on the 26th of February? Yet this was done this year at Falfurrias. This car was the first that was shipped in the United States and went to the New York market. The profit on these vegetables was \$1,600. Falfurrias also shipped the first car of watermelons in the United States this year. They were shipped May 25th. They brought \$400 a car. The first bale of cotton shipped from any point in the country this year went from Falfurrias on July 4th. Until two years ago it was thought that only lands in California worth \$500 to \$800 per acre could produce such fruits and products as winter vegetables, grapes, oranges, lemons, olives, dates, etc. But the building of railroads to southwest Texas has changed this and made this coun-

try the winter garden of the United States. It is nearer the great markets, has less frost and a more healthful climate than southern California. Thus this section has many advantages. Among the profitable crops here are alfalfa, which makes four or more cuttings per year. Cotton brings \$25 to \$45 per acre, and as the area of cotton land is very limited this is a great feature. Agricultural reports show that cotton land has had the greatest percentage of increase in value of any land during the past five years. The Falfurrias country also grows beans which net as high as \$200 per acre; watermelons which net an average of \$50 per acre. Among other crops which pay big are onions, beets, cabbage, carrots, cantaloupes, cauliflower, cucumbers, egg plant, Irish potatoes, sweet potatoes, grapes, blackberries, strawberries, figs, etc. Lemons, olives and bananas also do well. The Falfurrias Immigration Company, which have offices in Kansas City, have done wonders for this country. A large amount of land has been sold and put in cultivation. These lands sell at \$14 to \$25 per acre. Think of raising such crops on land bought at these prices. The lands are subdivided into tracts of 20, 40, 80, 160, 320 and 640 acres, and sold on extremely easy terms. The immigration company is composed of men who stand very high, are financially able and are willing to carry out the plans they have made to make Falfurrias the center of a great farming district, and they are making those who go to Falfurrias feel welcome and lending new-comers assistance in the true, whole-hearted southern style, for they realize that the success of their undertaking depends on the success of the individual who makes his home among them. They expended last year \$160,000 in platting of town sites, streets, parks and country roads, water works, long distance and local telephone, bank, mercantile company, lumber yard, newspaper plant, machine shops, saddle and harness factory, cotton gin, forty houses for laborers, and last but not least, \$15,000 for one of the most scientifically-cultivated demonstrations farms to teach new-comers to raise the most profitable crops. Read their advertisement on page 23.

LAST CALL FOR THE SADDLER BROS. & C. N. MOORE SHORT-HORN SALE.

One of the most important sales of Short-horn cattle that will take place this month is that of Messrs. Saddler Bros. and C. N. Moore, at Hastings, Neb., November 21st.

DIRECT FROM MILLS TO YOU

WE PAY THE FREIGHT

Have you ever stopped to consider when you buy a tin roof from your dealer, that you are charged three profits: first, the profit the jobber gets when he sells to the dealer; second, the dealer's profit on the tin; third, the dealer's profit on the tinner's labor?

But do you get a satisfactory roof even after you have paid the three profits and the job is completed? Or do you often have to send for the tinner again in a short time to patch up a leak?

BEACON-ITE is a long wave fibre roofing that you can buy direct from the mills, thereby saving the jobber's and dealer's profit. You put it on yourself and again cut down the expense. BEACON-ITE LONG LIFE ROOFING will never rot or rust.

We want to send you FREE samples of this roofing for your examination and also quote you mill prices. You'll be surprised at the quality and the price.

BEACON-ITE MILLS, 1105 N. 2nd Str., St. Louis

COL. HARRY W. GRAHAM.

can always get work, and the best foundation is to get started right. To whom it may concern I would say that if you contemplate entering the auction world your money and time will be well invested that you spend at this school. Wishing you and all your future students success, I am yours truly, E. J. Waterstrip." "Lamon, Iowa, Aug. 12, 1906. To whom it may concern: This is to certify that I take great pleasure in adding a few words of commendation in behalf of the American Auction School at

are putting up an extra good offering, composed of thirteen females and nineteen bulls of breeding age. The number and quality of the bull offering is such as will and should command the attention of good breeders, especially those who want bulls in numbers. The man who wants half a dozen or more bulls can easily get what he wants in this sale. We wish to call special attention to the roan yearling bull consigned by Mr. T. H. Saddle, No. 11 in catalog. This splendid young bull was bred by Mr. T. H. Saddle and is a bull of plenty of size and quality for one of his age and should be looked after by some breeder who wants a herd bull. There are other bulls in this sale that are good individuals and should be sought for by leading breeders. Among the females we find some extra good Scotch and Scotch-topped cows that have proven wonderful breeders and good milkers. We call special attention to Nos. 3, 4 and 12 in catalog, which will have good calves at foot. No. 4, Sally Betts 5th, has an extra fine heifer calf at foot which should be a good drawing card for this sale and the pair should command a good, long price. Another of the good ones consigned to this sale is Novius 5th by Sir Prince. This is certainly a great cow and one worthy of consideration on sale day. She has a good bull calf at foot and is the dam of other good ones in this herd. Betsy by old Sir Prince is another of the good ones and is a daughter of Sally Betts 5th, the cow that has proven herself a wonderful breeder and great benefit to this herd. This cow has a good heifer calf at foot and anyone looking for this class of stuff can make no mistake in buying any of the three cows mentioned. The offering from both parties is desirable in every way, as there are no old cows in the offering that have passed beyond their usefulness. It is not a culling out sale, but is simply an offering of the surplus young stock that they have bred on their farms for the purpose of selling to breeders. Catalogs can be had at this writing by addressing Mr. T. H. Saddle, of Hastings, Neb., and we trust that those in search of well-bred Short-horns with plenty of quality and size will not overlook this sale, as we consider it one of the good offerings of the season.

A GATE FOR \$4.50.

The day of the wood gate has passed. In the first place wood is so high in price that it no longer makes a cheap gate, and it never made a good gate. It rots, gets out of shape, pulls apart and it is never a thing of beauty. On the other hand metal gates stand the wear and tear of usage, they look neat, turn stock effectively and as they are light they do not sag out of shape. This is particularly true of the gate made by the Ward Fence Company, of Marion, Ind. It is twelve feet long, fifty-four inches high and it is made to last a life time. It will turn hogs, cattle, horses

and even poultry. Send for the free catalog if you are interested in gates. Address Ward Fence Company, Box 302, Marion, Ind.

A GOOD AUCTIONEERING SCHOOL.

The seventh term of the National School of Auctioneering and Oratory opens soon. Col. Carey M. Jones, an unusually strong auctioneer, is proprietor of the school. For years previous to the establishment of this institution Mr. Jones has been very successful in conducting live stock sales of the highest character. Being thoroughly posted on pedigrees of the leading beef breeds, he is well fitted to teach. Graduates of this school are selling pure-bred stock in eighteen states and in Canada. Those of our readers considering the advisability of learning the business should address the Jones School of Auctioneering and Oratory, 231 Ashland Boulevard, Chicago. Also refer to the advertisement on this page and kindly mention this paper when writing.

A WELL-IMPROVED COLORADO FARM.

Perhaps one of the finest and best built up half sections in the land of health and sunshine lies near Greeley, Colo. The buildings comprise a magnificent eight-room colonial house with all the modern conveniences. Surrounding is a thrifty orchard and a grove of valuable hard wood trees. Near by are the lodgings for help, also work shops and tool sheds. The outbuildings are large and well constructed, including barns, sheds, corals, root cellars and poultry house. On the west half is located the tenement houses and all other necessary buildings. The water rights on the farm are as good as any in the state, and the crops this year amount to 4,000 bushels oats, 5,000 sacks potatoes, 400 tons alfalfa, 600 bushels wheat, besides other small crops. Thus it is a general farm in an enviable location. Write to J. S. Flower & Co., Denver, Colo., for further description. Terms are easy and this is an investment worth looking into. When writing please refer to the advertisement on page 22.

LENTZ' CLOSING OUT DUROC JERSEY SALE.

On Tuesday, November 27th, at his farm near Earlham, Iowa, Mr. J. F. Lentz will close out his entire herd of Duroc Jersey hogs. This includes herd boars, brood sows, gilts and young boars. In fact everything goes, owing to his selling his farm. His present herd boar is Gold Bud 43791 by Golden Rule 14101, dam Our Pride II, third in class of sixty-six at St. Louis. He goes into the sale, also a lot of his get, and he will be bred to many of the sows to be sold. He is a big hog with lots of length and bone, and a breeder of a good lot of pigs. Some of the good spring gilts are sired by Lentz Red by Red Lad 16903, also one litter of three boars and four sows are sired by Addy's Top Notcher. These are out of a sow called Silver Lady by Surprise II, bought in the Harding sale. One of the best litters is sired by Lentz Red and out of a sow called Olive II, a granddaughter of Albinus. Topsy Pride, a daughter of Lentz Red, and her litter sister, Topsy Maid, both good sows, go in and no one will go wrong in buying either one of these. As this is a closing out sale, absolutely, there are going to be bargains here. Mr. Lentz has bought good foundation stock and he has a good crop of pigs, but the buyer gets the benefit of all in this sale. Breeders can well afford to attend this sale and pick up a few choice gilts for their brood sow sales and thereby make some easy money. Write Mr. Lentz at once for catalog and mention The Homestead.

A POWERFUL DISINFECTANT FOR THE FARM.

The value of a stock dip lies chiefly in its virtue as a disinfectant. What the farmer and the stock raiser desires, above all else, is to prevent disease—to keep it from becoming contagious and spreading to the unaffected animals on his farm and the farm of his neighbor. It is easier and much cheaper to prevent disease than to try to cure it when it has fastened its grip on your herds and flocks. We believe that in this day of advanced ideas and improved methods every farmer will agree with us that it is wise economy and highly satisfying to use a good disinfectant dip regularly. It is in truth a money-saving practice. The sanitary condition of barns, lots, food and water troughs, in fact, the entire surroundings has its influence on the general health of farm animals. Unsanitary surroundings breed diseases which cause an annual loss to stock raisers that is simply astounding and which might be prevented if proper conditions were maintained. As we said above, the value of the stock dip depends upon its virtue as a thorough disinfectant, so its virtue as a disinfectant depends entirely upon its purity and strength. A perfect disinfectant must be non-poisonous, non-corrosive and absolutely harmless to use. It must emulsify in water without leaving a sediment in the bottom of the solution and without throwing a scum to the top. We have such a dip in Hygeno, the strongest, most powerful disinfectant dip on the market. There are various compounds offered as dip, making a milky emulsion, which, in one respect are similar, but they all fall far short of equaling Hygeno in strength, purity and power, and none of them possess the positive disinfecting qualities, or have the healing, invigorating properties of Hygeno. This has been proven in every competitive test. Besides being a thorough disinfectant, Hygeno is a perfect germicide, parasiticide and a very useful antiseptic, practically furnishing the farmer a universal remedy, as well as a sure preventive for all known animal ailments. Readers of this paper, no matter whether they have a few or many head of stock, will find it worth their time and trouble to write the Hygeno Disinfectant Company, 582-588 Citizens Building, Cleveland, Ohio, for their catalog of the many practical uses to which Hygeno can be put. You will find this a valuable hand book on the care of all kinds of domestic animals. When you write kindly mention this paper and the book will be sent free.

SEND US THE ADDRESS OF YOUR FRIENDS IN NORTH DAKOTA.

THE Lafayette Stock Farm

LAFAYETTE, IND.

Largest importers in America of Oldenberg German Coach, Percheron and Belgian stallions and this no man can dispute. Our next importation of 1906 will arrive November 15th. We have won more blue ribbons in 1906 than all other importers combined.

At the great Illinois State Fair at Springfield we won, out of fourteen shows, twelve blue ribbons in the Percheron, Belgian and German Coach classes. We won the championship offered for the five best Percheron stallions owned by one firm and also the same championship offered for the best five Belgian stallions. We won the championship for best Belgian stallion and second, third and fourth in that class. At all other fairs we have done as well and we can show buyers more good, serviceable draft and coach stallions than ever before.

Our exhibition in 1906 at the great International will surprise the hundreds of thousands of visitors that will attend. We can and do sell our stallions as low as they can be sold at any place in America.

POLAND CHINA BOARS

WE have 20 March and April boars sired by R's Keep On, Iowa Chief and other noted boars. Long, growthy fellows, good colors, heavy boned, smooth as an apple and out of large, roomy sows. They weigh from 175 to 200 lbs. If you need more size in your herd, it will pay you to get one of these pigs. We guarantee our pigs as represented and always satisfy our customers. We cannot afford to send out a poor pig, as we are in the business to stay, and expect to supply our customers again in the future. Below is a copy of one of the many letters we receive from our customers:

DEAR SIRS:—We got the pigs Friday evening, the 2d, O. K. We are all well pleased with them. They are just as you said they were. Respectfully Yours,

Callender, Iowa.

All correspondence cheerfully answered.

More Concerning the Parsons, Stewart and Turner Sale of Short-horns.

The very important sale of Short-horn cattle to be held at Newton, Iowa, by Messrs. H. D. Parsons and Andy Stewart, on November 27th, is deserving of more than passing notice. This will be one of the very important sales of the season, and one of the last important events to take place in Short-horn circles prior to the international show at Chicago, December 1st to 8th. The offering made by Messrs. Parsons and Stewart is exceptional in many ways. It embraces, as has been before stated, almost the entire small herd of Scotch cattle owned by Mr. Andy Stewart, which includes ten females of the most royal Scotch breeding, all young and of the most useful ages. Everything offered by Mr. Stewart is of breeding age, and yet there are no old cows listed. The large percentage of Scotch cattle offered from the Malaka Farm of Mr. H. D. Parsons is made possible for two reasons: Mr. Parsons finds himself very short on farm help, and in addition to this, a local hail storm almost ruined his corn crop this season, which prevents his carrying these cattle over until spring, at which time he could reasonably expect to get a much better price for them. This is the occasion for throwing so many Scotch cattle on the market this fall. Something like thirty-four head of the entire offering of sixty head are Scotch. In the selection of the cattle for this sale, due care has been exercised to include only cattle that are breeders and are useful in every way. Nothing has been cataloged about which there is the slightest doubt. The cattle are in the pink of breeding condition and at this writing are still in the blue grass pastures. It has been the experience of these two gentlemen that cattle so handled were the most profitable to the buyer, and it has been on this line that their reputation for selling good values in Short-horns has been made. They hope thus to continue the same good name that has characterized all their undertakings in the past. Little need be said concerning the high standard of Messrs. H. D. Parsons and Andy Stewart. The writer of this article has been personally acquainted with Mr. Parsons and his operations at Malaka Farm for twenty years, and we have yet the first time to hear one word of complaint with regard to Mr. Parsons' methods of dealing with his customers. In fact, locally there is no man in Jasper county whose words stand higher than that of Mr. H. D. Parsons. The fact that Mr. Parsons has consented to take Mr. Stewart into a joint sale with him is the best evidence that Mr. Stewart is himself a man of this same type and character. In purchasing seed stock it is very essential that the pedigree of the man from whom the stock was purchased is as good as the pedigree of the animal. In this particular case, no men engaged in the business stand higher in the estimation of the public than these two gentlemen. High prices are not expected. Both participants to this sale will be contented if the public can but realize the high character of the cattle to be sold and will attend the sale and take these cattle at bargain prices. In the case of Mr. Parsons, the major portion of his offering has been bred and reared at Malaka Farm; hence, can be sold at whatever prices the public sees fit to place on them, and still leave a margin of profit on the right side of the ledger. With Mr. Stewart it is somewhat different. The ten Scotch Short-horn females that he is offering have been purchased at long prices. However, Mr. Stewart is a man of good, keen business judgment, and will be content with whatever values the breeders in attendance may see fit to place upon his contingent. Mr. Stewart, it will be remembered, closed out his herd some three years ago, or less, and has had to buy in Scotch cattle for the foundation of the present herd. But the old home farm on which he established this new herd has been sold and Mr. Stewart is not situated so that he can continue to keep so large a herd together. Hence, if these cattle do not bring even the purchase price, Mr. Stewart will simply pocket his loss gracefully as becomes the thorough business man that he is and conclude that he possibly exercised bad judgment in the values placed upon these purchases when made by himself. Included in this sale will be ten Scotch bulls, all of breeding age, among which are some herd leaders. Mr. Parsons has been noted for furnishing bulls of this character for many years. All told Mr. Parsons will contribute some thirty-four females and twenty bulls to this sale. The offering from start to finish is attractive in many ways, and for samples of the Scotch cattle we refer to the full page announcement in this issue of The Homestead, where representative Scotch pedigrees appear in full. Of course we can show but a small per cent of the many good Scotch cattle to be sold on a single page. However, the sample suffices as an indicator as to what may be found in the complete catalog, which, we are sorry to say, has not reached the writer at this time. In addition to the many good matured Scotch females, Mr. Parsons is offering the best bunch of richly-bred Scotch calves, almost a year old (heifers) that have ever left Malaka Farm, and in fact we do not recall when such a bunch of like ages has been offered by any breeder. With one or two exceptions it embraces the entire heifer crop of the year. For particulars address either of the above named gentlemen for catalog, and any other information relative to this sale. Free entertainment for all parties from a distance has been arranged for at the Churchill Hotel. Free lunch will be served in the pavilion on the fair ground at 12 o'clock noon, the sale commencing at 1:30 sharp. Liberal terms are offered in the way of settlement.

E. S. Turner's Sale of Short-horns.

On November 28th, the day following the big Scotch Short-horn sale of Messrs. H. D. Parsons and Andy Stewart, in the sale pavilion at Newton, Iowa, Mr. E. S. Turner, of Colfax, Iowa, will sell forty-eight head of Short-horn cattle in the same pavilion, and earnestly requests all breeders who attend the Parsons-Stewart sale to remain over the next day and buy bargains from his big draft sale. Mr. Turner will sell his herd bull, Red Victor, a splendid breeding bull bred by Mr. H. D. Parsons, sired by Victor Baron and out of Imp. Mable. This thick-bred bull was three years old in June and is a straight Scotch bull whose breeding, while

as rich as can be, is no better than his rare individual excellence. The calves from this bull are among the choicest to be found in any herd. He is a very uniform breeder of red calves of the same thick and desirable conformation as himself. Mr. Stewart is a modest gentleman who has been quietly breeding Short-horns for many years, his father having been in the business before him. And from the standpoint of practical business Short-horns, few herds can excel the one owned by Mr. Turner. The cows are largely of American sorts, but are of the proper type, are splendid milkers and very rapid breeders. They are Young Marys, Lanthas, Daisies, Carolines and Belinas. Mr. Turner's offering is principally the get of bulls bred by Mr. Parsons, coming through such good bulls as Rosemond by Duke of Oakland, whose second dam was Rosebud by Imp. Bandmaster, and the second dam by Imp. Master of the Mint, the third dam being by the best bull ever owned by that veteran breeder, Mr. J. G. Myers, of Kalona, Iowa. We refer to Mr. John W. Porter. The bull that preceded the above described animal was the Scotch bull, Idlewild Favorite. In reference to the rapidity of Mr. Stewart's cows in breeding, we will mention Hawthorne's Mazurka 5th, a cow that produced four living calves in less than twelve months, and no free martins among them, and this same cow is now safe in calf again. Another of this family is Hawthorne's Mazurka 2d, a splendid breeding cow included in the sale and the dam of the splendid bull that Mr. Turner sold some time ago to Mr. Christie, of Phoenix, Arizona. A splendid little block and a typical Short-horn is the red cow called Little Orange Blossom. She is fifteen-sixteenths Scotch and is about as breezy a looking proposition as one could well find. She has a splendid roan daughter one year old included in the sale, which bespeaks for her the honors above mentioned of being one of the greatest breeding cows in the offering. Mr. Turner has raised all of these cattle on his farm and is in position to take for them whatever the public sees fit to give him, without a murmur or a complaint. It certainly will afford buyers who desire a car load or more of useful breeding cattle to be present at this sale. Some fifteen to twenty calves will be sold with dams as one lot, and in many instances the cow bred again, which will give the buyer an opportunity of securing three head at the purchase price of one. These cattle will be at the fair grounds and on exhibition the day of the Parsons & Stewart sale, so that everyone interested can look them over and ascertain for themselves the character of the offering. For catalogs of the Turner sale, address Mr. E. S. Turner, Colfax, Iowa.

McLemore's Short-horn Dispersion.

A sale of Short-horn cattle that will and should attract the attention of every breeder in the cattle raising territory is the dispersion sale of Mr. W. M. McLemore, to be held at Anderson's sale barn, Seward, Neb., November 24th. These cattle are the product of several years' selecting among the leading herds of Iowa and Nebraska. Every animal to be sold in this sale was bought for the purpose of using in this grand herd, but as Mr. McLemore has disposed of his farm and having no place to keep a herd, he will offer to the breeders and farmers as grand a lot of cattle as has been put before the public this season. It will pay you, Mr. Farmer and Breeder, to come to this sale if you are in the market for some richly-bred Short-horns that have both scale and good milking qualities. This female offering we consider one of great excellence. Of the forty-three females in the sale, twenty-six of these grandly-bred cows will have calves at foot and the greater part of them are bred again to one of the three good Cruickshank bulls at the head of this herd. They are a richly-bred lot, twenty-two of them being descendants of Rose of Sharon and ten True Briton cows that should be sought for by leading breeders. It will be seen by looking over the catalog that the breeding is of the very best in well-established families. They show the Scotch type, the low-down, blocky type that are so much sought after and they will be in breeding condition, not overloaded with fat. One of the best families in the herd is the Rose of Sharon, and there will be

Thirty head will be sold; all but two are of my own breeding. They are of the Lancaster, Eliza and Scotch Rosemary families. Seventeen females will have calves at foot or will be well along in calf to Imp. Tillycairn. Eight heifers are just ready to breed. Imp. Tillycairn and four young bulls complete the offering. All are well bred and useful, raised under natural conditions. For fifteen years I have bred the Short-horn, using pure Scotch bulls and I regret that I must close out in order to care for my other business interests. Send for catalog; it tells the story.

FIRST ANNUAL SALE

OF IMPORTED, STRAIGHT SCOTCH,
CANADIAN BRED & SCOTCH-TOPPED

SHORT-HORNS

AT MY FARM NEAR

KENNARD, NEBRASKA,
TUESDAY, NOVEMBER
27, 1906.

42
HEAD

42
HEAD

HERE will be 42 head in the sale, 30 females and 12 bulls.

Fifteen cows will have calf at foot to my former Scotch bull Red Bud 145102. Imp. Flora 50th, a splendid red cow imported by Cargill & Son, will be included, also a number of Canadian-bred cows and heifers. There is a splendid bunch of Red Bud heifers in my sale, also a daughter of Baron Lavender, that is good enough for a show heifer, her dam being a daughter of Imp. True Briton. There will be an excellent lot of young bulls in the sale. One of these is Brawith Lad, a straight Scotch sired by Golden Lad, and is out of the great cow Imp. Rosemary 212th. This being my first annual sale, I am putting in some of my best cattle. I extend a cordial invitation to all breeders and farmers to attend my sale. Kennard is on the C. & N. W. R'y, six miles west of Blair, 25 miles northwest of Omaha, and 16 miles east of Fremont. Write for my catalog at once. Address,

DELMAR McCANN KENNARD, NEB.

Please mention Iowa Homestead
when writing.

GEO. P. BELLOW, Auct.

quite a number of these in the sale. They are all well topped out with excellent Scotch bulls, are invariably good milkers and have been excellent producers in Mr. McLemore's hands. In fact the calves at foot and those well along in calf will demonstrate the fact that they are a practical and money-making lot of Short-horns. One of the Scotch bulls referred to in the announcement is Royal Aberdeen, a pure Scotch bull one year old weighing a little over 1,000 pounds. He is an extraordinary good individual. He is a roan of the low-down, blocky type and is one of the best individuals that will be sold this fall.

International Sale of Aberdeen Angus.

The annual auction of Aberdeen Angus cattle under the auspices of the National Association has been an interesting and attractive feature to all admirers of this breed since the establishment of this show. It is the last great show of the year and numer-

ous champions and prize winners have been auctioned in these sales held in connection with the exposition. This year the sale will be held on Tuesday, December 4th, and there seems to be every prospect that the offering will be fully up to the standard of its predecessors. Leading breeders are consigning and quite a number of herd bulls and show animals of both sexes are cataloged. The consignors are Messrs. C. J. Off, Peoria, Ill.; D. Bradfute & Son, Cedarville, Ohio; Jacob Larue, Etna, Ill.; H. L. Cantine, Quimby, Iowa; Geo. Kitchen, Jr., Gower, Mo.; Lew Kerr, Newtown, Ind.; J. V. Arney, Leon, Iowa; W. N. Foster, Stone Bluff, Ind.; W. J. Miller, Newton, Iowa; M. A. Judy, Beecher, Ill.; McLachlan Bros. & Johnson, Estill, Mo.; J. B. Withers, Missouri City, Mo.; S. Melvin, Greenfield, Ill.; N. G. Daughmer, Douglas, Ill.; Maurer Bros., Boonville, Ind.; S. S. Kirkpatrick, New Richmond, Ind.; J. D. Hatch, Lancaster, Wis., and E. L. Salisbury, Shepherd, Mich. Catalog will be mailed upon application to Mr. W. C. McGavock, sale manager, Springfield, Ill.

BREEDERS SALE :::: 200 HORSES 200

Bloomington, Ill., Jan. 9-10-11, in Coliseum Wednesday and Thursday, Jan. 9-10, will sell 125 Registered Percherons, French Draft, Shires, Clydesdale Horses, Mares and Stallions.

These horses are consigned by the very oldest breeders in the state and out of the very best families and show herds that represent over 2,000 premiums to their credit. We don't claim to have all the prize winners of France, England or Scotland, but we do claim to sell you horses that were good enough to win at St. Louis, Springfield and other fairs in 1904-5-6. This will be one of the largest sales of pure-bred horses ever held in the state. These are the wide-as-a-wagon kind and a number of them will weigh over 2,000 pounds.

FRIDAY, JANUARY 11, WE WILL SELL 75 REGISTERED TROTTERS, GRADE DRAFT, COACH, ALL-PURPOSE AND SADDLE HORSES, STALLIONS, MARES AND GELDINGS FIT FOR THE MARKET.

This offering will consist of some of the very best bred ones in the state, and some with very fast mark, also a lot of gentlemen's drivers with several good matched teams and a lot of all-purpose horses. This will be a lot of very high-class horses, with a number of mares and geldings fit to ship to any market.

CONSIGNORS—Wm. Crownover, Hudson, Iowa; A. J. Dodson, Normal, Ill.; A. M. Storm & Son, New Lenox, Ill.; John C. Baker, Manhattan, Ill.; D. Augustin, Carlock, Ill.; Hurt & Reid, Arrowsmith, Ill.; Dillon Bros., Normal, Ill.; Wm. Ritter, Arrowsmith, Ill.; Walter Allen, Dunlap, Ill.; W. F. McTaggart, Pana, Ill.; Bloomington Horse Sale Company; Wm. Westmorland, Arrowsmith, Ill.; Frank McClure, Gibson City, Ill.; Mat Campbell, Bloomington, Ill.; M. G. Murray, Holder, Ill.; O. M. Welshir, Heyworth, Ill.; Chas. Boulware, Fletcher, Ill.; C. J. Raboin, Askum, Ill., and other consignors. Catalogs ready December 15th. Sale each day at 9 a. m.

C. W. Hurt, Mgr., Arrowsmith, Ill. Cols. John D. Snyder, D. L. Brown, Aucts.

Gudgell & Simpson to Sell Anxiety-Bred Herefords at South Omaha, Neb.

On Tuesday, November 27th, at South Omaha, Neb., Messrs. Gudgell & Simpson, of Independence, Mo., the founders and promoters of the Anxiety strains of Herefords, will make a draft sale of twenty young bulls and thirty two-year-old heifers, bred. This will be the third sale made by these gentlemen in thirty years. They have been connected with others in various sales, but in this sale every animal will be of Messrs. Gudgell & Simpson's breeding and every animal will be rich in the blood of Anxiety 4th. In writing an introductory for a former sale catalog Mr. Gudgell wrote at some length a preliminary from which we take the liberty of making quotations, as they will undoubtedly prove of value to all who buy and breed registered stock. These quotations further show much of the policy followed by these gentlemen in breeding what is today known as the modern type of Hereford. From Mr. Gudgell's preliminary:

"When I buy pedigreed cattle I want to know something of the pedigree of the breeder, as well as of the cattle," was a remark once made years ago in our hearing by a cattle raiser of large experience, who was credited with much shrewdness and a liberal share of this world's goods. The force of this remark struck us at the time it was made, and more than once has it recurred to us as laying down a line of policy that would be wise to pursue. As much wisdom is more or less universal, and as the same thought expressed in this remark may be present in the mind of everyone who purchases pedigreed stock, it occurs to us that it might be the part of wisdom, preliminary to the pedigrees of our cattle, to give a little information as to our pedigree, not exactly who we are personally, nor whence we came, but as to our connection with Hereford cattle. To such persons we will say that the foundation of our herd was laid near the close of the centennial year, by the purchase of a small car load of choice young Herefords from the then famous herd of the late F. W. Stone, of Canada. This was the first herd established in Missouri and the second west of the Mississippi river. In the years following additions were made. Some of the competent critics would admit of the good features of the short legs, thick flesh and good middles of the Herefords, yet all pounced unmercifully upon their heavy heads, large horns, and their thick, leathery necks as compared with these features in the Short-horn. Herefords were open to some criticism in the above mentioned features, and we thereupon resolved to make an effort to correct these defects. After seeing Anxiety 2238 (imported) at Chicago, on his arrival in this country, and being much impressed with his conformation, we were satisfied that the features so severely criticised in the Herefords could be very materially improved. In pursuance of this resolution we visited Herefordshire in the following summer of 1880 and brought over a shipment of near sixty head. This importation we followed with importations in 1881 and in 1882. These cattle, with the exception of some thirty bulls for use on a western ranch, were nearly all females selected for breeding and not speculative purposes. With the second importation came the now famous Anxiety 4th and North Pole, to which our herd is now so strongly indebted for its uniformly high quality, resulting mainly from a concentration and happy combination of the blood of these two bulls that were selected with the special object in view of improving the front and rear ends of our Herefords. After this third importation our herd settled down and devoted itself strictly to the observance of the scriptural injunction, 'be fruitful and multiply.' In the spring of 1879, we made an auction sale of Herefords at Kansas City, which was to the best of our information the first public sale of Herefords ever held west of the state of Ohio. In the fall of 1884 we, in connection with some other breeders, made another sale. The contingent from our herd brought an average price of about \$550. In this sale we sold the bulls, Beau Monde and Beau Real, both our breeding. The former sold for \$1,000 and the latter, then a year old, brought \$300. After our third importation in 1882 we found ourselves in possession of the two bulls, Anxiety 4th and North Pole, and quite a herd of good but miscellaneous-bred cows selected from the herds of some fifty different breeders and representing nearly as many different types and strains of breeding. How we proceeded to bring about some degree of order, or rather uniformity, out of this chaotic material is best shown by an examination of the pedigrees found in the catalog. Perhaps some who have not given a degree of study to the well-established principles that govern breeding for physical improvement, will at once say 'inbred' if a sire appears more than once in a pedigree, and from prejudice alone condemn the practice without any further consideration, although it should be patent to anyone that our operations in this direction have been conducted upon a very conservative scale. And yet inbreeding is the course that has been pursued by all breeders of improved live stock

who have effected any very marked improvement in their specialty. This is true of all the early improvers of Herefords, of the long horns, of the Short-horns, of the no horns and of every breed of domestic animals that has ever been improved, either in remote or modern times. To those who are well informed upon the subject of improved live stock breeding, these statements are but commonplace. These notes, however, are not intended for such persons, but on the contrary for prospective beginners in this line of business. Much more might be written by Mr. Gudgell on the methods pursued by this firm in breeding for the droop horn, the straight legs and the good round hams as seen on the Herefords of the present day. Certainly it must be the source of much satisfaction to see the long string of show animals that trace close up to bulls bred by themselves or that were bred by them and sold before they had been shown. In recent sales Messrs. Gudgell & Simpson bred animals, and animals rich in the blood of animals bred by them have been among the highest sellers. For their sale at Omaha they have selected an unusually choice lot of young things of both sexes, all animals that are just ready to start on a useful career as breeding stock. Among the bulls are herd headers, some of strong show yard character, and all the most useful and well-bred lot that has been offered in some time or will soon again be offered. The cows are all two-year-olds, are bred to their best herd bulls and are due to calve in the early spring and summer. No more profitable things are to be bought than heifers well along in calf and bred to such bulls as head the herd owned by Messrs. Gudgell & Simpson. The writer has never seen a more uniform lot of two-year-olds. They have scale, quality and the breezy appearance so necessary in a good breeding matron, and buyers who want something extra in the way of females for foundation herds or to fill in a herd should not miss this sale. To individualize on this offering would be going into such lengthy detail that we will simply say that there is not a poor animal in the offering. Every one will be found an animal of merit. The sale will be held at South Omaha, Neb., as per announcement on page 40. Write Messrs. Gudgell & Simpson for a catalog and arrange to be on hand.

A Neighborhood Experience.

For several years we have been inserting an advertisement for Messrs. Fleming Bros., of 210 Union Stock Yards, Chicago, Ill., advertising their fistula, poll evil, lump jaw, spavin and ring bone cures, and had occasion to call attention to their advertisement by publishing testimonials from those who have used their remedies. This week we wish to publish one written by Mr. N. E. Cate, of Northwood Ridge, N. H. He says: "I wish to tell you what your medicine did for my horse. It was a bad case and horsemen, in fact everybody who saw it, said it was no use to try to cure it. It was a fistula, and the horse was not worth a dollar, but I had faith enough to try your remedy and now the people who saw him before look with wonder. There is neither bunch, hollow nor scar on him. Mr. Kelley, who also wrote you, has cured his horse and that, too, was a bad case. Another man near me, Mr. Folsom, also used your remedy with success." The advertisement of Messrs. Fleming Bros. will be found on page 11 of this issue of The Homestead.

W. W. Brown's Dispersion Sale of Short-horns.

For over fifteen years Mr. W. W. Brown, of Weston, Mo., has bred Short-horn cattle, sparing neither time nor money in building his herd. It was never Mr. Brown's ambition to have a large herd, but he insisted on having a herd that was useful, a working herd and a herd that he could rely on to produce annually good crops of calves that under natural conditions would thrive, grow out good and be the source of profit. Early in his breeding operations Mr. Brown sought good Scotch sires, bought some good Scotch females and as a result he has today a herd that is practically all Scotch and a herd of practically his own breeding. Thirty head are cataloged and among these will be five bulls, seventeen cows and eight heifers just coming of breeding age. The leading attraction is the bull, Imp. Tillycairn 150069, a richly-bred Scotch bull with the Cruickshank strains predominating. The following history of Tillycairn is taken from the catalog: "He is what the Scotch breeders call 'a good doer,' a hearty feeder, with wonderful vitality and constitutional vigor. He was bred by Mr. W. M. Duthie, of Scotland, and imported in dam by Messrs. Hannah & Co., of Howard, Kan. While never highly fitted, he made quite a showing the fall of 1903; he won first in class at the Miami County, Kansas, fair; also stood at the head of herd that was first at the same fair. Was first in class at Ottawa, the Franklin County, Kansas, Fair, one of the largest and best fairs

14 COWS WITH CALVES AT FOOT
by my straight Scotch herd bull, CAPTAIN LOVELY, and also by the young Scotch bull, Royal Rosamond, winner of first prize wherever shown. I am selling my entire show herd, together with a grand good lot of well-bred Scotch and Scotch-topped cattle. Herd bulls and everything go, including a daughter of the celebrated show and breeding bull, Gay Monarch. Write for catalog, mentioning The Homestead.

CHAS. NEFF, - WALNUT, IOWA.
COL. GEO. P. BELLows, AUCTIONEER.

to be found in the West, as well as sweepstakes bull and heading the aged herd that was first. At Wichita, the Kansas State Fair, he was first in class, senior champion and grand champion bull, as well as heading the aged herd that was placed second. At Eldorado, in Butler county, Kansas, he was first in class, sweepstakes bull and headed the herd that was first grand champion of all beef breeds; at the Royal in Kansas City he was placed third in as good company as can be found anywhere. Had he been well fitted he would have proven a warm competitor for higher honors. In October, 1905, at the Bates County, Missouri, Fair, he was first in class and sweepstakes bull and headed the herd that was first. All considered, he is one of the best bulls in the United States. In sales held within the past six months daughters of Tillycairn have sold as high as \$500. Individually he is one of the evenly-balanced sort, a wonderfully strong-constituted bull, deep through the heart, well let down in flank and hams well to the hock. The writer knows few better-quartered bulls and the man wanting a deep red roan, a good handled and a fine-dispositioned bull will

find him in Tillycairn. Mr. Brown guarantees him in every way and all the cows will be either close to calving to his service or have calves at foot by him. The other bulls, four in number, are yearlings and just coming yearlings that were got by Mr. Brown's former herd bull, Pride Victor, a Cruickshank Victoria bull, that did excellent service in Mr. Brown's herd. Eight heifers just coming of breeding age are daughters of Pride Victor. These will be found desirable young things to buy. The cows are each and every one a regular breeder and a worker. All but one or two are reds and all show that they are the useful sort. They all descend from the Scotch Lancaster, Eliza and Rosemary families. Several are by the Norton-bred bull, Sir Charming 2d, that was got by Imp. Salamis; others are by Barmpton Bud, he by the Bellows-bred bull, Scottish King. Not an old, worn-out cow, a cripple or a non-breeder will be offered. The catalogs are ready and as the time is short we urge those of our readers who are interested in the Short-horn to write at once for one. See page 30 for advertisement and when writing kindly mention this paper.

BIG 2 DAYS' SALE OF SHORT-HORN CATTLE

AT NEWTON, IOWA, NOVEMBER 27TH AND 28TH.

ON NOV. 27, 1906,

At the Sale Pavilion at Newton, Iowa, We Will Offer for Sale
60 Head of Choicely Bred Short-horn Cattle

Consisting of thirty-four females and twenty bulls from H. D. Parsons' Malaka herd, twenty bulls and ten Scotch females from the well-known herd of Andy Stewart. Thirty-four head of the entire offering are Scotch cattle of the richest and most approved breeding. The remainder are richly Scotch-topped American sorts. This will be the greatest sale of Scotch Short-horns ever offered at the Newton sale pavilion and the choicest that will be offered in central Iowa this fall. Some choice Scotch herd bulls are in the offering. Apply for catalogs.

H. D. PARSONS OR ANDY STEWART.

NEWTON, IOWA.

COL. F. M. WOODS AND ASSISTANTS, AUCTIONEERS.

ON NOV. 28, 1906,

I WILL OFFER FOR SALE AT THE SALE PAVILION IN
NEWTON, IOWA, THE DAY FOLLOWING THE PARSONS
& STEWART SALE

48 Head Choice Scotch Topped Short-horn Cattle

I will offer forty-seven head of females and my Scotch herd bull, Red Victor. All the cows in the sale will either have calf at foot by him or be bred to him. Fifteen cows will be sold with calf at foot. Forty of my females are of breeding age and will either have calf at foot or be bred to Red Victor. Table back Short-horns that are great milkers is the class of cattle I am offering. My herd bull, Red Victor, is offered for sale. He is a straight Scotch bull, sired by Victor Baron 216682 and out of Imp. Mabel. My catalogs are ready for distribution and will be mailed by addressing me.

E. S. TURNER,

COLFAX, IOWA.

FIRST ANNUAL SALE

WAYNE COUNTY
SHORT-HORN
BREEDERS ASS'N.

CORYDON, IA., FRIDAY, NOVEMBER 30, 1906

HELD IN SALE BARN, 12:30 P. M.

15
MALES

45
FEMALES

This is the Association's first sale. It is to represent the best animals out of thirteen herds. The committee in charge of sale have allowed nothing but the best to be cataloged. All stock will be presented in just good breeding condition. The bulls are a good lot and have been grown under natural conditions. They are mostly Scotch-topped, with a few straight Scotch. All bulls are under two years with the exception of one herd bull Sanspareil King. The cows and heifers are of good breeding and offer a variety of blood lines. Those old enough will be bred or have calf at foot. Many of the aged cows will have produce in the sale. Some have pronounced milking qualities. The heifers are the largest part of the female offering and have been kept growing from birth. They will make good material for a foundation. The following sires are represented by get in the sale: Choice Goods, Junior, Sanspareil King, Victor of Evergreen Park, Imperial Victor, and Scarlet Prince, and others. All animals are registered and guaranteed to be as represented. The committee will assure you of good treatment. In the forenoon twenty-three head of Poland Chinas will be sold by Mr. D. T. Harris, Centerville, Iowa. Their breeding is representative of the best blood lines. The catalog includes both sales and may be obtained by writing

COMMITTEE:
J. E. CROSBY, H. E. MILLER,
I. G. DAVIS.

IMPORTED Shire, Belgian and Percheron stallions, \$1,000. Home bred draft stallions, \$250 to \$800. Hurt Bros., Osceola, Iowa.

CLOSING OUT

MY ENTIRE HERD OF DUROC JERSEYS

EARLHAM, IOWA, NOV. 27, 1906

Including my herd boar, GOLD BUD 43791, all my brood sows, spring gilts and spring boars. I have sold my farm and the entire herd must go.

22 SPRING GILTS, 8 FALL GILTS, 12 CHOICE BROOD
SOWS, THE REST SPRING AND FALL BOARS

I am offering a grand lot of spring and fall gilts and matured brood sows, and there are boars that are strictly all right. Everything must go, and there will certainly be bargains in my sale. Not an animal reserved. Write me for catalog at once. Address,

J. F. LENTZ,

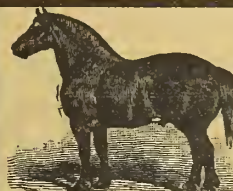

EARLHAM, IOWA.
COL. O. L. MOSSMAN, AUCTIONEER.

HORSES.

S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

My importation this year was composed of young stallions and mares that attracted the attention of all importers and lovers of fine horses. Prize winners in Paris are among the Percherons. Two coaches, one a two-time winner, are also in my barns. I have two-year-olds that weigh right at 1,900 pounds. No better strains are found in France. All are young, blacks, dark grays and bays. They are quartered at my barns at Kirksville, Mo., where I would be pleased to show them. If you need a stallion this year I am better prepared than ever before to sell you something extra and at a price that will save you money. By making my own selections in France, selling them myself and at the barn door enables me to do this. I can also sell you some fine mares. To the man wanting an absolutely first-class jack I will say that I have him well marked and big. Come to my barns and let me show you. I will treat you right every way. I can also sell you smooth-coated Fox Terriers, the rats' enemy. Priced at \$3 to \$7.50 each.

Kirksville is on the Wabash and Burlington railroads.

PERCHERONS FOR SALE.

IMPORTED and home bred stallions and mares one to seven years old; several match teams of mares. All stock registered in Percheron Society of America record. New importation arrived Oct. 10. Mansdum & Wheeler, Fairfield, Iowa

ROYAL BELGIAN STALLIONS

THE best and largest collection of imported and native bred BELGIAN DRAFT HORSES.

HORSES.

OLTMANN'S BROS.

LEER, GERMANY, - - - WATSEKA, ILLINOIS.

WE ARE THE PIONEER IMPORTERS OF THE
German Coach Horse.

...We are also Extensive Importers and Dealers in...

**Percheron and Belgian
Stallions.****Our Buying Facilities Unsurpassed.**

The senior member of our firm, Landschaftstrat O. V. Oltmanns, resides in the German Coach horse district and within four hours' ride of the Percheron and Belgian horse districts of France and Belgium and is ever on the lookout for the finest and best the Old Countries produce.

We buy better horses at less expenses than any other importer can possibly do and for that reason can give you a better horse for less money than you can buy elsewhere.

WRITE US FOR FULL PARTICULARS OR CALL AT OUR BARN.

OLTMANN'S BROS., - - - WATSEKA, ILLINOIS**TAYLOR & JONES,**WILLIAMSVILLE, ILLINOIS,
IMPORTERS AND BREEDERS OF**PERCHERON, SHIRE
AND BELGIAN STALLIONS.**WE ARE SELLING OUR STALLIONS DIRECT FROM OUR BARN AND
SELLING BETTER HORSES AT FROM \$700 TO \$1,400 THAN
ANY OTHER FIRM IN AMERICA.

We have a few sensational show horses that will come some higher, such as Arrowside Duke, first-prize aged stallion Illinois State Fairs 1905 and 1906 and at Chicago International.

Our new importation of horses has just arrived by special train from New York, including TATTON CHIEF, probably the best and highest-priced Shire that has crossed the ocean; the celebrated Percheron stallion, ADJUGE, and the great Belgian horse, MARTIN DU HAZOIR, with many other prize-winning Shires, Percherons and Belgians.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

Robert Burgess & Son, Wenona, Illinois.
Wichita, Kansas.**CHAMPION STALLION ILLINOIS STATE FAIR.
CHAMPION STALLION KANSAS STATE FAIR.
CHAMPION AMERICAN ROYAL KANSAS CITY.****SHIRE, PERCHERON,
BELGIAN and
HACKNEY STALLIONS****Good American Bred Stallions, \$800 to \$1000.****First Class Imported Stallions, \$1200 to \$1600. Choicest Stallions a Little Higher.****NOTICE**

Having concluded to make a change in placing Stallions before the Public account of the unsatisfactory business methods and transactions done in the Stallion trade to the Buyers as well as to the Sellers by the STALLION SALESMEN, we have concluded to sell our stud from the Barns. Our aim is to give our customers the entire benefit of the profits which have been going to the SALESMEN and to the helper assisting in placing the Stallion, who usually is one of your own neighbors (the most influential man of the neighborhood), and the great expense of placing the Stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the Stallion to the buyers or the companies from Two Thousand Five Hundred to Four Thousand Dollars.

The Quality of our Stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50 per cent. If it is necessary to arrange a company in your neighborhood in order to get a Stallion, form your own company and come to the barn and be convinced that you can save from \$1000.00 to \$1500.00. We ask all intending purchasers to visit our Stables, where we have over 300 head of Stallions to select from—SHIRE, PERCHERON, BELGIAN AND HACKNEY STALLIONS. Come to the barns and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the Stallion trade. Come to the barns and get the most reasonable terms that can be offered.

Send for catalog.

**W. A. LANG & CO., - - - GREELEY, DELAWARE COUNTY, IOWA.**
IMPORTERS AND DEALERS IN
**CLYDE, SHIRE, BELGIAN, PERCHERON, FRENCH DRAFT, GERMAN COACH
AND STANDARD BRED STALLIONS.**

We have always on hand a good selection of the above named breeds. We give the most liberal guarantee of any firm doing business. Our horses are all of the best in their class. Colors, all bays, blacks and dark grays. No old, worn out pickups. We make a specialty of organizing farm companies and know how to do it and give satisfaction. We can't sell you cheap ones for the reason that we don't handle them. Greeley is the great stallion center of Iowa where you can see more ton horses than any other place in America. Write

**PERCHERONS AND PERCHERONS
ONLY.****L. H. Humbert & Son, Corning, Ia.**

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

**PERCHERON IMPORTING
COMPANY, CHARITON, IOWA.**

YOU want an imported stallion of purest breeding. With a short back upbeaded, gentle and handsome. We have them. We pay the freight and return fare. We guarantee and insure every horse. We give you a square deal at a low price. OURS ARE THE BEST. NEW IMPORTATION IN AUGUST. Blacks and dark grays. On main line and branches of Burlington Route.

CHARITON, IOWA.

HORSES.

LAKEWOOD FARM**LAKEWOOD FARM PERCHERONS MADE A
RECORD NEVER BEFORE EQUALED IN AMERICA.****At Minnesota**

We won championship on stallion, championship on mare, and the grand sweepstakes prize open to all draft breeds on stallion showing four of his get, and grand sweepstakes on mare showing two of her produce. In addition we won the Percheron Society of America gold medals for champion stallion, champion mare, champion 3 mares and champion display of 5 American-bred Percherons.

**At Iowa**

We won sweepstakes on stallion and his get; grand display bred by exhibitor; Percheron Society of America Special for champion stallion a year; champion mare and champion group of 5 American-bred Percherons.

In addition to the foregoing specially mentioned prizes the Lakewood Stud won twenty-two other class and special premiums at these two greatest state fairs ever held—more prizes than fell to the lot of all other Percheron exhibitors combined.

230 PERCHERONS ON HAND; 100 STALLIONS, many of them show horses. Special prices during the fall months. Every stallion fully guaranteed. Send for new handsomely illustrated catalog.

**ANNUAL PERCHERON SALE AT SIOUX CITY,
DECEMBER 12 and 13, 1906****80 HEAD** of high-class Percherons at auction, consisting of young stallions ready for service, mares and fillies. Grand Dispersion Sale OF SCOTCH & SCOTCH-TOPPED

SHORT-HORNS

TO BE SOLD AT

DR. ANDERSON'S SALE BARN, SEWARD, NEB., SATURDAY, NOV. 24, 1906

**43 COWS &
HEIFERS
7-BULLS--7**

Twenty-six of these cows with calves by their side and most of them bred again to one of the three great Cruickshank bulls now at the head of this herd. This offering as a whole is considered to be one of the very best in the state this season and are worthy of the attention of the most discriminating buyers. They combine great beef and milking qualities that every breeder and farmer should be looking for. The bull offering is a very strong one in both breeding and individuality. Included in this sale will be the great Parsons-bred bull, Second Baron, sired by that noted sire, Baron Victor. Royal Aberdeen will also be sold and is no doubt one of the best yearlings that will be sold this year. Write for a catalog and mention The Homestead.

HENRY G. WARREN, INLAND, NEB.

SPECIAL RATES ON DUROC JERSEY BOARS.

FOR the next thirty days I will make a low rate on boars just to move them. Write quick if you want one.

J. E. WEHR, Portsmouth, Iowa

WOLF CREEK HERD OF DUROC JERSEYS.

Plenty good, strong pigs at prices well worth the money. Breeding unexcelled. Write to T. L. Livingston, Burchard, Neb.

DUROC Jerseys that weigh 175 to 200 lbs. Boars and gilts. Prices low, quality considered. Can ship from Iowa Falls. J. B. Fuller & Son, Alden, Ia.

DUROC JERSEY HOGS.

FORTY SPRING BOARS

sired by ORION CHIEF and KRUGER and out of dams by KAN'T BE BEAT, ORION CHIEF, CHIEF SURPRISE, COL. FINCH and other noted sires.

\$50 Buys boar related to Iowa and Illinois State Fair winner bred as above **\$50**

If you want an extra good spring boar, write
IRA JACKSON, TIPPECANOE CITY, OHIO.
Mention Homestead when writing.

TWO CHOICE OHIO CHIEF LITTERS FOR SALE.

70 Head of the Toppiest Duroc Jersey Pigs.

I AM offering for sale two very choice Ohio Chief litters out of a granddaughter of Echo King and Ak-Sar-Ben 4th. I also have pigs by Crimson Wonder Jr., Orion 2d and Leather Stockings, out of daughters and granddaughters of Nebraska Belle, Echo King and other noted sows and boars. I have the best blood lines known to the breed and I have a grand good lot of pigs. If you are looking for a herd header write or come and see me. I also breed Shire Horses and Aberdeen Angus Cattle. Young stock for sale at all times. Address

W. D. PITTMAN LAKE CITY, IOWA.

Prairie Glen Herd of Duroc Jerseys.

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. Good enough to head the good herds and do the breeder good. Sired by such boars as Al's Chief 43327 N, 15723 A, he by J. J.'s Chief 12445 A; first at Indiana state fair last year, a thousand-pound hog, he by Winchester Chief 10077, he by Morton's King 8725, Tientsin 17261. Imp. Wonder 43681, A. L. Advance 43331, Oubolt Chief 35271, a son of Perfection Chief 425 hog, Pleasant Hill Advance No. 44251, and other good sires; last, but not least, Ohio Chief, two sons of this great sire and show boar. Tientsin No. 17261 for sale, sire of some of my best. Satisfaction guaranteed. Come and inspect, or write me. Prices reasonable; quality best. Address,

P. S.—Eight November males of rare quality; three Top Notcher bred. A. L. MOSSMAN, TELEPHONE 11-3, RADCLIFFE, IA.

CRIMSON WONDER I AM 34697 Heads the American Herd

BOARS sold from this herd made sensational winnings at Des Moines this fall. I have boars now ready to go out that equal their illustrious relations in style and quality. If you are looking for a show boar or herd header, come and see me. Choice gilts also for sale. Will breed sows of quality and reputation to Crimson Wonder I Am for \$100 service fee. Address,

U. G. DAVIDSON, MANSON, IOWA.

CLOVER-WAVE DUROC JERSEYS.

GILTS in service. Red Orion 25793, by Orion 5393; dam Rose Bud 50188 by Jumbo Red 7973, a half brother to Ohio Chief. Belle's King II 4413, by Belle's King, a son of Echo King and Nebraska Belle. Dam of Belle's King II is Lou Dillon 109830 by Orion, dam Cherry Blossom II 50574 by Dandelion 12165. Duroc Standard 44117 by Duroc Paragon 29181, by King Perfection 16235; dam Paulina Queen II 84492, by Duroc Challenger 11163. We have 110 pigs mostly of March and April farrow, sired by these boars and others, and from as good a lot of sows as can be found in any herd. We are better prepared than ever before to furnish choice breeding stock. Visitors welcome at all times.

STOW & GINGRICH, HAMBURG, IOWA.

A CHOICE LOT OF PROUD ADVANCE PIGS.

I HAVE the best lot of Duroc pigs ever sired by Proud Advance. Also have pigs by Keep On It, the Iowa State Fair prize winner. A choice lot of pigs by other boars also. Don't overlook me if you want the best. Address,

GRANT WHITE, AFTON, IOWA.

LOW DOWN PRICES ON DUROC JERSEY BOARS

I AM now offering for sale 35 topdy spring boars, one September yearling that will weigh from 325 to 350 lbs., and some grand, good spring yearlings. My April boars will weigh 170 lbs. Good colors, plenty of length and lots of bone. Prices right for next 30 days. Address,

HARMON GRUVER, Brewster, Minn.

25 TOPPY DUROC JERSEY BOARS Sired BY GLENWOOD CRITIC 38579

ONE of the great show boars sired by the noted show winner and sire of winners, Glendale Chief. Prospective winners here for next year. Write at once.

A. W. LAMB, MONROE, NEB.

WON more prizes at Indiana and Ohio state fairs 1905 than any other Duroc herd.

J. D. NIDLINGER, DECATUR, INDIANA.

The "Nancy Herd" Durocs

Sow sale FEBRUARY 25, 1907. Pigs by Orion, Junior Jim, Critic's Echo. Inspection invited. 125 pigs. Write us.

W. A. STAPLES & SONS, GLIDDEN, IOWA.

WANETA DUROCS.

35 Choice Boars now for sale, both fall yearlings and spring boars. The "tops" at moderate prices.

B. A. SHAFER, SANBORN, IOWA.

DUROC JERSEY HOGS.

Buddy K. IV.

1ST prize aged Duroc boar and champion at Illinois State Fair, 1905, heads herd. I have an extra good lot of fall and spring boars for sale sired by this noted boar. High scoring Rhode Island Red cockerels for sale at reasonable prices. Write your wants.

ED. A. BAXTER,
PAWNEE, ILLINOIS

WHITE OAK HERD

OF Recorded Duroc Jersey Swine. We have a number of well selected males of March and April farrow, sired by Top Notcher Model 37663; he is the same breeding as Top Notcher Chief, that won first in class and first as grand champion at St. Louis in 1904. Our sows are the blood of Reed's Banker and Advance and Advance and Top Notcher Chief. Write, phone or come and see them. Satisfaction guaranteed. Prices way down for quality and breeding. We can ship over the C. R. I. & P. or Northwestern R. R.

J. W. Troy & Bros. Props., Rosehill, Mahaska Co., Ia.

ROYAL RUBY HERD OF DUROCS.

I NOW have a fine lot of spring boars for your inspection. They are sired by Osceola Chief, a very large, heavy bodied hog, also by Proud Perfection, one of the best sons of Perfection Chief, a state fair winner of 1905, also took 2d at St. Louis in 1904. Come and look them over and be convinced that they are fine. They have been closely culled and nothing but the best is for sale. Free delivery and entertainment. Telephone connections. Rural Route No. 2.

Gus A. Pederson, Ocheyedan, Iowa.

Duroc Jersey and Tamworth Boars

FOR SALE—We have a grand lot of Duroc and Tamworth boars for sale, every one of which is sired by a prize winner. Prices are always right. Address, Norrish & Bevington, Kingsley, Ia.

BOARS! BOARS! BOARS!

Will offer special prices on extra good Duroc pigs if taken at once. Pigs by ten leading sires including Ohio Chief, Higgin's Model, Morrison's Bell Top and others. Write me at once.

FRANK ALLDRITT, FRIEND, NEB.

40 TOPPY DUROC JERSEY BOARS 40

Sired by Junior Jim, 2d prize winner at Des Moines, Glendale Critic, 2d prize boar at Nebraska state fair, and Long Allox, litter brother to the sweepstakes sow Allox II. Good ones.

AUSTIN RENSCHAW, Blair, Neb.

Two Good Duroc Fall Males

LET, and spring boars for sale. Correct I know Jr 11629 at head of herd. S. L. Wyandotte and R. C. B. cockerels \$1 each. Inter-State phone.

F. Ebendorf, Strawberry Point, Ia.

Setting Sun Herd of Duroc Jerseys.

EXTRA big boars at living prices. Rhode Island Red Cockerels at \$1 each.

I. C. Welch, Bedford, Iowa.

CARL HANSEN, HERMAN, NEB.

HAS a choice lot of Duroc Jersey boars for sale, all sired by prize winners or sons of prize winners. Reasonable prices.

FAIRVIEW HERDS.

RED Polled cattle, Duroc swine. Will sell my herd in full expansion at a reasonable price. No swine for sale now. Spring sale February 13, 1907. J. B. Davis & Son, Fairview, Kan.

PLEASANT DALE STOCK FARM

GEO. F. DORSCH, Prop., Cook, Neb., Breeder of Duroc Jersey swine.

FOR SALE. My Duroc Herd Boar Crimson Model 41275 (half brother to Iowa Banker). Also some of his pigs from sows by Gay Advance 28775. L. L. Woods, Grinnell, Iowa.

THE Grendell Herd of Durocs contains the blood of the most popular families. F. H. Herring, Kalona, Iowa. Shipping point Iowa City.

FRANK IAMs

"Special Train" arrived August 14, 1906, carrying 120 "Peaches and Cream" Stallions. They are "Iams' kind," the "Best ever." Winners and "Sons of winners." \$1,000 and \$1,500 buys Imported "Topnotchers" of Iams. Watch "Iams' Smoke." He has his "Selling Clothes" on daily. No buyers with money or bankable notes get away from Iams. He buys, owns and sells more first-class draft and coach stallions than any man in U. S. "Whoa Bill"—Buy a stallion this fall—"Save \$200" and get choice of Iams' barns filled to the roof with

168 STALLIONS 168

Dad Iams' "Horse Show" at Iowa state fair, was "the talk" of "people and press." Everybody and cousins were admiring Iams' "Peaches and Cream" stallions. They said Iams "has the goods"—Better than he advertises. Iams Percheron stallion "Trallala" defeated the 1906 "Bibi" Percheron champion winner of France at Iowa state fair.

Mamma—Iams always has the best horses at Nebraska state fair. Iams' 2, 3 and 4-year-old Percheron and Belgian stallions won every first prize (bar one) and sweepstakes prize in both breeds (over all) and many second and third prizes. Iams' "Black Boys" are "Hot Stuff" for competitors; and Iams saves buyers all commissions and middlemen's profits. Iams is not in the "Stallion Trust."

\$1,000 SAVED AT IAMs \$1,000

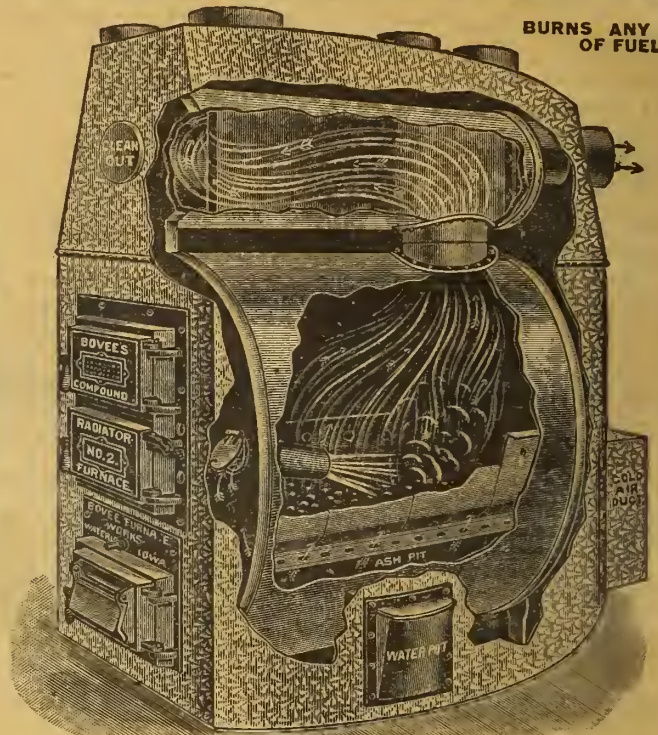

Ikey, what a rich graft these "slick stallion salesmen" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "Topnotchers" so good, big and cheap that they do not need to be peddled to be sold. Mr. Buyer, see Iams' stallions yourself. Take no "gold brick stallion salesmen's word." Iams has "the goods" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Xmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! buy a stallion of Iams. His \$1,200 stallions are much better than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from breeders, pays no buyers, salesmen or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a better stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by slick salesmen, or pay you \$100 for your rouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eyeopener and greatest horse catalog on earth. References: St. Paul State bank and Citizens National bank.

ST. PAUL, NEBRASKA.

HEAT YOUR HOUSE WITH Bovee's Compound Radiator Furnace

Store, Church or School House
BURNS ANY KIND OF FUEL

THOUSANDS IN USE

11 YEARS ON THE MARKET

HAVING BOVEE'S IMPROVED HOT BLAST VENTILATING SYSTEM AND RETURN CIRCULATING RADIATOR, which gives perfectly pure air and saves one-third of the fuel. Any handy man can properly install either of these furnaces with all connections in a short time. These furnaces absolutely make the best and most durable heating plant in use. Everything guaranteed to be first class. We can save you 40 per cent on the cost of your heating plant, our prices being but little more than good stoves. We have the largest and best line of furnaces in use, including our Celebrated Waterloo Furnace, complete, for \$43. Send for catalog.

WHOLE NO. 2575

THE PROBLEM OF WATERING HOGS IN WINTER.

If among all our subscribers there can be found one individual who has succeeded in securing a convenient, inexpensive and satisfactory way or means of watering hogs in winter, we shall be exceedingly pleased to hear from him. A method to meet the requirements must involve the use of warmed water, because we are convinced that if there is one thing more than another that will pay in handling hogs it is that of furnishing them with water from which the cold chill has been taken.

We do not have in mind a single instance where the problem of watering hogs in winter has been worked on by any of our experiment stations, and we are of the opinion that this would be a good line along which to experiment. A bunch of fattening hogs that have access to water with the chill off will drink ten or fifteen times a day, while if they have access only to cold water they will stand around and hesitate a good deal before drinking, because the hog is not a well protected animal and instinct teaches him that he should be cautious about taking a large amount of cold water into his system. It will make him shiver every time if he does, especially on a cold day. On the other hand, if water is heated to a temperature of 80 or 90 degrees a hog seems to relish it, no matter what the weather is.

What we desire at this time is to have the subject discussed, to have some of our posted subscribers give their views on the matter of heating water for hogs and give their plan by which this is supplied. We doubt if there is more than one reader in a hundred who does not keep some hogs, and therefore a subject of this kind appeals to all, for all are looking for light on it.

A little later the editor of this paper will give the plan that he has found to

work out satisfactorily, but in the meantime it has been thought best to solicit the views of others.

THE 1906 CORN CROP.

The 1906 corn crop is the largest ever raised, being within calling distance of the three billion dollar mark. The yield throughout the United States is estimated at 30.2 bushels, which is practically one bushel and a half more than last year and five bushels above the ten-year average.

In the seven largest corn producing states the crop is 55,000,000 bushels larger than it was in 1905. As the farm reserves of corn on November 1st, this year, amounted to 37,500,000 bushels more than a year ago, it means that there is now in the country something like 210,000,000 bushels more than last year, at the same date. This, no doubt, accounts for the three or four cents difference in the market in favor of 1905 as compared with 1906.

In spite of the fact that there is found in the hands of farmers 37,500,000 bushels more than last year, at the same time we believe there is another factor that does not enter into computation in the government's report. We refer to the amount that is used out of the crop before cribbing time. In our recollection we have never known feeding to start earlier and we have never seen a larger acreage fed, either in the form of snapped corn or foddering off, than was the case this year. Plenty of farms in the corn belt fed from 10 to 20 per cent of the crop before November 1st. Of course, in most of the cases this was utilized for hogs, the aim being as a general thing to fit hogs early for market this year on account of brisk prices. It may mean less consumption later, but we expect that the going into effect of the denatured alcohol bill will keep up the demand after the hogs are sent to market.

FUTURE PRICES OF FUEL ALCOHOL.

Since the passage of the denatured-alcohol bill by congress, a bill which becomes a law January 1, 1907, there has been considerable speculation over the probable price of alcohol after the law goes into effect.

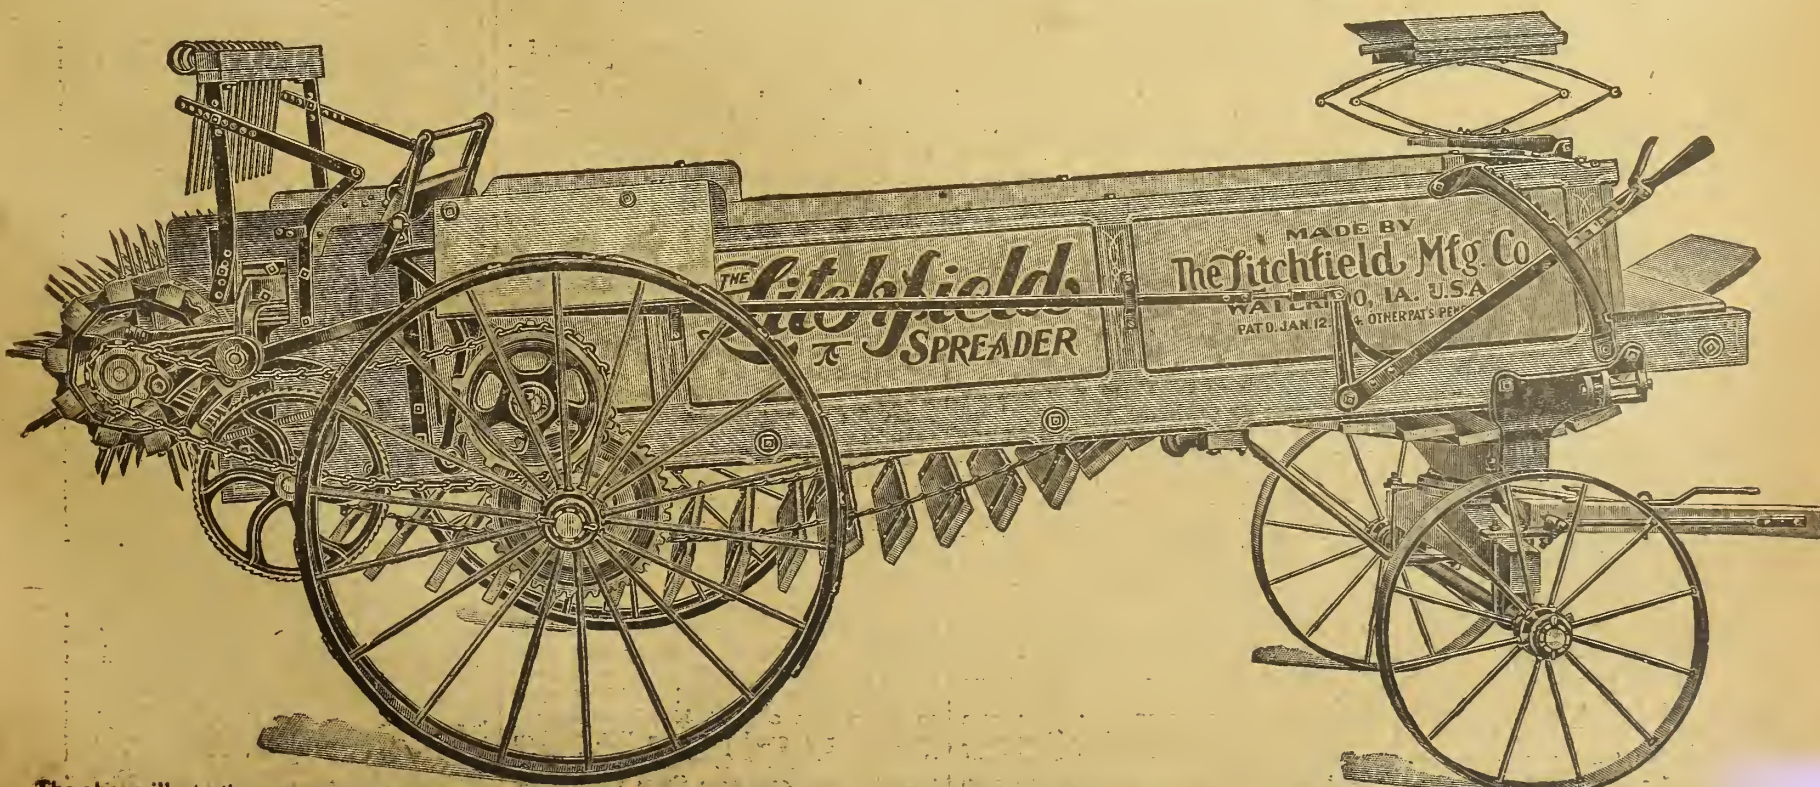

Alcohol may be made from nearly every crop grown in the Central West, but it is probable that only corn and possibly potatoes will be used for this purpose in the immediate future. The amount of alcohol that any substance will make depends upon the percentage of fermentable matter it contains. In the case of corn, this runs as high as 70 per cent. In other words, thirty-nine pounds of fermentable material is obtained from a bushel of corn. In turn, it takes two pounds of fermentable material to make one pound of alcohol. Consequently a bushel of corn will make about nineteen pounds of alcohol. The weight of a gallon of alcohol is seven pounds. Therefore, one bushel of corn will make 2.7 gallons of alcohol. At forty cents a bushel, therefore, the corn alone used in making 95 per cent industrial alcohol would cost practically fifteen cents. It is claimed that the cost of manufacturing, storage, etc., will amount to fifteen cents a gallon, and if to this be added the profits of the manufacturer and dealer, it is probable that alcohol will sell in the neighborhood of forty cents per gallon.

This takes no account of by-products that might result from manufacturing alcohol from corn. The protein of the corn is still unused and this is always valuable for feeding purposes. There are those who believe that the by-products will pay all the expenses of manufacturing, and that therefore the price of alcohol would simply be the value of the corn from which it is made and a reasonable profit to the dealer. On this basis, the value would be somewhere around twenty-five or thirty cents a gallon.

Potatoes contain from 15 to 20 per cent of fermentable matter, and a bushel of potatoes would therefore make about six pounds of alcohol. If the yield were 300 bushels per acre, there could be made from the crop 250 gallons of alcohol, which at thirty cents per gallon would amount to \$75. If it requires fifteen cents' worth of corn at forty cents per bushel to make a gallon of alcohol, farmers would have to sell their potatoes at fifteen cents a bushel in order to compete with corn in alcohol production—a state of affairs that will probably never be brought about in this country.

Rye contains a little over 70 per cent of fermentable matter and barley a trifle less. However, the yield per acre from these crops is such as to practically remove them as competitors with corn in the manufacture of alcohol. The whole matter is therefore simmered down to the question of converting corn into alcohol, and this to the farmers of the corn belt is highly significant. There will undoubtedly be a very substantial increase in the amount of alcohol used in the future and this practically amounts to the creation of a new market for those who raise corn. It is not unreasonable to suppose that the effect of the new law will be to permanently appreciate the value of corn. It looks now as though the day of twenty-five-cent corn has passed forever, and the man who owns and knows how to operate a piece of good corn land has something in his possession better than any stocks or bonds that are now on the market.

An Ohio farmer asserts that Nature has produced on his farm a combination of pumpkin and tomato with the result that while preserving their usual outside appearance, the pumpkins taste like tomatoes and the tomatoes like pumpkins. How are these misguided vegetables going to square themselves with the pure food commission?

The above illustration represents the very latest thing in the Litchfield Manure Spreader. This is the machine they have been talking to our readers about for nearly a year. It is made in our own state—at Waterloo, Iowa, and they have an interesting article concerning it this week on page 5.

NEW VS. OLD PROCESS OIL MEAL.

A Kansas subscriber sends the following communication:

I would like if you could tell me the difference between what is called new and old process oil meal. I have heard farmers in this locality talk about the matter, but when questioned they knew very little about these two products. Everybody here seems to favor the old process meal. Why is this?

This inquiry was submitted to the Minneapolis Linseed Oil Company, of Minneapolis, Minn., to which they sent the following reply:

In answering your question would say that old process oil meal derives its name from the fact that in this process the oil is extracted from the seed by hydraulic pressure, leaving the seed without the oil in long slabs or cakes. This is ground to produce the oil meal. In the new process the oil is extracted by grinding the seed and putting it in tanks and running raptha through it, and what is left is a new process oil meal. They claim for this process that they extract all of the oil from the seed. This of course would tend to make the meal of poor quality, also there is some odor of naphtha which is distasteful, if not injurious to cattle.

We understand there are but two new process factories in the country, one in Chicago and one at Cleveland, but we are not aware that either of them is in operation. It has been demonstrated that the old process meal is of much greater benefit as a feed. Think this is horn out from the fact that there are no new process mills operating at this time.

We find by referring to Professor Henry's "Feeds and Feeding" that there is very little difference in the composition of the new and old process oil meal. The old process, according to the analysis given by him, contains 32.9 per cent of protein, while the new process meal contains 33.2. This is so close as to practically amount to no difference whatever. However, there is a difference in the percentage of fat in the two meals, and this corresponds to the statement made in the letter quoted above written by the Minnesota Linseed Oil Company. The old process meal contains 8 per cent of fat, while the new process meal contains but 3 per cent of fat. With a slightly smaller percentage of protein and with twice as much fat, there is apparently some foundation for considering the old process meal superior.

PROGRAM FOR THE INTERNATIONAL EXPOSITION.

It is only a comparatively short time now until the International Live Stock Exposition will open in Chicago, the date being from December 1st to 8th. That, as we have frequently said, is the principal live stock exposition held in the United States; indeed, it is doubtful if a bigger or better is held on earth. The following program will be carried out in detail during the week:

CATTLE DEPARTMENT.

Saturday, December 1st—Students' judging contest.

Monday, December 3d, 9 a. m.—Students' own judging contest, pure-bred and grade bullocks, Short-horn breeding classes, college and experiment station fat, Clay, Robinson specials. Steers entered for the slaughter test must be placed in charge of committee Monday evening, December 3d. The hour for slaughter and for awarding prizes on dressed carcasses will be designated by committee in charge.

Tuesday, December 4th, 9 a. m.—Short-horn breeding classes continued, Hereford breeding classes, carloads feeding cattle, carloads fat cattle.

Wednesday, December 5th, 9 a. m.—Galleyway breeding classes, Hereford breeding classes continued.

Thursday, December 6th, 9 a. m.—Aberdeen Angus breeding classes, Red Polled breeding classes, Polled Durham breeding classes.

Friday, December 7th, 9 a. m.—Any unfinished judging.

SHEEP DEPARTMENT.

Saturday, December 1st—Students' judging contest.

Monday, December 3d, 9 a. m.—Pure-bred grade and cross-bred wethers, college sheep—Clay, Robinson specials. Fat sheep entered in slaughter test must be placed in the hands of the committee Monday evening, December 3d. Hour for slaughter and carcass judging will be designated by committee.

Tuesday, December 4th, 9 a. m.—Oxford and Cheviot breeding classes. P. M.—Shropshire and Dorset breeding classes, carloads native and range sheep.

Wednesday, December 5th, 9 a. m.—Shropshire and Leicester breeding classes. P. M.—Southdown and Lincoln breeding classes.

Thursday, December 6th, 9 a. m.—Hampshire and Cotswold breeding classes. P. M.—Rambouillet breeding classes.

SWINE DEPARTMENT.

Saturday, December 1st—Students' judging contest.

Monday, December 3d, 9 a. m.—Clay, Robinson specials; fat barrows, college classes; fat barrows, all classes. Swine entered for slaughter test must be placed in the hands of the committee Monday evening, December 3d. Hour for slaughter and judging carcasses will be designated by the committee.

Tuesday, December 4th, 9 a. m.—Barrow championship, carloads fat hogs.

HORSE DEPARTMENT.

Saturday, December 1st—Students' judging contest.

Monday, December 3d, 9 a. m.—Belgians, German Coachers. 8 p. m.—Draft gelding to halter—singles.

Tuesday, December 4th, 9 a. m.—Percherons, Hackneys. 8 p. m.—Draft geldings in harness—pairs.

Wednesday, December 5th, 9 a. m.—Clydes-

dales, French Coachers. 8 p. m.—Draft geldings in harness—three, ponies.
Thursday, December 6th, 9 a. m.—Shires. 8 p. m.—Draft geldings in harness—fours.
Friday, December 7th—Any unfinished draft or coach horse judging. 8 p. m.—Draft geldings in harness—sixes, ponies.

STORING DRIED SEED CORN.

A subscriber from Marathon, Iowa, sends the following communication:

I picked my seed corn and hung it up about two months ago. It is now quite firm and the question with me is whether to shell it now and put it in a warm place or leave it on the ear where it is hanging at present. Any information you can give me on this subject will be greatly appreciated.

This brings up a subject that interests every man who grows corn, and it may be said in the beginning that there is a very great difference in opinion among even good corn growers as to how corn should be handled after it has been dried out in the fall.

Many very successful men adopt the uniform practice of picking their seed corn some time in September and hanging it up in the manner described by this subscriber in a crib or in a thoroughly aired passageway and leaving it there until the following spring. Some time ago Mr. P. F. Mally, of Polk county, Iowa, gave his views along that line and stated that for twenty years he had never missed a stand, although his corn had never been stored in a warm room, but kept under cover in well aired places.

We like the practice of picking seed early, hanging it up and getting it thoroughly dried out before freezing weather, but then prefer to store it in a room in the house in an atmosphere that never gets cold enough to freeze. The seed is stored in racks in such a way so that no two ears touch, wire netting being placed on the back of the rack and a screen door on the front to keep out the mice. When corn is handled in this way there is absolutely no danger of its spoiling during the winter on account of the presence of heat, while on the other hand if it is left in cold quarters there may be times when it will absorb moisture in warm weather during the winter and when this is followed by a cold snap the germ may be to some extent injured.

Under no circumstances would we advise the shelling of this seed until within a very few weeks of the time it is required for planting. It has been found out by our experiment stations that seed corn deteriorates in its germinating ability very rapidly after it is shelled. If it came to the matter of choosing between the plan of leaving it on the ear hung in a corn crib, for example, or shelling it and placing it in a sack in a warm room, we believe we would rather leave it on the ear, though this is only an opinion and not based on scientific data.

Let us hear from others on this subject.

SALES AT THE INTERNATIONAL.

We desire to call attention to the fact that the pure-bred sales, held under the auspices of the various breeders' associations during the week of the International at Chicago, will take place outside the grounds in Dexter Park, reached by the Halstead and 43d street cars. All sheep sales will be held in the sheep show building on the ground, and all annual meetings to be held in the Pure-bred Record building can be reached from outside the grounds from Exchange avenue, the roads leading to the yards from Halstead street. This announcement is made by Mr. Skinner in order that all persons who do not desire to visit the show can attend the sales and also the annual meetings of the various associations.

The Best Time for Sows to Farrow.

To the Editor of The Homestead:

In a late issue of your paper you invite discussion on the above subject. I desire to say that I am partial to the early pig. Experience and observation have taught me that from the twentieth of February to the last of March is the best time for sows to farrow for the spring litters. These you can feed off before the weather gets so cold that it will take about all the corn they can eat to keep up the animal heat. And by feeding the sows oats, oil meal, etc., before as well as after farrowing, I have had just as good luck as at any other time.

Then you can raise another litter from the same sows that will be old enough to go through the next winter without any trouble and will be ready to ship the next June, before the weather gets

too hot. I am not favorable to winter feeding further than to keep the hogs in a thriving condition.

Marion county, Ia. J. M. Watkins.

This is certainly a very important and timely subject for discussion. The time cannot be fixed absolutely but must be governed by climatic conditions and environment. For illustration, if I lived in northern Iowa or in the Dakotas, or even where I now live (northwest Missouri) and failed or neglected to provide a good, dry, warm, comfortable hog shed for the sows to farrow in, I should consider it not only unprofitable but the height of folly to have sows farrow before the first day of May, as the chances would be that the pigs would die from exposure to cold, wet weather. Or, if they lived they would grow up into poor, sickly shoats that would hardly pay for their feed.

I would most emphatically endeavor to impress upon the hog raiser the importance of providing good, dry, warm places for their sows to farrow in, where the sunshine can be let in the whole length of the pen during the daytime and closed up at night. The pen should have a plank floor and be so well constructed as to keep out all snow and rain. Cold, wet, dusty nests for the farrowing sows have caused the death and disease of more pigs than any other one thing I know of during nearly forty years' experience in successful hog raising for the pork market.

If these conditions are strictly complied with it is possible to save the pigs at almost any season of the year, but I do not consider it very profitable to raise any large number of winter pigs, say a hundred or more, as it costs too much money and labor to make artificial conditions in winter which are equal to natural ones in summer.

It has been the uniform practice of the writer for many years to have the sows farrow on or about the last week in March or the first week in April, so they can be put into the October market weighing on an average of 200 pounds each in 210 days, or a gain of about one pound a day from farrowing time. I do not consider this a remarkable gain for any farmer to accomplish who understands the hog business. I have been successful by feeding a balanced ration, keeping the pigs healthy and growing their very best every day from farrowing time until the day they are placed upon the market.

In closing I need hardly remind the wide-awake, hustling hog raiser that the October market has averaged higher for the past ten years than in any other month of the year, and that his 200-pound shoats will top the market as breakfast bacon hogs.

Caldwell county, Mo.

Samuel E. Turner.

As you have asked for the different opinions of your readers as to which they liked best, February, March or April litters, I thought I would add my mite. I had some experience along that line and have decided on a plan which I think is the most profitable from the farmer's point of view.

I have no use for February litters, for the following reasons: It is so hard for the young pigs to keep warm that they pile up and get hurt; then they are housed up so closely that they don't get enough exercise and when they do get out it is usually cloudy and muddy and they catch cold. Their ears and tails come off, their beds are always wet and the sows do not suckle well. It takes a good deal of labor and expense to provide scitable houses, besides the feed and care, and you lose so many pigs that all of the profit is gone out of the business at the beginning. We all know that to make money out of hog raising for the market it isn't a question of how many hogs one raises but how good, how cheap and how quick.

I prefer my pigs to come in April when the sun is shining, birds singing and green grass growing. Then the mud will all be gone, the clouds flown away and the sows will give a full flow of milk, take exercise and the little pigs will stretch out on the warm ground and grow. There will be no thumps or tails gone now. Any sow that will raise four or five pigs in February will raise seven or eight in April.

Use nothing but good suckling sows so as to give a good, big, hustling, robust litter a good start in life. When the pigs are about four weeks old make them a creep and give them some little extra feed. Skimmed milk is good, but

1295 Portland-CUTTER

Can furnish cutters for \$12.95 and upward guaranteed equal to those retailed locally for \$10.00 to \$15.00 more than our price. Worth saving, isn't it? Send for Special Circular. MONTGOMERY WARD & CO.
Chicago and Kansas City.

if that is not available give some ground soaked corn, five parts, and tankage, one part. Feed little but often, say four times a day at least. Right here is the place they usually get stuck by feeding too much at a time and not often enough, causing the little pigs to eat too much and grow pot-bellied and get the scours. I say again feed little and often.

Let the sow wean the pigs herself. She will do this when the pigs are fifteen weeks old and they will weigh seventy or eighty pounds each.

Some will say that but one litter can be raised with a sow in that manner, but I say that it is better to raise one litter at a good profit than to raise two poor litters at a loss. A fall litter never did make me expenses. Pigs that will weight seventy-five or eighty pounds at weaning time or by August 1st can be made to grow very rapidly from that time on and will weigh 225 pounds in November and 300 pounds by January. By having the largest strains one can feed them until the market suits, whether it be November, January or March.

Sell the poorest half of the old brood sows and place them with spring gilts. In this way you will have good young brood sows. The older ones will weigh 500 pounds each and ten sows this size is no small item. There will only be one-half the number of old sows to keep over winter as there would have been if you attempted to raise two litters a year, and yet there would be as many pigs raised as if there were two litters if a sufficient number of young sows were kept.

Victor Wiley.

Moultrie county, Ill.

Shelling Corn Time.

Corn husking will soon be done. The cribs all over the corn belt are bulging to the limit. This means that there will be a great amount of corn to be shelled the coming winter. If you are in the business of shelling the golden cereal it will be a good idea to prepare for making some cash. Have a good machine to start with. There will be plenty of delays to put you back a week on the schedule without having any breakdowns. An accident of this kind is the most expensive thing one can suffer. Everything stops when the sheller stops but wages. Besides, delays are so aggravating to yourself and to the farmer. If the old machine has become untrusty, discard it. Let it remain where it is—maybe under cover, maybe not. At any rate start out with a good sheller. This will save you many kicks—and money. Such a machine may be bought of the Sandwich Manufacturing Company, 143 Main St., Sandwich, Ill. This machine has been the standard the world over for fifty years. Consult your local dealer or write direct to the firm, mentioning The Homestead.

SEND US THE ADDRESS OF YOUR FRIENDS IN NORTH DAKOTA.

Special rates from North Dakota up to the boundary line to points on the Minneapolis St. Louis R. R. and Iowa Central in Iowa and Illinois, on sale during November and December and good to return until April 15th. Send us your friends address and we will advise them fully. W. K. Adams, D. P. A.; D. B. Ransburg, C. P. A., 512 Walnut St., Des Moines, Iowa.

SPECIAL COLONIST RATES SOUTHWEST.

On the first and third Tuesdays of each month until March, 1907, inclusive, The Chicago Great Western Railway will sell one way colonist tickets to points in states of Arkansas, Colorado, Indian Territory, Kansas, Louisiana, Mexico, Missouri, Nebraska, New Mexico, Oklahoma, Texas and Wyoming at rate of one-half of regular first-class one way rate plus two dollars. For full information call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

ONE WAY SETTLERS' RATES.

To points in Nebraska, eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

Farm Furrows

Turned by a Practical Farmer.

The human race is fast being exterminated by the automobile race.

Alf Alford, who lives down at Alpha, Has raised a large crop of alfalfa; But those who would buy Find it's no use to try To get Alf's alfalfa at Alpha.

The draft horse is just now the popular horse and is in demand for city use at higher prices than any other stock.

It is not difficult for me to judge who knows most about bringing up the boys—the maiden aunt with her theory or the father with the sad fact of his past. The father was once a boy.

I have always regarded it a good plan to husk several rows all around the field before any snow or mud is visible. This plan renders it possible to turn at the ends without wasting any unhusked corn. Few men like to husk corn that has been run over by teams.

The secretary of agriculture has said that the corn cob is of no use to mankind. I am led to wonder how we could grow corn if we did not have a cob for it to grow on. What would our hired men do for cob pipes? How about the quick cob fire so common in every farm kitchen? I am afraid that our secretary has grown esthetic in that Washington environment. To repudiate the cob means abrogating the whole corn-producing system.

The practice of oiling the roads carried on in some localities provokes some criticism on account of the unpleasant odor and also the disagreeable sticky surface resulting. It is claimed by scientists that the Texas crude oil is better for oiling roads than the Pennsylvania product. The former has a paraffin base, while the latter has an asphaltum base, and it is claimed that a skim of asphaltum is deposited on the roads, which makes them much better.

One reason why it is difficult to get justice in our courts is because we are surfeited with laws that even a Philadelphia lawyer can't interpret. We need fewer laws and more justice. I am of the opinion that there is not a lawyer in the commonwealth of Iowa who can interpret all of her fence laws. Her fence laws have been made for each period, repealed, amended, revised, reinstated, improved and annulled until even smart men are puzzled to understand where we are at.

A German scientist claims to have discovered why grain lodges, and he believes it is possible to breed varieties that will not lodge. He says that in a normal or ideal stem the internodes from the lower to the upper increase in length and decrease in strength, according to a definite law, which gives to each internode the average length and strength of the one immediately below and the one immediately above it. Grain is said to lodge when the law of arithmetical average with reference to the internodes is distributed.

An oleomargarine fraud was recently discovered near a town in Indiana. A man in that locality was rapidly getting rich in operating a scheme contrary to the federal laws. He would purchase oleo in Louisville at nine cents per pound, bring it to his home and convert it into what appeared to be good country butter and he would take it back to Louisville and sell it to private customers at from twenty-five to thirty cents per pound. He had established routes in many parts of the city and was doing a big business.

Did you ever try to drive a ninety-pound shoat through a sixteen-foot gate? Of course you have, and you have had him stop before reaching the gate, turn about, meditate, hesitate, cogitate and finally the combined efforts of hired man and a dog can't put him through that gate. Then you have had the same pig approach the same gate when he was not wanted and you have slipped up along the fence in an attempt to head him off and—and—well, of course he got through first. It is presumed that the average hog is possessed of the spirit of divination. He can foretell what is go-

How You Can Test Standard Stock Food

Entirely at Our Risk

We want you to use Standard Stock Food this season whether we have a dealer in your town or not. Whether you deal with us direct, or with your dealer, we will take every particle of the risk of your being satisfied. If you are not or if the food does not do all we claim, then we will return every cent you have paid for it, and it shall cost you nothing. This paper stands behind this guaranty.

WE believe you will be fair with us. We want you to believe we will be fair with you—because we will.

Now if your dealer does not handle Standard Stock Food, we ask you to tell us and give us the privilege of making you our **DIRECT OFFER.** We will ship you the amount of food you need to make a thorough trial, and if it does not do everything we claim, we will refund every cent you have paid. If you are not fully satisfied, it shall not cost you anything.

Can you ask for a fairer offer.

Your animals are not like nature intended them to be; not like they would be under natural conditions. They are highly fed, quickly developed, and easy to get out of condition.

They need a little help from day to day—not medicine, or dope, or physic, but a condiment, a seasoning, to give variety to the feed ration, and make it taste better: a tonic to aid digestion and help get more nutrition out of the feed.

Your animals need a condiment, a flavoring, a seasoning just as you need salt and pepper, mustard and catsup, sauces and gravies, and various flavorings and seasonings to make your food taste better; to aid your digestion.

Standard Stock Food makes the ration taste better so your animals eat with a greater relish. It promotes the flow of all the digestive juices so that they digest their feed more quickly, more easily, and more thoroughly.

Its tonic properties put the entire system in that prime condition which means more thrift, better finish, and bigger profits.

We can prove the value and the superiority of Standard Stock Food so fully on every point that all we need is the opportunity.

So we put it straight and plain—take all the risk—don't ask any conditions—nothing but your word that you will use the food fairly, thoroughly and according to directions.

A dollar's worth of Standard Stock Food contains more feeds, will go farther, last longer and produce more and better results than a dollar's worth of any other stock food made whether it costs 5c or 15c a pound.

We know there is no question about Standard Stock Food paying you, and paying you big too. We have been making and testing it over 20 years. We have over 400,000 customers who have proved that it is the best condiment- tonic to mix with the feed ration that can be

**A Condiment-Tonic.
It Makes Stock Thrive.**

had at any price.

You take no risk. We guarantee absolutely and without conditions, that it shall cost you nothing if you are not satisfied with it. You know that this paper would not print this advertisement unless we always make our word good.

We refer you to your own Bank, or to any Bank or business house in Omaha for information as to our responsibility.

If We Have a Dealer In Your Town See Him; If Not, Write Today For Our Direct Offer.

Tell us how much stock you keep, and we will tell you how much Standard Stock Food you need for a fair trial. If you request it, we will send you a copy, **FREE**, of our fine stock book, **THE STANDARD FEEDER**, regular price 50c, 160 pages, 200 illustrations, chock full of valuable information on the feeding and care of all kinds of live stock.

STANDARD STOCK FOOD COMPANY, 1516 Howard St., Omaha, Neb.

ing to happen a good deal better than his owner.

Next to a shredder an old thrashing machine will put fodder in a good condition to feed. In fact some farmers claim that it is even better.

You've no doubt had a hog get contrary when loading in a wagon. Well, a very good way is to put an ordinary zinc basket over his head and he will back up to try to get his head out of it and by following him up with the basket he will be backed into the wagon before he knows it. Try it.

A neighbor recently said to me "I need another team but horses are so high that I can't afford to buy." I have been wondering what he would think if he had a good pair of horses to sell. He would be glad prices are high. It is easy to see why a farmer should be a seller of good horses rather than a buyer.

A beef club is usually composed of about fourteen members. A beef is cut into fourteen pieces, seven on a side. Each member of the club furnishes a beef, usually a two-year-old heifer. One man does all the killing and he gets the hide for his work. The pieces are cut by the butcher, weighed and numbered from one to fourteen. The members are numbered and at the start No. 1 gets piece No. 1 and the next time No. 1

gets piece No. 2, and by so doing all will eventually get the different parts of a beef. The heart, liver and tongue should go to the owner of the beef.

If I can't have at least ten tons of alfalfa hay in the barn I would like to have that quantity of good clover hay. Properly made clover hay is a good thing to have.

If a horse has the heaves feed less hay and more grain and water him before feeding. A horse with the heaves should not be worked hard for an hour after eating and too much should not be expected of him. Feed wet feed when it is convenient.

A dark soil absorbs the rays of the sun faster than the light soil and thus makes it warmer. This difference in temperature affects the germination and growth of plants. In the spring when the corn is coming up the rows are usually seen first in the dark soil.

A friend of mine owns a big peach ranch in southern Missouri. A great deal of the land is to farm crops and has not yet been set to peaches. He tells me that he began husking his corn the first of September and that he husked nine thousand bushels from 219 acres. That is a good yield and it is an early date to begin husking. He tells me that the one great enemy in that locality is

Johnson grass. It is everywhere present and is practically proof against eradication.

This is a year when the force of gravitation (or some other force) that draws all the large apples to the top of the barrel should fail to operate. There is certainly no need for the large apples getting only in the top of the barrel this year.

There is no longer any need of a screen door and if such are not taken down and stored in a dry place they can be made to answer for a storm door by covering them with building paper or some other material of a like nature. A door fixed in this way will answer the purpose but will not be a beauty.

Judging by the actions of some farmers one is inclined to the belief that the farmer is the only man who hunts competition. These men are regretting the decrease in the number of men engaged in farming. They would have an increase in the number and likewise an increase in competition. What is needed is an increase in the population of consumers and not producers of food. The amount of food is limited and is low enough in price. Farm values depend on the income from land. Income depends on the demand for food. That demand depends on the number of consumers.

THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

FALL PLOWING CORN-STALK GROUND.

The following communication has been received from a subscriber, Mr. C. E. Russell, of Warren county, Ill.:

In your issue of late date you have discussion on fall plowing stalk ground. Last fall (1905) I had five acres of corn in a field with oats. As I wished to fall plow all of this ground I gathered the corn the second week in October. I then turned my stock in and pastured the stalks closely. The 1st of November I took my double-row stalk cutter and cut the stalks, then hitched up to my gang plow. I set this to run from six to eight inches deep and plowed all the stalks under, doing a good job. This is a little deeper than I generally fall plow, but I could not do a good job and run the plow any shallower, as the stalks would drag and accumulate and finally throw the plow out. When I got ready to plant corn on this field this spring I disked it with a Clark double-action cut-away disk, cutting eight feet, then harrowed it down. The rest of this field was in oats in 1905 and was fall plowed in August. It was all treated alike in attention. This year I planted all to Leaming corn and it is yielding sixty-seven bushels per acre and seventy-five pounds per bushel. I can see no difference in the yield on the fall plowed oat stubble and on fall plowed corn land.

On the same subject another subscriber, Mr. Henry Lampe, writes:

I have had some experience in plowing corn stalk ground in the fall. I cut the stalks with a Deering corn binder, cutting the opposite way from which I shuck. By so doing the binder will pick up down rows to good advantage. I haul the bundles off with a hay rack. My rack is sixteen feet long and six and a half feet wide, the stringers of the rack tapering in front to sixteen inches. My wagon wheels are forty inches behind and thirty-four inches in front. I have corners in my rack made by a board across each end. As I haul the bundles I put a layer first from one side and then from the other until I get a good big load. The bundles are light. I then drive where I want the fodder and jump on the corner and dump the load. The load will fall off in a pretty nice rack. I then turn the rack back and am ready for another load. One man can clean off from twelve to fifteen acres a day with a good gentle team. The ground is then in fine shape to plow and the fodder is pretty good feed.

The yield referred to by Mr. Russell is nearly twice as large as is ordinarily obtained from corn-stalk land yielded as much as the fall-plowed oat stubble is significant. Every man who has attempted to plow his stalks under in the spring in preparation for corn knows that the yield is never as large as it is on adjoining fall plowing, providing the soil in each case is the same.

The plan suggested by Mr. Lampe is

GASOLINE ENGINE

WITH ELECTRIC IGNITION. Highest Grade Gasoline Engine, All Sizes up to 15-horse Power, at One-half What Others Ask and offered on 60 DAYS' FREE TRIAL.

FOR \$53.45 and up we furnish the highest grade, most efficient, most durable, least liable to get out of order, easiest handled, most reliable, simplest and safest gasoline engine made, fully covered by our binding guarantee. THE GREATEST POWER IN THE WORLD FOR ALL PURPOSES.

IN OUR NEW, Engine Catalogue, sent free on request, we illustrate and describe the greatest variety of vertical and horizontal gasoline engines, outfits, etc., the best and simplest made in the world, all sold on sixty days' free trial, on the most liberal terms and conditions, at the most wonderfully low prices ever heard of. If you can use power, don't fail to write and ask for our free Engine Catalogue today. We will send you a big book, postage paid, of engine information with price offers that will surprise you. Governor Warner, of Michigan, Talks:

Farmington, Mich., Aug. 25, 1906.
The "NEW WAY" Motor Company,
Gentlemen:—Answering your inquiry, I am pleased to advise that the 3 to 3½ H. P. "NEW WAY" AIR COOLED GASOLINE ENGINE which I purchased in April after careful investigation, to operate 6 Burrell Miling machines on the Huron County farm, owned by Cong. S. W. Smith and myself, is giving excellent satisfaction. The features of cooling the cylinder of the motor by air and without water will eliminate a source of trouble in filling and emptying water tanks in the winter, as well as the danger of water freezing and damaging the engine. It looks neat and is furnishing ample power.
Yours very truly, FRED. M. WARNER.

also a feasible one. Of course there is a waste of fodder in this case also. As said in a previous issue of this paper, if one could get the land plowed in the fall the yield of corn the following year will many times overpay for the loss of fodder.

Hog Cholera.

To the Editor of The Homestead:

Cholera is undoubtedly the worst scourge of the swine breeder. If all the chance of that dread disease could be completely eliminated, the problem of pork raising would be an easy road indeed. But there it remains, an ever present threat hanging over the breeders' head, and occasionally exacting heavy toll from the herd that in its sum constitutes a tremendous tax on the swine industry.

There are, however, precautions and preventives that, if strictly observed, will greatly diminish the ravages of this plague and with these the breeder and fattener should be thoroughly familiar. Let us enumerate some of these. Beware of a running stream of water that comes to you through a number of farms. It multiplies your risk by every preceding farm it traverses. Again, if there is no stock law and hogs are permitted to run at large, your risks are largely multiplied if your hogs are in fields adjoining the roads where they can touch noses with their wandering brethren through the fences. After the risks of foreign contagion we come to another class of preventives that call for equal vigilance on the part of the breeder. Do not keep large numbers of hogs in one herd. Divide up into different lots or fields. There is less risk in small bodies and if one be affected, the others are less exposed to immediate contact with the disease.

One of the most prolific sources of infection is the sleeping quarters. Look very carefully to them. Caution here is essential far more in the winter time than in the summer. In cold weather hogs will pile up for mutual warmth. Some of them become too warm and on the sudden rush at the call for breakfast, they run into the cold air with overheated bodies and pneumonia and other weakening diseases result. It should be the aim of the careful breeder to provide fairly warm quarters that are at last sheltered from cold winds. The hog is very sensitive to these but otherwise he will endure severe cold. Remember, however, that bodily heat saved is money saved. The hog must burn lard to keep warm and lard is expensive fuel. Beware of strawstacks. They are verily hotbeds of disease because the hogs become too warm there. So are manure piles. Give the hogs bedding but only enough to lie on—not enough to bury themselves in. They should not be allowed to mass together and get up smoking hot.

Next, observe cleanliness. From time to time burn the old bedding and give fresh straw. Once a week is not too often. Don't wait until it has been worn out. When you change the bedding take a hand sprayer or a sprinkling pot and disinfect all the sleeping quarters both earth and woodwork, with water into which you have put enough carbolic acid or coal tar products to make it smell strongly. Sprinkle the hogs themselves. If they are infested by lice, pour coal oil along their backs from nose to tail and rub some in their ears. It is a good skin tonic and won't hurt the hair in the least. I have used it for years. Finally diversify the feed. Hogs get tired of a monotonous diet like everything else in the animal world. Corn, of course, is the fattener, but it is a very one-sided ration and constipates. Give them enough shorts and bran to keep their blood cool and bowels free. Vary that with pumpkins and apples and house slop and soapsuds and later on cook turnips and beets and cull potatoes. Give them appetizers of charcoal, ashes and salt. Watch how they will crunch

THE MOST IMPORTANT FACTOR IN MAKING FARMING PROFITABLE

is your fanning mill. Don't it pay you then to get the best money can buy? What does the difference of a five or ten dollar bill make where hundreds and possibly thousands are at stake? Your whole profit of your farm lays in the way you treat your seed and grain.

your price, when the time comes to sell.
There is a machine on the market now, that will take every weed, every particle of foreign stuff out of your seed grain.
We can guarantee it, because we have tried it on the worst possible mixtures of dirty grain that a farmer can get. You would have been surprised to see how perfect and fast it cleaned. This machine is

The NEW SUPERIOR FANNING MILL

It has never been on the market before. It is a modern machine designed to separate, clean and grade modern seed and grain. For perfect work, capacity, and wide range of usefulness, no other grain cleaner or fanning mill can approach it. The "New Superior" is the product of twenty years of experience, thorough knowledge of grain, inventive genius and skilled workmanship. Its separating devices are unique and simple, and will perfectly separate, clean and grade any seed and grain, that is raised.

WILL YOU LET US PROVE IT, WITHOUT COST TO YOU?
Then write us and we will tell you how you can try this new, wonderful fanning mill in your own granary without the slightest cost or risk on your part. We will also give you full particulars and prices. Write today.

SAVE MONEY, TIME AND TROUBLE BY USING THE PURINTON FEED COOKER

QUICK and ECONOMICAL.

Look at the cut in the center and notice the construction of the Purinton Cooker.

There is little water just where there is the most heat, right above the coals. That's why the Purinton gets up steam quicker than any other cooker on the market.

Naturally, it's easier to bring a small volume of water to the boiling point than a larger volume. That saves you time and fuel.

SIMPLE and DURABLE.

There are no unnecessary parts to this cooker. It is absolutely safe, practically indestructible and is sold direct from our factory to you at a low price. Made in various capacities to suit all requirements.

Use wood, cobs, coal or anything burnable for fuel.

Double joint in pipe allows pipe to be put in a number of barrels around boiler without unscrewing.

Send For Catalog Today

CRESCENT FURNACE & FOUNDRY CO., 604 Madison Street, DES MOINES, IA.

up common stone if broken into small pieces.

With these preventives and safeguards that I have mentioned, the breeder need have but little fear of hog cholera. But if at last it does descend on you, don't lose your nerve and despair. Keep the center of infection as small as possible. Remove the sick animals to a small isolated pen and their exposed companions to some other spot. Feed only slop to both lots and disinfect daily—both hogs and quarters—with plenty of carbolic acid. Watch closely for further symptoms of the disease and at the first sign, remove the hog to the hospital lot. Keep the healthy herd as far from the sick as possible. As soon as one dies, bury or burn it. Don't leave it for the buzzards and other scavengers. They are liable to scatter the disease not only over your farm but over scores of others. Be careful that you do not carry germs on your own clothes or shoes to the healthy hogs. If compelled to handle the sick hogs, it is better to use a special pair of shoes and overalls.

Cape Girardeau, Mo.

L. R. Johnson.

The Week in Kansas.

To the Editor of The Homestead:

The nearer we get to the time when the almanac says winter, the better the weather. The "even tenor of the way" is still uninterrupted. It is still dry. It has tried to give us a small shower once or twice during the past week, but like all dry-weather showers, they were great bluff and no rain.

For the first time in several days we left the farm this week and drove a few miles away from home, to a sale. On the road we saw less corn husked than we expected to see. No one seemed in a hurry to get the corn cribbed. It has been fine weather so long, apparently, that the folks take it as a matter of course that the favorable weather will

last as long as they wish it to, so some are taking their time to do their fall work. Next week we may have mud half axle-deep or snow enough to make sleighing. There is no trusting the weather at this season of the year.

Some corn is being sold, but nothing like the amount that used to be marketed from the field. The people simply don't have to have the money, that's all. In this county the taxes are being paid as never before. Here, by paying all before the 20th of December, instead of half by this time and the other half on the first of June, we get a rebate of 5 per cent on the June half. Formerly few did this; now most everyone does. It is the exception to find the man who does not pay all at once. This is another straw which shows that the people are not pushed for ready money as in times past.

Considerable land has been changing hands this fall, with a probability of much more going to new owners before spring. Prices are from \$5 to \$10 an acre higher than a year ago. Farms that the owners really want to sell are getting scarcer than formerly. There was a time when any man would sell if he could get his price, but now many have no price—say they are satisfied to stay right here.

The weather this evening is more on the changeable order. Some are predicting a change soon, and expect to get in bad weather as much as we have received in good. This no man can tell. We only know that it has been the finest fall we have had in a long time, and for this we can be thankful, without worrying over the future. Henry Hatch.

Coffey Co., Kan., Nov. 15, 1906.

Complaint has become so urgent in Kansas about short-weight butter rolls that an investigation was instituted by the authorities. The little cubes of butter, like the sections of honey, grow smaller and smaller as the dealer and customer get away from the habit of weighing them.

A BABY BEEF PROBLEM.

BY W. J. KENNEDY, IOWA EXP. STATION.

A subscriber at Sioux Center, Iowa, sends the following communication:

We have forty-five head of yearling cattle on hand, almost all steers, which I intend to rough over this winter; that is, we have lots of hay and some corn fodder, and after the corn is out we will also have plenty of corn stalks. But we also have plenty of corn and some oats to put some of them, or the greater part on, and feed and finish up for market. Would it be a good plan to put twenty-five in the yard, and would they sell as baby beef when finished? They weigh a little over 600 pounds now. The youngest are about ten months old and the oldest about twenty months. Now, for baby beef, which should be put into the yard, the younger or the older ones? They are in fair condition and none of them are sucking calves. Would it be necessary to feed oil meal or anything of the kind because they are young? What is the ordinary price of baby beef in proportion to finished big steers? I would be obliged for any information. However, I might also add that we have ninety head of pigs which are all right now, though a number of farmers around here are losing many. As I understand it, there would be no money in feeding cattle without hogs. Would steers be better sellers than heifers the same as larger cattle? Would 1,100-pound finished steers of about two years of age be called baby beef?

Your subscriber presents a phase of the cattle feeding business which is puzzling many farmers at the present time. Taking everything into consideration, the writer would advise the selection of twenty or twenty-five head of the larger animals and putting them on feed at once. The remainder may be carried through the winter on the various kinds of roughage mentioned, but should also be fed a small allowance of corn and oats—say three pounds per animal per day. This will insure good growth and also keep the young things in fair flesh, two points which should never be lost sight of in the growing of cattle for beef production. When the grass season arrives they may be put on the grass lot and the grain ration continued, except that the oats may be omitted, the corn increased to three or four pounds, and from one to one and one-half pounds of cottonseed meal fed in addition. Continue this method of feeding until the new corn crop is ready, when snapped corn should be fed in liberal allowances so that the animals will be ready for the November or early December market.

The cattle which are put on feed should be fed some oil meal or cottonseed meal in addition to the corn and oat ration, unless alfalfa or clover hay is fed for roughage, in order to supply a sufficient amount of protein to cause growth as well as the laying on of flesh. At best these cattle will not be ready for market before the latter part of April or the first of May. These handy weight cattle sell right at the very top of the market, providing they are well finished. If they are not well finished they do not sell to advantage, as in many instances they are purchased by

feeders at prices which will warrant them to ship the cattle a hundred miles or so into the country to be fed sixty or ninety days before marketing them.

The term "baby beef" is usually applied to cattle, ranging in age from sixteen to twenty-two months, and varying in weight from one thousand to thirteen hundred pounds. In the production of this class of animals they are fed heavily from birth until ready for market. Sometimes they sell for higher prices than older and heavier cattle, while at other times they do not sell as well, depending very largely upon the market demands and the supply of the various kinds of cattle.

In this country the buyers will discriminate against heifers, but the difference is not so marked in baby beef animals as in the case of two-year-old and three-year-old cattle. The reason given for this discrimination is that heifers, as a rule, kill out more tallowy than do steers, and then the tendency for heifers to be in calf.

It is always more economical and profitable to have pigs follow feeding cattle, as otherwise there will be some waste of feed. Young cattle are less wasteful of their feed, however, than older animals. While one pig per steer is more than is necessary to take care of the waste, the majority of feeders use from one to two pigs per steer and follow the wise practice of feeding the pigs some additional food. By so doing the pigs make heavier gains, thus can be marketed at a much earlier age.

The writer's reason for advising the feeding of the heavier cattle first is that the younger animals will, as a rule, prove the most profitable to carry over until next fall, due to the extra amount of growth obtained.

The American Poland China Record Meeting.

To the Editor of The Homestead:

I wish to call attention to the meeting of the American Poland China Record Association, to be held during the International Live Stock Exposition, to be held during the International Live Stock Exposition, Thursday, December 6th. The meeting will be held in the Live Stock Record Building, which is the same building in which the secretary's office is located. The first session will be at 10 a. m. The business meeting will doubtless be completed by Thursday afternoon, in plenty of time for the Poland China banquet, which is to be held at the Transit House, Thursday night. Indications are that Poland China breeders will be present at the Record

sold like wild fire everywhere last year—its first year on the market. So much so that we were returning orders every day, unable to supply enough machines.

Indications are that we will have even a bigger trade this year, and that we will have to refuse many orders in the rush of the season.

But—to all who send us advance orders we guarantee to make shipment at time requested, until further notice.

in an agricultural implement.

Front truck takes the weight of frame and controls movement of harrow. Double levers make easy handling.

Doing away with the Tongue does away with all side draft—all neck weight—all crowding of team in short turns. Saves horses and turns quicker on the corner. Ball bearings take the end thrust.

Other specifications and points of superiority fully explained in our free catalog.

Let Us Quote You a Special Price on the Detroit Tongueless Disc Harrow

We sell direct to the user. We'll save you all the middleman's profits.

Our Harrows are not for sale by Dealers anywhere. Be sure to remember that. No dealer can sell you a Detroit Tongueless Disc Harrow.

We Allow 30 Days Field Test FREE

on every Harrow to prove that they are exactly as represented.

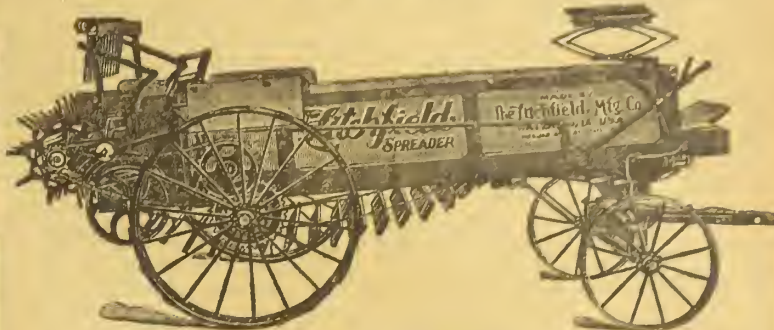

We pay all freight to your station. Write at once for our FREE hook and other valuable information.

Let us quote you a price on this Harrow. We give extra dating on advance orders.

The Detroit TONGUELESS Disc Harrow is the most valuable improvement of the age

American Harrow Co., 143 Hastings St., Detroit, Mich.

OUR GUARANTEE

The Value of a Five Year Contract.

THE WORD "guarantee" has been so much abused and so many times misused that the actual meaning of this naturally strong word is oftentimes questionable.

The lawful meaning of the word "guarantee" is, that the person or persons issuing such a guarantee become parties to a contract along with the parties receiving the guarantee and, included in this also, is the third person or the thing which is guaranteed and which becomes a part of the contract. When the Litchfield Spreader is guaranteed for five years against all flaws and defects either in workmanship, material or construction, this means something and becomes part of the value of this modern spreader. This is evidenced by an order from one of our customers the other day who specified that the machine should have our new style three-horse hitch and our five-year guarantee.

We are also reminded of a nice little poem sent us by one of our German customers over in Illinois, expressing his satisfaction of the Litchfield Spreader in rhyme, four lines of which we give:

"Don't I 'spread it' on dot Spreader!
Nottings like it you won't see.
It has got der 'Litchfield' name on
Und der Five Year Guarantee."

We certainly do not wish to sell the Litchfield Spreader on our guarantee alone, but we do want our customers to understand that a guarantee such as we give, has a value, a very emphatic value, and that if we did not have the quality in the Litchfield Spreader from the very vitals to every tip and point of the machine, we could not sell these spreaders to everybody and anybody under a contract of this kind. We don't ask our customers to pay us one dollar for our guarantee. It is simply given to show our trade that we stand firmly behind this, our 1907 Machine. This guarantee is not based on hopes for the future, but its foundation is on the record of this machine covering the past five years.
